Absolutely, Al. I was just jumping in because I see a lot of old experienced hams blaming the new ones for all the bad conduct. When I was a Novice in the summer of 1961 there were already lids and foul-mouths holding court. It is not a new phenomenon and human nature well ensure that it will never entirely go away.

Of course we see alot of the opposite happening also-the idea that the experience hams cause all of the problems, and the new hams are just saints. You are not allowed to ever constructly criticize, or correct when they are wrong, because that might run them off.

Actually, Dick, after I reread that post, I somehow had a feeling you'd take it the way you did. I didn't mean it that way, however. I was trying to be "hip" (what a terribly out-dated expression (much like me)) and "cool" with the "likes" and the "I mean,". Apparently I failed miserably!!!

No, I agree with you absolutely. When I was getting on the air, just a few years before you, there were lots of guys I would listen to but thankfully never emulated. And just the other day I was listening to a well-known left coaster who I have always thought was an absolute boor. On this occasion, talking to some friends, he was most pleasant and interesting to listen to. Every other time I have heard him, for more than 40 years, he was a blow-hard and particularly condescending.

And then there was that guy who'd call CQ and specify that he didn't want "no space cadets..." There were a few others, especially on both coasts, north and south of the border, who also had to lord over their contacts how much equipment, power and antennas they had -- and presumably money -- and made the rest of us feel pretty shoddy.

One of most my memorable contacts was with Windy Windom, W8GZ, back when I was still in short pants (like I am today). An incredible gentleman and, like my Elmer, one of the hams who had an incredible influence on me and my operating style.

When I first got on the air I made a complete fool of myself. I eventually learned through the good examples of those more experienced than I and the caring tutelage of a few wonderful Elmers. It is now up to us to provide the good examples and that gentle tutelage. Be a friend, not a cop.

There will always be a certain number of hams who will refuse to learn and will stagger down their own rocky paths, but there are more who will appreciate a hand reached out in friendship. I am reminded of one unrepentant Luddite in my own community who will never learn and doesn't want to. He happens to be an eighty-year-old Extra who has been a ham for decades. If no one else stands up, the new hams will only see and emulate him. We all have to get involved.

One final soapbox item: It is not only up to the new hams to seek us out, we need to seek them out. When a new ham does take the initiative to find one of our clubs and attend a meeting, seek them out, welcome and include them. Don't stand around in your OF cliques with your attitude of "Strangers Not Wanted." Training can't happen in a vacuum: you need students AND teachers.

OK, I'm done. :)

This is both a reply to Zack's comment above, and a bit of a rant, so after you read my reply to Zack, you might want to hit the Delete key...

Zack, I'm afraid I have to disagree with you regarding Field Day as a great way to introduce people to out hobby. Perhaps 25 or thirty years a go, when I was first licensed, that might have been true, but with the cacophony of sound coming out of the speakers today, I think that Field Day is more of a turn off to new hams than a turn-on.

Any introduction to operating for new hams should be done as a demonstration of how the hobby SHOULD be conducted, rather that the no-holds-barred dogfight we see on Field Day. I'm thinking of perhaps an evening display to a troop of Boy (or Girl) Scouts [yeah, or Guides!], or a club display at a fair or community event--especially if that event takes place on a weekend that does not coincide with a major contest.

End of reply...here begins the rant...

I draw your attention to the subject line of this post. The *initial* subject matter was a perfectly legitimate request for information, and it was, as usual, answered promptly and clearly. HOWEVER, the 'discussion' then degenerated into whether or not coinage can/should be sent via the mail [I think you'll find that the postal services of both the US and Canada frown on this practice], and then into the quality of the new recruits to our hobby, etc, etc; all without any regard to the original subject line! My second pet peeve with this particular message is that most folks did not find time to delete everything that went before. This is not only a major PITA, but is also against 'netiquette', and if I'm not mistaken, the general policy of this group.

I'm usually a pretty laid back guy, and I certainly don't start a rant at the drop of a hat, as some of my nearby friends have been known to do; and I'm certainly not as vituperative as some that I've seen here and on other lists, but every once in a while, the last straw lands, and

the camel's back is broken!

If you feel that you simply MUST reply to this, please do so directly, so as to not waste bandwidth on this list. My finger is poised over the Delete key! ;-)

There! That feels a lot better! Rant over. Thanks for your time & bandwidth.

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 05 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 186 Issued at 2200Z on 05 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 04/2100Z
to 05/2100Z: Solar activity increased to low levels. Region 1024
(S27W13) produced a C2/Sf flare at 05/0713Z, as well as frequent
B-class flares. Minor changes were observed in the region since its
rapid emergence yesterday. It retained a beta magnetic structure
with some polarity mixing evident in its intermediate spots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. There is also a chance for an isolated C-class flare from
Region 1024.
IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels throughout the forecast period (06 -
08 July).

Yahoo group: DX-IS (2009)
Date: 2009-07-06 03:59:33 UTC
From: Lee Jennings
Topic: 10155 Message: 10200

Many years ago NZ had a complete change of coins up to a dollar and then the bank notes took over up to $500. NZ never adopted a $1000 note. There have been several changes since, the latest a few years ago and we droped the 1c, 2c and 5c and the $1.00 and $2.00 notes in favour of two gold coloured coins. Many though the the world would come to an end. The treasury also shrunk the coins in size so the the 50c coin is about the same size as a US quarter.

The result has been less wear in you trouser pockets, smaller cost of making the coins and nothing selling for under 10 cents except in the supermarkets and big box stores where the till rounds up or down to the nearest 10c

The old coins were given 6 months to get out of ther sytem and they are worthless but collectors items. And speaking of that... I have an old Canadian "Shin Plaster" (20c note!) Maybe VE1AL could tell me how much they are worth :-)

I believe the "shin plaster" was worth 25 cents. At least that's what my late mother used to tell me! And of course she NEVER lied!

It's probably worth 25 cents today at the bank. Perhaps more to a collector. Likely useless in a store!

Hang it on the wall and enjoy!

I get a handful of NILs each year. The contact shows up in eQSL on my end but I have another call from within the same skip zone. For example I might work a VO1 and I get a request from a K1 on the same date/time/band/mode. I just uploaded 12 months of logs to eQSL and had a half dozen eCards I had to reject.

But it's certainly a bummer when it's something you really need confirmed.

☐

Here's one way that can happen:

After the contest the fellow generates the ADIF from his contest program, uploads to the eQSL & LoTW servers, and goes to bed.

The next day he forgets to import the contest log into his "daily" logging program. As time passes, he's less and less likely to catch the missing log.

Your QSL arrives in his mailbox. He checks his daily log. NIL. He does not make the connection.

If this was a 160m contest contact, you might suggest he also check his contest log.

Subject: [DX-IS] side note on qsl's

I did not get into reading tthe mail on the "green stamp" thread, but there was a lot of talk about bureos, lotw, directs, yada yada.....

One thing about qsling and being a member of a bureo that I have found interesting.....On occassion I will upload my log after contests to eqsl, for those who do like to use it. After uploading recently I looked at what matches might be there that really matched mine. A particual W* made a match, and I needed him real bad for 160 WAS. Took down the info, checked my log, and sent a qsl direct. Came back NIL. Wonder how we made a match?

Perhaps if you could scan it so I could get an idea of its condition, Lee, I will consult my coin catalogues and give you a ballpark estimate. I have a couple of them in my collection but neither of them is in great condition and are virtually worthless.

As you know, we don't have 2-cent coins in Canada, just 1-cent, 5-cent and 10-cent in the smaller denominations. There has been talk for years of getting rid of the pennies because it costs more to make them than they are worth. These days they seem to be thrown into "piggy banks" more than they are used in everyday commerce.

Subject: [DX-IS] Re: Green stamps for Canada and NZ Coins

Many years ago NZ had a complete change of coins up to a dollar and then the bank notes took over up to $500. NZ never adopted a $1000 note. There have been several changes since, the latest a few years ago and we droped the 1c, 2c and 5c and the $1.00 and $2.00 notes in favour of two gold coloured coins. Many though the the world would come to an end. The treasury also shrunk the coins in size so the the 50c coin is about the same size as a US quarter.

The result has been less wear in you trouser pockets, smaller cost of making the coins and nothing selling for under 10 cents except in the supermarkets and big box stores where the till rounds up or down to the nearest 10c

The old coins were given 6 months to get out of ther sytem and they are worthless but collectors items. And speaking of that... I have an old Canadian "Shin Plaster" (20c note!) Maybe VE1AL could tell me how much they are worth :-)

10205. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-06 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10205

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 06 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 187 Issued at 2200Z on 06 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 05/2100Z
to 06/2100Z: Solar activity was low. Region 1024 (S27W26) produced
an isolated C1/Sf flare at 06/1705Z. Region 1024 showed minor decay
with loss of some intermediate spots, but retained a mix of
polarities near region center.
IB. Solar Activity Forecast: Solar activity is expected to be very
low with a chance for an isolated C-class flare.
IIA. Geophysical Activity Summary 05/2100Z to 06/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels during days 1 - 2 (07 - 08 July).
Activity is expected to increase to quiet to unsettled levels on day
3 (09 July) due to an increase in solar wind velocities associated
with a favorably positioned coronal hole.
III. Event Probabilities 07 Jul-09 Jul
Class M 05/05/05
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 06 Jul 070
Predicted 07 Jul-09 Jul 070/070/070
90 Day Mean 06 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 05 Jul 004/006
Estimated Afr/Ap 06 Jul 003/005
Predicted Afr/Ap 07 Jul-09 Jul 005/005-005/005-007/008
VI. Geomagnetic Activity Probabilities 07 Jul-09 Jul
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/05
Major-severe storm 01/01/01

Subject: [moderatorcentral] Planned Outage: Wednesday, July 8

On Wednesday, July 8th we will be performing scheduled maintenance on the
Yahoo! Groups databases. During this time, some of you may not be able to
access your groups, and group mail will be delayed.

Maintenance should take roughly two hours, and will begin at 1pm PT (8pm
UTC- to determine what time the outage will take place in your neighborhood,
please visit this link:
http://www.timeanddate.com/worldclock/converter.html).

Once the maintenance has been completed, we will update the Yahoo! Groups
blog (http://www.ygroupsblog.com).

Thanks for your patience!

HI Alan
I was just being silly and reminiscing a bit. Don't really want to sell it of course. My Mom gave it me when I was a kid. I think it is a bit like all those things which show our "Canadian-ness" like Beavers, the maple leaf, maple syrup, ice and snow and all that stuff.

There are times when I struggle with identity having lived in two very similar, but vastly different cultures for each half of a lifetime. I guess that owning a shinplaster is part of that.

10208. Solar activity blues...

Yahoo group: DX-IS (2009)
Date: 2009-07-07 04:27:20 UTC
From: Lance Martin
Topic: 10208 Message: 10208

Hi Guys,

Every time I read the report from the 'Space Weather Prediction Centre'
I get disappointed.

There seems to be signs of activity on the sun but when I read Solar
activity Forecast, it says "Solar Activity is expected to be very
low..."

There is always a sigh....

I can't wait till the day I read the Solar Activity Forecast and it's
says "Solar Activity is expected to be very high, there are a bunch of
spots on the sun and you'd better get out there and work some DX, 10m is
open!!"

AH! The old Freiden rotary mechanical calculator ... I do remember ... sigh! Chunk, chunk, chunk, ... at 15 chunkc per second ... it's a wonder it didn't swallow its gears.

----- Original Message -----
From: Zack Widup
To: DX-IS@yahoogroups.com
Sent: Sunday, July 05, 2009 10:51 AM
Subject: Re: [DX-IS] Green stamps for Canada

I suspect you're right. I was first licensed in 1967. At the time, the older folks commented on the dumbing down of the exams because we no longer had to draw schematics of things on the exams. We still had to identify them and the components in them.

1967 is far enough back that you can notice a difference in things now. There are both positive and negative changes in ham radio since then. There was no internet back then and no personal computers. No calculators either - we did our work with slide rules and paper. Or if you were lucky you had one of those mechanical monster calculating machines or a hand-held Curta calculator (also mechanical - you turned a crank on top to do the calculations). [I'll bet most of those are in museums now!] So the advent of computers and advances in technology have improved things. We have radios now that can do things we didn't even dream of back in the 60's. We can design antennas on the computer and build them and they outperform what we had back then. Parts that didn't even exist in the 60's are now available and cheap for those who still build their own stuff.

But I think the hobby is now competing with the internet and other aspects of the technology for newcomers' attention. A very few see the true magic of radio. Most people who aren't hams don't get it and would rather spend their time on internet or with their X-boxes, etc. They have shorter attention spans and want exams that don't require much effort. I wonder how many people have gotten a license, think the only aspect of the hobby is 2m FM and give it up after a couple years?

I remember what got me hooked on ham radio - a teacher who taught a few of us ham radio classes after regular school hours in 8th grade had a few of us up to see his station one afternoon. Even let us say a few words to someone in a far away place into the mic. I was completely fascinated. Maybe that's what we need more of. Field Day is a great way to introduce people to our hobby. There were several people who visited our site this year. I had fun explaining things to some of them.

I think if the hobby dies it's only because we haven't continued this activity of showing people what it is and what it can do. Even in this high-tech world there's one thing you don't see every day - someone with a small dish on a tripod somewhere. I set my dish up in many locations along Lake Michicigan in Wisconsin as a rover in the 10 GHz contest for the last few years. I got quite an audience in many places. I thought it was great fun to show them what I was doing. Maybe one or two of them got their licenses. I can only hope.

73, Zack W9SZ

On Sun, Jul 5, 2009 at 6:57 AM, Deacon Dave <w1mce@...> wrote:

Dick answered your question regarding the 'quarter'. But, he ducked the comment regarding education. That's a very sore subject.

Ham radio education is in no better shape. Here in the USA some people who can't "speel" HAMM RAYDYIO can have the highest license [Extra Class] in just one day of cramming short term memory.

I used to teach Ham Radio Classes: 2 hours a night for 12 weeks to prepare for a Technician Class license. I did not teach Q&A! I taught basic theory and UNDERSTANDING! I used to insist on a basic 5 wpm CW proficiency, even though it's no longer a requirement, as a person's commitment to LEARN. [Lack of commitment leads to lack of dedication.] But, locally, getting your first license is almost guaranteed with a 4 hour Saturday morning class cramming Q&A followed by a VE session. I quit teaching!

Then, after the new licensee gets home I get a phone call asking me: "How long is a 1/2 wavelength dipole for 20 meters?" Or: "My new solid state linear just blew up! Why?" Or: "My VSWR is 1.5:1 and I can't get it down! Is that bad?"

Progressing up the ladder with a time in grade requirement does have much to recommend it. But, it doesn't sell 'raydyios'. And selling 'raydyios' has become the purpose of changing regulations!

Conclusion: Ham radio, in the USA, has been dumbed down [Lack of commitment leads to lack of dedication.] and is a dying technical interest.

Ah ha!

You have finally come out of the closet ... a back room currency collector in addition to an HR operator.

Hmmm?? I am known to have a small collection of old USA silver [Morgan] dollars and some commemorative silver in the family safe. But, being a pensioner severely limits my available cash for toys. I only own 4 HF radios, 2 linears, 4 antenna tuners, 3 two meter radios, and a complete "antique" station [HQ-145, DX-40 and VF-1, D-104] in perfect operating condition. Gets to be a little tough to find $$$ for REAL money.

Subject: RE: [DX-IS] Green stamps for Canada

As a Canadian who has dealt with coinage for $1 and $2 since their inception, I want to comment on two things.

In my travels, it has not been uncommon for me to collect as much as $20-25 in "change" in the run of a single day. This weighs heavily in one's pocket until it can be exchanged for bills. It is terribly inconvenient and the government, in it's wisdom, made both the "loonie" and the "twoonie" far larger and heavier than they ought to be.

Canada has also failed to produce enough 50-cent pieces for decades and while a limited number are minted annually, they are not now normally in circulation.

I have seen bills from some European countries which appear to be super-laminated and I suspect these would outlast the normal paper currency by several years.

It would certainly make it easier for Canadians to send cash with QSL requests if we had bills instead of a sickly coloured $1 coin and a ridiculously large and heavy and not attractive $2 coin.

And to top it off, I am particularly pleased when a "foreign" ham sends me a Canadian $1 bill with a QSL request. And the better the condition of the bill, the broader the smile on my face.

Subject: Re: [DX-IS] Green stamps for Canada

The USA government has much data to support the action of coinage. The service life of a coin can reach 50+ years, and is much less costly to produce. The service life of a GS is measured in terms of a few years and is more costly to produce. It makes great government cost saving sense to issue and USE coins. I use the various $1 coins at all my local merchants.
But government cost savings is anathema to government vested interest.

Canada got it right! A $1 and $2 coin makes lots of fiscal sense. Every week I pick up $25 in coins, one roll, and put the coins into circulation. ... OK I'm weird!

BTW: in USA history there was a great debate in the 1910s and 1920s regarding converting from coinage to paper money .. just a historical note.

Hello Gary,
Well the main problem with working PSK on one of these trips the guys that want to always send what we use to call their brag tape. When I am the DX I don't give a hoot about what your computer is or what rig and software you are using just a report is all I need.
I did work about 350 from 3DA0CF several years ago but it was hard to work the pileup with all the bragtapes going. I tried to advise everyone that only need my report and their report but almost everyone had to push that brag key on the key board.
I might put out a request and see if that will help.

10217. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-07 22:11:03 UTC
From: Paul Dunphy
Topic: 9721 Message: 10217

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 07 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 188 Issued at 2200Z on 07 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 06/2100Z
to 07/2100Z: Solar activity was very low. No x-ray flares were
observed during the past 24 hours. Region 1024 (S27W39) continued
to decay and activity from the region was significantly reduced.
The remainder of the disk was quiet and stable.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low with a slight chance for an isolated C-flare from Region
1024.
IIA. Geophysical Activity Summary 06/2100Z to 07/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on day one (8 July). An increase to quiet to
unsettled is expected for day two (9 July) due to possible coronal
hole effects. Conditions should be predominately quiet for day
three (10 July).
III. Event Probabilities 08 Jul-10 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 07 Jul 071
Predicted 08 Jul-10 Jul 070/070/070
90 Day Mean 07 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 06 Jul 003/004
Estimated Afr/Ap 07 Jul 004/005
Predicted Afr/Ap 08 Jul-10 Jul 005/005-007/008-005/007
VI. Geomagnetic Activity Probabilities 08 Jul-10 Jul
A. Middle Latitudes
Active 05/10/05
Minor storm 01/05/01
Major-severe storm 01/01/01
```

Good question Brian,
I don't have PSK63 or 125 on my laptop. That is why I don't use it.

From: Bill ZL3NB
Topic: 10145 Message: 10219

While agreeing with Cookie (Brian) that it would be nice to see some PSK63/125 on a Dxpedition I also have to say it should not be a priority as many operators on PSK do not have a basic clue as to working a Dxpedition and vice versa in some cases as most will use simplex and naturally as we all know....its just one big mess then. Besides RTTY is the main digi mode and most of us know what the protocol is with spreading out etc and its easier on the Dx station to control. For Dxcc purposes if you work it on RTTY why bother with the other digi modes.

But then again whatever turns you on...Thats ham radio!

From: Lance Martin
Topic: 10208 Message: 10221

Indeed!

Had a clear shot at TO8YY this morning on 20m RTTY, he was even calling CQ, but alas....

Oh well, who's going there next? I still need FJ on SSB and RTTY!

Subject: Re: [DX-IS] Solar activity blues...

Yeah, it's still pretty disappointing. At least one sunspot is being seen now and then and they are stated as part of the new cycle. Where are the Palos Verdes Sundancers?

On Mon, Jul 6, 2009 at 11:27 PM, Lance Martin <lance.martin@...> wrote:

Hi Guys,

Every time I read the report from the 'Space Weather Prediction Centre' I get disappointed.

There seems to be signs of activity on the sun but when I read Solar activity Forecast, it says "Solar Activity is expected to be very low..."

There is always a sigh....

I can't wait till the day I read the Solar Activity Forecast and it's says "Solar Activity is expected to be very high, there are a bunch of spots on the sun and you'd better get out there and work some DX, 10m is open!!"

Hi Frosty,

I do agree that the brag tapes are a problem. I find there are many PSK-31 DXers who are willing to just exchange the minimum information and there are many who do the "contest" exchange also. Another thing to consider is using and requiring those calling to "split" and call up or down several hundred cycles; most PSK-31 programs let the user uncheck the "net" option and/or check a split option or the operator can "split" their RX and TX freqs. At any rate PSK-31 seems no more a problem than RTTY.

You might look at QRZ DX's QSN Report; I submit a weekly report of 20M PSK-31 DX using DXLab Suite as my tools for finding the DX, spotting it and generating the reports.

Hello Gary,
Well the main problem with working PSK on one of these trips the guys that want to always send what we use to call their brag tape. When I am the DX I don't give a hoot about what your computer is or what rig and software you are using just a report is all I need.
I did work about 350 from 3DA0CF several years ago but it was hard to work the pileup with all the bragtapes going. I tried to advise everyone that only need my report and their report but almost everyone had to push that brag key on the key board.
I might put out a request and see if that will help.

While agreeing with Cookie (Brian) that it would be nice to see some PSK63/125 on a Dxpedition I also have to say it should not be a priority as many operators on PSK do not have a basic clue as to working a Dxpedition and vice versa in some cases as most will use simplex and naturally as we all know....its just one big mess then. Besides RTTY is the main digi mode and most of us know what the protocol is with spreading out etc and its easier on the Dx station to control. For Dxcc purposes if you work it on RTTY why bother with the other digi modes.

But then again whatever turns you on...Thats ham radio!

Gary,

You might add "If the PSK operators catch on to DXpedition operating practices" to this statement. Right now I doubt most will. You see endless posts which implying that point and click, channelized operation is the average level of expertise out there. To ask them to go "split" and not transmit on the DX's frequency appears to be a pipe dream. The rapid fire exchange of a DXpedition will cause problems too. I also suspect the most PSK operators would see the "invasion" of a DXpedition as destroying their favorite mode of operation. Remember PSK is pretty much localized to a few KHz of most bands. Put one DXpedition on and zap.

The need to switch to something faster than PSK31 is also questionable. There is little practical difference between the baud rate of PSK31 and RTTY.

This isn't to imply there are not super PSK DX'ers. There are.

BTW RTTY DXing used to be more laid back too. It took perhaps 50 years to evolve to where RTTY has become a practical and used DXpedition mode. Imagine bringing a model 28 machine and the paper required on a DXpedition.

Very true Gary,
We will do some PSK31 and some Rtty from 7P8 since there will be 5 of us on the air almost all the time. There will be logs put on line while we are there also. They can be found at
www.tdxs.net and or www.tdxs.net/7p8.html also info on my web page www.africandxsafari.com

Brian how about a model 19 machine.
What I did in 3DA0CF was to work simplex
and make a quick list of at least 10 calling me
and then when someone started the brag crap I wentand called the next one on my list. I might try split but as you have said it will clutter up the band fast. Also We found that if someone is on 20cw no way to do PSK at the same time on same band.

Obviously if DXpeditions say "No PSK-31" there won't be any "invasion". On the other hand if we could get some DX operations to set down the same standard as used in their phone and CW operations there would be absolutely NO problems (tongue firmly planted in cheek). The reality is the mode isn't the problem, but inexperienced / over aggressive operators are. Using stations heard screens as well as the DXLab Suite for station control could provide reasonable rates even in marginal propagation conditions. I've been using PSK-31 for several years and have found it to be a great DX and Contest mode when DXLab Suite is used.

Hi Gary,

There is another issue. It seems the PSK groupies think that nobody should run more than 5 w to a wet noodle antenna. Plus they expect to operate with a 2- 3KHz passband without any AGC capture by other strong stations.

How do you think they will feel with a several dozen KW's with beams calling the rare one?

I know the stations calling the VU4 DXpedition on PSK were not using 5 watts.

To all radio amateurs

SB DX ARL ARLD027
ARLD027 DX news

This week's bulletin was made possible with information provided by N1KI, N4EO, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

LIECHTENSTEIN, HB0. Alain, F5LMJ, will be QRV from July 11 to 24. He plans to work as HB0/F5LMJ/p in CW and digital modes during his evening and early morning hours. QSL via F5LMJ, bureau or LoTW.

MONTSERRAT, VP2M. Bill, W5SJ, will be active as VP2MSJ from July 14 to 21. He can use the shack of VP2MDD and will take part in the CQWW VHF Contest but will also be on the other bands, especially 30 and 60 meters. QSL via W5JAY.

CUBA, CO. The Cuba DX Group (GDXC) will activate the call sign T40C during the upcoming IARU HF World Championship 2009 as a multi/single, mixed mode entry. QSL via N1KI.

TIMOR-LESTE, 4W. Chris, 4W6FR, is QRV as time permits. Look for him on 20 and 17 meters using PSK. Most of his activity takes place between 0900 and 1300z. QSL via VK4FW, direct or the OQRS at //www.odxg.org

TOGO, 5V. Franco, I1FQH, will be active as 5V7PRF between July 22 and 30. This will be a very light DXpedition with activity on 80 through 10 meters using mostly CW and some SSB. QSL via I1FQH, LoTW, eQSL or the bureau.

SOUTH KOREA, HL. Jerry, N4EO, will be QRV as HL9EO from Yongsan Barracks through mid-September as his work duties permit. Look for him on 20 meters and higher with a concentration on CW and PSK. QSL direct to N4EO.

ST. LUCIA, J6. WB4WXE (V26HS), will be QRV as J6/WB4WXE from July 10 to 20. Look for him mostly on 6 meters running 350 watts into a 6 element beam. When there is no activity, or propagation on 50 MHz, he'll try 17 meters and possibly some other HF bands. QSL via WB4WXE.

CROATIA, 9A. Zik, VE3ZIK (DO7ZZ), will be active as 9A/VE3ZIK from Bilice between July 2 and August 3. Activity will be on the HF bands using CW, SSB and digital modes. He will also participate in the RSGB IOTA Contest from IOTA group EU-170. QSL via DO7ZZ, direct or bureau.

URUGUAY, CX. The members of the Radio Club Uruguayo will be active as CX1AA during the IARU CONTEST. Activity will be on 160 through 10 meters using CW and SSB with two stations on each band, one station on CW and the another on SSB. QSL via W3HNK.

MOBILE TOUR, Europe. Jurij, MM0DFV, started a 7000 km mobile tour on July 7. The route is: Scotland (MM0DFV/m), England (M0DFV/m), France F/MM0DFV/m), Belgium (ON/MM0DFV/m), Germany (DL/MM0DFV/m), Poland (SP/MM0DFV/m), Belarus (call sign yet unknown, Russia (call sign yet unknown), Kazakhstan, (call sign yet unknown). His emphasis will be on PSK. Separate QSLs for each location will be printed.

ARUBA, P4. Operators Bob, W3BTX (P49T) and Roy, W3TEF (P4/W3TEF) will activate P41USA over the anniversary date of the attacks on the USA on September 11, 2001. Look for activity on all bands between September 8 and 17, including the September VHF Contest. QSL via W3TEF.

MALDIVES, 8Q7. IK2AHG, Davide, is QRV through July 19 mostly on CW as 8Q7DI from Maayafushi Island, (AS-013). QSL via I8ACB. Pierre, 8Q7QQ, home call HB9QQ, is active until July 11. He looks for Sporadic E and EME contacts on 50183 kHz, JT65A mode (first period) at his moonrise and moonset. He is also active on 30, 17 and 12 meters. QSL to home call.

ISLE OF MAN, MD. A team of German ops will be QRV until July 13. Look for MD/DK1SG, MD/DG7SF, MD/DH1SBB, MD/DG1SBU, MD/DG3SHD, MD/DG5SBK, MD/DL1SPH, MD/DL8SAD, MD/DC5SAN and MD/DL6SBN to be QRV on 160 through 10 meters using SSB, CW, RTTY and PSK. During the IARU Contest they will use special call MD9Y. The operators will be QRV on or near the usual IOTA frequencies. QSLs for MD9Y should go via GD3YUM. QSL all others via their home calls.

INDONESIA, YC0. Hotang, YC0IEM, will be active as YC0IEM/9 from Bali (OC-022) until July 27. QSL via IZ8CCW.

CANADA, VE. Gregg, VE3ZZ and Noel, VE2BR will be QRV from Prince Edward Island from July 15 to 27 using the VY2TT superstation and signing VE3ZZ/VY2 and VE2BR/VY2. They will be active as VY2Z during the IOTA contest. QSL to home calls, direct or via the bureau.

MADEIRA ISLAND, CT3. CT9/DK7TM, CT9/DB2TR, CT9/DL1CW, CT9/DL1SBF and CT9/DL3ZH will be active using CW, SSB and RTTY from July 10 to 15. They also plan to take part in the IARU HF World Championship. QSL cards should be sent via the bureau to their home calls.

ST PIERRE AND MIQUELON, FP. FP/K9OT and FP/KB9LIE will be QRV on 160 through 10 meters from July 10 to 18, using CW and SSB, including an entry in the IARU Contest. QSL to home calls via the bureau or LoTW.

THIS WEEKEND ON THE RADIO. The IARU HF World Championship, FISTS Summer Sprint and QRP ARCI Summer Homebrew are on tap for this weekend. Please see July QST, page 76 and the ARRL and WA7BNM contest web sites for details.

10232. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-09 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10232

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 09 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 190 Issued at 2200Z on 09 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 08/2100Z
to 09/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1024 (S09W65) was quiet and stable as it
approached the west limb.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 08/2100Z to 09/2100Z:
The geomagnetic field was mostly quiet. Solar wind started to
increase at approximately 1700Z due to coronal hole effects. This
resulted in an unsettled period for 1800Z to 2100Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected be quiet on day one (10 July). Day two (11 July) is
expected to be quiet to unsettled due to possible coronal hole
effects. Day three (12 July) is expected to be quiet.
III. Event Probabilities 10 Jul-12 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 09 Jul 069
Predicted 10 Jul-12 Jul 069/069/068
90 Day Mean 09 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 08 Jul 003/006
Estimated Afr/Ap 09 Jul 005/005
Predicted Afr/Ap 10 Jul-12 Jul 005/005-007/008-005/005
VI. Geomagnetic Activity Probabilities 10 Jul-12 Jul
A. Middle Latitudes
Active 05/10/05
Minor storm 01/05/01
Major-severe storm 01/01/01

10233. Re: [DX-IS] Re: Fw: 7P

Yahoo group: DX-IS (2009)
Date: 2009-07-10 13:16:51 UTC
From: CSM(r) Gary Huber
Topic: 10145 Message: 10233

Hi Brian,

Well I believe the "standard" PSK-31 power level is more like 30 Watts out of the transmitter.... Yes strong signals do cause AGC compression and its fairly easy to see on the waterfall who has the overpowering and over-modulated signals. I also believe that some of these problems can be solved with a transmit frequency split up or down 5 KHz which would put the strong signals outside the normal PSK-31 passband and let the DXpedition focus only on stations calling them.

With 344 Mixed on the wall, PSK-31 used with the DXLab Suite has provided me with lots of fun finding good DX. With my hearing impairments decoding CW and SSB it has become a bit more difficult to work a pile-up or work through it. Once I worked through the initial learning curve of using PSK-31, I found that many SSB or CW DXing techniques will also work in the Digital modes. But don't tell anyone.... it means less competition in the DX-pedition pile-up!

73 es DX,

Gary - AB9M

Subject: Re: [DX-IS] Re: Fw: 7P

Hi Gary,

There is another issue. It seems the PSK groupies think that nobody should run more than 5 w to a wet noodle antenna. Plus they expect to operate with a 2- 3KHz passband without any AGC capture by other strong stations.

How do you think they will feel with a several dozen KW's with beams calling the rare one?

I know the stations calling the VU4 DXpedition on PSK were not using 5 watts.

73 de Brian/K3KO

CSM(r) Gary Huber wrote:

>Obviously if DXpeditions say "No PSK-31" there won't be any "invasion". On the other hand if we could get some DX operations to set down the same standard as used in their phone and CW operations there would be absolutely NO problems (tongue firmly planted in cheek). The reality is the mode isn't the problem, but inexperienced / over aggressive operators are. Using stations heard screens as well as the DXLab Suite for station control could provide reasonable rates even in marginal propagation conditions. I've been using PSK-31 for

several years and have found it to be a great DX and Contest mode when DXLab Suite is used.

11 July 2009 A.R.I. DX Bulletin
No 949
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5V - Franco, I1FQH will be active as 5V7PRF from Togo on 22-31 July.He plans to operate mostly CW with some SSB on 80-10 metres, running 100 watts to a Spiderbeam for 15, 17 and 20 metres, verticals and wires for the other bands. QSL via home call, direct or bureau. He will upload his log to LoTW and eQSL.cc; updates will be posted to http://twitter.com/i1fqh [TNX I1FQH]
5Z - Bob, K4UEE will be in Kenya on 10-17 July doing short term mission work (http://www.410bridge.org) in the village of Kwambekenya, located about 3-4 hours north of Nairobi. He is involved in several different projects including a video project and demonstrating amateur radio in the local high school. Bob hopes to be QRV for some DXing in the late evenings and early mornings local time. [TNX K4UEE]
7P - Pista/HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI) will be active from Lesotho from 29 July to 13 August. They will have two stations QRV all the time, and a third station might be on for PSK and RTTY. Activity will be on all bands, with a serious effort on 160 and 80 metres. QSL 7P8OK via M0URX, others via home calls. The web page for the expedition can be found on the Texas DX Society's site (http://www.tdxs.net/)[TNX K5LBU]
8Q - Davide, IK2AHG is active as 8Q7DI from Maayafushi, Maldives (AS-013) until 13 July. He operates holiday style mainly CW on 40-10 metres. QSL via I8ACB. [TNX IK2AHG]
9A - Look for 9A6NL (Laci, HA6NL), 9A/HA6PS (Zsolt), 9A/HA7JJS (Al) and 9A/HA7PL (Laci) to be active from Pasman Island (EU-170) on 20-29 July, IOTA Contest included. Before and after the contest they will operate CW, SSB nad digital modes on the HF bands and 6 metres. QSL via home calls, direct or bureau. [TNX HA0HW]
9Y - The Trinidad and Tobago Amateur Radio Society (TTARS) will be QRV during the IARU HF World Championship as 9Y4HQ [425DXN 948]. Activity on 10-80 metres CW and 40 metres SSB will come from the QTH of 9Y4W on Tobago (SA-009), while the rest of SSB operations

will takle place from the QTH of 9Y4D on Trinidad (SA-011). [TNX
The Daily DX]
CE0Z - The November-December XR0ZN expedition to Juan Fernandez [425DXN
937] has been postponed and it is now expected to take place in
March-April 2010. Updates at www.la6fja.eu/dx/XR0ZN/
CT7 - The Algarve Star DX Team will operate SSB, CW and RTTY on 80-6
metres as CS28MCF on 13-19 July for the 28th International
Motorcycle Rally in Faro. QSL via CT1EHX. [TNX CT1END]
CT8 - Hermann, CT3FN (HB9CRV) and several other operators will be active
as CR2F from Ribeirinha lighthouse on Faial Island (EU-175),
Azores between 18 July and 1 August. They will operate CW, SSB and
RTTY on 80-6 metres, and will participate in the IOTA Contest as
CR2W. QSL for both callsigns via CT1GFK, direct or bureau. The
webiste for the operation is at http://www.to-mk.com/neu/ [TNX
VA3RJ]
DL - Andy, DL7AT will be active as DL7AT/m from Norderney Island
(EU-047) on 17-24 July. QSL via home call, direct or bureau. [TNX
www.rsgbiota.org]
EA - Luis, EA1NT will participate in the IOTA Contest as AO1I from
Lobeira Grande (EU-077). He will operate SSB only with an
amplifier and a vertical antenna. QSL via EA1NT, direct or bureau.
[TNX EA1NT]
ES - Juri, ES5GP will be active as ES5GP/8 from Kihnu Island (EU-178)
from 29 July to 9 August. He will operate SSB and PSK on all
bands. QSL via home call. [TNX ES1QD]
F - The Radio Club du Vaucluse will activate special event callsign
TM1MV on 11-25 July for the arrival of this year's Tour de France
(http://www.letour.fr/indexus.html) at Mount Ventoux. The cyclists
will climb the mountain during the 20th stage, on 25 July. QSL via
F5KPO. [TNX F8REF]
FH - Willi, DJ7RJ has received the call TO7RJ to be used from Mayotte
(AF-027) from 22 September trhough 21 October. He will be leaving
the island on 25 October, so he will be active as FH/DJ7RJ during
the last days. Expect Will to operate CW and SSB on 160-10 metres,
and perhaps 6 metres. QSL via home call. [TNX AA1M]
FP - Tim, M0TDG, and Martin, G3ZAY plan to be active from Miquelon
(NA-032) as FP/homecall on 24-27 September. They will operate CW
and SSB; low band operation will depend on equipment availability
(and airline baggage limits). QSL via home calls. Martin will also
try to activate McNutt's Island (VE1, NA-126) on 29 September.
[TNX G3ZAY]
G - Once again the Radio Society of Great Britain (RSGB) will be
represented by GB7HQ in the IARU HF World Championship. Expect a
large group of operators to be active from two separate DXCC
entities (England and Scotland) on all the HF contest bands on
both CW and SSB. To assist in making contacts, when you contact
one operator he can give you the frequency of the next GB7HQ
station to work. QSL via G3TXF (direct, bureau and LOTW). Further
information, including the awards programme for contacting GB7HQ
on various bands/modes, can be found at http://www.gb7hq.com [TNX

G4IRN]
G - John, M0XIG and Tony, 2E0SBS will operate special event station GB1TT on 16-18 July from the site of the optical telegraph at Toothill, Hampshire (England). The Toothill Shutter Telegraph was one of a number that operated as a communication link for the British Admiralty between London and Plymouth. QSL via M0XIG, direct or bureau.
G - "Sky Sheppey 2009" celebrates 100 years of British Aviation and the part played by the pioneers of early flying and the armed services over those years on the Isle of Sheppey (EU-005). Special event station GB100SS will be active from Eastchurch on 25-27 July, IOTA Contest included. QSL via operator's instructions. [TNX F5NQL]
GD - MD/DC5SAN, MD/DG1SBU, MD/DG3SHD, MD/DG5SBK, MD/DG7SF, MD/DH1SBB, MD/DK1SG, MD/DL1SPH, MD/DL6SBN and MD/DL8SAD are active from the Isle of Man (EU-116) until 13 July. QSL via home calls. They will use special callsign MD9Y during the IARU HF World Championship (QSL direct to GD3YUM). [TNX DXNL]
HS - A large group of operators from the HS DX Association will participate in the IOTA Contest as HS0AC/p from Si Chang Island (AS-107). QSL via HS0ZFZ. [TNX NG3K]
I - Paolo, IK2MLS will be active as IA5/IK2MLS from Elba Island (EU-028, IIA LI-002) on 3-8 August. He will operate holiday style on 40-10 metres as well as on the VHF bands. [TNX IK2MLS]
IS0 - Joe, IS0MKX and other 14 operators (I1BUP, I1ZB, I5OYY, IK5EKB, IK5RUN, IS0BMU, IS0EUJ, IS0IGV, IS0JMA, IS0KEB, IS0UMP, IS0ZOD, IW5ELA and IZ1DNJ) will be active as IM0M from Asinara Island (EU-165, IIA SS-061) on 22-26 July, including an entry in the IOTA Contest. They will have five stations active on the HF, VHF and UHF bands, SSB, CW and FM. QSL via IS0MKX, direct or bureau. The web istes for the operation are at http://www.mdxc.org/im0m and http://digilander.libero.it/assoradiomarinai/asinara/home.htm [TNX I1BUP]
IS0 - A group of operators from the Sardinia QRP Club will be active as IQ0QP from Quirra Island (EU-165, IIA CA-009) on 23 August, from about 7 UTC to 16 UTC. They will operate SSB and CW on +/- 7021, 7031, 7091, 10105.5, 10115.5, 14031, 14061 and 14321 kHz. QSL direct (see qrz.com). [TNX IS0VSU]
J6 - Howard, WB4WXE will be active as J6/WB4WXE from St. Lucia (NA-108) on 10-20 July. He will concentrate on 6 metres, with some activity on 17 metres and possibly some other HF bands. QSL via home call. [TNX ARRL DX Bulletin]
JA - Look for JA6VDB/6 and JE6AQP/6 to be active from the islands of Nozaki and Ojika, in the Goto Islands group (AS-040), Nagasaki prefecture on 8-12 August. They plan to operate CW and SSB on 40-15 metres. QSL via home calls, direct or bureau. [TNX JI6KVR+
LA - Chris, OE9ICI will be active as LA/OE9ICI from Hitra Island (EU-036) from 19 July to 1 August, including an entry in the IOTA Contest. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]

OH - Ian, G4FSU will be active again as OH/G4FSU from Emsalo Island (EU-097) from 21 July to 16 August, including an entry in the RSGB IOTA Contest. QSL via home call. [TNX www.rsgbiota.org]
ON - Celebrating the 65th anniversary of the liberation of Rijkevorsel by the British 49th Infantry Division (the so-called "Polar Bears"), club station ON4NOK will operate special callsign ON65POL on 18-27 September. QSL via ON7YX, direct or bureau. [TNX ON6UQ]
OZ - Look for OZ/DL2JRM/p (CW) and OZ/DO6XX/p (SSB) to be active on 80-10 metres from Vendsyssel-Thy (EU-171) from 18 July to 1 August. QSL via home calls, direct or bureau. [TNX www.rsgbiota.org]
PA - The Netherlands' national society (VERON) will be represented by PA6HQ in the IARU HF World Championship. There will be twelve stations on the air during the entire contest, CW and SSB on each band. The 2009 PA6HQ signals will come from the stations of PI4CC, PI4ZI, PI4DX, PA3GCV, PI4D and PI4COM. QSL via PA3CAL. A special award is available for working PA6HQ on six bands; details che be found at http://pa6hq.veron.nl [TNX PA1AW]
PY - PY5BH, PY5DC, PY5DJ, PY5FO and PY5IN will participate in the IOTA Contest as PR5D from Ilha do Mel (SA-047). QSL via PY5DC. [TNX www.rsgbiota.org]
PY - Alex, PY2WAS reports he will be active as PX8W from the rarest Brazilian State of Amapa on 1-2 August. He will operate CW and SSB on 10, 12, 15, 17, 20, 30, 40 and 80 metres. QSL via PY2WAS, direct or bureau.
SM - Kjell, SM4DDS will once again be active as 7S5A from Boko Island/Stora Alo (EU-177) on 12-16 July. He plans to operate CW and SSB on 10-80 metres. QSL via SM4DDS, direct or bureau. [TNX SM4DDS]
SM - Anders, SM5EFX will be active as SM5EFX/2 from Ledskar Island (EU-135) on 19-31 July. He will participate in the IOTA Contest as SF2X. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
SM - Eric, SM1TDE will participate in the IOTA Contest as SA1A from his home QTH on Gotland Island (EU-020). Expect him to operate CW only on all bands. QSL via SM1TDE, bureau preferred. [TNX SM1TDE]
SP - Mek, SP7VC and Adam, DJ0IF will participate in the IOTA Contest as SP7VC/1 and SP8RX/1 from Wolin Island (EU-132). QSl via home calls. [TNX DJ0IF]
SV - Steffen, DM3CW will be active holiday style as J48AL from Aigina Island (EU-075) from 21 July to 3 August. He will operate CW only using 100 watts into wire antennas. QSL via DM3CW, bureau preferred. [TNX DM3CW]
SV5 - Ermanno, IK2WZD will be active again on SSB and digital modes as SV0XAN/5 from the islands of Lipsi, Agathonisi and Arkoi (Dodecanese, EU-001) from now until 10 October. QSL via IK2WZD. [TNX IZ2ABN]
TK - Lee, F5MUX will be active as TK5UX from Petreto Bicchisano, Corsica (EU-014) on 12-26 July. For the time being he will operate barefoot on 40-10 metres with a vertical antenna. He prefers CW, but he also operates RTTY. QSL via F5MUX. [TNX F5MUX]

UA - In preparation of next year's World Radiosport Team Championship, four Russian teams (R31WRTC, R32WRTC, R38WRTC and R39WRTC) will participate in the IARU HF World Championship. They will operate field-day from WRTC-2010 locations and with WRTC-2010 set-ups. QSL via bureau. [TNX NG3K]
UA - RU3YA, RV3YR, UA3YA, UA3YCX and UA3YY will operate SSB, CW and digital modes as homecall/p from Kotelny Island in river Desna (not IOTA, RII-32-02) on 24-26 July. QSL via home calls. Information on the Russian Internal Islands Award can be found at http://robinsons.ru/index/0-6 [TNX RV3YR]
VE - Celebrating the 40th anniversary of the landing of men on the moon (20 July 1969), special event callsign VE3MOON will be in use on 14-27 July. QSL via VE3OIJ, direct or bureau. [TNX VA3RJ]
VK9N - Tommy, VK2IR will be active as VK9IR from Norfolk Island (OC-005) on 19-22 July. He is the team leader of VK9NI [425DXN 947], and will operate while setting up before the team arrives. QSL VK9IR via VK2IR, direct only. [TNX NG3K]
VP2M - Bill, W5SJ will be active as VP2MSJ from Montserrat (NA-103) on 14-21 July. His primary band will be 6m, and he will participate in the CQ WW VHF Contest (18-19 July), but he also plans to operate on the other bands, especially 30 and 60 metres. QSL via W5JAY. [TNX W5SJ]
W - The North Carolina Contesters Club (NR3X) will be active again as N4A from the South Core Banks (NA-067) on 22-27 July, IOTA Contest included. This year's operators will be Barry/K4CZ, Dan/N3ND, Nate/N4YDU, Jack/W0UCE and Keith/W4KAZ. QSL direct to N4YDU. The webpage for the operation is at http://w4kaz.com/n4a/ [TNX VA3RJ]
YB - Hotang, YC0IEM will operate as YC0IEM/9 from Bali Island (OC-022) on 9-27 July. QSL via IZ8CCW, direct or bureau. [TNX IZ8CCW]
YO - YR0HQ will represent the Federatia Romana de Radioamatorism (FRR) during the IARU HF World Championship. A certificate will be issued free of charge for station 12, 9, 6 or 3 QSOs with the HQ station. Please visit http://www.hamradio.ro/ or e-mail yo3apj@... for the details. [TNX YO3APJ]
ZP - Special event station ZP15MWC will be active on 12-19 July from Asuncion, Paraguay to celebrate the 15th Mennonite World Conference Assembly. QSL direct to PA0HEL. [TNX VA3RJ]

IARU HF WORLD CHAMPIONSHIP ---> This year's event (rules can be found at http://www.arrl.org/contests/rules/2009/iaru.html) will run from 12 UTC on 11 July through 12 UTC on the 12th. The following IARU Member Society HQ stations are expected or supposed to participate (also give a look at the list maintained by Bernie, W3UR on www.dailydx.com/iaru-09.htm):

**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5Z4/RW1AU ---> Valery, 5Z4/RW1AU, is now QRT from Nairobi, and is back home in St. Petersburg. His work assignment spanned almost one year, from August 2008 through June 2009. During that period, Val used the 5Z4RS club station in Nairobi as time allowed between work responsibilities to make almost 12,000 QSOs on 40-10 metres, using both CW & SSB. His logs have been uploaded to LoTW. Paper QSL to either RW1AU (direct and bureau) or K5XK. [TNX K5XK]

E51SC ---> The Daily DX reports that Nigel, E51SC (G4KIU) has had to leave Rarotonga, South Cook Islands [425DXN 943] and return to England for family reasons. All of the QSOs (about 600) he made during his stay have been uploaded to LoTW.

HV5PUL ---> A video of the early June activity from HV5PUL is available at http://www.youtube.com/watch?v=wuRbBc4GyP0 [TNX IZ2LSC]

INTERNATIONAL LIGHTHOUSE LIGHTSHIP WEEK ---> The highly popular annual Lighthouse Weekend has been extended to a full week, including two on-going activities: the ILLW Special Event (1-9 August) and the ILLW QSO Party Contest (1-2 and 8-9 August). Complete information can be found at http://ialhp.org/

LOGS ---> The TZ6EI web page (http://www.w0sd.com/mali/mali.htm) now has post DXpedition information (statistics, distances, pictures, etc.), as well as the link to the on-line logs (6 metres only). This was primarily a 6m DXpedition (546 unique calls), but TZ6EI also worked on the HF bands (over 1000 uniques on RTTY). [TNX W0SD]

QSL EK6LP ---> Antonello, IK2DUW reports that effective 1 July he is no longer the QSL manager for EK6LP. He can still confirm QSOs made through 30 June 2009; cards for contacts made after that date should be sent direct to Aram R. Manvelyan, P.O. Box 47, 3102 Gyumri, Armenia.

QSL ST2R ---> Those who still need a card for ST2R (January-April 2007) can request it by e-mail (s57dx@...) and get it through the bureau.
Direct cards should be sent to Slavko Celarc, Ob Igriscu 8, 1360 Vrhnika, Slovenia (return postage is USD 2 ore EUR 1). [TNX S57DX]

QSLs received direct or through managers: 3B8/F1BCS, 3B8/SM6GOR, 3B8MM, 3D2AD, 3D2YA ,3XD2Z, 4K8M, 4L1FX, 4L8A, 4O3A, 4S7AB, 4U1UN, 5B4AIF, 5H3VMB, 5H3VMB/3, 5K0T, 5N0OCH ,5R8VB, 5T5DC, 5V7PM ,5X1NH ,5X1VB, 5Z4/UA4WHX, 6M0W/5 (AS-081), 6O0F, 6V7P, 6W/DM2AYO, 6W1SJ, 6W2SC, 7Q7VB, 7Z1UG, 8P9NX, 8R1K, 9H3UT, 9J2FM, 9J2VB, 9J2YO, 9K2GS, 9L0W (AF-037), 9M6JC, 9U0XB, 9X0R, 9X0VB, 9Y4D, A25VB, A52BT, A61BK, A65BE, A71CT, AP2NK, BS7H ,BW9/DL2JRM/P, BX3AH, C31CT, C6DX, C91FC, C91MR, C91TX, C91VB, C91VB/6, CE0Y/9A4X, CE0Y/LA6IKA, CE0Y/SM6CUK, CN2R, CP4BT, CU8W, CX7CO ,D20VB, D44TD, D60VB, DP1POL ,DU3NXE, E44M, EA6AZ ,EA9CF, EL2DX, ER0WW, ER4DX, ER4ER, ER5GB, ET3JA, EX8AB ,FG5LA, FH/G3SWH, FJ/DL1DA, FM5BH, FO/DJ7RJ, FO/N6JA, FW5RE, H40FN, H44MY ,HC8/UX0HX, HH7/N3BNA, HI3TEJ, HI9/EA3WL, HK3Q, HL0HQSC, HP1WW, HR3/JA6WFM, HS0ZFQ, HV0A ,HV5PUL, J20VB, J3/DL7CM, J3/K5AND, J48IS, J68AS, J75KG ,J88DR ,JA1XGI/VK9X, JD1BMH, JT1R, JW5LJA, K5D, KG4CN, KH0UA, KH6LC, KH8/N9YU, KP2M, KP4EIT, LU2EQF, LU5FF, LW1HR, N3DXX/6Y5, NP3U, NP4A, OJ0J, OJ0MI, OX/DJ5HD, OX/PA3EXX/p, OX3MC, OY/LA7WCA, OY1CT, P29VCX, P4/W1XP, PJ7/DH1ND, PS0F, PT1R (SA-079), R5CC, S04R ,S21ZDT, ST2EB, ST2R, SV5/DL3DRN, SV5/G0TSM, SV8/DL8MCA (EU-072), T20VB, T2UF, T30CC, T30M, T30XX, T31DX, T32YY, T33ZZ, TC57A, TF2JB, TF8GX, TG/IK2IYH, TG9ADM, TG9AHM ,TG9NX, TI7KK (NA-191), TL0A, TO2T, TO3R, TO4T, TO5FJ, TO6T, TS7C, TT8JT, UA0AZ, UN1L, UN6G, UN7PBY, V31TP, V31XX, V5/DJ8VC, V51AS, V51VV, V63MY ,V63TO ,V8AQM, VE1FO/p (NA-127), VK0BP, VK9LA ,VP2EFB, VP2ETN, VP2V/AH6HY, VP2V/NY6X, VP2V/SP3IPB, VP5W, VP8DLM, VP8YLI, VP9KF, VR2CD, VR2UW, VU2ELJ, VU2NKS, WP4U, XE3DX, XR3P, XW1B, XW2B, YA5T ,YJ0KS, YJ0SS ,YL2BJ, YN2DD, YS4M, YU8A, YW6AJ (SA-090), Z2/UA4WHX, Z37M, ZC4LI, ZF2ZB, ZL7T, ZM3WW, ZP5CGL, ZW8BBC.

ZCZC AP28
QST de W1AW
Propagation Forecast Bulletin 28 ARLP028
>From Tad Cook, K7RA
Seattle, WA July 10, 2009
To all radio amateurs

SB PROP ARL ARLP028
ARLP028 Propagation de K7RA

Finally, some sunspot activity to report, and not one of those phantom spots, appearing one day and vanishing the next. Sunspot group 1024 first emerged a week ago, on July 3, 2009, with a daily sunspot number of 17, and the magnetic signature of a new cycle 24 spot. Over the next few days it grew more rapidly and became larger than any sunspot group in the past two years. Today, July 10, it should pass over the sun's western limb, and disappear. Our numbers at the bottom of the bulletin go through Wednesday, July 8, and on Thursday the sunspot number was 15.

Look at the table at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt and notice the sunspot area, in millionths of a solar hemisphere. You can see the size increased rapidly, backed off a bit on July 6, then has increased continually since then, at least through July 9.

You can see a detailed daily progression of the sunspot area at http://www.solarmonitor.org/slideshow.php?date=20090703. If you see no image, just refresh your browser, or hit the F5 key. You should see images at different times on July 3, from different observatories, gradually stepping through. The images look distinctive based on what part of the electromagnetic spectrum a particular observatory is imaging.

Now change the end of the URL in the web address window from date=20090703 to date=20090704, and hit enter. You should see images from July 4. Keep stepping through subsequent dates, and you will see the active region progress toward the sun's western limb, which is to the right.

Last week's bulletin had a report from Brian Smith, W9IND, who said the W9VW six-meter beacon in Indianapolis got a listener report from France. This week at 2227z on July 6, it was copied S3 by CU2JT in the Azores (HM77). The beacon runs 8 watts.

We've had some interesting comments in past bulletins from Dave Greer, N4KZ of Franklin, Kentucky, over half about six meters. Check bulletins 21 and 23 in 2005, 1 and 24 in 2006, and 32 and 33 in 2008. You'll find these at http://www.arrl.org/w1aw/prop/, then click on ''Show older bulletins''.

Dave shares more interesting comments with us in this bulletin.

''All 6-meter operators know just how fickle the band can be -- particularly during a multi-hop E-skip opening. A station just a few miles from another might not hear the rare DX being worked by the other. But I had the opposite occur one recent evening when I worked California and Ireland within 5 minutes of one another. I don't recall ever experiencing multi-hop E-skip in two opposite directions before''.

''It began at 2350 UTC on June 26 when I heard and called KR6Z in DM14 who had a strong signal here in north-central Kentucky, EM78. We chatted for 10 minutes and signed. My friend, Tim, N4GN, over in Louisville, 40 miles west of my Frankfort QTH, called and said to turn my beam toward Europe because he had just worked Ireland''.

''I took his advice and put EI7IX, grid IO53, in my log at 0003 UTC with a SSB contact. He was 57 here. Then I tuned down the band and got on CW where I heard EI2IP in IO61 calling CQ. He came back and I had my second Irish station in the log and thus completed working from the West Coast of North America to Western Europe all in a 5-minute span. Amazing. I don't think I had ever experienced anything like that in 25 years of 6-meter operating''.

''Others might disagree with me but it seems that the multi-hop E-skip has been quite consistent this year -- day after day after day. Of course, I'm at work from 8 a.m. to 5 p.m. and miss out on a lot of good stuff but have still managed to put three new entities in the log this summer -- Sardinia, St. Kitts and Grenada. Of course, some real good -- and potentially new ones -- got away, including D44TD, heard at my QTH for 2 minutes before fading out, OD5KU, who I could just barely hear about the noise at mid-morning on June 27 and an EA6 who never heard me frantically answering his CW CQ. But I have put a dozen EA8 stations in the log this summer, plus Italy, France and Spain, not to mention numerous Caribbean QSOs and a strong YV station. On a recent evening, K6MIO/KH6 was copied in Louisville by N4GN but his signal never made it the extra 40 miles east to Frankfort''.

''I have begun reading a bit more about these so-called noctilucent clouds and the role they might play in sporadic-E. Fascinating stuff. First observed after the huge Krakatoa volcanic eruption in 1883 in present-day Indonesia, it was originally thought they were caused by volcanic debris spewed into the upper atmosphere. Now, the more common theory is the debris that helps the clouds form is dust from meteor showers. But I can't help but wonder, and speculate, if the Sarychev Peak volcanic eruption in Russia a couple

weeks ago hasn't somehow contributed to this E-skip season by dumping more debris in the atmosphere -- enough anyway for people worldwide to report some very colorful sunsets recently. Just food for thought''.

Thanks, Dave.

In other 6-meter news, Ted Saba, KN5O of Covington, Louisiana (EM40) worked KL7RA, Richard Strand of Kenai, Alaska (BP40) on 6-meter CW on June 30 at 18:50z with 559 reports both ways. Their signals covered a distance of over 3,400 miles.

Jon Jones, N0JK of Kansas has a six meter report from late June. He reports excellent E-skip on June 23 1415-1700z, 25 at 1408-1500z and July 2 1417-1600z, July 3 1400-1520z and a big evening opening at 2225-0300z. During each of those times 5J0BV in San Andreas was heard working people, but Jon missed all these openings due to work.

He writes, ''June 26 was very good with Africa, South America and Europe in all at the same time to Kansas. Using a 2-element Yagi and 100 watts on June 26 I worked EA8CQS (IL18) on 6M SSB at 2236 UTC followed by 8R1DB (GJ06) at 2330 UTC, also on SSB. CT1HZE had a great CW signal for over an hour. I did not call Joe, CT1HZE as have worked him before and he was looking for 6 and 7 call area stations''.

''Seeing that on several days 5J0BV had Es propagation to the Midwest between 1400-1600 UTC, I planned to be ready for him the morning of July 4. I got off work at 1200 UTC (7am) and drove from Topeka back to Wichita. On the way is the portable site I use in EM18. I was set up by 1330 UTC. Initially heard HI3TEJ and some weak Florida stations. That seemed to be about it. I was about ready to tear down - but stuck with it as I felt between 1430-1500z might be when 5J0BV would show. Sure enough, at 1420 UTC faint CW appeared on 50.106. It was 5J0BV. In the log at 1427 UTC. Dennis faded out about 5 minutes later''.

Russ Kendrick, K5RUS of West Monroe, Louisiana sent in a report of his recent 2-meter e-skip adventures:

''I had just got home from work and turned on the rigs. I saw the E cloud on DX Sherlock (see http://www.vhfdx.net/spots/map.php) so I pointed the antennas to NE and turned on the 2 meter rig. I heard and worked K1WHS FN43 2259z I began calling CQ then worked VE2DFO FN25 2305z (first Canadian for me on 2m) then heard a loud thunder clap and some cloud to ground lightning close by. Took off my headset and unhooked everything but the 2meter coax. Quickly with one finger on the desk mic and in between the lightning strokes I called CQ. At 2306z I worked VE2JWH (FN35) and then VE3EN (FN25) at 2313z. I only heard the same guys until 2316z, then nothing until 2333z when I heard K1WHS again loud. I gave him a report, then things got quiet except for stations near me calling to the

northeast. I found VE3EN on 6 meters at 0028z and had a QSO about 2 meters. He put our 2 meter QSO on Youtube.''

http://www.youtube.com/watch?v=REcR_-3lijo

VE3EN was as loud to me as I am on his video, but I did not hear him say 73. That's how fast the band can change.

On May 28, 2008 from 2330z to the 29th at 0005z I made about 25 QSOs on 2 meters, 6 states, 6 grids in almost the exact same area and the same time, and worked K1WHS as well''.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 2 through 8 were 0, 17, 24, 26, 23, 21, and 18 with a mean of 18.4. 10.7 cm flux was 66.5, 67.3, 71, 71.6, 68.9, 71.3, and 70.8 with a mean of 69.6. Estimated planetary A indices were 3, 5, 3, 6, 4, 5 and 6 with a mean of 4.6. Estimated mid-latitude A indices were 2, 3, 2, 4, 3, 3 and 3 with a mean of 2.9.

10237. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-10 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10237

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 10 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 191 Issued at 2200Z on 10 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 09/2100Z
to 10/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. Region 1024 (S25W79) was quiet and stable as it
approached the west limb.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 09/2100Z to 10/2100Z:
The geomagnetic field was mostly quiet with occasional unsettled
periods due to a high speed stream from a coronal hole.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for day one (11 July), with a
slight chance for isolated active periods due to coronal hole
effects. Conditions are expected to be quiet for days two and three
(12-13 July).
III. Event Probabilities 11 Jul-13 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 10 Jul 068
Predicted 11 Jul-13 Jul 068/068/068
90 Day Mean 10 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 09 Jul 006/006
Estimated Afr/Ap 10 Jul 007/007
Predicted Afr/Ap 11 Jul-13 Jul 010/010-005/005-005/005
VI. Geomagnetic Activity Probabilities 11 Jul-13 Jul
A. Middle Latitudes
Active 15/05/05
Minor storm 05/01/01
Major-severe storm 01/01/01
```

10238. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-11 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10238

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 11 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 192 Issued at 2200Z on 11 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 10/2100Z
to 11/2100Z: Solar activity continued very low. The disk is now
spotless as Region 1024 is past west limb at S25.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 10/2100Z to 11/2100Z:
The geomagnetic field has been quiet. Although the solar wind speed
has been elevated from recent times to near 450 km/s, the IMF is
weak and, therefore, of little stimulus to the magnetosphere.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet throughout the forecast period.
III. Event Probabilities 12 Jul-14 Jul
Class M 01/01/01
Class X 01/01/01

SB DX @ WW < KB8NW $OPDX.916
Ohio/Penn DX Bulletin No. 916

The Ohio/Penn DX PacketCluster
DX Bulletin No. 916
BID: $OPDX.916
July 13, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NJ1Q, N3TL, NG3K, WY3H, N4AA & QRZ DX, KH6BZF, N7OU, K8YSE, W0SD, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA5RM, F5NQL & UFT, F5PFP, F6DWQ, HA0HW, I1JQJ/IK1ADH & 425 DX News, IA5K team, IZ2LSC, JI6KVR IOTA-JA News, PA1AW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3LYC and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-July, through Sunday, 12th-July there were 211 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV/A, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP9, VQ9, VR, VU, XE, XW, XX9, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAZILAND (Ops Needed). Frosty, K5LBU, is once again looking to put together a team of operators to do the CQWW DX SSB Contest in October 2010 from Swaziland. This would be a 10 or 15 day operation with the contest in the middle. It would be possible to do a Multi-2 set up, but he doesn't think they could do a Multi-Multi operation. He would like to hear from anyone that might like to go. He plans to use one callsign for the contest and the rest of the time you can

operate with your own 3DA0 callsign. His E-mail address is:
frosty1@...

4U_ITU, ITU HQ. Gerald Lander, HB9AJU, reports (edited) "that the callsign 4U1ITU will be put on the air only very seldom in the upcoming future. The restricted activities are the result of a general assembly of the International Amateur Radio Clubs (IARC) in May. Several reasons led to this decision including increased security levels at the ITU headquarters, a changed recognition of amateur radio in international communication and last but not least, 4U1ITU does not belonging to the most wanted countries list anymore. The IARC decided to focus their activities on special modes or conference delegates and to limit all overnight and weekend activities as much as possible. Finally the new antennas were installed on top of the Varembe building." You can see them at:
http://public.fotki.com/sparky73/any/ham_radio/4u1itu-2009-antenna/

5R, MADAGASCAR (IOTA Op). Eric, F6ICX, will be active as 5R8IC from Saint Marie Island (AF-090) between November 17th and December 15th. Activity will be on 80-10 meters. QSL via his home callsign.

A4, OMAN (IOTA Op). Members of the Royal Omani Amateur Radio Society will be activating Suwadi Island (AS-112) as A43SI during the RSGB IOTA Contest (July 25-26th). QSL only direct to A47RS: P.O. BOX 981, PC 113 Muscat, OMAN.

ANTARCTIC/ARCTIC UPDATED SCORES POSTED. Michel/F6DWQ and Mehdi/F5PFP from the "French Polar Team" announced that the Antarctic and Arctic Challenge scores/results have been posted on the following Web pages:
Antarctic Challenge scores:
http://www.french-polar-team.fr/Antarctic_Challenge_results.php
Arctic Challenge scores:
http://www.french-polar-team.fr/Arctic_Challenge_results.php
Polar Challenge (Ant + Arct) scores:
http://www.french-polar-team.fr/Polar_Trophy.php

CP, BOLIVIA. Toni, EA5RM, is expected to be working in Bolivia during the month of August. He informs that he expects to be on the air during his spare time as CP1XRM.

CS28, PORTUGAL. Operators Jose/CT1EHX, Joao/CT1FNT, Antonio/CT1GFK, Al/CT1GPQ, Miguel/CT1IUA and Rui/CT2IHP will be active as CS28MCF during the 28th International Motard Meeting of Faro between July 13-19th. All operators are members of the Algarve STAR DX Team. Their activity will be on 80-6 meters using CW, SSB and RTTY. QSL via CT1EHX.

EG, SPAIN (Special Event). Look for special event station EG1SMP to be on the air between July 24th and August 7th, especial during the ham gathering in San Miguel de Pedroso between July 25-26th. Activity is by the UREBU (URE section of Burgos). Reference numbers: Los Restos del Antiguo Monasterio de San Miguel (MVBU-1259) and (DME-09048). QSL via EA2BT, by the Bureau.

FP, ST. PIERRE AND MIQUELON. Operators Tim/M0TDG and Martin/G3ZAY will be active as FP/homecall from Miquelon (NA-032), September 24-27th. Activity will be on the low bands using CW and SSB, depending on equipment availability (and airline baggage limits). QSL via their home callsigns. ADDED NOTE: Martin will also try to activate McNutt's Island (NA-126) a Canadian island on September 29th.

FH/TO7, MAYOTTE. Willi, DJ7RJ, has received the callsign TO7RJ to be used for the period between September 22nd and October 21st, 2009. He will be using the callsign FH/DJ7RJ from October 21st until he leaves the island on October 25th. Activity will be on 160-10 meters, possibly 6m, using CW and SSB. QSL via his CBA.

IOTA NEWS.....
AF-004. Operators Federico/EA8DN, Maria/EA8BJJ, Rosa/EC3AJW and Ricardo/EA4YK will be active as AO8Y from the Island of La Palma (DIE S-012, WLOTA L 1648) during the RSGB IOTA Contest (July 25-26th). QSL via EA4YK, direct or by the Bureau. Visit their Web site at: http://www.madrono.net

AS-040. Operators JA6VDB and JE6AQP will be active as homecall/6 from Nozaki Island, Ojika Island and Goto Island in the Nagasaki Prefecture, between August 8-12th. Activity will be on 40-15 meters using CW and SSB. QSL via their home callsign, direct or by the Bureau.

AS-107. Members of the HSDXA (Thailand DX Association) will activate Si Chang Island as HS0AC/p during the RSGB IOTA Contest (July 25-26th) between 1100z, July 25th and 1100z, July 26th. QSL via HS0ZFZ. Operators mentioned are: Cy/HS0GBI, Winit/HS1CKC, Son/HS6NDK, Choon/E20HHK, Supote/E20NTS, Manfred/HS0ZEU, Swen/HS0ZFZ, Nathan/HS0ZHG, Mike/HS0ZHS, Paul/HS0ZIN, Juthathip/HS3SAD, Supaporn/HS7ZVC, and possibly others.

AS-185. VERY RARE (#2).. A group of operators will be active as 3W6C from Con Co Island, Vietnam, between April 10-18th, 2010. Operators mentioned as of today: Team Leader Hans-Peter/HB9BXE, Jan/DJ8NK, Hansruedi/HB9BHW, Rene/HB9BQI, Christine/HB9BQW, Hansjurg/HB9DKZ, Paul/HB9DST/AA1MI, Friedhelm/HB9JBI, Matthias/HB9JCI, Peter/HB9PJT, Rolf/HB9TVR, Casimir/HB9WBU, Eddy/XV1X and Michal/XV9DX. The team is looking for sponsors. Complete details are available at: http://www.3w6c.qrv.ch

EU-008. William, GM4UBJ, will be active as homecall/p from the Isle of Skye (IOSA NH07, SCOTIA CN14, WLOTA 1626) between July 19-31st. His activity will be holiday style, but he plans to participate in the RSGB IOTA Contest (July 25-26th). QSL via his home callsign, direct, by the Bureau, e-QSL and LoTW.

EU-016. Gert, OE3ZK, will be active as 9A/OE3ZK from the Island of Korcula (ACIA IC-767, CIA-19, IOCA CI-041, MIA MC-163, WLOTA 1315), July 21-30th. Activity will be on all bands using SSB, CW and RTTY. Check the IOTA frequencies. QSL via his home

callsign, direct or by the Bureau.

EU-024. Giacomo "Jack", IZ3DBA, will be active from Sardinia (IIA SD-001, MIA MIS-035, WLOTA 1608), August 1-10th. Activity will be on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-028. Members of the "IA5K team" will be active from Elba Island (IIA LI-020, MIA MI-022, WLOTA 0609) during the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Max/IZ5BTC, Stefano/IZ5MMN/KI6RVQ, Gabriele/IZ5FDD/KI6RVR and possibly other SWLs. QSL Manager is IZ5BTC.

EU-028. Paolo, IK2MLS, will be active from the Elba Island (IIA LI-001, MIA MI-022, WLOTA 0609), August 3-10th. Activity will be holiday style on all HF bands, plus VHF operation. QSL via his home callsign, direct or by the Bureau.

EU-032. Ed, GW3SQX, will be active using the special callsign TM7O from the Island of Oleron (DIFM AT-025, WLOTA 1369), July 25-27th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th) with operations on all HF bands, mostly CW. QSL direct to GW3SQX.

EU-036. Chris, OE9ICI, will be active as LA/OE9ICI from Kvenvaer, Hitra Island (WW Loc. JP43EM) between July 19th and August 1st. Activity will be on all HF bands. QSL via his home callsign, direct or by the bureau (No eQSL!).

EU-041. Giacomo "Jack", IZ3DBA, will be active as IM0/IZ3DBA from Maddalena Island (IIA OT-008, MIA MIS-013) between July 28th and August 1st. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://www.iz3dba.it

EU-055. Operators Henk/PA3FMC and Ruud/PE1BTV and Hans/PH0V will be active as LA/homecall from Utvaer island (WLOTA 2373, WW Loc. JP21GA), August 10-18th. Look for LA/PE1BTV and LA/PH0V to be active on VHF-MS from JP21GA and LA/PA3FMC on HF. QSL via their home callsigns, direct or by the Bureau.

EU-067. Nick, SV1CEI, will be active as homecall/8 from Kea Island in the Kyklades (Cyclades) IOTA group until August 25th. QSL via his homecall, direct or by the bureau.

EU-077. Luis, EA1NT, will be active as AO1I from the Island of Lobeira Grande (DIE O-133, WLOTA L 4092), July 24-26th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operations will be on all HF bands. QSL via his home callsign, direct or by the Bureau. Visit his Web site at: http://www.urlc.net/Lobeira2009.html

EU-088. Operators Ole/OZ2TF, Klaus/OZ7KDJ and Erik/OZ9V will be active as OZ8MW/p from Anholt Island (DIA NK-001) between July 22-27th. Activity will be on 80/40/20/15/10 meters before the IOTA Contest. They will be in the IOTA Contest. Also, look for activity on 6 meters using a FT-920, 5 element beam at 15 meters. QSL via OZ8MW, direct or bureau.

EU-120. Members of the Medway Reynet and operators Chris/M0DOL, Morris/ M0MAO and Gary/M0NNH will activate special event station GB100SS from Isle of Sheppey (WAB TR15, LOC. JO01kj) on all bands between July 25-27th. Activity is to celebrate the 100th anniversary on the fly machines in that country. Read about the details at: http://www.qrz.com/db/GB100SS

EU-125. Axel, DL7VEA, will be active as OZ7VEA from Romo Island [aka Roemoe] (DIA NS-001), August 2-21st. Activity will be on all HF bands and modes. QSL via his home callsign, direct or by the bureau.

EU-157. Stephane, F8CFE, will be active as homecall/p from the Ile Agot (DIFM MA-009) during the RSGB IOTA Contest (July 25-26th). No bands/modes of activity or entry category was provided. QSL via his home callsign, direct or by the Bureau.

EU-170. A Hungarian group will take part in the RSGB IOTA Contest (July 25-26th) again this year. Activity will be from Pasman Island (IOCA-085, JN73QW), Croatia, between July 20-29th. Before and after the contest you can find them on all HF bands and 6 meters using CW, SSB and the Digital modes. The operators mentioned are: Laci/HA6NL, Zsolt/HA6PS, Al/HA7JJS and Laci/HA7PL. All operators will sign 9A/homecall except Laci/HA6NL; he will sign 9A6NL. QSL via HA Bureau or direct by the operators home addresses on QRZ.com. For direct requests, please enclose SAE and 1 (valid, new) IRC or 2 USDs. Without this, the QSL will go via the bureau.

EU-174. Gabi, HA1YA, will be active as J48YA from Thasos [aka Thassos] Island (GIOTA NAS-037, MIA MG-124, WLOTA 4186, WW Loc. KN20HS) between August 25th and September 8th. Activity will be on the HF bands, 4m, 6m and 2m. QSL via his home callsign.

NA-067. Operators Frances/AJ4JQ and Jonathan/KJ4IZB hope to be active as AJ4JQ from Hatteras [aka Pea] Island (USI NC-005S, WLOTA 3913) between July 12-18th. Frances reports "This is just a vacation, so I can not guarantee that I or my Dad, KJ4IZB, will be on the air from any particular place at any particular time, but I know we will visit Hatteras and Roanoke islands, so I will try to bring the gear along. QSL via home call (QRZ.com).

NA-067. Members of the North Carolina Contesters Club (NR3X) will be active as N4A from Core Banks (USI NC-033S, WLOTA 0596, Pamlico County, North Carolina), July 22-27th. Activity will include an entry in the RSGB IOTA Contest (July 25-26th). Operators

mentioned are: Nate/N4YDU, Keith/W4KAZ, Barry/K4CZ, Dan/N3ND
and Jack/W0UCE. They will use 100 watts into wire antennas
and expect to be on or near the usual island/IOTA frequencies.
QSL direct to N4YDU (QRZ.com).

NA-137. Members of the Long Island DX Society (N1LI) will be active
from Long Island (USI ME-083S, Cumberland County, Maine) during
the RSGB IOTA Contest (July 25-26th). QSL via K1DG: Doug Grant,
PO Box 301, Long Island, ME 04050 USA (SASE would be appreciated).

NA-139. Stan, N2US, will be active as homecall/p from Assateague
Island (USI VA-024S, Accomack County, Virginia), and the
lighthouse (ARLHS USA-021, WLOTA 4206) during the RSGB IOTA
Contest (July 25-26th) as a Single-Op/12 Hour/Low-Power entry.
QSL via his home callsign (QRZ.com).

NA-143. Bill, N5LYG, will be active from Galveston Island (USI TX-001S,
Galveston County, Texas) during the RSGB IOTA Contest as a
Single-Op/Mixed-Mode entry. QSL via his home callsign (QRZ.com).
Visit his Web site at: http://www.n5lyg.org

NA-230. Cezar, VE3LYC, will attempt his most difficult operation to
date: activating for the first time the Ottawa Islands (IOTA
NA-230) group in Hudson Bay. Name of the specific island and
exact dates are not available at this time, but they will be
announced a few days in advance of the operation. Cezar seeks
to be on the air for 3 full days during the period July 25th
to August 10th using the callsign VY0O. Ottawa Islands are
12-14 hours away from shore and transportation requires a large
boat. This is not a leisure trip. Traditionally, unstable
weather patterns, unknown local landing conditions, high seas,
the presence of ice chunks in the Bay, potential presence of
polar bears (since islands are cooled by cold winds in summer),
and other logistical aspects make this trip extremely challenging.
Cezar will work towards a successful attempt but wants to convey
to the island chasers that this operation may be aborted as
safety comes first. At this time Cezar seeks group and individual
donors who understand and appreciate the difficult and expensive
task ahead and are willing to be part of this effort. All
those who will contribute financially will be acknowledged. He
mentions that past support from EU stations has been dis-
proportionate with their QSO demand (45% of QSOs but only
25% support for VY0A), but hopes that this situation will
improve. Direct and bureau QSL instructions will be announced
in due course. He requests, "I am desperately trying to find
support for this operation. Any help will be so much appreciated."

IS0, SARDINIA (EU-024). Operators Rastislav/OM3BH, Jozef/OM3GI, Jozef/OM3NA
and Tibor/OM3RM will be active as IS0/OM8A during the RSGB IOTA Contest
(July 25-26th) as a Single-Op(???)/All-Band/High-Power/DXpedition entry.
QSL via OM2VL.

J6, ST. LUCIA. Howard, WB6WXE, is now active as J6/WB4WXE until July 20th. He was spotted on 6 meters this past weekend using a 6 element beam and 350 watts and operating from a site which is at 2,000 feet ASL. Howard is expected to be active on other bands when 6m is quiet, especially on 17 meters. QSL via his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For July 13-19th).....
13 AN SOLAR REFERENCE
14 AN ---------------
15 AN AN - Above Normal/Geomagnetic Level is QUIET
16 AN HN - High Normal/Geomagnetic Level is UNSETTLED
17 AN GEOMAGNETIC REFERENCE
18 AN ---------------------
19 AN QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less
SPECIAL ADDED NOTES (by editor KB8NW): CONGRATULATIONS to my good friend, "BIG" Cleveland Indians fan and propagation guru Lee Wical (KH6BZF) and Sandra Merrick on their marriage in January of this year. Your editor (and XYL) attended a special gathering this past weekend where both Lee and Sandy renewed their vows amongst family, friends and their classmates during a "1952 Mentor Class Reunion" on a ranch in Leroy Township, Ohio. Everyone had a great time with plenty of eats and congratulated/wished Lee and Sandy the best. Your editor has been communicating with Lee for many years via the InterNet, and this was the first time I got to meet him. It was a real pleasure to meet him and his new wife. Lee is an Ohio native and was lucky as a young boy to be picked as a runner-up batboy during the 1948 World Series (which was last time the Cleveland Indians were World Champions). Lee plans to live in Hawaii during the winter and in Ohio on Sandy's ranch during the summer. He is currently active as KH6BZF/8. Also, look for Lee to be active very soon from Manitoulin Island (CISA ON-001), in Ontario, Canada.

KL7DX 2008 DXPEDITION DVD AVAILABLE. A DVD on the July 2008 Russian Robinson Club operation to Clevelenad Volcano on Chuginadak Island, is now available at: http://nsiradio1.stores.yahoo.net/kl20dxdvd.html It is on sale now for 19.99 USDs.

KP4, PUERTO RICO. Joachim, KP4EE, will be active as KP4KE during the CQ WW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via OK1DOT.

N3, UNITED STATES (Special Event). Operators Tom/WY3H and his son Ethan/W3IRS, and also John/K3WWP will operate N3AQC (NAQCC and FISTS Club Sation) as a special event station on August 13th from the USS Requin (Submarine) which is dry docked in the Alleghney River in Pittsburgh, Pa. Their operating times will be roughly between 10 a.m. to 2 p.m. (+/- a few minutes) EST (1400-1800z). A special QSL card will be sent to all contacts. Operation will be on 20 and 40 meters only in the CW portion of the bands or course.

NH0, MARIANA ISLANDS. Koji, JL3RDC, will be active as NH0DX during the CQ WW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Band entry. QSL via JL3RDC direct ONLY (no Bureau).

PACIFIC TOUR. Bill, N7OU, informs OPDX that he will be making two stops in the Pacific starting mid-September and during October. His schedule is as follows:
September 18-30th - Bill will be making a lightweight, solo DXpedition to Chatham Island, signing ZL7/N7OU. Activity will be on 80-10 meters, CW only, using 100w into a vertical. QSL via N7OU.
October 5-30th - Bill will be on Rarotonga Island (OC-013), in the South Cooks, doing volunteer work again and signing E51NOU during his spare time. Activity will be on 80-10 meters, CW only, using 100w into a vertical. QSL via N7OU.

QSL INFO AND NEWS.....
AT1HQ via VU2PTT and LoTW. Special ARSI callsign for the IARU Contest.

CR5HQ via CT1REP (see QRZ.COM). Bureau cards can be requested at: rep@... (no need to send a card via bureau!)

Log and pictures are available from the CR6A activity from the Fuzeta Est Mole Lighthouse: Pictures at: http://algarvedx.com
Log at: http://algarvedx.com/logonline

DA0HQ via the Bureau.

PA6HQ via PA3CAL. A special PA6HQ Award is available for stations working PA6HQ on six (6) bands, 10/15/20/40/80/160 meter, in any mode you want. More info at: http://pa6hq.veron.nl

SX0HQ via LoTW or by the Bureau. Activity by the RAAG (Radio Amateur Association of Greece).

TM0HQ via the REF-Union bureau to manager F8CRH

TZ6EI LOGS. Ed, W0SD, reports that the logs for TZ6EI (six meters only) are online thanks to Chris, DL5NAM. You can link-up to them at: http://www.w0sd.com/mali/mali.htm
There were 546 unique six meter contacts made. 22 QSOs with NA. He states, "Hopefully we can get the HF logs online in a week or so."
The TZ6WI Web page has posted DXpedition statistics, distances, pictures etc... as well as the link to the online logs. QSL via W7XU.

VY0A QSL STATUS. Cezar, VE3LYC, reports that he has mailed all the direct QSL requests for the VY0A NA-186 operation. More information is available on the QRZ.com Web page.

ZW5HQ via PY5CA, direct or by the bureau, please indicate via PY5CA.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3D2YA, 4L1FX, 4O3A, 5V7PM, BS7H, D44TD, DP1POL, ER5GB, ET3JA, J75KG, L21D, R1ANR, S21DX, S04R, TG9AHM, V8AQM, YA5T and YN2BQ

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SPECIAL EVENTS (Moon Landing Celebration!).....
In celebration of the 40th anniversary of the first manned moon landing, the special event callsign VE3MOON will be operating from July 14-27th. They will be operating satellites from the Canada Museum of Science and Technology during much of this period, usually between 1400-2000z. They will also be working HF from various locations throughout the duration of the event. Currently, they do not have a set schedule, but they do have multiple radios and operators. Popular satellites among their operators are AO-51, SO-50, VO-52, FO-29, and the ISS. There will be a QSL card for this special call. QSL management is through VE3OIJ.

Look for the special callsign K5E to be active on AO-7 at 1332z, July 16th, and will remain active on the FM and CW/SSB satellites, NO-44 (if operational) and the ISS in packet or voice (if either system is active) through 1650z on July 24th. Those dates and times coincide with the duration of the Apollo 11 mission to the moon which began 40 years ago next Thursday, July 16th. K5E seemed the perfect choice for a special event callsign to celebrate the 40th anniversary of "one small step for man .... one giant leap for mankind."
K - the 11th letter of the alphabet.
5 - the call district of Houston, location of Apollo 11 Mission Control.
E - Eagle, the Apollo 11 lunar module.
During the satellite passes, the operator will use the special callsign and will ID as "Kilo 5 Eagle". Glade Schroeter, WA3MVQ, is donating high-quality full-color QSL cards which will be used to confirm all contacts with K5E. Stations wishing to confirm will send their request to Tim, N3TL, with an SASE. The card will be standard QSL size and a picture of the QSL card is expected to be posted on QRZ.com. Work K5E one time to claim a special QSL card. There will be no endorsements of any kind, and only one QSL will be issued per valid amateur callsign.

TK5, CORSICA. Laurent, F5MUX, will be active as TK5UX between July 12-26th. QSLs are preferred via eQSL <http://e.qsl.cc>. Visit his Web page at: http://www.f5mux.com

TO2, ST. PIERRE AND MIQUELON. A team of Brazilian operators will be active as TO2FH between May 19-23rd, 2010. Operators mentioned so far are: Fabio/ PY2AAZ/AC2AC, Anderson/PY2TNT, Fred/PY2XB and Alex/PY2WAS. More details are forthcoming.

TO2, MAYOTTE. A team of Brazilian operators will be active as TO2FH between September 3-15th, 2010. Operators mentioned so far are: Fabio/ PY2AAZ/AC2AC, Anderson/PY2TNT, Fred/PY2XB and Alex/PY2WAS. More details are forthcoming.

VIDEO AVAILABLE ON THE WEB. Andrea, IZ2LSC, informs OPDX that a short video clip regarding the activation of HV5PUL done in June 2009 is

available on Web at: http://www.youtube.com/watch?v=wuRbBc4GyP0

ZP15, PARAGUAY (Special Event). Look for special event station ZP15MWC
to be on the air July 13-19th. Activity is to celebrate the 15th Mennonite
World Conference held in Asuncion, Paraguay. Activity will be on 40, 20,
15, 10 meters SSB during the hours of 1300-2200z. Suggested frequencies
are: 7080, 14290, 21350 and 28450 kHz (+/- QRM and conditions permitting).
The single station will be operated by: Rudolph/ZP5RL, Ernst/ZP1BD and
Helmich/PA0HEL. QSL via PA0HEL.

10241. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-12 22:11:04 UTC
From: Paul Dunphy
Topic: 9721 Message: 10241

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 12 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 193 Issued at 2200Z on 12 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 11/2100Z
to 12/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 11/2100Z to 12/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels through the period (13 - 15 July).
III. Event Probabilities 13 Jul-15 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 12 Jul 068
Predicted 13 Jul-15 Jul 068/068/068
90 Day Mean 12 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 11 Jul 002/004
Estimated Afr/Ap 12 Jul 002/005
Predicted Afr/Ap 13 Jul-15 Jul 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 13 Jul-15 Jul
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

To mark the 200th anniversary of the birth of the illustrious Louis Braille, inventor tifloescritura system for the blind, and with the 30th anniversary of ARMIC, Association for Visually Handicapped Radio of Catalonia, with the invaluable assistance of various members, partners, friends of the entity, and other amateur radio, puts on the air with a special prefix different seasons, to commemorate this important event.

Louis Braille was the inventor of the system tifloescritura that bears his name to the blind, resulting in a breakthrough in communication for those who suffer this disability.

If I was in the air EG3LB thanks to various members of ARMIC subsequently was EG7LB thanks to the collaboration of EA7URS now is in the air EG5LB, thanks to the members and friends of the area ARMIC of EA5.

We want to thank the great help and the great affection with which he had personally taken the business, two friends from the area EA5, friends EA5CHA and EA5GXL.

The EG5LB be in the air the following day..

  JULY 12
  JULY 26

    2 AUGUST
    3 AUGUST
    4 AUGUST
    5 AUGUST
    6 AUGUST
    7 AUGUST
    8 AUGUST
    AUGUST 9
  16 AUGUST
  23 AUGUST
  29 AUGUST

SEPTEMBER 6

SEPTEMBER 7

The QSL like the rest of stations LB-EG-X will be a special QSL ARMIC edit, and will be sent once they complete all activities from the various districts.

For the QSL EG5LB you can refer to:

EA3RKR

Via bureau or direct to those who prefieran.Recordar to be attached directly on self-directed and properly posted for their return, the QSL received Direct without a self-sufficient postage on your return to be answered only via bureau.

Thanks to all, and hope to work everyone in radio.

73'sy APUNTAROS to thank you for this special celebration with us.

ARMIC EA3RKR Team

If you want to join and participate in activities ARMIC EA3RKR, contact us at ea3rkr@... is no need whatsoever to live in Catalonia, just want to enjoy and have fun doing what we like and love to all, ie Make Radio, there are multiple tasks that can be involved at various points, even from outside of EA.

You can visit the website of the association to see more deeply into the activities being carried out and obtain full information of it, for it can access the website of the entity.

JOIN THIS GREAT FAMILY!!!

All information at: www.gratisweb.com/ea3rkr/esp/index2.hml and QRZ.com.

Please disseminate this information, TNX.

From: Alan Leith
Topic: 10243 Message: 10243

Unbelievable!!!!! I just heard IY3MG calling CQ. I called, he answered and told me we had had a "QSO" before. An Italian behaving like a rare DXpedition. Is there something about this operation that I don't know about? I seriously doubt it. What a pretentious idiot!

Oh yes, we did indeed have a contact before, also on 20M CW. Like big deal! Gimme a break.

10246. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-13 22:21:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10246

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 194 Issued at 2200Z on 13 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity was very low. No flares were detected.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
Geomagnetic field activity was at quiet to unsettled levels. Field
activity increased to unsettled levels after 13/1200Z. ACE solar
wind data indicated a coronal hole high-speed stream commenced
around 13/1200Z. Velocities gradually increased after 13/1200Z and
reached a peak of 505 km/sec at 13/2029Z. Intermittent periods of
southward IMF Bz occurred beginning around mid-period (minimum -9 nt
at 13/1309Z).
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels on day 1 (14 July).
Activity is expected to decrease to quiet levels for the balance of
the period (15 - 16 July).
III. Event Probabilities 14 Jul-16 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 13 Jul 067
Predicted 14 Jul-16 Jul 067/067/067
90 Day Mean 13 Jul 070
V. Geomagnetic A Indices
Observed Afr/Ap 12 Jul 004/005
Estimated Afr/Ap 13 Jul 006/010
Predicted Afr/Ap 14 Jul-16 Jul 007/008-005/005-005/005
VI. Geomagnetic Activity Probabilities 14 Jul-16 Jul
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

ahhhhhhh, the good ol days.....worked for company that had to have daily buissnes report transmitted to home office each night.....300 baud Key it into machine, call the #, and go have a cup of coffee. Then print out a copy for refference. Okidata tractor, no spooler. Thaking bi-monthy store inventory was a blast! Inventory during day, enter after close, transmitt, run inventory report, go home get some shut eye, come back about 4 am, check exceptions, revise, and transmitt again. Usually make it home about 7 am and store had to be open at 10 am.

286 processer, 640 memory.

Gosh mis those days too hi hi

Dale K8TS

IBM was still using the 8 inch floppy and the associated typewriter in 1984. I guess it was state of the art word processing in the 1950s. Very few people could make it work in 1948. And back then "Managers do not type!" which meant something which would have taken 15 minutes on a PC had to be typed by the secretary, get back a DRAFT a day or two later, mark it up and back to the secretary. When the DRAFT was finally error free, the word processing center produced a FINAL for mailing.

I was a member of the "STAR" committee in DoD which APPROVED the DARPA NET (ARPA NET) being opened to Colleges. After which it was opened to the public and became the internet. Al Gore was still a drunken bum in college living off his father the Senator.

One year in the mid-70's the University of Illinois club W9YH got permission to use the Radio Science group's log-periodic Yagi located in Thomasboro, IL about 15 miles north of Champaign-Urbana. We used it for Phone Sweepstakes that year. Those of you who have been in the area probably remember seeing it from Interstate 57. It's gone now.

Anyway, one of the club members wrote a logging program that connected by 300-baud phone modem to a DEC-10 computer on campus. The DEC-10 did the logging. We used the still active phone line of the by-then-deserted field station. What we didn't stop to think was that it was considered a long-distance call from Thomasboro to Urbana and we had the phone line connected for the entire contest. Someone eventually got the bill. I don't know who in the club dealt with the authorities, but somehow we were still permitted to use the site and the LP antenna. But the phone line was disconnected.
That's one of those things I'll never forget!

The discussion on the Internet and networks is nostalgic. Because the Internet has become an integral part of DXing, and a tool that we can't do without when it comes to DX, the issue is valid. I enjoy the reminiscences of the guys who were around in the early days, and feel free to continue to share your experiences in this area.

I ask that you all keep the politics out of it, though. It will only lead to hard feelings by many members if we continue to go down that road . . .

I also have memories of those good old days; working in telecommunications for a major insurance company who at the time was developing a country wide computer network to 17,000 agent offices. Everyone of those 17,000 offices received uploads and downloads every night over dial-up. My part was developing dial-up facilities and procedures to reduce communications expenses. IBM PCs and UNIX Processors running 300 Baud then 1200 Baud over copper and microwave facilities were cutting edge in the early 80s before fiber optic cables and GUI interfaces.

10265. Reminiscences of technology

Yahoo group: DX-IS (2009)
Date: 2009-07-15 13:04:29 UTC
From: Zack Widup
Topic: 10265 Message: 10265

I changed the subject line of this conversation.

I recall when microwave towers started appearing on the horizon. It was all new technology, mostly used by the phone companies as relay stations. All of these towers used what we called the Hogg Horn antenna (developed in part by D. C Hogg). This was some time in the 60's in this part of the country, I believe.

I have a couple of what I believe to be the RF parts of these relay sites. They are waveguide segments with klystrons that operate in the range of 3.7 - 4.2 GHz.

From: rmontemerlo
Topic: 10243 Message: 10266

In the early 70's I was a system engineer for a small company in CT which replaced Model 28 TTY (yep of RTTY fame) in the Fortune 300 companies with a batch email terminal which picked up email in the evening using a IBM 2780 protocol either on a customers computer or via our email servers. First terminals used and endless loop mag tape and the followon was processor based.

One of the first store and forward email implementations...

Yikes almost 40 years ago....

Feeling old

Zack,

Now why doesn't it surprised me that if anyone would have microwave surplus on this list, it would be you! I am up in your neck of the woods this week for a funeral (in EN41) but don't have anything above 50mhz with me.

I changed the subject line of this conversation.

I recall when microwave towers started appearing on the horizon. It was all new technology, mostly used by the phone companies as relay stations. All of these towers used what we called the Hogg Horn antenna (developed in part by D. C Hogg). This was some time in the 60's in this part of the country, I believe.

I have a couple of what I believe to be the RF parts of these relay sites. They are waveguide segments with klystrons that operate in the range of 3.7 - 4.2 GHz.

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 15 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 196 Issued at 2200Z on 15 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 14/2100Z
to 15/2100Z: Solar activity was very low. No flares have occured.
The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (16-18 July).
IIA. Geophysical Activity Summary 14/2100Z to 15/2100Z:
The geomagnetic field ranged from quiet to unsettled levels over the
past 24 hours. Solar wind speeds decayed from around 530 km/s to
near 425 km/s throughout the day.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (16-18 July).
III. Event Probabilities 16 Jul-18 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 15 Jul 067

Good Evening Dale & All:

Excellent point you raise above. I will be licensed 52 years in November, and as best I can remember, this is the very worst SFI minimum that I can remember. Six meters is fun right now, but that isn't going to last. If this continues, the only other hope is 160 meters, and that is several long hot miserable months away. It is now 7:21 PM in the evening and the temp is still showing at 100 degrees. Is it winter yet?

73,
Mike, W5UC

First computer I used was a Royal McBee LGP30 in 1959 at UNB. One of the very first GASP!!! solid state computers NO IC's however. Used a Friden Flexiwriter for input/output. Programing and data input was by 8 level paper tape. We had 8K of memory!!!, the old toroidal core stuff that gave rise to the term memory core. Programming was all hand compiled, there was no compiler software to help out. You basically did the bit bashing yourself and then punched a paper tape to try it out. As for modems or ARPA/DARPA Net there was none and no modems either. Same was true of the IBM 1130 on which I learned FORTRAN. When I finally got my first computer, a Commodore PET, it had 8 times the memory, a built in compiler, dual floppy disc drives and a 300 bps modem for dialing up BBSes all over the country. That, for me, was the millennium come :-) When I finally got my first 2400 bps modem (which I still have) There wasn't much else I could have asked, in fact none of us had a clue about what was just up ahead on the technology highway an networking was still just a lab phenomena.

Can you remember?
Before the Web came Punch Cards Hi Hi!!

Bob

☐

IBM was still using the 8 inch floppy and the associated typewriter in 1984. I guess it was state of the art word processing in the 1950s. Very few people could make it work in 1948. And back then "Managers do not type!" which meant something which would have taken 15 minutes on a PC had to be typed by the secretary, get back a DRAFT a day or two later, mark it up and back to the secretary. When the DRAFT was finally error free, the word processing center produced a FINAL for mailing.

I was a member of the "STAR" committee in DoD which APPROVED the DARPA NET (ARPA NET) being opened to Colleges. After which it was opened to the public and became the internet. Al Gore was still a drunken bum in college living off his father the Senator.

I changed the subject line.

My first personal computer was an Atari ... about the same vintage as the Commodore. For you younger ones, that was many years before the IBM or PC was even thought about. The Atari was a game computer that could be programmed in Basic to do other things.

I took my CW test around 1955, I think, at the FCC Boston also with a straight key.

I took my Extra Class CW test at Field Day 100% by accident. I had my Advanced ticket and was hanging in the VE tent chatting with some "olfarts" while an individual was struggling with his 20 wpm test. I recited the full message to the people I was sitting with. Two of them were active VEs. So, on their recommendation I took the Extra exam and passed.

I found the old Advanced Class exam to be more demanding than the Extra Class of 10 years ago. I also found the old FCC requirement on CW [circa 1955] as 1 minute solid copy no errors or omission more demanding than the 20 wpm Extra of 10+ years ago.

This meandering down old history roads just confirms that I'm getting old!

I believe in my attic I have a VIC-20, a Commodore 64 and an Apple II. I had an Atari but I think I sold it in a garage sale.

I remember writing programs in Basic for some of these.

I got my Extra in 1971. I remember the 1 minute of solid copy I had to write down for the CW receiving test. I also remember I was sending slightly slow on the sending test and the FCC examiner asked me to speed up a bit, which I did. I believe they were a little more lenient on the sending test than they were on the receiving test. Did they even have a sending test with the VE program?

I also took the Advanced and Extra written tests on that same day. The Advanced WAS more difficult than the Extra. But I passed them both. The FCC examiner in Chicago had a nickname with some of us - "Mr. Weasel." I heard he never smiled. After I'd passed the Extra CW and the Advanced written tests, he gave me the Extra exam and said something like "Here's another one for you to pass." And he almost smiled.

☐
Can you remember?
Before the Web came Punch Cards Hi Hi!!

Bob

☐
IBM was still using the 8 inch floppy and the associated typewriter in 1984. I guess it was state of the art word processing in the 1950s. Very few people could make it work in 1948. And back then "Managers do not type!" which meant something which would have taken 15 minutes on a PC had to be typed by the secretary, get back a DRAFT a day or two later, mark it up and back to the secretary. When the DRAFT was finally error free, the word processing center produced a FINAL for mailing.

I was a member of the "STAR" committee in DoD which APPROVED the DARPA NET (ARPA NET) being opened to Colleges. After which it was opened to the public and became the internet. Al Gore was still a drunken bum in college living off his father the Senator.

Zakkie - you didn't have a Trash 80? Hmmmmmm.
I was a VE in the 80's with W5YI and we didn't have a sending test, only receive. BTW, when I took my 13 wpm I sent at 8 wpm and passed. On a straight key I got a bit sloppy at 13 but the examiner only cared about a good fist and that I knew the numbers. I thought there had to be 'two' minutes of solid no errors copy as one minute would've been too easy .... .. rene

Dave thanks for the encouragement! If I see ya I'll hit you with my walker.

About the Commodore time a couple of Japanese PCs were out that never hit the market but were pretty good. Okidata had one if I remember.

Quote on Ken Olsen is a bit misleading in that the Commodore was the only "hobbiest" product out and noone could have forecasted a home market. Even the IBM PC was not originally targeted to a home user. At the time 'Personal' meant individual in business and eventually small business. My how things changed.

Not guessing here...I was the Product Manager for Digital's first two PCs (Code Robin/Rainbow).....boy do I have stories.

Now feeling even older...

Come to think of it, I did have a Trash 80 (CoCo). I think that was one of the first ones I got rid of.

I think you're right about the two minutes of copy of CW on the exams. It's been so long I forget. I do remember people told me it was a good idea to be able to copy 5 wpm beyond the speed required on the FCC exams, just to make sure your nervousness didn't get in the way. So when I took the General exam I could copy 18 wpm at home in a relaxed state, and could copy 25 wpm when I went for the Extra.
I used punched (Hollerith) cards to write computer programs in college, too. We used an IBM 360 mainframe. I never saw the innards of that, but someone told me it used something like a 3-500 tube to generate clock pulses for all the logic devices in it. Maybe that was an urban legend!

Dave thanks for the encouragement! If I see ya I'll hit you with my walker.

About the Commodore time a couple of Japanese PCs were out that never hit the market but were pretty good. Okidata had one if I remember.

Quote on Ken Olsen is a bit misleading in that the Commodore was the only "hobbiest" product out and noone could have forecasted a home market. Even the IBM PC was not originally targeted to a home user. At the time 'Personal' meant individual in business and eventually small business. My how things changed.

Not guessing here...I was the Product Manager for Digital's first two PCs (Code Robin/Rainbow).....boy do I have stories.

Now feeling even older...

Punched cards were used a lot in the old days. I used to write some little programs for fooling around with music and the like on the IBM SAGE computer of the 1950's. It had 50,000 vacuum tubes and occupied a 4 story building. Radar date was sent, processed and air traffic was displayed on monitors that weighed near 1000 pounds. When I made a mistake on that card punch I would either punch another hole or gather the chads and put them back in the card as needed. It worked good, just used an eraser to go over them and they stuck just fine.

My memory is that there was a five minute receive test first, one minute solid copy, no errors or omissions. Followed by a similar send test. I do remember I asked if I could use my Vibroplex ... the examiner looked at me and said "you Pass!" Gosh, getting old is tough.

You younger hams, once you survive to the QCWA make a commitment to stop getting old.

Come to think of it, I did have a Trash 80 (CoCo). I think that was one of the first ones I got rid of.

I think you're right about the two minutes of copy of CW on the exams. It's been so long I forget. I do remember people told me it was a good idea to be able to copy 5 wpm beyond the speed required on the FCC exams, just to make sure your nervousness didn't get in the way. So when I took the General exam I could copy 18 wpm at home in a relaxed state, and could copy 25 wpm when I went for the Extra.

I used punched (Hollerith) cards to write computer programs in college, too. We used an IBM 360 mainframe. I never saw the innards of that, but someone told me it used something like a 3-500 tube to generate clock pulses for all the logic devices in it. Maybe that was an urban legend!

Zack

On Thu, Jul 16, 2009 at 9:41 AM, WB6PSY/N6AXK <tagteam@...> wrote:

Zakkie - you didn't have a Trash 80? Hmmmmmm.
I was a VE in the 80's with W5YI and we didn't have a sending test, only receive. BTW, when I took my 13 wpm I sent at 8 wpm and passed. On a straight key I got a bit sloppy at 13 but the examiner only cared about a good fist and that I knew the numbers. I thought there had to be 'two' minutes of solid no errors copy as one minute would've been too easy .... .. rene

I believe in my attic I have a VIC-20, a Commodore 64 and an Apple II. I had an Atari but I think I sold it in a garage sale.

I remember writing programs in Basic for some of these.

I got my Extra in 1971. I remember the 1 minute of solid copy I had to write down for the CW receiving test. I also remember I was sending slightly slow on the sending test and the FCC examiner asked me to speed up a bit, which I did. I believe they were a little more lenient on the sending test than they were on the receiving test. Did they even have a sending test with the VE program?

I also took the Advanced and Extra written tests on that same day. The Advanced WAS more difficult than the Extra. But I passed them both. The FCC examiner in Chicago had a nickname with some of us - "Mr. Weasel." I heard he never smiled. After I'd passed the Extra CW and the Advanced written tests, he gave me the Extra exam and said something like "Here's another one for you to pass." And he almost smiled.
:-)

DD,
I passed QCWA years ago ;-(
Now your comment on Advanced test. My Advanced test as with my wife was a lot more difficult than the ExtraLite test today. I asked the FCC to grandfather my wife to Extra explaining that her test was far more stringent, having taken her test at the FCC and also having passed 13 wpm. They didn't buy it - boo hiss.
I still recall having to copy two (2) minutes of perfect copy out of five to pass my test. Perhaps the Left Coast was stricter than the east coast .... ..

Come to think of it, I did have a Trash 80 (CoCo). I think that was one of the first ones I got rid of.

I think you're right about the two minutes of copy of CW on the exams. It's been so long I forget. I do remember people told me it was a good idea to be able to copy 5 wpm beyond the speed required on the FCC exams, just to make sure your nervousness didn't get in the way. So when I took the General exam I could copy 18 wpm at home in a relaxed state, and could copy 25 wpm when I went for the Extra.

I used punched (Hollerith) cards to write computer programs in college, too. We used an IBM 360 mainframe. I never saw the innards of that, but someone told me it used something like a 3-500 tube to generate clock pulses for all the logic devices in it. Maybe that was an urban legend!

I believe in my attic I have a VIC-20, a Commodore 64 and an Apple II. I had an Atari but I think I sold it in a garage sale.

I remember writing programs in Basic for some of these.

I got my Extra in 1971. I remember the 1 minute of solid copy I had to write down for the CW receiving test. I also remember I was sending slightly slow on the sending test and the FCC examiner asked me to speed up a bit, which I did. I believe they were a little more lenient on the sending test than they were on the receiving test. Did they even have a sending test with the VE program?

I also took the Advanced and Extra written tests on that same day. The Advanced WAS more difficult than the Extra. But I passed them both. The FCC examiner in Chicago had a nickname with some of us - "Mr. Weasel." I heard he never smiled. After I'd passed the Extra CW and the Advanced written tests, he gave me the Extra exam and said something like "Here's another one for you to pass." And he almost smiled.

I changed the subject line.

My first personal computer was an Atari ... about the same vintage as the Commodore. For you younger ones, that was many years before the IBM or PC was even thought about. The Atari was a game computer that could be programmed in Basic to do other things.

I took my CW test around 1955, I think, at the FCC Boston also with a straight key.

I took my Extra Class CW test at Field Day 100% by accident. I had my Advanced ticket and was hanging in the VE tent chatting with some "olfarts" while an individual was struggling with his 20 wpm test. I recited the full message to the people I was sitting with. Two of them were active VEs. So, on their recommendation I took the Extra exam and passed.

I found the old Advanced Class exam to be more demanding than the Extra Class of 10 years ago. I also found the old FCC requirement on CW [circa 1955] as 1 minute solid copy no errors or omission more demanding than the 20 wpm Extra of 10+ years ago.

This meandering down old history roads just confirms that I'm getting old!

SB DX ARL ARLD028
ARLD028 DX news

This week's bulletin was made possible with information provided by CT1BOL, K1SFA, NC1L, PA1H, VK2FPGR, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CROATIA, 9A. Gert, OE3ZK will be QRV as 9A/OE3ZK from Korcula Island, IOTA EU-016, from July 21 to 30. Activity will be on all bands using CW, SSB and RTTY. He will be active on the IOTA frequencies. QSL to home call.

EAST MALAYSIA, 9M6. Brett, VR2BG is QRV as 9M6BG until July 28. He hopes to be active during the IOTA contest. Activity has been on 40 and 20 meters using CW. QSL to home call.

MADEIRA ISLANDS, CT3. A group of operators will be QRV as CR3D and CR3R from Chao Islet, Desertas Islands, IOTA AF-046, from July 24 to 26. Activity will be on all HF and VHF bands using CW, SSB and digital modes. QSL via operators' instructions.

BALEARIC ISLANDS, EA6. Pista, HA5GY is QRV as EA6/HA5GY until July 20. He is active using QRP power on the HF bands. QSL to home call.

THAILAND, HS. Don, HS0ZEE has been active on 20 meters CW daily around 1400z. QSL to home call.

SARDINIA, IS0. A group of operators will be QRV as IM0M from Asinara Island, IOTA EU-165, from July 22 to 26. Activity will be on all HF and V/UHF bands and modes. This includes an entry in the upcoming IOTA contest. QSL via operators' instructions.

MINAMI TORISHIMA, JD1. Masa, JD1BMM is QRV from here until July 22. He is generally active on 20 and 17 meters using CW and various digital modes, but has been active on 6 meters as well. QSL via

bureau.

SVALBARD, JW. Robert, LA9QNA is QRV as JW9QNA from Longyearbyen, IOTA EU-026, until July 22. This includes entries in the North American RTTY QSO Party and the CQ World Wide VHF Contest. QSL to home call.

DENMARK, OZ. Harry, PA1H and Nico, PA8PA will be QRV as OZ/home call from Lango Island, IOTA EU-172, from July 25 to August 1. Activity will be on 160 to 10 meters, and possibly the VHF bands, using SSB and digital modes. This includes an entry in the upcoming IOTA contest. QSL to home calls.

GREECE, SV. Laci, HA0NAR will be QRV as SX8R from Thassos Island, IOTA EU-174, from July 22 to 31. This includes an entry in the upcoming IOTA contest. Activity will be on 80 to 6 meters using CW and SSB. QSL to home call.

CORSICA, TK. Lee, F5MUX is QRV as TK5UX until July 26. Activity is on 40 to 10 meters using mostly CW but with some RTTY as well. QSL to home call.

BELIZE, V3. Terry, W6WTG and Sharon, N2OWL will be QRV as V31UR from Caye Caulker, IOTA NA-073, from July 21 to 29. This includes being an entry in the upcoming IOTA contest. QSL via W6UR.

NORFOLK ISLAND, VK9N. Member of the Hellenic Amateur Radio Association of Australia will be QRV as VK9NI from July 22 to 29. Activity will be on 160 to 6 meters using CW, SSB and RTTY with five stations running simultaneously. This includes an entry in the upcoming IOTA contest. QSL via W3HNK.

MONTSERRAT, VP2M. Bill, W5SJ is QRV as VP2MSJ until July 21. Activity is on al bands, including 60 and 30 meters. This includes an entry in the CQ World Wide VHF Contest. QSL via W5JAY.

MEXICO, XE. In celebration of the 12th anniversary of the Radio Club Queretaro, special event station 4C12SG is QRV until July 27 from the ''Sierra Gorda Queretana'' at the Sotano del Barro, one of the world's lowest locations. Activity is on al HF bands and possibly 6 meters. QSL via XE1RCQ.

INDONESIA, YB. Hotang, YC0IEM/9 is QRV from Bali, IOTA OC-022, until July 27. QSL via IZ8CCW.

THIS WEEKEND ON THE RADIO. The North American RTTY QSO Party, CQ Worldwide VHF Contest, NCCC Sprint CW Ladder, Russian Radio Team Championship, DMC RTTY Contest, RSGB Low Power CW Field Day and the CQC Great Colorado CW Gold Rush are all scheduled for this weekend. The Run for the Bacon QRP CW Contest is scheduled for July 20. The SKCC CW Sprint is scheduled for July 22. Please see July QST, page 76, and the ARRL and WA7BNM contest web sites for details.

I too would really like to see a PC version. VE3NEA's Morse-runner comes close but omits the band change function, the VFO, and the fact that operators become more proficient as you move up and down the band.

If you could add in those features, you'd have Dr. DX and a great program at that!

Subject: Re: [DX-IS] Re: Oldtimers

My memory is that there was a five minute receive test first, one minute solid copy, no errors or omissions. Followed by a similar send test. I do remember I asked if I could use my Vibroplex ... the examiner looked at me and said "you Pass!" Gosh, getting old is tough.

You younger hams, once you survive to the QCWA make a commitment to stop getting old.

Come to think of it, I did have a Trash 80 (CoCo). I think that was one of the first ones I got rid of.

I think you're right about the two minutes of copy of CW on the exams. It's been so long I forget. I do remember people told me it was a good idea to be able to copy 5 wpm beyond the speed required on the FCC exams, just to make sure your nervousness didn't get in the way. So when I took the General exam I could copy 18 wpm at home in a relaxed state, and could copy 25 wpm when I went for the Extra.

I used punched (Hollerith) cards to write computer programs in college, too. We used an IBM 360 mainframe. I never saw the innards of that, but someone told me it used something like a 3-500 tube to generate clock pulses for all the logic devices in it. Maybe that was an urban legend!

Zack

wrote:

Zakkie - you didn't have a Trash 80? Hmmmmmm.
I was a VE in the 80's with W5YI and we didn't have a sending test, only receive. BTW, when I took my 13 wpm I sent at 8 wpm and passed. On a straight key I got a bit sloppy at 13 but the examiner only cared about a good fist and that I knew the numbers. I thought there had to be 'two' minutes of solid no errors copy as one minute would've been too easy .... .. rene

I believe in my attic I have a VIC-20, a Commodore 64 and an Apple II. I had an Atari but I think I sold it in a garage sale.

I remember writing programs in Basic for some of these.

I got my Extra in 1971. I remember the 1 minute of solid copy I had to write down for the CW receiving test. I also remember I was sending slightly slow on the sending test and the FCC examiner asked me to speed up a bit, which I did. I believe they were a little more lenient on the sending test than they were on the receiving test. Did they even have a sending test with the VE program?

I also took the Advanced and Extra written tests on that same day. The Advanced WAS more difficult than the Extra. But I passed them both. The FCC examiner in Chicago had a nickname with some of us - "Mr. Weasel." I heard he never smiled. After I'd passed the Extra CW and the Advanced written tests, he gave me the Extra exam and said something like "Here's another one for you to pass." And he almost smiled.

wrote:

I changed the subject line.

My first personal computer was an Atari ... about the same vintage as the Commodore. For you younger ones, that was many years before the IBM or PC was even thought about. The Atari was a game computer that could be programmed in Basic to do other things.

I took my CW test around 1955, I think, at the FCC Boston also with a straight key.

I took my Extra Class CW test at Field Day 100% by accident. I had my Advanced ticket and was hanging in the VE tent chatting with some "olfarts" while an individual was struggling with his 20 wpm test. I recited the full message to the people I was sitting with. Two of them were active VEs. So, on their recommendation I took the Extra exam and passed.

I found the old Advanced Class exam to be more demanding than the Extra Class of 10 years ago. I also found the old FCC requirement on CW [circa 1955] as 1 minute solid copy no errors or omission more demanding than the 20 wpm Extra of 10+ years ago.

This meandering down old history roads just confirms that I'm getting old!

Hey DD - don't know if I'm old enuf for that. Unlike you
oldtimers, my first computer was an IBM 8088 with two single sided 5¼" 360k
diskettes and the memory was a whopping 64k memory. I had to boot up in A
drive and then do a B:\ to go into the working disk. Then along came an AST
sixpack - wow! For packet I used a dumb terminal as a Comadore 64 was too
expensive. My present radio is still a FT101E. My CW test at the FCC
(that's right - FCC) was done with a straight key .... ..

In the early 70's I was a system engineer for a small
company in CT which replaced Model 28 TTY (yep of RTTY fame) in the Fortune
300 companies with a batch email terminal which picked up email in the
evening using a IBM 2780 protocol either on a customers computer or via our
email servers. First terminals used and endless loop mag tape and the
followon was processor based.

One of the first store and forward email implementations...

Yikes almost 40 years ago....

Hi John,

You don't really need a PC version. I can't tell you how
and Tom, K2TA (SK), who I know had it running on a PC can't help.
What I do know was that he had it on a floppy and ran some emulation
software to do it. I have the cartridge but some where have it on a
floppy that he gave me too. Tom was much more computer savvy than I
and he wrote some ham software for the Commodore Amiga.

Geoff,

Things were a lot more leisurely back then. Imagine highly paid
engineers keypunching their own IBM cards via hunt and peck.
I recall the Philco 2000 with its BKS paper tape input. It would read
the tape forward and backward and compare the data. If the same, the
data was "good" and it would try to run the program. I think that
machine had a whopping 8K of memory.

Yep, I had almost the same experience. I was SO excited to be able to join QCWA -- and I did. After a year of looking at the magazines I let it drop. I guess it just wasn't what I expected.

I was aware that there are C-64 emulator programs for the PC. The stumbling block is that the Dr. DX was a ROM plug-in for the C-64. It sounds like K2TA had solved the problem of extracting the program from the ROM and transferring it to disc. If you can locate your floppy with the program, I'd be very interested in getting a copy from you.

I haven't joined QCWA OR the OOTC yet although I qualify. Maybe that's that
I'm afraid will happen.
I'm enjoying this thread, though!

When I was a Novice and for a long time after upgrading to General I had no
concept at all of the sunspot cycle and very little concept of grayline
propagation. I just knew there were certain times it seemed best to hear and
work Europe, Africa or Pacific on 40 and 15 meters. Some DX did occasionally
come into the Novice bands and work us back then. CO2BB was one of them. I
worked a station in Okinawa on 15 when I was a Novice.

Shortly after I got my General license I worked a Novice who was calling CQ
on about 7035 kHz. The Novice band at the time was 7150-7200 kHz. I asked
why he was out of band and he said it was the only crystal he had! It was
probably meant for the 15 meter Novice band (21100-21150?). I hope he made
it to General.
:-)

No 950
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5B - Alan, 5B4AHJ will participate in the IOTA Contest as P3J from his home QTH on Cyprus (AS-004). Expect him to operate SSB and CW on all bands. QSL via 5B4AHJ. [TNX 5B4AHJ]
9A - Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X, will be active as 9A8ZRS from Vela Palagruza (EU-090) from 20 to 31 July, IOTA Contest included. They plan to operate CW, SSB and PSK31 on 80, 40, 20, 15 and 10 metres, plus 6 and 2 metres. QSL via operator's instructions. [TNX F5NQL]
9A - Gert, OE3ZK will operate CW, SSB and RTTY as 9A/OE3ZK from the island of Korcula (EU-016) on 21-30 July, including an entry (CW) in the IOTA Contest. QSL via home call, direct or bureau. [TNX OE3ZK]
A4 - A team from the Royal Omani Amateur Radio Society will participate in the IOTA Contest as A43SI from Suwadi Island (AS-112). QSL via A47RS. [TNX A41MA]
CE - The Radio Club Rancagua (CE4RG, formerly as Radio Club of Chile) was established on 22 July 1936. Celebrating their 73rd anniversary, club members will operate with special event callsign CE73RG for 73 days starting on 22 July. Expect activity on 80, 40, 20, 17, 15, 12 and 10 metres SSB, CW and PSK. QSL via CE4WJK.
CT9 - Twelve operators from Portugal and Madeira will be operate SSB, CW and digital modes as CR3D and CR3R from Chao Island (AF-046), Madeira 24-26 July. Part of the team will focus on the IOTA Contest (with two stations), while the rest will concentrate on 30, 17 and 12 metres, plus 6, 4 and 2 metres. QSL direct to CT1BOL. Further information at http://www.qrz.com/db/CR3D [TNX CT1BOL]
EI - A combined team from the South Dublin Radio Club and the City of Belfast Radio Amateur Society will participate in the IOTA Contest as EJ0GI from Inis Oirr, Aran Islands (EU-006). QSL via EI2SDR. Some team members may be active under their home calls before and after contest between 23 and 27 July: one of them will be David, EI3GKB (GI8SKN), who will operate as EJ3GKB on 80-6 metres. [TNX

EI3GKB]
EA8 - Celebrating the opening of the Gran Telescopio Canarias, the largest optical telescope in the world (http://www.gtc.iac.es/en/), special event callsign AO8GTC will be used from the observatory at Roque de los Muchachos on La Palma, Canary Islands (AF-004) on 25-26 July. Expect activity on CW, SSB and digital modes by four stations. QSL via EA8RCP. [TNX EA8NQ]
EA9 - Look for JR1AIB to be active as EA9/DJ1AIB from Melilla on 22-26 July. He will operate SSB, CW, RTTY and PSK on 160-6 metres. QSL via JR1AIB. [TNX NG3K]
ES - ES1LS, ES1QV, ES2EZ, ES2DJ and ES2QN will participate in the IOTA Contest (25-26 July) as ES0U from Saaremaa Island (EU-034). QSL via ES2DJ, bureau preferred.
F - On 25 July 1909 Louis Bleriot became the first person to fly a powered aircraft across the English Channel from Calais to Dover. Commemorating the centenry of that historic flight, the Radio Club of Cambrai (F8KGN) will be active as TM1LB until 27 July. QSL via the REF bureau. [TNX F8REF]
F - Ed, GW3SQX will be active as TM7O from Oleron Island (EU-032) on 25-27 July, including a CW only entry in the IOTA Contest. QSL via GW3SQX, direct only. [TNX www.rsgbiota.org]
F - Jan, ON7JA will be active as F/ON7JA from Ile de Noirmoutier (EU-064) on 25-27 July. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
G - Commemorating Louis Bleriot's historic flight, the Dover Amateur Radio Club (http://www.darc.org.uk/) will operate special event station GB100LB on 25-26 July. QSL via operator's instructions.
GI - John/EI4GK, Pete/EI4GZB, Joe/EI7GY, Declan/EI9HQ and Pete/GI4VIV will participate in the IOTA Contest from Rathlin Island (EU-122). They will operate as GI0MPG from Rathlin East Lighthouse. QSL via GI0MPG. Prior to the contest some of the operators may be active using MI/homecall. [TNX EI4GK]
GM - Doug, GM0ELP (CW) and Simon, M0GBK (SSB) will be active as MM3T from the Isle of Skye (EU-008) on 25-26 July for the IOTA Contest. QSL via eQSL only, as "we do not have paper QSL cards" (but IOTA chasers will be able to claim credit online once the contest logs are uploaded to www.rsgbiota.org in 2010). [TNX www.rsgbiota.org]
GM - Paul, M3KBU will participate in the IOTA Contest as MM3KBU/p from the Isle of Mull (EU-008). He will also be visiting several islands in either the Inner (EU-008) and the Outer Hebrides (EU-010) on 1-16 August. Please check MM3KBU at www.qrz.com for updates. QSL via M3KBU. [TNXwww.rsgbiota.org]
HB0 - David, ON4DN will be active as HB0/ON4DN/p from Liechtenstein on 24-26 July. He will operate holiday style on 40-10 metres SSB and digital modes, with a focus on 30m. QSL via home call, direct or bureau. [TNX ON4DN]
HL - Han/DS2GOO, Yang/DS4CDA, Ryou/DS4NYE, Rocky/HL1VAU and a few other guest operators will be active as homecall/4 from Pigum Island (AS-060) on 25-27 July. They will have two complete stations with a dozen of verticals near saltwater, and will operate CW, SSB and

digital modes on 80-10 metres; if the band is opend, they will
also give 6m a try. QSL via home calls. During the IOTA Contest
they will use D93I (QSL via DS4NYE). [TNX HL1VAU]
IS0 - Massimo, I0PNM will participate in the IOTA Contest as IM0/I0PNM
from San Pietro Island (EU-165). He will operate SSB on 40-10
metres. In the following weeks, and especially on 15-16 August,
expect him to operate from the lighthouse at Capo Sandalo (ARHLS
SAR-018) on 40-10 metres SSB and PSK31. QSL via home call. [TNX
I0PNM]
IS0 - Emiliano, IS0BRQ says he will be active from Ferraglione Island
(EU-024, IIA CA-033) for part of the IOTA Contest. He plans to
operate QRP starting early in the morning of 26 July.
LZ - Gabriele/IK3GES, Boyan/LZ1BJ and Lyuben/LZ1ZC will be active as
LZ/IK3GES, LZ1BJ/1 and LZ1ZC/1 from the island of Sveta Anastasiya
(EU-181) on 24-27 July. They plan to run 100 watts into a
10-element log-periodic on 20, 17, 15, 12 and 10 metres, with some
possible activity on 40, 30 and 6 metres. QSL via home calls,
bureau preferred. [TNX LZ1BJ]
OZ - Jakob, OZ7AEI will be active as OZ7AEI/p from Bornholm Island
(EU-030) on 19-26 July. He plans to operate on 20 and 40 metres
SSB from a few lighthouses (updates on activations to be posted at
http://www.oz7aei.dk). QSL via home call, direct or bureau. [TNX
OZ7AEI]
PA - PD5CW, PE1OPM and PE1OXV will be active from Schouwen Duiveland
(EU-146) on 24-26 July, IOTA Contest included. Look for activity
on 80-10 metres SSB and CW. [TNX www.rsgbiota.org]
SM - John, G3LAS will operate SSB and CW as SM5/G3LAS from Fogdo Island
(EU-084) on 23-27 July, IOTA Contest included. [TNX The Daily DX]
SM - Kent, SM5ELV and Leif, SM5FWW will be active as SM5ELV/5 and
SM5FWW/5 from Aspoja Island (EU-177) for the IOTA Contest.
Non-contest activities will include PSK and 6 metres. QSL via
bureau. [TNX SM5ELV]
SV - Cliff, SV1JG and George, SV1RP will be active as SX8M from Milos
Island (EU-067) on 24-27 July, including an entry in the IOTA
Contest. QSL via SV1JG, direct or bureau. [TNX SV1JG]
TA - Special event callsign TC21BSR will be on the air from Istanbul
until 20 July for the 21st annual Bosphorus Race. QSL via TA1HZ.
[TNX TA1HZ]
UA - A team of Russian operators will be active as UE1CBB from Bol'shoy
Berezovyy Island (EU-133) on 22-27 July. They will participate in
the IOTA Contest as RI1AA. QSL for both callsigns via UA1AIR,
direct or bureau. [TNX UA1AIR]
VE - Ken/W8ND, Butch/N8CHS and Kelly/K8MCN will be active as W8ND/VE1
from Big Tancook Island (NA-081) on 23-26 July. QSL via K8MCN,
direct or bureau. [TNX VA3RJ]
VE - Frank, VE7DP and Heinz, VA7AQ will take part in the IOTA Contest
from Taxeda Island (NA-091). [TNX VA7AQ]
VE - Cezar, VE3LYC plans to operate as VY0O from the Ottawa Islands
(NA-230, new one) for three full days between 25 July and 10
August. Specific island's name and exact dates are not available

at this time, but they will be announced a few days id advance of the operation. This will be Cezar's most difficult operation to date. The islands are 12-14 hours away from shore and transportation requires a large boat. Traditionally unstable weather pattern, unknown local landing conditions, high seas, the presence of ice chunks in Hudson Bay, potential presence of polar bears, all these and other logistical aspects make this trip extremely challenging. At this time Cezar seeks group and individual donors who understand and appreciate the difficult and expensive task ahead and are willing to be part of this effort. "Past support from EU stations has been disproportionate with their QSO demand (45% of QSOs but only 25% support for VY0A)", he says, but hopefully this situation will improve. [TNX VE3LYC]
VE - VE1VOX and VE1AOE will be active as VC1W from Welsh Island (NA-154) on 12-16 August (depending on weather conditions). They will have two stations and more operators might join the expedition. QSL via VE3EXY. [VE1VOX]
W - Steve, W3RFA and Bob, KB3NYX will operate from Smith Island (NA-140) on 25-26 July for the IOTA Contest. This will be a micro-expedition with limited equipment, as they are getting to the island by sea kayak. [TNX www.rsgbiota.org]
YJ - Chris, VK3QB plans to be active (requested call YJ0QB) from Vanuatu on 20-27 July. He will operate holiday style during his afternoons and evenings on 40 metres CW, with possible activity on 30, 20 and 15 metres if the bands are open. [TNX The Daily DX]

425 DX NEWS MAGAZINE ---> The latest issue (June 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

QSL R1ANL ---> "Since most of the QSL requests for the 1997-99 R1ANL operation by Nikolay Zinin (RW6ACM) from Novolazarevskaya Base (Antarctica) remained unprocessed by the previous QSL manager (UA6AH), I took over the QSL management of this activity", Dominik, DL5EBE says. "After some delay, I finally managed to enter the handwritten log (14000 QSOs) into the computer and upload all contacts to LoTW". Those who need a paper QSL card can send their request to DL5EBE, direct (see qrz.com) or bureau (e-mail requests for bureau cards can be sent to weield@...). [TNX DL5EBE]

QSL VIA TA3J ---> Nilay Mine Aydogmus, TA3YJ has transferred all of her duties as a QSL manager to her husband Berkin, TA3J. Affected callsigns are listed at http://www.aydogmus.gen.tr/ta3j/qslservice.htm [TNX TA3J]

+ SILENT KEYS + Recently reported Silent Keys include Jean-Luc Maingot (F5PC), Roy S. Hartley (G0HDX), Jim Leist (KB5W), Richard R. Clay (KC0TJ), Thomas F. McDuffie (KM6K), Ernest J. Zingleman (KS4Q), Buck Barto (N9PLJ), Antoni Zebik (SP7LA), Henry L. Luhrman (W4PZV) and James E. Mullin (W8KKK).

The Ohio/Penn DX PacketCluster
DX Bulletin No. 915
BID: $OPDX.915
July 6, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K, N4AA & QRZ DX, W3BTX, WA4PGM, K5XK, K5LBU, K8YSE, W0MM, CX3AL, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EI7CC, F5NQL & UFT, G4IRN, I1BUP, I1JQJ/IK1ADH & 425 DX News, LZ1ZF, OH2BH, OH2BN,Pete's-DX-Newsdesk, RSGB IOTA Web Site, S50U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and YO3APJ for the following DX information.

*** SPECIAL NOTE FROM EDITOR: Sorry for the delay in sending out the bulletin. I had a great holiday weekend with my daughter in Murfreesboro, TN. Thanks for the understanding... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th-June, through Sunday, 5th-July there were 206 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5N, 5R, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV/a, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V8, VE, VK, VP2V, VP9, VQ9, VR, VU, XE, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

13 COLONIES INDEPENDENCE SPECIAL EVENT ANNOUNCEMENT. Ken Villone, KU2US, Award Manager, has announced that "All operators that needed 'K2D' on HF for their last station of a 'CLEAN SWEEP', will be given credit on their

certificate, due to an unfortunate situation.... Thank you for understanding and your participation." For more details, go to:
http://www.qrz.com/db/KU2US
-or-
http://home.comcast.net/~dzabawa/ThirteenColonies.htm

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX that based on the crew that activated Chesterfield Island as TX9 some years back, Hawa, DK9KX, as team leader, has formed a new crew which will operate from Conway Reef during the period of October 1-10th, 2009, plus/minus due to weather conditions. Hans, DL6JGN, the leader of 3D2CR crew, who operated from the island 20 years ago, will also join Hawa's team. As of press time, the team consists of the following: Norbert/DJ7JC, Jan/DJ8NK, Dieter/DJ9ON, Heye/DJ9RR, Hawa/DK9KX, Hans/DL6JGN and Ron/PA3EWP. The callsign will be announced at the starting date. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL Manager is DJ8NK QSL direct or by the Bureau. PLEASE NOTE: New IRCs are "OK", but old IRCs with expiration date December 31st, 2009, are not "OK", because QSL cards most likely will be sent out in January 2010. A Web page will be active soon at: http://www.conwayreef2009.de

4W, TIMOR-LESTE. Chris, 4W6FR, works for the Australian Armed Forces and is stationed in Timor-Leste periodically. He has finally been given permission to operate and has his license in hand now. He has begun operating but only operates as time permits outside of his work hours. It seems he really likes working PSK, especially on 20 and 17 meters. There has been some QSNs reported on 20 meters SSB. Most of his activity takes place between 0900-1300z. QSL via VK4FW, direct or the OQRS at: http://www.odxg.org

5V, TOGO. Franco, I1FQH, will be active as 5V7PRF from Kpalime between July 22-30th. This will be a very light DXpedition with activity on 80-10 meters using mostly CW and some SSB (no Digital modes or 6m). He will use 100 watts into a Spiderbeam for 20/17/15m as well as a vertical and wire dipoles for the other bands. QSL via I1FQH, LoTW, eQSL or Bureau. Look for updates on QRZ.com or http://twitter.com/i1fqh

5Z, KENYA. Bob, K4UEE, will be here between July 10-17th, doing a short term mission work. (See: http://www.410bridge.org) He informs OPDX that he will be in the Kwambekenya village located about 3-4 hours north of Nairobi. He is involved in several different projects including a video project and demonstrating amateur radio in the local high school. He hopes to be active for some DXing in the late evenings and early mornings local time. He has an IC-706 MKII, a "Beam in a Bag" and a dipole for 30/40m. This is definitely not a DXpedition and operating time is limited.

7P, LESOTHO (Update). A group of international operators will be operating from Lesotho starting July 29th through August 13th. They will be operating with the equipment supplied by African DX Safari in Johannesburg. The following operators will be on the air: Dr. Gasper "Pista" Istvan/HA5AO (7P8AO), Ben Pyfer/DJ0YI (7P8YI), Laurent Thomin/W0MM (7P8MM), John

Plenderleith/9M6XRO (7P8OK) and Charles "Frosty" Frost/K5LBU (7P8CF). They will have 2 stations on most of the time and might have a 3rd for PSK and RTTY. Activity will be on all bands and they hope to work as many of you on 160/80 meters. They will have a 70 foot vertical which works great on those bands. For 40, they will have a 4 sq. dipole setup on one of the towers. Two trailers with towers will have Tennadayne T8 LogP antennas at about 55 feet. For 30 meters a sloper off one tower will be used. Also, a M2 6 meter beam will be up as well. QSL via each operator's own home callsign except for 9M6XRO/7P8OK who is via M0URX in the UK. ADDED NOTE: Operators from the 4M5DX group were not able to join up with the African DX Safari group due to things beyond their control. The African DX Safari group wished that they could but things did not work out for them.

8N, JAPAN. The JARL will activate 9 HQ stations from various regions in Japan during the 2009 IARU HF Championship this weekend. Each station listed below may be active on other bands other than specified as below outside the contest before the contest weekend. All QSOs will be QSLed automatically via the Bureau. Look for the following 9 HQ stations:

Callsign	Band/Mode during the Contest	Location
8N1HQ	15m-CW	Kimitsu City, Chiba
8N1HQ	160m-CW, 10m-CW	Minato Ku, Tokyo
8N1HQ	80m-Phone	Minami-Ashigara City, Kanagawa
8N2HQ	10m-Phone	Nakatsugawa City, Gifu
8N3HQ	15m-Phone	Nara City, Nara
8N3HQ	40m-CW	Kobe City, Hyogo
8N3HQ	20m-CW	Miki City, Hyogo
8N4HQ	80m-CW, 40m-Phone	Okayama City, Okayama
8N8HQ	20m-Phone	Iwamizawa City, Hokkaido

9A, CROATICA. Zik, VE3ZIK (DO7ZZ), will once again be active as 9A/VE3ZIK from Bilice between July 2nd and August 3rd. Activity will be on the HF bands using CW, SSB and digital modes. He will also participate in the RSGB IOTA Contest from IOTA group EU-170. QSL via DO7ZZ, direct or by the bureau (E-mail requests for Bureau QSL cards can be sent to Zik via zibert@...). Logs will be uploaded to eQSL and LoTW.

CX, URUGUAY. The members of the "RADIO CLUB URUGUAYO" will be active as CX1AA during the upcoming IARU CONTEST activity, from 1200z Saturday, July 11th until 1200z Sunday, July 12th. Activity will be on 160-10 meters using CW and SSB with two stations on each band, one station on CW and the another on SSB. QSL Manager for this activity is W3HNK.

DX SUMMIT (SOON READY FOR 2-WAY COMMUNICATION WITH OVER 110,000 MONTHLY USERS -- http://www.dxsummit.fi/dxspots.aspx): The OH8X Team reports: "The Radio Arcala DX Summit portal is celebrating the milestone of one million monthly hits over a course of several months and more than 110,000 people spending an average of 35 minutes on the site daily. The top five nations using the service are as follows:

USA (28.5%) followed by Germany, United Kingdom, Italy and Japan. In total, users from 170 DXCC countries have entered the service portal. With new visits approaching 19% during the month of May, an increase of users is quite evident.

In the process of making the DX Summit service more focused on younger user segments and non-amateur radio population, two features have been added recently.

Each spotting and spotted callsign is automatically linked to QRZ.COM, providing a more human link to the personal profiles of people and to their pictures. Just click the callsigns and you will automatically enter the relevant QRZ.COM page. Additionally, each line carries the name of the DXCC country spotted.

In a few months time, custom selected filters will be provided to the public allowing users to receive personalized spots that they would like to receive. While initially the selected spots will be sent to your personal email address, the ultimate aim is to offer an SMS (short message service) option to DX Summit users.

This service is a non-profit exercise for Radio Arcala, OH8X but we are pleased to recognize Yasme Foundation and Nokia Corporation for their support of further development and defrayment of operating expenses of the portal. As the servers are in the hands of a professional service provider in the United States, some interruptions are recorded and changing the service provider is in process.

Also, a Help Desk for regular users and for S/W developers is being set up. Here it is suggested that DX Summit open a channel for accepting voluntary donations to keep the Help Desk operational. On a trial basis, through PayPal, DX Summit accepts donations and, additionally, following a donation of 10 USD or 10 EUR, Radio Arcala will send you a full-color Radio Arcala wall calendar postpaid. This option is valid only for the months of July and August. http://www.dxsummit.fi/donate.aspx

We thank you for your support of and interest in Radio Arcala DX Summit."

G & GM, ENGLAND AND SCOTLAND. The RSGB will be represented in the IARU HF Championship by GB7HQ from two separate DXCC entities this year (G,GM). The contest runs July 11-12th. G3LZQ is handling special certificates for those working GB7HQ:
* Bronze award - contact GB7HQ on three band/modes
* Silver award - contact GB7HQ on six band/modes
* Gold award - contact GB7HQ on nine band/modes
* Platinum award - contact GB7HQ on all twelve band/modes
Further details of the award can be found at:
http://www.gb7hq.com/Award-Info.html
When you contact one operator, he can give you the frequency of the next GB7HQ station to work to assist in making contacts for the awards. QSL are being handled by G3TXF: direct, bureau, or LoTW. Full details of the station hosts, locations, operators, WAB squares and grid locators can be found at: http://www.gb7hq.com/2009/2009-Ops-List.html

IOTA NEWS.....
EU-047. Andy, DL7AT, will be active as DL7AT/M from Norderney Island (N-05 for the German Islands award), July 17-24th. He will also activate the Norderney lighthouse (ARLHS FED-025, GLHA #39, WLH DL-021, WLOTA 1621). QSL via his home callsign, direct or by the bureau.

EU-090. A group of Slovenian operators will be active as 9A8ZRS from Vela Palagruza Island (ACIA IC-901, CIA-33, IOCA CI-084, MIA MC-284, ARLHS CRO-012, CLH-100, WHL 9A-046, WLOTA 0057) between July 20-31st. Activity will be on 80/40/20/15/10/6/2 meters using CW, SSB, PSK-31 and possibly other digital modes. Their operations will include an entry in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X. QSL via the operator's instructions.

EU-121. Members of the Dalkey Island Contest Group plan to activate Clare Island for the upcoming RSGB IOTA Contest which takes place on July 25-26th. The callsign EJ1DD will be used in a "100 watt DXpedition" entry. QSL information is via EI7CC. Operators will be EI2CA, EI5DI, EI6EW, EI7CC, EI7CD, EI8BP and EI8CE. Look for activity also from the individual operators using the EJ prefix between July 23-27th.

EU-135. Anders, SM5EFX, will be active as SM5EFX/2 from Ledskar Island, July 19-31st. Activity will be on all HF bands/modes. He will also participate in the RSGB IOTA Contest (July 25-26th) using the special callsign SF2X. QSL both callsigns to SM5EFX, direct or by the bureau.

EU-146. Operators Frans/PA5CA, Jan/PA0JED, Arend/PA2AWU, Dervin/PD9DX and Marcel/PA9M will be active as PA6Z from Schouwen Duiveland during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/ Single-Transmitter entry. QSL via PA9M, direct or by the bureau.

EU-165. Joe, IS0MKX, will lead a team of 15 operators to activate Asinara Island (SS-061, for Italian Island Award) between July 22-26th. Activity will include the RSGB IOTA Contest (July 25-26th). The callsign will be IM0M. QSL via IS0MKX. For more info, please visit: http://digilander.libero.it/assoradiomarinai/asinara/home.htm

EU-175. Operators Luis/CT1EEQ, Arlindo/CT1EGW, Hermann/CT3FN/HB9CRV, Antonio/CU8AS, Jurgen/DJ2VO and Ruedi/HB9CQL will be active as CR2F from the Island of Faial (DIP AZ-007) between July 18-31st. Activity will be from the Ribeirinha Lighthouse (DFP FAZ-17, ARLHS AZO-020, WLH CU-007, WLOTA 1830, WW Loc. HM58QO), located at Cedros. They plan to be on 80-6 meters using CW, SSB and RTTY. They plan to be active around 50.113 MHz with CR2W as callsign. The team will also participate in the RSGB IOTA Contest (July 25-26th), using the callsign CR2W as a Multi-Single/Expedition entry. QSL via CT1GFK, bureau OK; via

E-mail requests to: cu8at@... . For more information,
please visit: http://www.to-mk.com/neu/
Online logs will be available at: http://algarvedx.com/logonline

NA-140. Operators Steve/W3RFA and Bob/KB3NYX will be active as W3RFA
from Smith Island (USI MD-003S, Somerset County, Maryland)
for the RSGB IOTA Contest (July 25-26th). This is a "Micro-
DXpedition". They are getting to the island by sea kayak. All
gear will weigh less than 100 lbs ea. They will use 100 watts
into a wire antenna. QSL via their home callsigns.

SA-047. Operators Alexandre/PY5BH, Vagner/PY5DC, Fleck/PY5DJ, Fernando/
PY5FO and Goncalves/PY5IN will be active as PR5D from Ilha do
Mel (DIB PR-01, also count for WLOTA LH-1435) during the RSGB
IOTA Contest (July 25-26th). QSL via PY5DC. Visit their Web
site at: http://www.alcad.com.br/radio

MOBILE TOUR (Europe). Jurij, MM0DFV, has started his 7000 km mobile tour
on July 7th. He reports, "I am taking my mobile HF gear, and will try
to be active from various places as much as possible. The route is:
GM - Scotland (MM0DFV/m) - G England (M0DFV/m) - F France (F/MM0DFV/m) -
ON - Belgium (ON/MM0DFV/m) - DL Germany (DL/MM0DFV/m) - SP Poland
(SP/MM0DFV/m) - EU Belarus (call sign is unknown yet) - UA Russia (RZ3??
= call plus various slashes, will get the license on arrival) - UN Kazakh-
stan (UN/RN3FX hopefully)... and inversely. My radio will be a Yaesu
FT-897D, Mobile Whips, Doublet and ATU MFJ-993 for portable stops, etc.
Main attention is to PSK. I will print different QSL-cards for each new
place I stop. On 10th August 2009 I plan to be back home. Please watch
me in case I am lost :)) All the best to all, and have a nice summer!"

OH0, ALAND ISLAND (CHALLENGING THE HIGH WINDS). Martti, OH2BH, reports:
"Sailing out on Thursday morning under command of captain Jaakko, OH1TX,
the group of Toshi/JA8BMK, Aki/OH1ZE and Martti/OH2BH will be setting the
sail from the coast of Finland toward waters of Aland Islands in spite of
a poor weather prediction. You can expect their activity starting late
Thursday around 1400 UTC. QSL via JA8BMK."

P4, ARUBA (Special Event & Contest). Operators Bob/W3BTX (P49T) and Roy/W3TEF
(P4/W3TEF) will once again activate P41USA this year over the anniversary
date of the USA attacks on September 11th, 2001. Look for P41USA to be active
on all bands between September 8-17th. Activity will include the September VHF
Contest. All QSLs go to W3TEF.

PX8, BRAZIL (Rare State). Alex, PY2WAS, will be activating Amapa State
(one of the 27 Brazilian States, the rarest one) after 12 years without
any DX ham activity. Amapa is located in the estuary of the Amazona River
in the Amazonic Region. Callsign will be PX8W and activity will take place
between August 1-2nd. Activity will be on 80/40/30/20/17/15/12/10 meters
using CW and SSB. QSL cards must be sent via PY2WAS, directly or by the
Bureau. Please, check QRZ.com for more details.

QSL INFO AND NEWS.....
5Z4/RW1AU NOW QRT. Valery, 5Z4/RW1AU, is now QRT from Nairobi, and is back home in St.Petersburg. His work assignment spanned almost one year, from August 2008 through June 2009. During that period Val used the 5Z4RS Club Station in Nairobi as time allowed between work responsibilities to make almost 12,000 QSOs on 40-10m, using both CW and SSB modes. QSL info Update: Direct QSLs are now OK to Valery's home address below, but cards to RW1AU will also be responded-to via the bureau. Valery's address is: Valery Baisha, P.O.Box 16, St.Petersburg, 195426 RUSSIA. QSLs are also "OK" via K5XK. See QRZ.com for RW1AU for more details.

QSLS VIA LOTW: 3D2YA, 5N0OCH, A7/M0FGA, K5D, PY1OTO/PY0T, SV5/G0TSM, SV9CVY and WP2B

QSLS RECEIVED VIA MAIL: 5N0OCH, 5V7PM, 9J2YO, BW9/DL2JRM/P, CX7CO, DU3NXE, EA6AZ, EA9CF, EX8AB, HV0A, J88DR, K5D, PA4VHF, SV8/DL8MCA, TI7KK, UN6G, VK9LA and YJ0SS

QSLS RECEIVED VIA THE BUREAU: 9G5MM, UA6AN and TM2RWC

RARE STATE/GRIDS ON THE BIRDS. OPDX Webmaster John, K8YSE, will be active from Delaware, FM29, and possibly other Delaware grids between July 9-12th. Operations will be limited to the FM birds AO27, SO50 and AO51. He will look for a location that can see the western horizon and hopes to work those that did not work ND9M/P a few weeks ago. Equipment is a Kenwood TM-V7A mobile and an Arrow 146/437-10. QSL via K8YSE.
ADDED NOTE: John's son, Doug, KD8CAO, was active from EN86, Drummond Island, MI, during the past few days. He worked 17 stations on a AO51 pass at 2240z, July 7th. He was also active from EN86 on July 8th, which is a very rare grid. Doug should be active on Thursday, July 9th, from EN76. Doug is using his TH-D7AG and the Arrow antenna on the FM birds and a TS2000 with doppler control for the SSB birds.

S50, SLOVENIA. The Radio Amateur Association of Slovenia, Zveza Radioamaterjev Slovenije (ZRS), will be active as S50HQ in the IARU HF World Championship Contest as a Multi-Op/IARU HQ station entry. Look for the Multi-Op stations on the following bands and modes:

Contest Call	Band	Mode	Operators
S50HQ	10	SSB	S53XX
S50HQ	10	CW	S58A
S50HQ	15	SSB	S52ZW,S57UN,S52EZ
S50HQ	15	CW	S50U
S50HQ	20	SSB	S50K
S50HQ	20	CW	S57DX
S50HQ	40	SSB	S51ZO,S51FB,S55HH
S50HQ	40	CW	S52AW,S53F
S50HQ	80	SSB	S52ZW,S57UN
S50HQ	80	CW	S50A
S50HQ	160	SSB	S57M, S56P
S50HQ	160	CW	S53O

VK9N, NORFOLK ISLANDS (Update). Tommy, VK2IR, team leader of the upcoming VK9NI operation (See OPDX.914), will operate as VK9IR while setting up before the team arrives on the island for 3 days between July 19-22nd. QSL via VK2IR.

VP9, BERMUDA. Kyle, WA4PGM, will once again be traveling to Bermuda between July 10-20th. He plans to be active in the IARU, NAQP RTTY, and CQ VHF Contest. Callsign was not mentioned, but possibly VP9/WA4PGM or a special callsign for the contests. QSL direct to WA4PGM, please use PO Box address.

WWF ACTIVITIES. According to an official/authorized representative of WFF program in England, Charlie, M0OXO, plans to organize a series of WFF expeditions in Britain during July as follows:
July 10-13th - Holy Island (GFF-013); callsign GB1HI
July 21-22nd - Pembrokeshire Coast (GFF-015); callsign MW0OXO/p
July 23-27th - Ramsey Island (GWFF-072), Wales; callsigns MC0SHL/p and MW9W
For more info on the "World Flora Fauna" (WFF) award, please visit:
http://www.wff44.com/en

YC0, INDONESIA. Hotang, YC0IEM, will be active as YC0IEM/9 from Bali (OC-022) between now and July 27th. Bands and modes of activity were not provided. QSL via IZ8CCW.

YR0, ROMANIA (Award Available). The YR0HQ team has announced that they will participate in the 2009 IARU World Wide Championship. They also announced that an award will be issued, free of charge, to all radio amateurs who will contact YR0HQ during the contest period. The YR0HQ award could be printed in different format sizes and colors in accordance with the applied class, depending of how many contacts have been made, as follows: Extra Class - 12 QSOs
1st Class - 9 QSOs
2nd Class - 6 QSOs
3rd Class - 3 QSOs
They are still designing the awards for the different classes. However, only one award will be given no matter how many contacts have been made. Send the application, along with the log extract, to one of the following addresses:
By mail to: FRR, YR0HQ AWARD, BOX 22-50, RO-014780 BUCURESTI 22 ROMANIA
By E-mail to: yo3apj@...

Propagation Forecast Bulletin 29 ARLP029
>From Tad Cook, K7RA
Seattle, WA July 17, 2009
To all radio amateurs

SB PROP ARL ARLP029
ARLP029 Propagation de K7RA

We saw a nice run of eight days with a large sunspot, but none have emerged in the six days since. Unlike other recent spots, this one did not appear just for one or two days, then vanish.

Check the data at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt and note the Sunspot Area, expressed in millionths of a solar hemisphere, which kept growing after the daily Sunspot Number peaked at 26.

The solar flux dropped below 70 on July 9, two days before the disappearance of this latest spot, and it has stayed there since. Solar flux is expected to rise to 70 or above July 25 through August 5. The same 45-day forecast at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html (I am looking at the July 16 forecast) predicts continued quiet and mild geomagnetic conditions, with planetary A index of 5. The only predicted larger values we see for the next few weeks are 10 on July 21, 8 on July 28-29, and 8 and 7 on August 5-6. This is a wonderful aspect of the weak solar wind, which does not play havoc with propagation as it does during stormier times.

Geophysical Institute Prague predicts quiet conditions for July 17-20, unsettled July 21, quiet to unsettled July 22, and back to quiet on July 23.

Many of us have been longing for the days of daily sunspot numbers above 100, but there was a downside, and that was from heightened geomagnetic activity. While this could be nice for VHF operators wishing to aim their beams north and refract their signals off of aurora, for everyone else, especially those at higher latitudes, the effect on HF was not a good one.

I was looking in old issues of our propagation bulletin for examples, but found that our archive online only goes back to

January of 1995, and we didn't begin recording any geomagnetic numbers until October 1996 when it was suggested by Robert Wood, WB5CRG (now W5AJ). It began with just the planetary A index in ARLP042 on October 11 (see http://www.arrl.org/w1aw/prop/1996-arlp042.html).

But looking back in bulletins from 1997 and especially 1998, we can see geomagnetic indicators that could wipe out HF communications for days at a time, causing some operators to believe that their radio was broken or feedline was cut.

Go to http://www.arrl.org/w1aw/prop/ and click on the ''Show older bulletins'' link toward the upper center of the page.

Any time the A index is above 15, conditions may begin to get rough. For 1997, check the bulletins numbered 40, 42, 44, 46 and 48. Note that on some days, the planetary A index could get into the mid or high twenties, or even worse, the forties or sixties. ARLP048 from 1997 describes a severe geomagnetic storm.

Conditions became tougher in 1998. For that year, check out bulletins 13, 18, 19, 27, 30-33, 35, 36, 40, 43, 46 and 47. Some days had planetary A index readings of 48, 52, 60, 69, 78, 96, 112 and even 121. This made HF conditions tough all over, but talk to someone who was trying to operate from Alaska in 1998. Ketchikan is above 55 degrees North latitude, and Juneau above 58, but Anchorage is above 61 degrees, and Fairbanks, nearly 65 degrees north latitude, about 120 miles south of the Arctic Circle. The further north you are, the more pronounced are the effects of geomagnetic disturbances.

So enjoy this weak solar wind. It wasn't always like this.

Bob Leo, W7LR of Bozeman, Montana has worked with radios for many years. He is 88 now, and you can see his bio at http://www.qrz.com/w7lr. Bob reports a personal first on July 9 when he heard Europe on 6 meters, which he says is new and exciting. At 1356z on 6 meter CW he spent a half hour working CT1HZE (Portugal) with strong signals. Bob was running 100 watts into a 7-element Yagi at 45 feet.

Bill Gannaway, a reader in Greenville, Texas experienced some dramatic sporadic-E skip on July 10. Around 2200z Bill was driving home from work, and trying to listen to a strong local station when it was covered over by a station in Tucson. He tuned up the dial, and found a number of Phoenix and Tucson stations all up the band. A useful tool for identifying broadcast stations by frequency, location and callsign, is http://www.radio-locator.com/. Click on Advanced Search.

Robert Forsman, WK5X of Stuart's Draft, Virginia reports an interesting six meter experience on July 6.

''I've often wondered about what the shortest possible single-hop distance would be on 6 meter sporadic-E. Until the opening of July 6 of this year, my personal shortest QSO via 6 meter sporadic-E was just a bit longer than 300 miles. During these types of openings, I work grid squares that are otherwise difficult''.

''Around 2300z on July 6, my XYL informed me (I was in the other end of the house) that my FT-897D, which I had accidentally left on, and parked on 50.095 MHz, was ''beeping loudly'' and that I needed to ''go turn that thing off''. I thanked her for alerting me to the band opening''.

''I'm not used to hearing 8's on 6 Meters. From my QTH in Virginia's Shenandoah Valley, most of the 8's that I've worked have been either in the Upper Peninsula of Michigan, or a mountaintop contest station in nearby West Virginia. After settling at the rig, the first station that I worked was KA1VHF, near Columbus, OH. The second station that I worked was KA8HOK, Millersport, OH at a distance of only 234 miles. This was my shortest ever sporadic-E QSO. I also noted that these were some of the strongest non-local signals that I've ever heard on this band. A quick look at EA6VQ's estimated MUF real time map indicated that the estimated E-layer MUF at the midpoint between KA8HOK and myself was 303 MHz. I believe that that is the highest I've ever seen on 'VQ's real time map. Hopefully someone was able to take advantage of this on 1.25 Meters''.

''Then, as the MUF over the region began to fall, the band grew longer. My next contact was with northern Indiana, and then my next two were in southern Michigan''.

The EA6VQ tool that Bob refers to is at
http://www.vhfdx.net/spots/map.php.

>From July 8, Steve McDonald, VE7SL of Mayne Island, British Columbia sent this in.

''Just a note to tell you of some truly great propagation this past week on the magic band. Early on the morning of July 8 I had been chatting with Jack, OA4TT (140 km south of Lima Peru) on the ON4KST 50 MHz chat page. As everyone tends to do when propagation is slow, we were jokingly describing what it might take to get a signal from OA to VE7 on multi-hop Es. I posted that we needed the link to UT or Southern CA/Arizona, then into Mexico, Oceanic next and finally another hop down to Lima. As we mused, I was hearing strong single-hop into Utah. I left the shack for about an hour only to return to see that Jack had decided, just for fun, to send a few CW CQ's towards the USA on 50.1155. With little expectation, I moved the receiver down to Jack's frequency and immediately heard him calling CQ. After picking myself up from the floor, I gave him a short call to which he immediately responded. Signals were weak (449) and somewhat watery and fluttery which leads me to think that this was something other than multi-hop Es. At something over 5,000 miles, this mid-summer contact demonstrated why the 'magic' band

continues to live-up to its name''.

Check Steve's web page, the VE7SL Radio Notebook:
http://members.shaw.ca/ve7sl/

Martin McCormick, WB5AGZ of Stillwater, Oklahoma offered some very interesting comments on TV channels 2-6 after the digital TV transition.

''Central Oklahoma is now devoid of local signals between 54-88 MHz and the listening is interesting. Sunday July 12 was the last day of the ''Nightlight'' service that Congress authorized so that one TV station in each market could keep an analog transmitter going with a loop to tell the 1 or 2 people who hadn't figured it out yet what needed to be done to receive TV over the air.

KOCO Channel 5 in Oklahoma City was the last full-power analog to go dark there and Monday July 13 saw a moderate Es opening with Spanish language TV probably from Mexico fading in briefly around 17:00 UTC on 81.75 MHz.

A couple of propagation Observations:

We have had several days this year in which Mexican signals reached as far up as the low end of the FM Broadcast band. When that happened, TV Channels 2-6 were full of Spanish and sometimes English and French from Canada.

In a QST article of a couple of years ago, someone mentioned that it would be nice to see if we can get the 72-76 MHz band for North America. The services there now could move to an equal amount of space in one of the vacated TV channels and make this an interesting DX band.

A couple of weeks ago, I had left a receiver tuned to TV Channel 4 at 71.75 MHZ. We have had very hot summer days and the tropo at night has been fairly impressive. Instead of Es, I got literally hours of a Channel 4 television audio signal from somewhere within the central US. It was running the endless loop nightlight service with no aural ID so I don't know where it was, but it didn't fade out until after Sunrise at which time it went away fast. One can guess that 6 meters and 72 MHZ would have been hot during that night.

It is strange to spin the dial on a general coverage VHF receiver now and not hear the buzz of video and FM audio landmarks that were there since before many of our births, but Canada and Mexico will provide good propagation beacons for a few more years to come.

I believe it was February QST where I read that 37 US broadcasters will keep their new digital signals on Channels 2-6. I wonder for how long and how many Es openings it will take to change their minds''.

Thanks, Martin.

Jeff Lackey, K8CQ of St. Simons Island, Georgia writes:

''Six meters has been great as you have been commenting in your weekly solar update. And I had to tell you that even ''lousy antennas'' can work, such as my 15 ft flag pole that I use mostly on HF. But as a joke I found it would load up on 6 meters a couple of years ago. Over the last couple of weeks, I've made about 100 contacts on 6m in 19 states and 6 DX entities. Yesterday (15 July 2009) at 2050Z I worked CT1HZE. He was S5 when I worked him, but later he peaked to S8 working many NA stations. That was my first European QSO on 6m. Earlier around 2000Z I had heard EA8AK (S8) working into Spain. He didn't hear me. I heard several EU stations but all too weak to make contact.

So I am now up to 37 states and 13 DX entities on 6 meters with my flag pole antenna. I encourage others in CC&R situations to get on and try out this ''magic band.'' It is a lot of fun when Es band conditions exist. The beacons below 50.080 are a great help in knowing if the band is open. And don't be afraid to call CQ. I have done this many times when the band for me seemed dead. Every once in awhile I am surprised to get a response''.

Don't forget the CQ World Wide VHF Contest this weekend.

See http://www.cqww-vhf.com/ for details.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 9 through 15 were 15, 13, 0, 0, 0, 0, and 0 with a mean of 4. 10.7 cm flux was 69.1, 67.8, 68.2, 68, 67.2, 66.6, and 66.5 with a mean of 67.6. Estimated planetary A indices were 6, 7, 4, 5, 10, 8 and 5 with a mean of 6.4. Estimated mid-latitude A indices were 6, 7, 2, 4, 5, 6 and 3 with a mean of 4.7.

10317. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-17 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10317

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 17 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 198 Issued at 2200Z on 17 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 16/2100Z
to 17/2100Z: Solar activity was very low for the past 24 hours. No
solar flares have occurred. The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low for the next three days (18-20 July).
IIA. Geophysical Activity Summary 16/2100Z to 17/2100Z:
The geomagnetic field was at quiet levels for the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (18-20 July).
III. Event Probabilities 18 Jul-20 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 17 Jul 066
Predicted 18 Jul-20 Jul 067/067/067
90 Day Mean 17 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 16 Jul 002/004
Estimated Afr/Ap 17 Jul 001/002
Predicted Afr/Ap 18 Jul-20 Jul 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 18 Jul-20 Jul
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10318. [425ENG] 425 DX News #950 [2]

Yahoo group: DX-IS (2009)
Date: 2009-07-18 07:41:50 UTC
From: 425eng@425dxn.org
Topic: 10318 Message: 10318

> > > 425 DX NEWS < < <

This is the second attempt at sending 425DXN #950 and the relevant Calendar. Apparently something went wrong with the server yesterday, and the bulletin and/or the calendar did not reach quite a number of subscribers to the mailing list. If you got #950 regularly, please be patient and simply trash this message, as there is neither new nor updated information in it. Thank you.

18 July 2009 A.R.I. DX Bulletin

No 950

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

5B - Alan, 5B4AHJ will participate in the IOTA Contest as P3J from his home QTH on Cyprus (AS-004). Expect him to operate SSB and CW on all bands. QSL via 5B4AHJ. [TNX 5B4AHJ]
9A - Jane/S57L, Goran/S52P, Vinko/S53F, Brane/S56UGB and Silvo/S50X, will be active as 9A8ZRS from Vela Palagruza (EU-090) from 20 to 31 July, IOTA Contest included. They plan to operate CW, SSB and PSK31 on 80, 40, 20, 15 and 10 metres, plus 6 and 2 metres. QSL via operator's instructions. [TNX F5NQL]
9A - Gert, OE3ZK will operate CW, SSB and RTTY as 9A/OE3ZK from the island of Korcula (EU-016) on 21-30 July, including an entry (CW) in the IOTA Contest. QSL via home call, direct or bureau. [TNX OE3ZK]
A4 - A team from the Royal Omani Amateur Radio Society will participate in the IOTA Contest as A43SI from Suwadi Island (AS-112). QSL via A47RS. [TNX A41MA]
CE - The Radio Club Rancagua (CE4RG, formerly as Radio Club of Chile) was established on 22 July 1936. Celebrating their 73rd anniversary, club members will operate with special event callsign CE73RG for 73 days starting on 22 July. Expect activity on 80, 40, 20, 17, 15, 12 and 10 metres SSB, CW and PSK. QSL via CE4WJK.
CT9 - Twelve operators from Portugal and Madeira will be operate SSB, CW and digital modes as CR3D and CR3R from Chao Island (AF-046), Madeira 24-26 July. Part of the team will focus on the IOTA Contest (with two stations), while the rest will concentrate on 30, 17 and 12 metres, plus 6, 4 and 2 metres. QSL direct to

CT1BOL. Further information at http://www.qrz.com/db/CR3D [TNX CT1BOL]
EI - A combined team from the South Dublin Radio Club and the City of Belfast Radio Amateur Society will participate in the IOTA Contest as EJ0GI from Inis Oirr, Aran Islands (EU-006). QSL via EI2SDR. Some team members may be active under their home calls before and after contest between 23 and 27 July: one of them will be David, EI3GKB (GI8SKN), who will operate as EJ3GKB on 80-6 metres. [TNX EI3GKB]
EA8 - Celebrating the opening of the Gran Telescopio Canarias, the largest optical telescope in the world (http://www.gtc.iac.es/en/), special event callsign AO8GTC will be used from the observatory at Roque de los Muchachos on La Palma, Canary Islands (AF-004) on 25-26 July. Expect activity on CW, SSB and digital modes by four stations. QSL via EA8RCP. [TNX EA8NQ]
EA9 - Look for JR1AIB to be active as EA9/DJ1AIB from Melilla on 22-26 July. He will operate SSB, CW, RTTY and PSK on 160-6 metres. QSL via JR1AIB. [TNX NG3K]
ES - ES1LS, ES1QV, ES2EZ, ES2DJ and ES2QN will participate in the IOTA Contest (25-26 July) as ES0U from Saaremaa Island (EU-034). QSL via ES2DJ, bureau preferred.
F - On 25 July 1909 Louis Bleriot became the first person to fly a powered aircraft across the English Channel from Calais to Dover. Commemorating the centenry of that historic flight, the Radio Club of Cambrai (F8KGN) will be active as TM1LB until 27 July. QSL via the REF bureau. [TNX F8REF]
F - Ed, GW3SQX will be active as TM7O from Oleron Island (EU-032) on 25-27 July, including a CW only entry in the IOTA Contest. QSL via GW3SQX, direct only. [TNX www.rsgbiota.org]
F - Jan, ON7JA will be active as F/ON7JA from Ile de Noirmoutier (EU-064) on 25-27 July. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
G - Commemorating Louis Bleriot's historic flight, the Dover Amateur Radio Club (http://www.darc.org.uk/) will operate special event station GB100LB on 25-26 July. QSL via operator's instructions.
GI - John/EI4GK, Pete/EI4GZB, Joe/EI7GY, Declan/EI9HQ and Pete/GI4VIV will participate in the IOTA Contest from Rathlin Island (EU-122). They will operate as GI0MPG from Rathlin East Lighthouse. QSL via GI0MPG. Prior to the contest some of the operators may be active using MI/homecall. [TNX EI4GK]
GM - Doug, GM0ELP (CW) and Simon, M0GBK (SSB) will be active as MM3T from the Isle of Skye (EU-008) on 25-26 July for the IOTA Contest. QSL via eQSL only, as "we do not have paper QSL cards" (but IOTA chasers will be able to claim credit online once the contest logs are uploaded to www.rsgbiota.org in 2010). [TNX www.rsgbiota.org]
GM - Paul, M3KBU will participate in the IOTA Contest as MM3KBU/p from the Isle of Mull (EU-008). He will also be visiting several islands in either the Inner (EU-008) and the Outer Hebrides (EU-010) on 1-16 August. Please check MM3KBU at www.qrz.com for updates. QSL via M3KBU. [TNXwww.rsgbiota.org]

HB0 - David, ON4DN will be active as HB0/ON4DN/p from Liechtenstein on 24-26 July. He will operate holiday style on 40-10 metres SSB and digital modes, with a focus on 30m. QSL via home call, direct or bureau. [TNX ON4DN]
HL - Han/DS2GOO, Yang/DS4CDA, Ryou/DS4NYE, Rocky/HL1VAU and a few other guest operators will be active as homecall/4 from Pigum Island (AS-060) on 25-27 July. They will have two complete stations with a dozen of verticals near saltwater, and will operate CW, SSB and digital modes on 80-10 metres; if the band is opend, they will also give 6m a try. QSL via home calls. During the IOTA Contest they will use D93I (QSL via DS4NYE). [TNX HL1VAU]
IS0 - Massimo, I0PNM will participate in the IOTA Contest as IM0/I0PNM from San Pietro Island (EU-165). He will operate SSB on 40-10 metres. In the following weeks, and especially on 15-16 August, expect him to operate from the lighthouse at Capo Sandalo (ARHLS SAR-018) on 40-10 metres SSB and PSK31. QSL via home call. [TNX I0PNM]
IS0 - Emiliano, IS0BRQ says he will be active from Ferraglione Island (EU-024, IIA CA-033) for part of the IOTA Contest. He plans to operate QRP starting early in the morning of 26 July.
LZ - Gabriele/IK3GES, Boyan/LZ1BJ and Lyuben/LZ1ZC will be active as LZ/IK3GES, LZ1BJ/1 and LZ1ZC/1 from the island of Sveta Anastasiya (EU-181) on 24-27 July. They plan to run 100 watts into a 10-element log-periodic on 20, 17, 15, 12 and 10 metres, with some possible activity on 40, 30 and 6 metres. QSL via home calls, bureau preferred. [TNX LZ1BJ]
OZ - Jakob, OZ7AEI will be active as OZ7AEI/p from Bornholm Island (EU-030) on 19-26 July. He plans to operate on 20 and 40 metres SSB from a few lighthouses (updates on activations to be posted at http://www.oz7aei.dk). QSL via home call, direct or bureau. [TNX OZ7AEI]
PA - PD5CW, PE1OPM and PE1OXV will be active from Schouwen Duiveland (EU-146) on 24-26 July, IOTA Contest included. Look for activity on 80-10 metres SSB and CW. [TNX www.rsgbiota.org]
SM - John, G3LAS will operate SSB and CW as SM5/G3LAS from Fogdo Island (EU-084) on 23-27 July, IOTA Contest included. [TNX The Daily DX]
SM - Kent, SM5ELV and Leif, SM5FWW will be active as SM5ELV/5 and SM5FWW/5 from Aspoja Island (EU-177) for the IOTA Contest. Non-contest activities will include PSK and 6 metres. QSL via bureau. [TNX SM5ELV]
SV - Cliff, SV1JG and George, SV1RP will be active as SX8M from Milos Island (EU-067) on 24-27 July, including an entry in the IOTA Contest. QSL via SV1JG, direct or bureau. [TNX SV1JG]
TA - Special event callsign TC21BSR will be on the air from Istanbul until 20 July for the 21st annual Bosphorus Race. QSL via TA1HZ. [TNX TA1HZ]
UA - A team of Russian operators will be active as UE1CBB from Bol'shoy Berezovyy Island (EU-133) on 22-27 July. They will participate in the IOTA Contest as RI1AA. QSL for both callsigns via UA1AIR, direct or bureau. [TNX UA1AIR]

VE - Ken/W8ND, Butch/N8CHS and Kelly/K8MCN will be active as W8ND/VE1 from Big Tancook Island (NA-081) on 23-26 July. QSL via K8MCN, direct or bureau. [TNX VA3RJ]
VE - Frank, VE7DP and Heinz, VA7AQ will take part in the IOTA Contest from Taxeda Island (NA-091). [TNX VA7AQ]
VE - Cezar, VE3LYC plans to operate as VY0O from the Ottawa Islands (NA-230, new one) for three full days between 25 July and 10 August. Specific island's name and exact dates are not available at this time, but they will be announced a few days id advance of the operation. This will be Cezar's most difficult operation to date. The islands are 12-14 hours away from shore and transportation requires a large boat. Traditionally unstable weather pattern, unknown local landing conditions, high seas, the presence of ice chunks in Hudson Bay, potential presence of polar bears, all these and other logistical aspects make this trip extremely challenging. At this time Cezar seeks group and individual donors who understand and appreciate the difficult and expensive task ahead and are willing to be part of this effort. "Past support from EU stations has been disproportionate with their QSO demand (45% of QSOs but only 25% support for VY0A)", he says, but hopefully this situation will improve. [TNX VE3LYC]
VE - VE1VOX and VE1AOE will be active as VC1W from Welsh Island (NA-154) on 12-16 August (depending on weather conditions). They will have two stations and more operators might join the expedition. QSL via VE3EXY. [VE1VOX]
W - Steve, W3RFA and Bob, KB3NYX will operate from Smith Island (NA-140) on 25-26 July for the IOTA Contest. This will be a micro-expedition with limited equipment, as they are getting to the island by sea kayak. [TNX www.rsgbiota.org]
YJ - Chris, VK3QB plans to be active (requested call YJ0QB) from Vanuatu on 20-27 July. He will operate holiday style during his afternoons and evenings on 40 metres CW, with possible activity on 30, 20 and 15 metres if the bands are open. [TNX The Daily DX]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The latest issue (June 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

QSL R1ANL ---> "Since most of the QSL requests for the 1997-99 R1ANL operation by Nikolay Zinin (RW6ACM) from Novolazarevskaya Base (Antarctica) remained unprocessed by the previous QSL manager (UA6AH), I took over the QSL management of this activity", Dominik, DL5EBE says. "After some delay, I finally managed to enter the handwritten log (14000 QSOs) into the computer and upload all contacts to LoTW". Those who need a paper QSL card

can send their request to DL5EBE, direct (see qrz.com) or bureau (e-mail requests for bureau cards can be sent to weield@...). [TNX DL5EBE]

QSL VIA TA3J ---> Nilay Mine Aydogmus, TA3YJ has transferred all of her duties as a QSL manager to her husband Berkin, TA3J. Affected callsigns are listed at http://www.aydogmus.gen.tr/ta3j/qslservice.htm [TNX TA3J]

10319. [425ENG] 425 DX News #950 [Calendar] [2]

Yahoo group: DX-IS (2009)
Date: 2009-07-18 08:13:15 UTC
From: 425eng@425dxn.org
Topic: 10319 Message: 10319

> > > 425 DX NEWS < < <

This is the second attempt at sending 425DXN #950 and the relevant Calendar. Apparently something went wrong with the server yesterday, and the bulletin and/or the calendar did not reach quite a number of subscribers to the mailing list. If you got #950 regularly, please be patient and simply trash this message, as there is neither new nor updated information in it. Thank you.

18 July 2009 A.R.I. DX Bulletin

No 950

My Times-Sinclair actually had a pre-Visicalc spreadsheet program. It wasn't practical for a log however - I think it would only hold 256 records!

The lady who ran the FCC office in Tampa had a similar reputation. Her sense of humor apparently went when her ex-husband went! She even held study material in a separate area when you tested. Once you entered the testing room, you had to surrender anything that she construed could be used on the test - with the exception of a calculator (this was 1979-80 timeframe), which she vigorously tested to make sure it didn't contain any helpful information.

We had a big deck of cards (a program) we fed into the computer (this was back in the mid 60s) that "played" music by changing the vibrations of the paper while printing. We had to put the printer on manual and rotate the paper back and forth. Otherwise, about halfway through the song (Born Free) the printer would eat up an entire box of paper!

Back a week ago (last Thurs, Fri, Sat) was the MARAC convention in Michigan (MARAC is the Mobils Amateur Awards Club). There were a gob of mobiles on the air with guys on the way to and from the convention (MARAC is mostly about county hunting). Condx were pretty good while the guys were on their way to the convention, but, Sunday, Monday and Tuesday following the event, condx took a turn for the worse.

Early in the day (and late in the day) I could hear a lot of them on 20, 30 and 40. As the day wore on, 40 faded out, then 30 got tougher and I had to rely exclusively on 20 meters. Then on Tuesday, condx became outrageously poor. It became difficult even on 20 to hear guys in Iowa, Colorado and even Texas (I'm in central Florida).

Looking at a cluster screen showed similar effects. Most of the DX being worked was by the DX! There didn't seem to be a lot of spots generated from this side of the pond.

We've been in a slow process of rebuilding the operating station, so Wednesday I disassembled everything and the XYL and I have been staining, painting, sanding and cutting since then.

Assembling a deck of punch cards for early computer programs required
the cards be in the exact right order. It would take days to assemble
a several thousand card "deck". This usually involved creating dozens
of piles of program routines placed on the desk top and later assembled
into a contiguous "deck".

We had two man offices in those days. Work was just North of the Mason
Dixon line and the employer was not permitted to install air
conditioning -- except for the computer room. All we had were powerful
oscillating fans.

Imagine the chagrin when an office buddy came into the office and turned
on the fan because it was hot. It lifted most of carefully placed
cards off the other guy's desk and scrambled them! Took him about a
week to put cards back into order.

That's why for program decks, one would punch a sequence number in the
last 8 columns of the card. That way, if the deck was ever accidentally
shuffled, it could be put back in the proper order using a card sorter.

Now, what does all this have to do with DX anyway?

Ah! Once the decks were properly collated we used to draw a straight diagonal line across the pile so that we had some clue if the pile got "mishandled". I used a RED marker for my stuff, Others used a color unique so we could identify who "owned" the pile of cards.

Wasn't it fun to program "in the olden days?"

From: WB6PSY/N6AXK
Topic: 10281 Message: 10328

In California at the Long Beach field office of the FCC we had Grace. She would take one's calculator and clear it before the test and then re-clear it after the test. Fine by me - I didn't use one .... .. Grace also had a mirror on top of a filing cabinet in an adjacent room so she could spy on the testing room to see who was cheating. After a complaint of TVI by an FBI agent across the streetfrom me she sent me a letter telling me to quit working skip, point my beam away from any other house, put a low pass filter on my rig and quit using my linear amplifier. I had a friend who was a volunteer attorney for the FCC and on a trip to the field office he told Grace who she had cited and that I had a ham license and then asked her why she didn't look my name up. She said it was easier to cite me as a CB'er. A letter was sent to my neighbor telling him to put a filter on his TV and that I could transmit as I saw fit ;-)

The lady who ran the FCC office in Tampa had a similar reputation. Her sense of humor apparently went when her ex-husband went! She even held study material in a separate area when you tested. Once you entered the testing room, you had to surrender anything that she construed could be used on the test - with the exception of a calculator (this was 1979-80 timeframe), which she vigorously tested to make sure it didn't contain any helpful information.

Ah! Once the decks were properly collated we used to draw a straight diagonal line across the pile so that we had some clue if the pile got "mishandled". I used a RED marker for my stuff, Others used a color unique so we could identify who "owned" the pile of cards.

Wasn't it fun to program "in the olden days?"

Subject: Re: [DX-IS] Re: Created the World Wide Web? Al Gore did NOT invent it!

Assembling a deck of punch cards for early computer programs required
the cards be in the exact right order. It would take days to assemble
a several thousand card "deck". This usually involved creating dozens
of piles of program routines placed on the desk top and later assembled
into a contiguous "deck".

We had two man offices in those days. Work was just North of the Mason
Dixon line and the employer was not permitted to install air
conditioning -- except for the computer room. All we had were powerful
oscillating fans.

Imagine the chagrin when an office buddy came into the office and turned
on the fan because it was hot. It lifted most of carefully placed
cards off the other guy's desk and scrambled them! Took him about a
week to put cards back into order.

Does anyone remember the jumper plug in panels, patch panels, that used to be used for programming [AKA sequencing] electronic equipment? [circa 1955-60]

We used to use them for setting up the wiring into crossbar switches.

Cusses, it's really is tough getting older than I was this morning. This morning I could remember the names of the d--m things :-(

We just called them wire boards. Just about every card processing
machine had one; from the sorters to interpreters to accounting
machines. Anyone remember how to program an IBM 026 key-punch drum
card? I remember I used to carry one around with me. After a while
I would just sit down and punch up a new one when I had some punching to do.

The first computers we used didn't even have operating systems. When
you wanted to run a program you had to sit at the console and key in
the binary code to connect to the card reader, read the first card
into memory and then jump to the card image to execute a one-card
loader that would read in the rest of the cards which were punched in
binary or BCD "machine language."

When I was in SAGE at Fort Lee in the 50's we had about an acre size computer and around 150 display monitors. They called them consoles back then. They were pretty up-scale too. Of course they all had light guns and even a cigar lighter, ashtray and a telephone. They were all cabled up exactly the same, yet they were all different in what they displayed on the CRT screen. The screen was neat too as it was a 19 inch round CRT (something like a TV picture tube) with a 5 foot neck.

What made each one different from another, why a gismo called a CAT/DAB plug board. A wired up little board with a lot of yellow jumpers and holes to plug 'em all in, as desired, to display a different operational air defense situation on each console.

I have extensive experience on the 88 card sorter, but don't remember
any punch boards. You simply sort one column at a time, though there
was a punchout wheel to make it ignore selected digits.

I think you mean the model 77 collator, another necessity for any
card system. It did have a wire board.

I was remembering the multi-column selector on the Model 82.

The Model 77 was before my time (Thank God something was! :). All
of my work was on the Model 557 collator.

Dick

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-July, through Sunday, 19th-July, there were 199 countries active. Countries available: 3A, 3B8, 3D2, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S5, SM, SP, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TL, TN, TY, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4C12, MEXICO (Special Event/Satellite Op). Members of the Radio Club Queretaro announce to look for special event station 4C12SG to be active between July 20-27th. Activity is to celebrate the 12th anniversary of the operation from the "Sierra Gorda Queretana". Operations will take place from "Sotano del Barro", one of the deepest places in the world. Also, look for 4C12SG to be active on the satellites (Grid EL01), and if conditions permit, also on 6 meters. QSL via XE1RCQ. Log will be uploaded to LoTW after the event.

4W, TIMOR-LESTE. AL, CT1GPQ, will be active from here between August 3rd and October 3rd. Currently CT1GPQ doesn't know what his callsign will be, but his license issues are being arranged. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. His station setup will be an Icom IC-706 MK2g, a dipole for 40 and 30 meters and square loops for 20 and 17 meters. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@...
Activity logs will be online (possibly daily) on: http://algarvedx.com
All information will be sent first via the Algarve STAR DX Team Mailing List. Subscriptions are available on team's WEB site. PLEASE NOTE: This is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time.

9G, GHANA. Operators Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, and Donato/IZ2CHO will be active from Busua Beach in the Ghana Western Region between November 13-27th. Their activity will also include an IOTA trip to Abokwa Island (AF-084). They will use two different callsigns for their activities. Operations on the mainland will use the callsign 9G5TT, while operations on AF-084 will use 9G5XX. Activity will be on all HF bands (80-10 meters) and modes. Silvano/I2YSB informs OPDX that they do not have a licence for 160 meters, 60 meters and 6 meters. On AF-84 there will be one station on 20 meters only. The time of the operation on the island will be on a day to day bases, and will be depended on the sea condition and weather forecast. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

BX5, TAIWAN (AS-020 - RARE CONTEST IOTA). Jimmy, BX5AA, will be active during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via BX5AA.

C3, ANDORRA. Vini, IK2CIO, will be active as C31/IK2CIO between August 6-12th. Activity will be holiday style on 160-6 meters using CW and SSB. QSL via IK2CIO, by the Bureau or direct.

CO8, CUBA. Raul, CO8ZZ, informs that he will be active during RSGB IOTA Contest (July 25-26th) from the main island (NA-015, FL10mw) in the CW only category. QSL via DK1WI.

CR2, AZORES (IOTA Contest/LH Op). Members of Algarves STAR DX Team (a multi-national team) will activate Faial Island in the Azores using the callsigns CR2F, CR2N and CR2W, between July 18-31st. Operators mentioned

are: CT1EEQ, CT1EGW, CT3FN/HB9CRV, CU8AS, DJ2VO and HB9CQL. Callsigns
will be used for:
CR2F - For the Farol da Ribeirinha Lighthouse (WLOTA 1830) operation
between July 18□24th and July 27-August 1st.
CR2W - For the RSGB IOTA Contest (July 25-26th).
Activity from Caldeira do Faial Natural Reserve
CR2N - For the "Caldeira do Faial Natural Reserve" activity between
July 29-30th. Reference numbers: DPRN FF-212 and WFF CTFF-46.
Activity will be on 80-6 meters using CW, SSB and RTTY. QSL all callsigns
via CT1GFK, direct, by the Bureau or E-mail Bureau requests. Check QRZ.com
for more info. Official Web site is: http://www.to-mk.com/neu
Logs online will be at: http://algarvedx.com/logonline

CR3, MADEIRA ISLANDS (IOTA/LH Op). A groups of CT1/CT3 operators (from the Madeira Contest Team and G.I.R.A.) will be active as CR3D and CR3R from Chao Islet in the Desertas Islands group (AF-046) between July 24-26th. Activity will be on the HF and VHF bands using CW, SSB and the Digital modes. They will also be active in the RSGB IOTA Contest (July 25-26th). Operators mentioned are: Barros/CT3BD, Luis/CT3DL, Luis/CT3EE, Duarte/CT3EN, Duarte/CT3KY, Jose/CT3MD, Joao/CT3NY, Jorge/CT1BOL, Jose/CT1CJJ, Paulo/CT1EFS, Filipe/CT1ILT and Firmino/CT1IZW. For further information about this Project, please visit the CR3D QRZ.com page at: http://www.qrz.com/db/CR3D

EA9, CEUTA AND MELILLA. Yasuyuki, DJ1AIB/JR1AIB, will be active as EA9/DJ1AIB from Melilla between July 22-26th. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. QSL via JR1AIB.

EG, SPAIN (Special Event). Look for special event station EG5LB to be active during the follwing dates: July 26th, August 2-9th, August 16th, August 23rd, August 29th and September 6-7th. Activity is to celebrate the 200th anniversary of the birth of the illustrious Louis Braille, inventor of the tifloescritura system for the blind, and with the 30th anniversary of ARMIC, Association for Visually Handicapped Radio of Catalonia. QSL via EA3RKR, direct or by the Bureau. For more details, see QRZ.com or visit: http://www.gratisweb.com/ea3rkr/esp/index2.html

EH, SPAIN (Special Event). Look for special event station EH1SC to be active until July 24th. Activity is taking place during the "Celebrations of Santiago de Compostela". Operations will be on all the bands. QSL via: Radio-Noticias, Apartado 368, 15780 Santiago de Compostela (Spain). For more information, visit: http://www.radionoticias.com

EM360, UKRAINE (Special Event). Members of Ternopil Amateur Radio Club will use special callsign EM360B between August 14-18th, to mark the 360th anniversary of historical battle near the city of Zboriv. QSL via UY5BC.

GJ, JERSEY. Members of the Bristol Contest Group will be active as GJ6YB during the RSGB IOTA Contest (July 25-26th) from Jersey (EU-013, WLOTA L-0818) as a Multi-Op/Island-DXpedition entry. Operators mentioned are: EI3JE, EI7FJ, G3TKF, G3XSV, G3YHV, G3ZVW, G4CLA, G4FKA, G4NKT, G7TWC,

M0MAT and M1EBV. QSL via G3SWH, direct or by the Bureau.

IOTA NEWS.....
AS-060. Members of the Korean Contest Club and possibly others will be active as D93I (and also their homecall/4) from Pigum Island (KDN H32) between July 25-27th. Operators mentioned are: Han/DS2GOO, Yang/DS4CDA, Ryou/DS4NYE, Rocky/HL1VAU and a few other guest OP's.. They will have two complete HF stations with a dozen of vertical antennas nearby saltwater. Continuous activity is planned on 80-10 meters using CW/SSB/Digital. If the propagation allows, they will try some 6m openings to various directions also. During the IOTA contest, they will operate as a Multi-Op/Island-Expedition entry as D93I. QSLs for D93I are via DS4NYE and all others via their homecall.

EU-005. Members of the SANDS Contest Group (M0SCG), based in Morecambe, Lancashire, will be active as G1T from Sunderland Point, near Lancaster during the RSGB IOTA Contest (July 25-26th) as a Multi-Single entry. Reference numbers are: WAB Square SD45 and Grid LOC. IO84NB.

EU-006. Members of the South Dublin Radio Club and the City of Belfast Radio Amateur Society will travel to the Aran Islands off the coast of Galway hoping to build upon the successes of recent years, and be active as EJ0GI from Inis Oirr during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/DXpedition/High-Power entry. Some team members may be active under their home callsigns outside of the contest between July 23-27th. QSL via EI2SDR (information available on QRZ.com).

EU-006. David, EJ3GKB, will be active from Inis Oirr, July 23-27th. Activity will be on 80-6 meters before and after the RSGB IOTA Contest. Look for updates and pictures via Twitter (DavidGi8SKN), depending on time and signal reception.

EU-008. Members of the Cockenzie and Port Seton Amateur Radio Club (CPSARC) will once again operate from the Isle of Tiree (IOSA NH04, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA (Islands on the Air) Contest which runs from 1200z, July 25th to 1200z, July 26th, using the club's special contest callsign GM2T. Look for pre-contest activity by the members signing as MM0CPS/P. CPSARC heavily supports newcomers to their wonderful hobby and has a large number of newly licensed members who are actively encouraged to participate in their contest effort, whether experienced or not. This way not only does their hobby benefit from new operators, but contesting benefits as they invariably become bitten by the contest bug. This year's team consists of: Cambell/MM0DXC, Bob/GM4UYZ, John/ MM0JXI, Brian/M0RNR, Gary/MM0FZV, Moe/MM0MRM, Geoff/MM5AHO, David/MM0XDG, Ellis/GM4GZW, Bob/GM4IKT, Jim/G3VOU, Brian/

G4UJE, Jonno/M5FUN, Malcolm MM0YMG, Duncan/MM0GZZ and Steve/
MM3YPN. QSL GM2T via the Bureau, or their QSL Manager GM4UYZ,
by the Bureau or direct. Details are available at:
http://www.qrz.com/gm2t
For details about CPSARC, visit their revamped Web site at:
http://www.cpsarc.com
ADDED NOTE: This is the club's 11th anniversary on the island,
and the team would like to express their gratitude to all the
islanders who have looked after them over the years, but in
particular to Elaine Hutchinson of Elephants End Restaurant
(www.elephantsend.com) for her unrivalled support and
hospitality over the last 11 years.

EU-011. Members of the Cray Valley ARC will again be active on the
Scilly Isles between July 23-28th, on all bands, using the
callsign G3RCV/P. They will also be taking part in the IOTA
contest next weekend.

EU-031. Operators Alessandro/IW8EHK, Alfredo/IY7NGM, Catello/IZ8LLW
and Francesco/IZ8OFJ will be active as IC8/IW8EHK during the
RSGB IOTA Contest (July 25-26th). Other reference numbers:
Punta Carena WAIL CA-008, ARLHS ITA-124 and WLOTA L-2466.
QSL Manager: IK7JWX.

EU-036. Chris, OE9ICI, will be active as LA/OE9ICI from Kvenver,
Hitra Island (WW Loc. JP43EM), between now and August 1st.
Activity will be on all HF bands. QSL via his home callsign,
direct or by the Bureau. NO eQSL!

EU-048. Jean-Marc, F5SGI, will be active from Belle Ile (DIFM AT-015,
WLOTA 0872, Grid IN87) between now and July 31st. Activity
will be on 80-6 meters using CW, and an entry in the RSGB
IOTA Contest (July 25-26th). QSL via his home callsign, direct
or by the Bureau.

EU-059. (UPDATE) Col, MM0NDX, will be active as GM5A and MM0NDX/P
from St. Kilda (WAB NF19, SCOTIA D123, Grid Loc. IO75RT),
Scotland, between July 24-27th. This will be a family holiday-
style operation from the campsite in Village Bay. St. Kilda
is one of only two-dozen global locations to be awarded "World
Heritage Status" for both natural and cultural significance.
Col will participate in the 2009 RSGB IOTA Contest (July
25-26th) as GM5A. Outside of the contest he will sign MM0NDX/P
and possibly be active on 80 and 40 meters. QSL GM5A via
GM4FDM and MM0NDX/P via M0URX. A Web site is now active
for this activity at: http://eu059.wordpress.com/

EU-067. Operators Cliff/SV1JG and George/SV1RP will be active as
SX8M from Kyklades (Cyclades) Milos Island, Greece, during
the RSGB IOTA Contest between July 24-27th. QSL via SV1JG,
direct or by the Bureau.

EU-075. Steffen, DM3CW, will be active as J48AL from the Island of
Aigina (GIOTA SAS-045, MIA MG-007, WLOTA L-4088) between
July 21st and August 3rd. Activity will be holiday style
and operating CW only using 100 watts into wire antennas.
QSL via DM3CW, bureau preferred.

EU-122. Operators Sean/EI4GK, Pete/EI4GZB, Declan/EI9HQ, Pete/GI4VIV
and Joe/EI7GY will once again be active from Rathlin Island
as GI0MPG for this year's RSGB IOTA Contest (July 25-26th).
Operations will be from the Rathlin East Lighthouse (ARLHS
NTI-011), the same QTH as last year. QSL direct or by the
Bureau to GI0MPG.

EU-124. Members of the Barry Amateur Radio Society (BARS) will activate
Flatholm Island again for five days this year between Thursday,
July 23rd and Tuesday, July 28th. During the RSGB IOTA Contest
(July 25-26th), they will use the callsign GW8K. They will use
the callsign GB5FI for activity before and after the contest.
QSL via GW0ANA, direct or by the Bureau.

EU-124. (UPDATE) The Strumblehead DX and Contest group have now sealed
the final permission to activate Ramsey Island (EU-124), off the
West Wales coast, from the "Royal Society for the Protection of
Birds" an organization who own the island. They will be active
from 1800z, July 24th through to 1400z, July 27th taking in the
IOTA contest. They will be active using the club call MC0SHL
for the whole duration of the operation, and using MW9W in the
contest. They will be on all bands from 80-10 meters SSB. There
is also some 30 meters RTTY planned by G1VDP if the other guys
allow him, with participation in the last 80m Club Championships
DATA section. They will be operational using generators as
power. Radios used will consist of 2 K3's and a Yaesu FT1000MP
MkV and amplifiers. Antennas will consist of a Hexbeam, a windom
and dipoles. Most of the activation is for the WAB award scheme
as the square is semi rare and has not been activated for some
time. They will be looking for JA and Asia during their mornings
and evening on all bands. The team will be on from the farm for
a few days before and after using the GB0WFF for the World Flora
and Fauna award see http://www.wff44.com for award details,
and using the MC0SHL club call and erecting a tower for Rob,
MW0RLJ. The island will not only count for the WAB award but
will also count for the WFF award. A special QSL card printed
for both club callsigns. Full details are on the group's Web
site <http://www.mc0shl.com>. QSL via the groups manager M0URX.

EU-125. Operators Gabi/DF9TM, Frank/DL2SWW and Ric/DL2VFR will be
active as OZ0FR from Romo Island (NS-001 for the Danish Islands
Award) between July 23-27th, including the IOTA Contest (July
25-26th). Activity will be high power on CW and SSB into a
yagi antenna for 20-10 meters, a SteppIR vertical (BigIR) for
40-10 meters and dipoles for 80 and 40 meters. This activity
will also count for the World Flora and Fauna Award (WFF -

for OZFF-004). QSL OZ0FR via DL2VFR (also via the DL Bureau, do not send QSLs via OZ Bureau). More details at: http://www.iota-expedition.de

EU-135. Anders, SM5EFX, will be active as SM5EFX/2 from Ledskar Island between now and July 31st. Activity will be on all HF bands and modes. He will also participate in the RSGB IOTA Contest (July 25-26th) using the special callsign SF2X. QSL both calls to SM5EFX, direct or by the Bureau.

NA-057. Ray, WQ7R, will be active as HQ9R from Roatan Island (Grid EK66) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via K5WW.

NA-154. Operators Dana/VE1VOX and Don/VE1AOE will be active as VC1W from Welsh Island (new CISA), August 22-25th. They plan to have two stations on the air and possibly more operators to join their operation as the date approaches. This is a remote island and weather may affect the actual dates. QSL Manager is VE3EXY.

EU-171. Operators Rene/DL2JRM and Netti/DO6XX will be active as OZ/homecall/p from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between now and August 1st. Activity will include the RSGB IOTA Contest (July 25-26th). Operations will be on 80-10 meters CW using 100 watts into a dipole/GP. QSL via their home callsigns, direct or by the Bureau.

EU-174. Tomas, HA0NAR, will once again be active as SX8R from Thassos Island (MIA MG-124, GIOTA NAS-037, WLOTA LH-4186, QRA KN20hs), Greece, July 22-31st. Activity will be on 80-6 meters using CW and SSB. He will also be an entry in the RSGB IOTA Contest (July 25-26th). He will use 100 watts and monoband antennas (Inverted Vee for 80m, verticals on a Spider pole and fishing rods for the other bands). QSL via HA0NAR, by the Bureau or direct.

EU-180. A Ukrainian and Moldavian team will be active as homecall/p from Tuzla Island between July 23-27th. Activity will be on CW and SSB. Operators mentioned are US0KW, US0ZZ, UT2XQ, UT4ZG, UT7UT, UU0JM, UU1AZ, UU4JDD, UU4JMG, UY6IM, UT/ER1DA, UT/ER3DW, UT/ER3DX and UT/ER3ZZ. QSL via their home callsigns. They will the "Black Sea Contest Club" callsign UU7J/P during the RSGB IOTA Contest (July 25-26th). QSL via UU0JM.

EU-181. Operators Gabriele/LZ/IK3GES, Boyan/LZ1BJ/1 and Lyuben/LZ1ZC/1 will be active from Sveta Anastasiya Island (WLOTA L-0035) between July 24-27th. They plan to use 100 watts into a 10 element log-periodic on 20/17/15/12/10 meters. Some activity on 40/30/6 meters is also possible. QSL via the QSL Bureau to their home callsigns.

NA-081. Operators Ken/W8ND, Butch/N8CHS and Kelly/K8MCN will be active as W8ND/VE1 from Big Tancook island (CISA NS012, WW Loc. FN74WL, Lunenburg County, Nova Scotia), July 23-26th. Activity will include the RSGB IOTA Contest (July 25-26th). QSL via K8MCN, direct or by the Bureau.

OC-148. Arif, YC9MDX, will be on the air from Kupang, Timor Island (WLOTA 0019) during the RSGB IOTA Contest (July 25-26th). Activity will be on 40/15/10 meters SSB only. QSL via B7DX, direct only (QRZ.com).

SA-023. Operators PY6AWV, PY6HD and PY6RT will be active as ZZ6Z between July 24-26th. Activity will include the RSGB IOTA Contest. Their operations will be on 80/40/20/17/15/10 meters SSB only. QSL direct or bureau to PY6HD or LoTW. No E-QSL.

SA-023. Operators Orlando/PT2OP and Marcelo/PY6KW will be active as PV6I between July 24-27th. Activity will include the RSGB IOTA Contest (July 25-26th). QSL via PT2OP.

LUNAR EVENT ON AO-51. On "July 20th, AMSAT-NA will mark the 40th anniversary of the first manned lunar landing with a special event on AO-51. AO-51 will transmit a message commemorating the event Monday, July 20th, during evening passes in the U.S. and Europe. The message will be transmitted on the 435.300 MHz FM downlink and will contain a Robot 36 SSTV image as well as a voice message.

KH6BZF PROPAGATION FORECAST/REPORT (For July 20-26th).....
20 AN SOLAR REFERENCE
21 AN ---------------
22 AN AN - Above Normal/Geomagnetic Level is QUIET
23 AN HN - High Normal/Geomagnetic Level is UNSETTLED
24 AN GEOMAGNETIC REFERENCE
25 AN ---------------------
26 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
SPECIAL NOTE: By the time you read this, Lee should be active from Gore Bay, Manitoulin Island (CISA ON-001), in Ontario, Canada. He will be there through July 29th, using an Icom-706MKIIG into a TarHeel II antenna or wire/dipole antenna.

LIGHTHOUSE ACTIVITY.....
The Old Barney ARC will be operating as N2OB from the Barnegat Lighthouse (USA-039) on Long Beach Island, NJ (IOTA NA-111), on August 1st from about 1300-2100z. There will be two stations set up with activity primarily on 20 and 40 meters SSB. QSL via N2OB.

The Old Barney ARC <http://www.obarc.org> will be operating as W2T from the Tucker's Island Lighthouse (USA-911) in the Tuckerton Seaport <http://www.tuckertonseaport.org>, August 15-16th from about 1300-2100z each day. There will be two stations set up with activity primarily on

20 and 40 meters SSB. QSL via N2OO.

MJ0, JERSEY (EU-013). Mat, F5SHQ, will be active as MJ0ASP during the RSGB IOTA Contest (July 25-26th) as a Single-Op/Low-Power entry. QSL via MJ0ASP.

OH0, ALAND ISLAND (EU-002). Operators Juha/OH6XX and Timo/OH6GLE will be active as OH0Z during the RSGB IOTA Contest (July 25-26th) as a Multi-Op/ Island entry. QSL via W0MM.

PACIFIC TOUR #1. Operators Claudia/K2LEO/PA3LEO and Andrea/IK1PMR are currently planning a Pacific trip for November and December. Preliminary planning includes DX activity from Western Samoa (5W), Tonga (A3) and possibly Rarotonga in the South Cook Islands (E51). They are inviting DXers (with or without DXpedition experience) to join their operations, even for a single destination (A3 being the main DX stopover). If you are interested in joining Claudia and Andrea□s Pacific DX tour, visit their Web page (still under construction) for more details and how to contact them at: http://www.ik1pmr.com/plans/a3

PACIFIC TOUR #2. Chris, DO7AG, will be flying to the South Pacific with his family between November and January. He plans to be active as 5W1QX from Western Samoa and A31CE from Tonga. Activity will only be on 40 and 20 meters (this is due to the type of license he has). Complete dates of activation are to be determined. ADDED NOTE: Chris realizes that another operation from A3 and 5W will be going on at the same time (see above), and he hopes to meet Claudia and Andrea.

QSL INFO AND NEWS.....
5C2 QSLS STATUS. Alfredo, IK7JWX (5C2J), informs OPDX that he has received the QSLs from the printer and expects to start sending out QSL, for all the confirmations this week of all the 5C2 team's QSOs from Morocco (Essaouira & Lh. MOR-019).

CS28MCF LOG ONLINE. The Algarve S.T.A.R. DX Team reports that the CS28MCF log is now available online at: http://algarvedx.com
Last update was 17th, July, 2359z. Attention: 400 QSOs are missing and will be added next Monday. Some pictures will be uploaded today.
CS28MCF - 5000 QSOs in log now. Operations stopped at 19th,July, 2259z.

QSL EA6/HA5GY/qrp via his home callsign. Activity on July 15th, was from a lighthouse (BAL-005), QRA is JM19EN.

Nilay Mine AYDOGMUS, TA3YJ (XYL), transferred all her duties and rights concerning the management (TA3YJ QSL Service) to her husband Berkin AYDOGMUS, TA3J, because of the "severe sanitary conditions" of her parents. The new QSL Manager is now Berkin AYDOGMUS, TA3J (TA3J QSL Service). He is the QSL Manager of the following: HA/TA3J, LZ1/TA3J, LZ2/TA3J, LZ2/TA3YJ, OE/TA3J, OK/TA3J, SV1/TA3J, SV1/TA3YJ, SV4/TA3J, TA3CEH, TA3J, TA3J/0 (IOTA-AS099), TA3J/0 (IOTA-AS115), TA3J/1, TA3J/3, TA3J/3 LH (ARLHS#TUR006), TA3J/4, TA3J/4 LH (ARLHS#TUR065), TA3J/7, TA3J/60, TA3PI, TA3YJ, TA3YJ/0 (IOTA-AS099), TA3YJ/3, TA3YJ/3 LH

(ARLHS#TUR006), TA3YJ/4, TA3YJ/4 LH (ARLHS#TUR065), TA3YNO, TA3YPI, TA7KI (ARI2009), TC2K4J, YM125ATA, YM125ATA/4, YM1907FB, YM21TA, YM3ATA, YM3BU, YM3LZ (WAE2000SSB), YM3LZ (WPX2000SSB), YM3SV and YM75TA. His Home page is: http://www.aydogmus.gen.tr/ta3j/qslservice.htm His E-mail address is: ta3j@...

NOT THE QSL MANAGER. John, ZB2EO, reports that RW6HS is NOT and has never been his QSL Manager, and that all QSLs for ZB2EO and ZG2EO, should be sent DIRECT to address as per QRZ.com.

QSLS VIA LOTW: 3D2YA, 4O3A, 4U1UN, 5N0OCH, 9Z4FZ, EU7SA, IU9T, PY0FF, R1ANL, SM5IMO and ZC4LI

QSLS RECEIVED VIA MAIL: 4S7NE, A73A, CE4WJK, CT1HZE, DP1POL, EA6BH, HB0/DJ1AIB, J88DR, JT1AGO, JT1ZP, JW5LJA, KH7Y, LA6YEA, MJ/DL7AFS, MJ/DJ7ZG, R1ANB, R1ANC, VK9LA, VY0A, YV4AB and ZK3MW

QSLS RECEIVED VIA THE BUREAU: 5B/DF9TM, 6V7J, 6V7K, 6W1RW, 6W7RV, 9A0CI, EA8AH, EB5KB/P, EE5GG, EH5K, EK3GM, ER10KDR, ER5DX, GB1SRI, HA8IE, HG0HQ, I1ZHH, IF9A, II8ANT, II8IPY, IK5CAC/7, IK6CAC, IQ0FR/6, IQ5PJ, IW9FRA, J20MM, OD5WPX, OG5M, OH2/DL5ME, OJ0/SM0LQB, RA2FBC, SM3PZG, TK/IK1YED, TM5B, UA6UDV, US0LW, VE3MIS, VE3XD and ZY7C

SU8, EGYPT (LH Activity). Operators Greiss/SU1GS, Mohamed/SU1AO and Said/SU1SK received permission from the NTRA (Egyptian's National Telecom Regulatory Authority) to use the callsign SU8LH during the first activity from an Egyptian lighthouse on Ras El-Bar Island (Not IOTA), 250km north of Cairo, between August 1-9th. Look for SU8LH to participate in the International Lighthouse/LightShip Weekend (ILLW). Activity will be on CW and SSB, 6 meters and the HF bands. They will be running 100 watts into wires antennas. For a brief detail about the event and location, go to: http://www.qsl.net/su1sk/Links.html
QSL via SU1SK. For info on the ILLW, go to: http://illw.net/2009_list.htm

SV5, DODECANESE. Tom, OK2PTZ, will be active as SV5/OK6Y from Kos Island (EU-001) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/Mixed-Mode entry. He states, "I will be on the island Saturday 25th. I hope I will be ready for 2nd part of the contest." QSL via OK2PTZ.

TC21, TURKEY (Special Event). Members of the Turkish group called SWAT (Special Wireless Activity Team) will be active as TC21BSR from Istanbul between July 14-20th, during the 21st Bosphorus Race. It is the only event which starts from one continent (Asia) and ends at a different continent (Europe). See the following for details at:
http://www.turkishnoc.org/tr/Faaliyet/bgz/2009/Bgz2009.htm
Activity will be mainly on the HF bands using SSB and SSTV, and the VHF-UHF on FM. More information is available on QRZ.com the TCSWAT Web page at: http://www.tcswat.org

TP60, FRANCE (IOTA Contest/Special Event). Francis, F6FQK, reports that members of the "Council of Europe Radio Amateur Club" (CERAC) will be active as TP60CE to celebrate the 60th anniversary of the "Council of

Europe", as well as be an entry in the RSGB IOTA Contest. Look for them between July 24-26th. QSL via F5LGF. An online log search will be available at: http://ewwa.free.fr

V73, MARSHALL ISLANDS. JA operators Fuminor/JA2DSQ and Yuji/JH2BNL will be active from Majuro (OC-029) between August 24-29th. JA2DSQ will be signing as V73NF on the lower band using CW. JH2BNL will be signing as either V7XX or V73J operating 80-10 meters using SSB and RTTY. QSL via their home callsigns.

VK9N, NORFOLK ISLANDS. Just a reminder that the members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VK9NI between July 22-29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. QSL via W3HNK. More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VK9X, CHRISTMAS ISLAND (OC-002). Operators Harry/DM5TI, Rene/DL2JRM and Thomas/DL2RMC will be active from here between November 21st and December 5th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. They plan to use verticals and beams, and also be an entry in the CQWW DX CW Contest (November 28-29th). QSL via DL1RTL, by the Bureau or direct.

VP2V, BRITISH VIRGIN ISLANDS. Curt, W3HQ, will be active as VP2V/W3HQ from Virgin Gorda between December 4-16th. Activity will be CW only. Bands will be mainly 160 and 10 meters on weekends, and 30/17/12 meters during the week. QSL via W3HQ. Skeds are welcomed (2 way QRP skeds are preferred). His E-mail address is: w3hq@...

VY1, CANADA (Yukon on 160 Meters!). Operators John/KL7JR, Claire/WL7MY and KL7BO will be active as VY1RST during and after the ARRL November SS Phone Contest from near Beaver Creek, Yukon, between November 20-26th. Emphasis will be on 160/80 meters SSB (using a 160m Inverted L) with a 2nd station on for 40-10 meters (vertical) SSB and PSK-31. QSL Manager is KL7JR. E-mail skeds are welcome at: John.ReisenauerJr@alyeska-pipeline.com

XV, VIETNAM (IOTA Op). Sigi, DL7DF, will lead a crew of operators to be active from the Island of Phu Quoc (AS-128) between November 4-17th. Their callsign has not been announced yet, but it is expected to be the XV prefix. Activity will be on 160-10 meters using CW and SSB with several stations on the air. One station will be exclusively dedicated to RTTY, PSK31 and SSTV. Their equipment consists of 3 transceivers (two K2 and one IC7000) with three kW linears into two 18m lowband verticals, a 2 element vertical for 40m, a 2 element vertical for 30m, two Spiderbeam for 20/17/15/12/10m, and some beverage antennas. Operators mentioned are: Manfred/DK1BT, Wolf/DL4WK, Andy/DL5CW, Sigi/DL7DF and Frank/DL7UFR. Pilot station for this DXpedition is Bernd, DF3CB. QSL via DL7DF, by the German QSL Bureau or direct to: Sigi Presch, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. PLEASE NOTE: If you prefer a direct QSL, please send a SASE and 1 IRC or 3 USDs for outside

of Europe and 1 IRC or 2 USDs for mail within Europe. If you do not provide the right return postage or a self addressed envelope, they will reply via the bureau. Please only one callsign per letter! If more than one, all additional cards go via the bureau. For complete details, visit: http://www.dl7df.com/xv/index.html

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 19 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 200 Issued at 2200Z on 19 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 18/2100Z
to 19/2100Z: Solar activity continues to be very low. No flares
occurred. The disk remains spotless, now for the eighth successive
day.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 18/2100Z to 19/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next 24 to 36 hours. The effects of a
high speed solar wind stream are due on July 21-22. Unsettled to
active conditions should prevail during that interval.
III. Event Probabilities 20 Jul-22 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 19 Jul 068
Predicted 20 Jul-22 Jul 067/067/067
90 Day Mean 19 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 18 Jul 001/003
Estimated Afr/Ap 19 Jul 001/005
Predicted Afr/Ap 20 Jul-22 Jul 005/008-015/018-010/010
VI. Geomagnetic Activity Probabilities 20 Jul-22 Jul
A. Middle Latitudes
Active 05/25/20
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Here's one for you old-timers.

I was at Commodore (CFO) when the Pet came out.

When I left, serial number 1 of the Pet was in my office and they gifted it to me as a going away present.

I still keep it in my office.

PET.JPG

http://www.goldtel.net/PET.JPG

Can you imagine. 4K of RAM. And that old reliable Commodore BASIC.

Don

You are successful! At 71+ years of age and 55+ years of ham radio I have finally found an artifact I did not know about! Guess I was born too late. Ahh! Wonderful to be young .. I think but I'm not sure ,,, I can't remember.

10345. 5N

Yahoo group: DX-IS (2009)
Date: 2009-07-20 22:07:42 UTC
From: Dale Cole K9TTT
Topic: 10345 Message: 10345

Hate to barge in on the board and actually not be a computer remark-however I am enjoying the conversation very much

Now, was there a comment way back when about a 5N or such that the station was unlicensed, or did not meet DXCC criteri or sumpin?

Just recieved a 5N*** card, that I belliege is 100% solid citizen.

Thanks
Dale K8TS

#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 201 Issued at 2200Z on 20 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 19/2100Z
to 20/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 19/2100Z to 20/2100Z:
The geomagnetic field was predominantly quiet, with isolated
unsettled conditions. Solar wind data observed at ACE was consistent
with a co-rotating interaction region.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled, with isolated active levels, on
day one (21 July) as an anticipated coronal hole high-speed stream
(CH HSS) becomes geoeffective. Quiet to unsettled conditions are
expected on day two (22 July) as the CH HSS begins to wane.
Activity is expected to decrease to quiet levels on day three (23
July).
III. Event Probabilities 21 Jul-23 Jul

Hi Dale,

It was 5N/LZ1QK that was being bounced by the ARRL for not
enough documentation. I don't know if that has been
rectified. 5N0OCH QSLs have been coming out, and this station has
been providing LoTW matches. Given that 5N0OCH uploads to LoTW are
getting through the system, it is almost certain he has provided
sufficient evidence to the league that his QSLs are acceptable.

Well today W0MM and I K5LBU take off for South Africa and Lesotho. We will meet up with the rest of the group on the 29th in Roma, Lesotho. In the mean time Laurent and I will be touring in Kruger National Park where we will set up a portable station each night and operate some as Portable ZS6. CU on the air and gud DX.

10351. Re: COMMODORE 64 AND DOCTOR DX

Yahoo group: DX-IS (2009)
Date: 2009-07-21 13:35:27 UTC
From: Bill
Topic: 10290 Message: 10351

Yes, I had a great time with DoctorDX in the early 1980s. Had a Vic20 and a Commodore64.---Doctor DX was my inspiration to emulate it on the PC. In 1996, I wrote a PC program called CyberDX-CW, which worked somewhat like DoctorDX, with noise, QRM, logging, and automated DXCC type accounting. Actually, I still sell a copy of it every once in a while. That program inspired CyberCWContest, which actually sold better and still does, after 13 years and a few updates, mainly to keep the countries list somewhat up-to-date. CyberDX-CW mainly targeted a DXCC crowd, CyberCWContest targeted the contesters. The first version only implemented the CQWW-CW contest, a few years later, I added the ARRL DX contest format for US stations and a dx-pedition format so that you could do a virtual contest from any country on earth. Both programs had propagation simulators so signals respond in a realistic manner, given local time, band, and how rare the country was. These programs had some unique (at the time) features; visual display of a telnet spotting network, that allowed point and click, cause the virtual receiver to change to that frequency. Another unheard of feature in those days was a virtual spectrum display that displayed the relative signal strength of virtual staions on the band, with point and click on individual stations and have the virtual receiver tune to that station. Even now radio manufactures have missed that feature. I thought we would see it on the ICOM 7800, which has a USB port that would handle an input from a mouse. I think it would be trivial for ICOM to add a pointer on the display, controlled by a mouse or keyboard, to point to a blip on the display and tune it in within the receiver's band width. There was also a built-in virtual Logger with function keys that worked like TR-LOG. Some hams used these programs on their laptops in an aircraft or at a hotel. --- At Dayton, in 1997, I had an experience with an older ham. I had CyberDX-CW running with audio on. He said, "that receiver is really picking up some good stuff inside this building." I explained the virtual radio concept. Well, he tuned it for a while, copied some CW in his head and even talked to his buddy about it. Then he looked up and asked me where was the antenna? I knew then that the concept of a virtual receiver had not gotten through. I explained the concept and the implementation again, slightly differently, but the result was the same. In his mind, the computer was a receiver with a crt front panel. I explained everything again. Obviously, it didn't sink in and as he was walking away, he turned and said again, "where is the receiver".---Do a google search on CyberDX-CW or CyberCWContest for info. Bill, N5RR

Yes, I would guess that. Just curious. When Ralph was there he worked most bands down to 50 meters a lot. I used to hear him practically every day on 40 CW. I didn't have capability for 80 or 160 then, so I don't know if he worked those bands.

I'd love to work 7P on 80 meters. Maybe we can make it.

From: Paul Dunphy
Topic: 9721 Message: 10355

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 21 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 202 Issued at 2200Z on 21 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The solar disk continues to be void of sunspots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (22-24 July).
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
The geomagnetic field was quiet during the past 24 hours. A solar
sector boundary crossing from negative to positive was observed at
the ACE spacecraft around 0145Z; yesterday's anticipated high speed
stream did not materialize as solar wind speeds held steady in the
range between 300-340 km/s. There was a possible second solar sector
boundary crossing back to negative polarity at about 1800Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (22-24 July).
III. Event Probabilities 22 Jul-24 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 21 Jul 068
Predicted 22 Jul-24 Jul 068/068/068
90 Day Mean 21 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 20 Jul 003/006
Estimated Afr/Ap 21 Jul 005/005
Predicted Afr/Ap 22 Jul-24 Jul 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 22 Jul-24 Jul
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10356. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-22 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10356

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 22 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 203 Issued at 2200Z on 22 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. No flares occurred during
the last 24 hours. The visible solar disk is spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was at quiet to major storm conditions.
Observations from the ACE spacecraft observed a gradual increase in
the solar wind velocity starting around 22/0000Z. This was followed
by an increase in density, variations in the IMF Bz (-17/+14 nT),
and enhanced Bt (peaks to 17 nT) between 22/0000Z and 22/0800Z.
Current solar wind speeds are averaging around 470 km/s indicating
the influence of the anticipated coronal hole high speed stream.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled, with a slight chance for isolated
active levels, for the next two days (23-24 July). Mostly quiet
conditions are expected for day three (25 July) as the coronal hole
high speed stream begins to wane.
III. Event Probabilities 23 Jul-25 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux

DX Bulletin 29 ARLD029
>From ARRL Headquarters
Newington CT July 23, 2009
To all radio amateurs

SB DX ARL ARLD029
ARLD029 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MEXICO, 4C. Look for special event station 4C12SG to be active until July 27. Operations will take place from ''Sotano del Barro'', one of the deepest places in the world. Also, look for 4C12SG to be active on the satellites (Grid EL01), and if conditions permit, also on 6 meters. QSL via XE1RCQ.

CANARY ISLANDS, EA8. AO8GTC will be active with four stations using CW, SSB and digital modes on July 25 and 26 to celebrate the commissioning of the largest optical telescope at the ''Roque de los Muchachos'' obervatory on La Palma (AF-004). QSL via EA8RCP.

TAIWAN, BX5. Jimmy, BX5AA, will be active from AS-020 during the RSGB IOTA Contest as a Single-Op/All-Band/High-Power entry. QSL via BX5AA.

ANDORRA, C3. Vini, IK2CIO, will be active as C31/IK2CIO between August 6 and 12. Activity will be holiday style on 160 through 6 meters using CW and SSB. QSL to IK2CIO, via the Bureau or direct.

CUBA, CO8. Raul, CO8ZZ, will be active during the RSGB IOTA Contest from NA-015, in the CW only category. QSL via DK1WI.

MADEIRA ISLANDS, CR3. A groups of operators from the Madeira Contest Team and G.I.R.A. will be active as CR3D and CR3R from Chao Islet in the Desertas Islands group (AF-046) between July 24 and 26. Activity will be on the HF and VHF bands using CW, SSB and the digital modes. They will also be active in the RSGB IOTA Contest.

BAHAMAS, C6. Pete, W2GJ, Ed, K3IXD, Dallas, W3PP, and Jim, K4QO, will be QRV until July 27. They will sign C6APR in CW and SSB on 80 through 10 meters and also during the IOTA Contest. Other calls used will be C6AXD in RTTY and C6AQO on 6 meters. All three calls also count for the Bird Rock Lighthouse (ARLHS BAH-005). The QSL manager for all their calls is K3IXD.

CEUTA AND MELILLA, EA9. Yasuyuki, DJ1AIB/JR1AIB, will be active as EA9/DJ1AIB from Melilla until July 26. Activity will be on 160 through 6 meters using CW, SSB, RTTY and PSK. QSL via JR1AIB.

LIECHTENSTEIN, HB0. David, HB0/ON4DN/p, will be active July 24 to 26. He is working holiday style in SSB and digital modes on 40 through 10 meters, with a special focus on 30 meters. QSL via home call, direct or via bureau.

JERSEY, GJ. Members of the Bristol Contest Group will be active as GJ6YB during the RSGB IOTA Contest from (EU-013, WLOTA L-0818) as a Multi-Op/Island-DXpedition entry. QSL via G3SWH, direct or by the Bureau. Also, Mat, F5SHQ, will be active as MJ0ASP during the RSGB IOTA Contest as a Single-Op/Low-Power entry. QSL via MJ0ASP.

ALAND ISLAND, OH0. Operators Juha, OH6XX and Timo, OH6GLE will be active as OH0Z during the RSGB IOTA Contest as a Multi-Op/Island entry. QSL via W0MM.

DODECANESE, SV5. Tom, OK2PTZ, will be active as SV5/OK6Y from Kos Island (EU-001) during the RSGB IOTA Contest as a Single-Op/Mixed-Mode entry. QSL via OK2PTZ.

BELIZE, V3. Per, LA5OPA, will be QRV as V31NP from Ambergris Cay (NA-073) between July 26 and August 12. He will work in SSB and PSK31 mostly on 20 meters. QSL via bureau or direct to LA5OPA.

TOGO, 5V. Franco, I1FQH, is QRV as 5V7PRF until July 30. You can find him mostly in CW on 80 through 10 meters but sometimes also in SSB. Please QSLs direct, via bureau, LoTW or eQSL via his home call.

GREENLAND, OX. Bo, OZ1PIF, is operating OX3LX until August 1. He is QRV on six meters from grid square GP60. QSL via OZ1PIF.

FAROE ISLANDS. OY. Thomas, OY/OZ1AA, is now QRV from the OY6FRA club station in the capital, Torshavn. He is on HF and 6 meters using CW and SSB. QSL via OZ1ACB, Allis Andersen, Kagsaavej 34, DK-2730 Herlev, Denmark.

MOROCCO, CN. CN10FT is QRV until August 20 commemorating the 10th year of the reign of the King of Morocco, Mohamed VI. Operators are CN8ZG, CN8CMZ, CN8KD, CN8NK and CN8SG. QSL via EA7FTR.

CROATIA, 9A. Operators 9A6NL, 9A/HA6PS, 9A/HA7JJS, and 9A/HA7PL will be QRV until July 29, including an entry in the RSGB IOTA Contest from IOTA EU-170. They will be active before and after the

contest on all HF bands plus 6 meters using CW, SSB and digital modes. QSL via the HA bureau or direct to the op's home call.

UKRAINE, UT. Look for UU7J/P in the RSGB IOTA contest from Tuzla Island, EU-180. QSL via UU0JM. Ops US0KW/P, US0ZZ/P, UT2XQ/P, UT4ZG/P, UT7UT/P, UU0JM/P, UU1AZ/P, UU4JDD/P, UU4JMG/P, UY6IM/P, UT/ER1DA/P, UT/ER3DW/P, UT/ER3DX/P and UT/ER3ZZ/P will operate CW and SSB from this location until July 27. QSL via home calls.

GHANA, 9G. Operators Alfeo, I1HJT, Silvano, I2YSB, Carlo, IK1AOD, Vinicio, IK2CIO, Angelo, IK2CKR, Marcello, IK2DIA, Stefano, IK2HKT, and Donato, IZ2CHO will be active between November 13 and 27. Their activity will also include an IOTA trip to Abokwa Island (AF-084). They will use two different call signs for their activities. Operations on the mainland will use the call sign 9G5TT, while operations on AF-084 will use 9G5XX. Activity will be on 80 through 10 meters, using all modes. QSL via I2YSB, direct only.

THIS WEEKEND ON THE RADIO. The 144 MHz Digital EME Championship, IOTA Contest and the Flight of the Bumblebees are on tap for this weekend. Please see July QST, page 76 and the ARRL and WA7BNM Contest Web Sites for details.

25 July 2009 A.R.I. DX Bulletin
No 951
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3DA0 - David, GI4FUM/EI4DJ (3DA0DJ) will be visiting Swaziland for the third time, from 30 July to 11 August. This year he will be joined by Tony/G4LDL (3DA0TB), Malcolm/GM3TAL (3DA0MH), Gerry/M0VAA (3DA0VA), Mike/NC4MM (3DA0MM) and Yuri/UT5EL (3DA0EL). The purpose of this trip is to service a scout radio station at an international scout camp near Manzini with the callsign 3DA0SS, using wire antennas and relatively low power. The main operation site will be at the Hawane Resort in Western Swaziland, where there is a good antenna farm and they can run high power. They will operate two HF stations around the clock, depending on propagation. QSLs via GI4FUM. Further details and photographs are available at http://www.gi4fum.co.uk [TNX GI4FUM/EI4DJ]
4W - Al, CT1GPQ will be active from East Timor (callsign TBA) between 3 August and 3 October. He plans to operate mainly CW, with some SSB and RTTY, on 40 and 30 metres (with a dipole) as well as on 20 and 17 metres (with square loops). Al will be part of a medical team, and will be QRV only when time permits. QSL via CT1GFK, who will also the pilot station (he can be reached at star@...).
Updates and on-line log search will be available at http://algarvedx.com [TNX CT1GFK]
9G - Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT and Donato/IZ2CHO will be active as 9G5TT from Busua Beach, Ghana on 13-27 November. They will have three stations active on 80-10 metres (neither 160m nor 6m are allowed) CW, SSB and RTTY. They will also operate as 9G5XX from nearby Abokwa Island (AF-084), with one station on 20 metres. Activity form the island will be planned day by day, depending on sea conditions and weather forecast. QSL via I2YSB, direct only. Further information can be found at http://www.i2ysb.com/
BY - The Wangjing DX club of Beijing will be active from the Liaoning Province East Group (AS-158) on 24-26 July, IOTA Contest included. Operators mentioned are BD1HFP, BG1MFE, BG1TEM, BG1UXS, BG1WUM, BH1BRF and BH1INL. Expect them to be signing homecall/2 on 40-10

metres SSB. QSL via home calls. [TNX BH1INL]
CP - Toni, EA5RM will be working in Bolivia in August, and expects to operate as CP1XRM in his spare time. [TNX EA5RM]
CT8 - Hermann/CT3FN, Antonio/CU8AS, Juergen/DJ2VO and Rudi/HB9CQL will operate CW and SSB as CR2N from the Caldeira do Faial Natural Reserve on Faial Island (EU-175), Azores on 29-30 July. QSL via CT1GFK. [TNX LZ1ZF]
EA - Niko/DD1MAT, Oscar Luis/EA1DR, Kepa/EA2DCF, Chris/EA3NT, Pablo/EA4TX, Rick/EA4ZK, Julen/EB2BXL and George/EC2ADN will participate in the IOTA Contest as AM1M from Mouro Island (EU-142). QSL via EA1DR. [TNX DD1MAT]
EA - Celebrating the 200th anniversary of the birth of Louis Braille, special callsign EG5LB will be used again on 26 July, 2-9 August, 16 August, 23 August, 29 August and 6-7 September. QSL via EA3RKR, direct or bureau. [TNX EA3RKR]
F - Celebrating the 60th anniversary of the Council of Europe, the local amateur radio club (http://ewwa.free.fr) will be active again as TP60CE on 24-26 July. QSL via F5LGF. [TNX F6FQK]
FK/C - George, AA7JV and Tomi, HA7RY will be active as TX3A from the Chesterfield Islands (OC-176) between 23 November and 6 December (actual operating dates are subject to change due to weather and other variables). The callsign TX3A is licensed for only 14 days of operation. Should they arrive earlier or leave later that the dates licensed, they will operate as FK/AA7JV or FK/HA7RY. Although George and Tomi intend be active also on the higher bands, this will be "another simple low-band DXpedition" with a strong focus on 160, 80 and 40 metres (in that order). QSL via HA7RY, direct or bureau. The use of the Online QSL Request Service (to be launched on the website once the expedition is over) is encouraged. The log will be uploaded to LoTW and eQSL. Further information and updates can be found at http://www.tx3a.com/ [TNX HA0HW and AA7JV]
G - The Cray Valley Radio Society will be active as G3RCV/p (QSL via G4DFI) and G0FDZ/p (on 5 MHz, QSl via home call) from the Scilly Isles (EU-011) until 29 July. They will participate in the IOTA Contest as M8C (QSL via G4DFI). [TNX 2E0RCV]
GM - MM1M (QSL via G3VCQ) is new callsign the Sheffield DX Net ARC will be using during the IOTA Contest. They will operate from the Isle of Arran (EU-123) until 27 July; MS0SDC/p will be in use before and after the Contest. [TNX G3VCQ]
GW - The Barry Amateur Radio Society will be active as GB5FI from Flatholm Island (EU-124) until 28 July. They will participate in the IOTA Contest as GW8K. QSL via GW0ANA, direct or bureau. [TNX OPDX Bulletin]
GW - The Luton VHF Group will participate in the IOTA Contest as GW2L from Holy Island (EU-124). After the contest they will be active as GB8HI until 30 July on a part time basis. QSL for both callsigns via G8ATD.
HL - A group of operators from the Hanyang University Wave Research Club will be active as HL0C/4 from Sonyu Island (AS-148) until 27

or 28 July. They will operate CW, SSB, RTTY and BPSK31 on 80, 40, 30, 20, 17 and maybe 15 metres, plus 6m. QSL via HL0C. [TNX HL2UVH]
I - Stefano/IV3LZQ, Paolo/IV3PUT and Giovanni/IV3ODE, will be active as IA5/homecall from Capraia Island (EU-028) until 27 July, including an entry in the IOTA Contest. QSL via home calls, direct or bureau. [TNX IV3LZQ]
I - Filippo, IV3ZFF reports he will be active as IG9/IV3ZFF from Lampedusa Island (AF-019) on 26-29 July. Main activity will be on 10, 15 and 20 metres. QSL via home call.
I - Paolo/IK2MLS, Maurizio/IK2MLR, Giuseppe/IZ2KPI and Antonio/IK2ULS will be active from Tinetto Island (EU-083) on 26 July, including part of the IOTA Contest. QSL via home calls. [TNX IK2MLS]
I - Look for IK6XOU/p, IK6YXM/p, IZ0DIB/p, IZ4IUS/p and IZ6ASI/p to be active from the lighthouse of Cattolica (ARLHS ITA-051, WAIL ER-001) on 8-9 August. They will operate SSB and digital modes on 10, 15, 20 and 40 metres. [TNX IZ6ASI]
I - A group of operators from ARI Pesaro, ARI Fano and the Adriatic DX Team will be active as IQ6PS/p from San Bartolo Lighthouse (WAIL MA-006, ARLHS ITA-106) on 8-9 August. They plan to operate SSB and CW on 10, 15, 20, 40 and 80 metres. [TNX I6KIU]
I - A group of operators from ARI Genova will be active again as IU1L from La Lanterna (ARLHS ITA-177, WAIL LI-005) on 15-16 August. They will operate on 10, 15, 20, 40, 80, 6 and 2 metres. QSL direct or bureau. [TNX IZ1BZS]
IS0 - Giacomo, IZ3DBA will be active as IM0/IZ3DBA from Maddalena Island (EU-041) from 28 July to 1 August, and then as IS0/IZ3DBA from Sardinia (EU-024) until 10 August. His favourite mode is CW. QSL via home call, direct or bureau.
JA - Celebrating its 120th anniversary, the Tokyo Dental College ARC (JA1YUC) will be active as 8J120TDC/2 from Mikomoto Island (AS-117) and lighthouse, Shizuoka Prefecture, on 26-28 July. QSL via bureau, or direct to Tokyo Dental College, 1-2-2 Masago, Mihama-ku, Chiba City, 261-8502, Japan. [TNX F5NQL]
JA - JO3EVM will be active holiday style from Ishigaki-jima, Yaeyama Islands (AS-024) on 27-30 July. He will run 50 watts to a dipole for 40, 20, 15, 10 and 6 metres, and will operate mostly SSB with some PSK31. [TNX The Daily DX]
KL - Merle, N6PYN and Brad, KA5CDJ plan operate as N6PYN/KL7 from the Seal Islands (NA-239, new one) in late July-early August. The exact date is not known, but it "will not be earlier than July 29". They hope to be QRV around the clock for "at least two days", with activity on 20, 30 and 40 metres SSB and CW running 100 watts to a vertical dipole. QSL via N7RO. [TNX www.islandchaser.com]
OH - Jukka, OH3OJ will be active as OH3OJ/p from Hailuoto Island (EU-184) on 11-15 August. He will operate CW, SSB and RTTY on 80-10 metres with 600 watts, a Spiderbeam for 15, 17 and 20 metres, dipoles and GPs for the other bands. QSL via home call, bureau preferred. [TNX OH3OJ]
OZ - Axel, DL7VEA will be active as OZ7VEA from Romo Island (EU-125) on 2-21 August. QSL via DL7VEA, direct or bureau. A log search will

be available at http://www.dl7vea.de/oz7vea-2009_en.html [TNX www.rsgbiota.org]
PY - Jose/PY6HD, Beto/PY6RT and Nilzo/PY6AWV will be active as ZZ6Z from Itaparica Island (SA-023) until 26 July, including and entry in the IOTA Contest. They operate SSB only on 80, 40, 20, 17, 15 and 10 metres. QSL via PY6HD, direct or bureau. The log will be uploaded to LoTW. [TNX PY6HD]
PY - PT2OP and PY6KW will be active from Itaparica Island (SA-023) until 27 July, including an entry in the IOTA Contest as PV6I. QSL via PT2OP, direct or bureau. [TNX PT7WA]
PY - Look for ZW6LH (QSL via PT2OP) and PR6S (QSL via PY6KW) to be active from a number of lighthouses in the Brazilian State of Bahia between 31 July and 3 August. [TNX PT7WA]
SM - Announced IOTA Contest activities from IOTA group EU-043 include SM6EQO/p from Styrso Island (QSL via SM6EQO) and SK6M from Tjorn Island (QSL via SM6FKF). [TNX NG3K]
SU - SU1AO, SU1GS and SU1SK will be active as SU8LH from the lighthouse at Ras El-Bar (ARLHS EGY-014) on 1-9 August. Expect activity on the HF bands and 6 metres SSB and CW, with 100 watts and wire antennas. QSL via SU1SK. [TNX SU1SK]
SV - Kostas/SV1DPI, Nikos/SV3BSF, Dimitris/SV1CIB and Vasilis/SV1DPJ have been active as homecall/p (QSL via home calls, direct or bureau) from Kythira Island (EU-113) since 22 July. They will be there until 26 July and will participate in the IOTA Contest as SX8Z (QSL via SV1DPI, direct and LoTW). [TNX SV1DPI]
UA - A team from the Kursk Technical University's radio club will operate CW and SSB as RI1OP from Purluda Island (EU-153, RRA RR-02-87) until 27 July, including an entry in the IOTA Contest. They plan to have two stations running 100 watts into vertical antennas. QSL via RW3WW. [TNX RN1ON]
UA - Victor, RN1NU and Igor, UA3EDQ will operate as RN1NU/p and UA3EDQ/1 from Yakostrov (EU-147) until 27 July, IOTA Contest included. QSL via home calls. [TNX www.hfdx.at.ua]
UA - Igor, UA0IDZ and Victor, RW0IM plan to operate as UA0IDZ/p and RW0IM/p from Nedorazumeniya Island (AS-059) during the IOTA Contest. QSL via operator's instructions. [TNX www.hfdx.at.ua]
UA - Special callsign R45EFIR will be used on 1-10 August on all bands and modes Celebrating the 45th anniversary of radio club "Efir" (RK3PWJ, http://www.tularadio.ru) of the city of Efremov. [TNX UA3PNO]
UR - Look for US0KW/p, US0ZZ/p, UT/ER1DA/p, UT/ER3DW/p, UT/ER3DX/p, UT/ER3ZZ/p, UT2XQ/p, UT4ZG/p, UT7UT/p, UU0JM/p, UU1AZ/p, UU4JDD/p, UU4JMG/p, and UY6IM/p to operate CW and SSB from Tuzla Island (EU-180) until 27 July. QSL via home calls. They will participate in the IOTA Contest as UU7J/p (QSL via UU0JM). [TNX UT7UT]
UR - UR3GO, UR4QTP, UR7GO, US0GH, US0GM, UV5QAW UV5QQ, UW1GZ and UY5HF will be active as homecall/p from the the Kalanchakskiye Islands (EU-179) until 27 July. They will participate in the IOTA Contest as UW0G. QSL via operator's instructions. [TNX UW7LL]
V3 - Per, LA5OPA will be active as V31NP from Ambergris Key (NA-073),

Belize from 26 July to 12 August. He plans to operate SSB, PSK31
and RTTY on 20 metres, with possible activity on other bands if
they open to Europe. QSL via home call, direct or bureau.
V7 - Yuji Oda/JH2BNL (as V73J or V7XX, on SSB and RTTY) and and
Fuminori Nakayasu/JA2DSQ (as V73NF, mainly on CW) will be active
from Majuro (OC-029), Marshall Islands on 24-29 August. QSL direct
to home calls. They have a webpage at http://nh0aa.us/ [TNX JA2NQG]
W - Jim, AD5ZA will be active as AD5ZA/4 from Santa Rosa Island
(NA-142) on 1 August. He will operate BPSK31 on 20 and 15 metres.
QSL direct to home call. [TNX www.rsgbiota.org]
W - Members of the Old Barney ARC (http://www.obarc.org) will be
operating as N2OB from "Old Barney", the Barnegat Lighthouse
(USA-039) on Long Beach Island (NA-111) on 1 August from about 13
UTC through 21 UTC. Expect main activity on 20 and 40 metres SSB
with two stations. QSL via N2OB. [TNX N2OO]
W - The Old Barney ARC (http://www.obarc.org) will operate again as
W2T from the Tucker's Island lighthouse (USA-911) located in the
Tuckerton Seaport on 15 and 16 August, from 13 UTC through 21 UTC
each day. Operation will be primarily on 40 and 20 metres SSB with
two stations. QSL via N2OO. [TNX N2OO]
ZD8 - Jim, N6TJ will be active again (SSB and CW) as ZD8Z from Ascension
Island (AF-003) from 30 July to 7 August. QSL via AI4U. [TNX The
Daily DX]
ZF - Dave, W9CGI will be active as ZF2GC from Grand Cayman Island
(NA-016) from 29 July to 10 August. He will be QRV mainly on 12
and 17 metres PSK31 and SSB, using less than 50 watts to a
vertical. QSL via home call, direct or bureau. [TNX
www.rsgbiota.org]

RSGB IOTA CONTEST ---> The following stations have announced their
participation in this year's event (from 12 UTC on 25 July through 12 UTC on
the 26th). For lastest additions please visit http://www.rsgbiota.org/, and
give a look at the announced operation lists maintained by Ric, DL2VFR
(http://www.iota-expedition.com/IOTA2009/iota2009.html) and Bill, NG3K
(http://www.ng3k.com/Misc/iota2009.html).
Other groups will be activated during the weekend, but advance information
did not mention if the operators participate in the contest. Complete
details on the IOTA Contest can be found at http://www.iotacontest.com/
SWLs please note that the IOTA SWL Contest, discontinued in 2005, has been
picked up by the Mediterraneo DX Club (SWL Section), in cooperation with
the RSGB HF Contests Committee, and it will be held in parallel with the
IOTA Contest. Please visit http://www.mdxc.org/swl/iota-2009.php for
detailed information. Good luck to you all!

MS CONTEST ---> The VHF-DX-Portal MMMonVHF, in co-operation with the magazines DUBUS and Funk-Telegramm (by Joachim, DL8HCZ), organizes the second edition of the 144 MHz Meteorscatter Sprint Contest, which will take place on 12 August (from 00.00 UTC through 23.59 UTC). Details and rules can be found at http://www.mmmonvhf.de/ctest.php [TNX DL8EBW]

QSL VK9NI ---> Please note that the QSL route for the current VK9NI operation from Norfolk Island [425DXN 947] has changed and is no longer via W3HNK. The new route is via VK3HR (Hellenic Amateur Radio Association of Australia Inc., P.O. Box 57, Richmond, VIC 3121, Australia). The website for the operation is at http://www.vk9ni.com; a log search is up and running at http://www.clublog.org/expeditions/VK9NI

UKRAINIAN LIGHTHOUSES ---> Several activities from lighthouses in Ukraine are expected to take place between now and mid-August. Details can be found on the Ukrainian Lighthouses on the Air programme's website at http://www.lights.in.ua/ [TNX US4LGW]

+ SILENT KEYS + Walter Cronkite (KB2GSD), the legendary CBS Evening News anchor (1962-1981), passed away on 17 July at 92 years of age. Other recently reported Silent Keys include Ken Willis (G8VR), Bill Lee (GW3MFY), Jackson "Murray" Neece (K5MDM), Antonin Vavra (OK2PCX), Sergej I. Mokrinskij (RW0AW) and Frank M. Sicuro, Sr. (W5UP).

QSLs received direct or through managers: 3B9/SP2JMB, 3D2YA, 3Y0E, 4L1FX, 4L8A, 4O3A, 4S7NE, 4T6I, 4U1UN, 5N/LZ1QK, 5T5DC, 5V7PM, 5X1NH, 6V7M, 6V7O, 6V7P, 8P0P, 8P5A, 8R1PW, 9L0W (AF-037), 9M6BRC, 9V1RA, 9X0R, 9X0Z, 9Y4D, A71BU, A73A, AI5P/6Y5, AM8IL, BA4TB/5 (AS-137), BS7H, BV1EK, BV2009WGK, C6AGU, CE0Y/N6NO, CE4WJK, CN2M, CN89NY, CN8VO, CO7PH, CO8LY, D44TD, DP1POL, E44M, E51NOU, E71A, EA6BH, EA6TS, EI6S, ER5GB, ES1WW, ET3JA, EY8/K4ZW, FJ/G3SWH, FJ5DX, FM1FV, FT5YJ, FW1W, FW5RE, H40FN, H7/IV3ILH, HB0/DJ1AIB, HK0GU/1 (SA-040), HK3JJH/HK0B, HK3JJH/HK0M, HK3JJH/YV7, HP1WW, HQ9R, HT2N, HV5PUL, IL7G (EU-050), J68V, J75KG, J79IU, J7DX, J7Y, J88DR, J88XF, JD1BLY, JT1AGO, JT1ZP, JW5LJA, K5D, KG4CN, KH7Y, L21D (SA-021), LU/FT5YJ, LY1000A, MD/K3PLV, MJ/DJ7ZG, MJ/DL7AFS, MJ/K3PLV, OX5AA, P4/K2LE, P4/WA2NHA, PJ2T, PJ4/K2NG, PS0F, PZ5DD, R1ANB, R1ANC, R1ANR, S04R, S21DX (AS-127), T27OU, T30R, T32OU, T47C, TG9/IV3ILH, TG9AHM, TI7KK (NA-191), TI8II, TO4X, TS7C, V4/AH6HY, V8AQM, VE3DZ/VP9, VK9DWX, VK9LA, VK9N/G3TXF, VP2VVA, VP5/K9NW, VP6DX, VQ9RD, VU7SJ, VY0A (NA-186), WB2KSK (NA-026), WH0S, WH7/K9NW, XE2HWB/XF1, XU7MDY, XW1B, YA5T, YB0MJY, YB1ALL, YB3OX, YI9KEE, YN2BQ, YN2DD, YN2WW, YN2Z, YP1WFF, YS1G, YV4AB, ZD8UW, ZF2GU, ZF2ZB, ZK3MW, ZL7T, ZW8BBC (SA-072), ZY0F.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 918
BID: $OPDX.918
July 27, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K2JXW, NG3K, K4UEE,, N4AA & QRZ DX, KH6BZF, AA7JV, K8YSE, Algarve STAR DX Team, C31CT, DD1MAT, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1JQJ/IK1ADH & 425 DX News, I2YSB, IK7JWX, LZ1ZF, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, SM0BYD, SV1DPI, VA3RJ & ICPO and VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late RSGB IOTA Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 17th-July, through Friday, 24th-July there were 200 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PY, PY0F, PZ, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V5, V6, V7, V8, VE, VK, VK9N, VP2M, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B, CYPRUS. Terence, G4MKP, will be active as 5B/G4MKP from Tsada village near Pafos between August 14-25th. Activity will be mainly CW on 80-10

meters. QSL via M0URX.

7P, LESOTHO. Just a reminder that a group of operators will be active from here between July 29th to August 13th. They plan to have two stations active at all times with a third station to possibly be on for PSK and RTTY. Activity will be on all bands, but with a special effort on 160/80 meters. Operators are: Pista/HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/ W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK via M0URX, others via their home callsigns. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net

8Q, MALDIVES. Andrew, G7COD, will once again be active as 8Q7AK from Embudu Village, Embudu Island (AS-013, WLOTA L-3911), between October 12-25th. Activity will be on 80-12 meters including 30/17/12m using CW and SSB. Operating schedule (everyday) is as follows: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14147, 18133, 21253 and 24953 kHz
QSL via his home callsign, direct or by the bureau. Look for complete details at QRZ.com under 8Q7AK.

9G, GHANA (Update/Change). Silvano/I2YSB informs OPDX that there has been an update to their activity in Ghana between November 13-27th. Their activity will also include an IOTA trip to Abokwa Island (AF-084). They will use two different callsigns for their activities. Operations on the mainland will use the callsign 9G5TT, while operations on AF-084 will use 9G5XX. Activity will be on all HF bands (160-10 meters) and modes. Silvano states that they do not have a licence for 60 meters and 6 meters. On AF-84 there will be one station on 20 meters only. The time of the operation on the island will be on a day to day basis and will depend on the sea condition and weather forecast. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

C3, ANDORRA. Last week we reported that Vini, IK2CIO, would be active as C31/IK2CIO between August 6-12th. We have been informed by several sources that "the Andorran Radioamateurs Union (URA) reminds that the local administration has not implemented the CEPT Recommendation T/R 61-01; therefore, any C3/homecall activity should be regarded as illegal." An up-to-date list of licensed amateurs can be found at: http://www.ura.ad

CR3, MADEIRA ISLANDS. Operators Carlos/CT3CD, Carlos/CT3FQ and Ricardo/ CT3KN will be active as CR3T from Madeira (AF-014) during the RSGB IOTA Contest (July 25-26th) as a Multi-Single entry. QSL via LoTW or direct to CT3KN.

DP3, GERMANY (Special Event). Members of the Waldkirchen Radio Club will activate special event station DP3SSKW on CW and SSB through December 31st. Activity is to celebrate the 3rd Shito-ryu Shukokai Karate 2009 Worldcup being held in Waldkirchen. QSL via the Bureau; direct QSLs only via DK7FK. Skeds for 40 and 80 meters are possible via E-mail to DK7FK: b.barth@...

EF8, CANARY ISLANDS. Juan, EA8CAC, will be active as EF8R from Gran Canaria Island (AF-004) during the RSGB IOTA Contest (July 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, in the RSGB IOTA Contest (July 25-26th) as a Single-Op/Low-Power entry. QSL direct only.

AS-158. Members of the Wangjing HAM DX Club of Beijing, China, have received approval and will be active from Liaoning East Group Island (38'40 - 39'50N 121'10 - 124'10E) in the RSGB IOTA Contest between July 24□26th. The following operators will participate in this IOTA contest: BG1WUM, BG1TEM, BG1UXS, BG1MFE, BH1BRF, BH1INL and BD1HFP. The operation callsign will be the operator's callsign/2. Operation will be SSB on 40-10 meters. The RIG is IC-756Pro and TS-2000. The antennas are GP+SG230 and dipole. QSL via the info on QRZ.cn or QRZ.com with an IRC or 1 USD for the reply postage.

EU-005. Steve, G0UIH, will be active as as G0UIH/m from the Isle of Walney (WLOTA L-1871, WAB SD26), Cumbria, between July 24-27th. Activity will be holiday style, but he will be in the RSGB IOTA Contest. QSL via his home callsign, direct or by the bureau.

EU-005. Steve, G0UIH, will also be active as homecall/p from Piel Island (CU-005 for English Islands) between August 14-16th. This island is the "Jewel in the Crown" of the Islands of Furness. The Island has a history going back to the 11th Century. Expect activity on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-008. David, MM3RDP, will be active as MM3RDP/p from Skye Island (IOSA NH-07), and will also activating Neist Point Skye Light-house(SCO-147) between July 24-27th. His activity will include the RSGB IOTA Contest (July 25-26th). Activity will be on 40-10 meters SSB, but mainly 20 meters. QSL via his home callsign, direct or by the Bureau.

EU-010. Dave, M0GGK, will be active as MM0GGK/P from the Isle of Lewis between August 1-8th. He will use his K1 into a loop and a long wire, and expects to be on between 2100-0000z every night.

EU-015. Members of the Radio Amateur Society of Crete (RASC) were denied by Greek authorities to activate Chrissi Island (EU-187), so the Cretan DX team (R.A.S.C DX division) will operate as J49A from the same location as last year - Cape Sidiro which is located in northeast Crete. The new ultra-beam 2 elements yagi will be tested on this expedition during the RSGB IOTA Contest. QSL direct or via LoTW. For more info, visit at: http://www.rasc.gr

http://j49a.blogspot.com

EU-031. Alfredo, IK7JWX, will be active as IC8/IY7NGM from Capri Island (I.I.A. NA-006, WLOTA L-2466, WAIL CA-008, ARLHS ITA-124, possibly some D.C.I. castles), July 24-26th. Activity will be on SSB and also possible operations on 6 and 2 meters. The WW.Loc. is JN70cm. QSL via IK7JWX, by the Bureau or QRZ.com (NO eQSL).

EU-032. Martin, F4UKP, will be active as homecall/p from the Island of Re (DIFM AT-022, WLOTA L-1407) between August 15-22nd. Activity will be on all HF bands, CW and SSB, using a K2 and a 20m triple leg vertical. QSL via his home callsign, direct or by the bureau.

EU-090. Slovenian operators Jane/S57L, Goran/S52P, Vinko/S53F and Brane/S56UGB are now active as 9A8ZRS from Palagruza Island until July 31st. Most of the activity (as this was being written) was on 40m (CW/SSB) and 30m (CW). QSL via S57L.

EU-113. Operators Kostas/SV1DPI, Nikos/SV3BSF, Dimitris/SV1CIB and Vasilis/SV1DPJ will go to Kythira Island from late afternoon of July 22nd through July 26th. During the RSGB IOTA Contest (July 25-26th) they will use the callsign SX8Z. Before the contest the operators will be active signing homecall/8. QSLs for the operators are via the bureau or direct. QSLs for SX8Z are via SV1DPI, direct or LoTW.

EU-142. Operators Chris/EA3NT, Pablo/EA4TX, George/EC2ADN, Oscar/EA1DR, Niko/DD1MAT, Kepa/EA2DCF, Julen/EB2BXL and Rick/EA4ZK will be active as AM1M from Mouro Island during the RSGB IOTA Contest (July 25-26th). Reference numbers are: WLOTA 2720, DIE N-016, FARO D-1554, ARLHS SPA-153, DME 39075 and TPEA S. QSL via EA1DR.

EU-146. Operators Will/PE1OPM (SSB) and Jeroen/PD5CW (CW) will be active from from Schouwen Duiveland during the RSGB IOTA Contest (July 25-26th). Activity will be on 80-10 meters. QSL via their home callsigns, direct or by the bureau.

EU-165. Joe, IS0MKX, will lead a team of 15 operators to activate Asinara Island (SS-061, for Italian Island Award) between July 22-26th. Activity will include the RSGB IOTA Contest (July 25-26th). The callsign will be IM0M. QSL via IS0MKX. For more info, please visit: http://digilander.libero.it/assoradiomarinai/asinara/home.htm

EU-172. Fred, ON6QR, will be active as OZ/ON6QR from Aro Island, west of Jylland, Denmark, during the RSGB IOTA Contest (July 25-26th). His activity will be QRP using dipoles antennas. Listen carefully for him.

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press release number 5 dated July 22nd (edited): "The K4M team has passed a very important milestone with the shipment this week of 2 tons of radios, linears, antennas (20 of them), radios (6), computers and interfaces, thousands of feet of coax and stubs, and various connectors, switches, wattmeters, and all the supplies you would expect from an operation on a remote island. At the following Web page is a picture of a portion of the freight: http://www.midway2009.com/kh4news.html
The gear will be stored in Hawaii until the supply ship leaves in 3 weeks to Midway. Our charter flight to the island is confirmed. The team is assembled. Fundraising continues on our website, www.midway2009.com . If you haven't visited it in a while stop by and help support our effort. All pre-expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXPedition. This month we are highlighting three more team members. You can read all their history at: http://www.midway2009.com/meettheops4.html "

KH6BZF PROPAGATION FORECAST/REPORT (For July 27th-August 2nd).....

0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KL7, ALASKA (New IOTA). Operators Merle/N6PYN and Brad/KA5CDJ plan to activate the Seal Islands (NA-239, new one) as N6PYN/KL7. They hope to be active 24/7 in late July (possibly early August) for at least two days. Their exact start date is not known but will not be earlier than July 29th. QSL Manager will be N7RO. They will operate SSB and CW on 20, 30 and 40 meters with 100 watts and a vertical dipole.

KP1, NAVASSA (Rumor). It was reported to OPDX by Bob Allphin, K4UEE, that the following rumor "a permit has been issued to the group that did Desecheo recently. An operation will take place next year. Info from Dave K4SSU, one of the ops" -- "IS NOT TRUE".

LIGHTHOUSE ACTIVITY/NEWS.....
Just a reminder that the International Lighthouse-Lightship Weekend (ILLW) is scheduled for August 1-9th. A new Yaesu FT-857D will be given as the prize in a RANDOM DRAWING of submitted logs. Pre-registration is required. The winner is NOT based on score. Everyone that submits a valid log has an equal opportunity of winning the Yaesu. Registration deadline is July 31st. For complete details, rules, and logging require-ments, visit the ILLW Web site at: http://illw.org

Members of the Portuguese Navy Hamradio Club (NRA, NUCLEO DE RADIO-
AMADORES DA ARMADA) will activate for the first time the Lajes Lighthouse
(ARLHS AZO 010), on Azores, between 0800-1900z, on August 1st. The
callsign will be CR2NRA. Activity will be on 80/40/20/15/10 meters
using CW and SSB. Operators mentioned are CU3DI, CU3CY, CU3AU, CU3CC
and CU3HQ. QSL via the info on QRZ.com.

Orlando/PT2OP (ZW6LH) and Marcelo/PY6KW (PR6S) will be active from
several lighthouses in the state of BAHIA between July 31st and August
3rd. Activity will include participation in the International Light-
house Lightship Weekend (ILLW). Both stations are valid for ARLHS,
DFB (Brazilian Lighthouses Awards) and the South American Lighthouses
Award. QSL via their home callsign.

Members of the "Sodertorns Radioamatorer" (SK0QO) will once again be
active as 7S0SFJ from the Museum Lightship No. 25 Finngrundet (ILLW
SE-0013, SWE-043), in Stockholm, Sweden, during the ILLW activity
August 15-16th. The LS Finngrundet was built in 1903 and decommissioned
in 1969 and since 1970 is a museum vessel. Club SK0QO has been operating
7S0SFJ every year since 1996. The club will put their double dipoles
up for 80/40m and 30/17m as well as their dipole for 20m up Friday
evening, August 14th, and will be active until Sunday, early afternoon.
Rigs: FT-2000, TS-680, IC-706. Activity will be on SSB and CW (Hans,
SM0BYD, mainly on 30/17m). QSL by the Bureau and SM0BYD. SWL reports
are also welcome. For more details and pictures, see:
http://www.qrz.com/callsign/7s0sfj
(The Lightship FINNGRUNDET is managed by SMM (Statens Maritima Museer),
The Swedish National Maritime Museums.)

LZ01, BULGARIA (WFF Op). Operators Gosho/LZ1ZF, Boris/LZ2JR and Rumen/LZ2RS
will activate the special WFF callsign LZ01WFF from the Sokolski Monastery
<http://www.bulgarianmonastery.com/sokolski_monastery.html> in the natural
park "Bulgarka" (LZFF-022, QTH Loc.: KN22QT) between July 24-26th. For
details on the Central Balkan National Park, see the following Web page:
http://www.visitcentralbalkan.net/index.php?l=1&s=1&c=26&o=2005
Activity will be on all HF bands using CW and SSB, plus operations during
the IOTA Contest. All QSOs will be confirmed via the Bureau. QSL via LZ1ZF.

OY, FAROE ISLANDS. Carsten, OY1CT, will be active from Streymoy (EU-018)
during the RSGB IOTA Contest (July 25-26th) as a Single-Op/CW/24-HRs/
High-Power entry. QSL via OY1CT.

OY, FAROE ISLANDS. Thomas, OZ1AA, will be active as OY/OZ1AA from
Streymoy (EU-018) during the RSGB IOTA Contest (July 25-26th) as a
Single-Op/Mix/24-HRs/Low-Power entry. QSL via OZ1ACB. Visit his Web
page at: http://www.oz1aa.com

OY, FAROE ISLANDS (Also TF). Maurizio, IW4BLZ will be active as OY/homecall
from Faroe Islands (EU-018) between July 27-29th. He will also be active
as as TF/homecall from Iceland (TF, EU-021) between July 31st and August
11th. Activity will be on all bands from 80-6 meters. QSLs via his home
callsign, direct or by the bureau.

P29, PAPUA NEW GUINEA. Andy, P29CS, on Lihir Island (OC-069), will be active during the RSGB IOTA Contest (July 25-26th). QSL via P29CS.

QSL INFO AND NEWS.....
CS28MCF LOG. The Algarve S.T.A.R. DX Team reports that CS28MCF is now QRT. Last QSO was at 2259z, July 19th. They made 6491 QSOs and the Log is online at: http://algarvedx.com

QSLS VIA LOTW: A7/M0FGA, OH0Z, PV8AA, RA3UT, VK7WI, W1AW/KL7 and YL4HQ

QSLS RECEIVED VIA MAIL: 3B9/SP2JMB, 4L8A, 4T6I, 9Y4D, AI5P/6Y5, AM8IL, EI6S, GM3MOU, JD1BLY, TS7C, VE3DZ/VP9, VY0A, YS1G and ZW8BBC

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY will be active as TX3A between November 23rd and December 6th. The TX3A license is valid for 14 days only between the dates listed above. Because these dates could change (due to weather and other things), they "may" have to operate as FK/AA7JV or FK/HA7RY before and after this period. These are the same operators that activated VK9GMW from Mellish Reef, and they plan to make this another simple low-band DXpedition. Their priorities will be 160, 80 and 40 meters, in that order. They will be active on the higher bands the rest of the time. The operators will use the same antenna that they used on Mellish Reef, but they have developed a new RX antenna, which they hope will improve their RX capabilities. QSL via HA7RY:
* Mailing direct -Please include 2 USDs with every direct QSL request for up to three cards per envelope. If you send International Reply Coupons (IRC), please make sure that it is not expired or is not about to expire. DO NOT SEND IRCs that are valid only until end of 2009! Cards are likely to be posted only early 2010. Mailing address: Tamas Pekarik, Alagi ut 15, H-2151 Fot, HUNGARY

* The preferred way is using the "Online QSL Request Service" (OQRS) on their Web site which they will launch once the DXpedition is over. You can use that form to request your direct QSL and cover the costs of sending the QSL card to you direct by using PayPal. They request a minimum of 5 USDs or 4 EUROs for this service.

* LoTW and eQSL: The log will be placed onto the LoTW and eQSL systems.

* Bureau: They will launch an "Online QSL Request Service" (OQRS) on their Web site as soon as the expedition is over. If you want to receive your QSL via the bureau, please use that form to request the card. They will check your QSOs against the log and send your card to you via the bureau. This method will allow them faster processing, helps them protect the environment and you will receive your TX3A card faster. If you request your bureau card online, please do NOT request a direct card and do NOT send us your QSL card.

More detailed information is available on their new Web page at: http://www.TX3A.com

VK9N, NORFOLK ISLANDS (Update/QSL Manager Change). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) continue to be active as VK9NI until July 29th. The HARAOA Group plans to have 4-5 stations on the air and plans to be active on 160-6 meters using CW, SSB and RTTY. They plan to take part in the RSGB IOTA Contest (July 25-26th) during their stay. PLEASE NOTE: QSL via VK3HR (NOT W3HNK as first announced -- Joe states that he was asked to step aside!). More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

VY1, CANADA (Yukon RTTY Activity Planned). Steve, N6QEK, is making plans a little early for the 2010 RTTY Roundup. He is all set to operate during the 2010 running of the RTTY Roundup from the Yukon Territory. His callsign will be VY1/N6QEK. The dates of operation will be during the contest and a day or so before and after. QSL via his home callsign, direct or by the Bureau. He has a Web site up and running for this operation at: http://www.n6qek.com

ZD8, ASCENSION ISLAND (AF-003). Jim, N6TJ, will once again be active from here as ZD8Z between July 30th and August 7th. Activity will be on all bands CW/SSB. QSL via his new manager AI4U, direct or by the Bureau.

The following stations are expected to be active in the
RSGB IOTA Contest (July 25-26th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/iota2009.html

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 205 Issued at 2200Z on 24 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity has been very low. No flares were
observed during the past 24 hours. The solar disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet to unsettled. Solar wind speeds
observed from the ACE spacecraft are averaging around 550 km/s with
minor IMF Bz fluctuations (+/-2nT).
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominately quiet for the next three days (25-27
July). Isolated unsettled conditions are expected for 26 July due
to a recurrent high speed stream.
III. Event Probabilities 25 Jul-27 Jul
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 24 Jul 068
Predicted 25 Jul-27 Jul 069/070/070
90 Day Mean 24 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 23 Jul 008/008
Estimated Afr/Ap 24 Jul 006/007
Predicted Afr/Ap 25 Jul-27 Jul 005/005-007/008-005/005
VI. Geomagnetic Activity Probabilities 25 Jul-27 Jul
A. Middle Latitudes
Active 05/10/05
Minor storm 01/01/01
Major-severe storm 01/01/01

From: Dale Cole K8TS
Topic: 10362 Message: 10362

I sent this to several lists as I thought it might be of interest.

If you get a big chunk of (~6') save it. I does not have to be good stuff. My commode has gave me some "issues",as you might say, lately. I have found that the coax is the right size and flexibility to navagate all the traps and do the same job for nuttin, that a $100.00 plumber can't do. Works even better than those "snakes" you buy at the local hardware.

Just thought I would pass it along. Just another reason we can give the xyl to validate the existance of the "junk box" hi hi

I wouldn't use 9913 though, as I assume that job would get too much water in the feedline.

Did you find that N connectors worked better than PL259s?

Could not find the snake, just found an old "chunk" in the garage with no ends on it at all. In fact, I think the reason that it was not being used was that the braid already had water in it and was unusable. Till now.

ZCZC AP30
QST de W1AW
Propagation Forecast Bulletin 30 ARLP030
>From Tad Cook, K7RA
Seattle, WA July 24, 2009
To all radio amateurs

SB PROP ARL ARLP030
ARLP030 Propagation de K7RA

No new sunspots yet, but a big surprise this week with aurora and a geomagnetic storm. The activity peaked around 0300-0900z on Wednesday July 22, with K index as high as 6. Planetary A index for the day was 24. You can see the K index variation at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt. One nice result was aurora propagation on six meters.

A week ago there wasn't any indicator of increased activity. If you go to http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html and click on July 21, you can see that the forecast was modified more than once, but the highest forecast was an A index of only 15.

KN5O and N5OMG in Louisiana both worked JA7QVI on six meters on June 17. KN5O worked him at 2359z, and 30 minutes later reported that the JA7QVI signal was still holding steady at S2. This was on a Friday, five days before the aurora.

Patrick Hamel, W5THT in Mississippi on July 17 noted that July propagation on six meters is some of the best he has ever experienced. He wonders if the volcano erupting on Sarychev Peak on Matua Island is spewing conductive ash, possibly reflecting radio waves. I don't know if that is true or not, but at http://www.dailymail.co.uk/sciencetech/article-1195215/ you can see dramatic photos of the eruption.

There is a new sunspot trying to emerge today, but it looks to be from old cycle 23.

Geophysical Institute Prague predicts quiet geomagnetic conditions July 24-25, quiet to unsettled July 26, and back to quiet for July 27-30.

The U.S. Air Force and NOAA Space Weather Prediction Center calls for planetary A index of 5 for July 24-25, 8 on July 26, 7 on July

27, and back to 5 though the end of the month. They predict solar flux on July 24-26 at 68, 69 and 70, remaining at 70 through August 7.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 16 through 22 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 66.7, 66.2, 67, 67.6, 68.2, 67.7, and 67.8 with a mean of 67.3. Estimated planetary A indices were 4, 2, 3, 2, 6, 4 and 24 with a mean of 6.4. Estimated mid-latitude A indices were 2, 0, 1, 1, 3, 3 and 18 with a mean of 4.

10367. Signal identification

Yahoo group: DX-IS (2009)
Date: 2009-07-26 13:56:25 UTC
From: Paul M Dunphy
Topic: 10367 Message: 10367

You guys recall the AEA PK-232 TNC having a mode where it would tell you what it thought the unknown digital signal was? I don't think it was very sophisticated. It probably cycled through the 7-8 modes it "knew" and if it got anything that it could lock on and decipher the noise to get sensible text, it reported the signal as that. It wasn't perfect, but it was surprisingly good for what they could cram into an EPROM. It could tell you if it was RTTY normal or reverse, AMTOR, FEC A, etc.

Does anything like this exist in the current world of software decoding? There is PSK31, PSK125, Hellschreiber, Olivia, RTTY (normal and reversed, and various baud rates), MFSK, MT63, Packet, Pactor, Amtor and like a lot more on the air. Some come and go, and others seem to stay. Anyhow, unless you are a guru at recognising the tones or have 5 different programs, it appears you just have to guess until you get it right.

I always though that feature in AEA's TNC was slick and wondered why it hasn't been replicated in any of the new sound card decoding programs. Maybe it has, and I just haven't found it. Used to be nice to tune the commercial segments of the bands and find a 75-Baud RTTY news feed or a SITOR Xmission from ships, etc. While this stuff is almost all gone, some mysterious signals still exist -- probably encrypted but maybe not. I recall catching a SITOR transmission in the late 1980s from a ship sending in the payroll info for the crew . . .

What jogged my memory was a curious signal on 14.008 MHz an hour ago. Sounded like RTTY but MMTTY couldn't decode it either normal or reverse, nor any of the baud rates I tried. I'm sure it was some sort of encrypted military stuff, and it went away after 4-5 minutes, but it would have been fun to have a program try all the known modes.

10372. K5D QSL

Yahoo group: DX-IS (2009)
Date: 2009-07-29 01:11:00 UTC
From: Alan Leith
Topic: 10372 Message: 10372

Got my K5D QSL(s) today -- very nice card(s) and I now have KP5 on all bands 10-160 except 10 SSB and both modes on 12.

However, the person who mailed the envelope to me added postage to the 72-cents + an "H" stamp to total $1.49. I don't have a scale accurate enough to weigh the envelope that contained both the fold-over card and a single card plus three small pieces of advertising but I really doubt that it required an additional stamp.

Could someone clear this up?

Al;

I believe I just sent a sase, and have had my card since some time in June. I think if I recall right the mgr. was in USA, and to send something to 'ya northern's cost more to cross the lline. Sure don't think it needs to be that much. Personal opinion thouth.
I did do an online for VK9NA but only have heard rummors about that one. However, it is nice to be waiting for qsl's again.....instead of sunspots hi hi

hi Al --

?By international postal regulations, all stamps on international mail must state their value.

?The US lettered stamps (A-H) have no value printed on them and?were never?meant for international use.? They were only to be used on domestic US postage.? That's what the Post Office explained when they issued them.

?If you have a stash of those US?lettered stamps, they are worthless for international mail.? Suggest you trade or sell them?to a US ham for the appropriate value.? That's why K5D had to make up the difference.

?As a QSL Bureau sorter, I still have old envelopes on file from customers with these lettered stamps, and I have to verify their value before I take them to my post office.?

Got my K5D QSL(s) today -- very nice card(s) and I now have KP5 on all bands 10-160 except 10 SSB and both modes on 12.

However, the person who mailed the envelope to me added postage to the 72-cents + an "H" stamp to total $1.49. I don't have a scale accurate enough to weigh the envelope that contained both the fold-over card and a single card plus three small pieces of advertising but I really doubt that it required an additional stamp.

Could someone clear this up?

From: Alan Leith
Topic: 10372 Message: 10376

Thanks for the explanation, Will. Actually, I have used the US lettered stamps to make up current postage for many, many years. There has never been a problem. I just wondered why the amount of postage had been increased to $1.49 from the 72-cents I had put on it. Here in Canada we can purchase stamps with no denomination on them (I never have but know they're available) and no matter when you use them and no matter what you paid for them they will make up the difference when postal rates increase. I don't know if that applies to the outrageous amount Canada charges for international postage or not.

Subject: Re: [DX-IS] K5D QSL

hi Al --

By international postal regulations, all stamps on international mail must state their value.

The US lettered stamps (A-H) have no value printed on them and were never meant for international use. They were only to be used on domestic US postage. That's what the Post Office explained when they issued them.

If you have a stash of those US lettered stamps, they are worthless for international mail. Suggest you trade or sell them to a US ham for the appropriate value. That's why K5D had to make up the difference.

As a QSL Bureau sorter, I still have old envelopes on file from customers with these lettered stamps, and I have to verify their value before I take them to my post office.

Al, Will, etc.

Stamps in Canada (and the USA) that are "permanent" (as in no price marked on them) are for domestic use only. In Canada, it costs $0.98 to send a letter to the USA and $1.65 to send a letter to anywhere else outside of Canada. I forget what it costs for a domestic stamp (~55-cents, I think), but you can't put two of them on a letter going to the USA. You have to buy a $0.98 stamp with 98-cents printed on it. Same for International. The stamp must have $1.65 printed on it. 4 or 5 domestic "permanent" stamps won't work.

I'm not one of those guys who has the card in the mail before the ink is dry in the log, Dale. In my latest batch of bureau cards, I have a bunch going back to 1995 (outgoing from me!!!). I also use SASEs for Canada and the US but thought the amount I had put on the SASE for K5D was enough to get it back to me in Canada. Good thing I included a little cash donation with my request, hi!

Al;

I believe I just sent a sase, and have had my card since some time in June. I think if I recall right the mgr. was in USA, and to send something to 'ya northern's cost more to cross the lline. Sure don't think it needs to be that much. Personal opinion thouth. I did do an online for VK9NA but only have heard rummors about that one. However, it is nice to be waiting for qsl's again.....instead of sunspots hi hi

The placement of the value in Arabic Numerals is a requirement of

the Universal Postal Union and applies to any stamp issued by a

UPU member nation for foriegn postage.

Back in the early 1900's the USA issued stamps with the denomination

spelled out. The UPU said they were a no-no for international use.

The UPU has another requirement, that the issuing countries name be

on the stamp. Only one country is exempt from this requirement.

Thanks for the history lesson, Dick. What I obviously failed to get across was that I have never been charged "postage due" when I have used a "nondenomination" stamp on an SASE from your country to mine. As for the UPU, it being European and all, I am not surprised about the use of numerals to indicate local value. It makes identification of the stamp easier for all. I expect that the UPU will someday regulate the actual size of stamps (he said, tongue-in-cheek).

And yes, I am aware of the only country that does not identify its stamps.

BTW, I had a devil of a time getting through to TF/IK1PMR on 30 earlier this evening. I had three major problems: a very high noise level, lots of QSB and a really crappy 30M antenna. However, perseverance paid off and I finally got him two and a half hours after I first heard him :-).

Also, have you changed your call or did you unintentionally drop the Zed when you signed your note?

As I understand, through this thread, is that all international stamps should have the roman numerols on the face.

Just going through my "stach" of foerion stamps, looking on the France, Finland, and even the infamous German stamps I do not see any on any. They have always worked on the sase's that I have sent out. Do I misunderstand something?

10384. Puerto Rico callsign prefix rules?

Yahoo group: DX-IS (2009)
Date: 2009-07-30 12:15:15 UTC
From: Frank T Brady
Topic: 10384 Message: 10384

Does anyone know if there are 'rules' regarding PR callsigns like there
are for Guantanamo Bay?
KG4 2x2 are GB and KG4 2x3 are USA.
But both 2x2 and 2x3 WP4 calls can be USA or Puerto Rico.
e.g., WP4A is USA and WP4L is Puerto Rico.

I found the answer (Perry at ARRL) -
There is no way to use callsign alone to resolve qth for US possessions
(other than Guantanamo Bay).
This is because hams can keep their callsign when they move between USA
and possessions.
Of course I knew this was true for movement between states, but I
'assumed' possessions were different.

The short answer is no there are no rules and there is no way to know for sure from which of the US DXCC entities a station is operating based solely on the station's call sign.

Callsigns with KP4, NP4, WP4 prefixes are only issued to applicants with a mailing address in Puerto Rico. However, the holder of a US license may move (change mailing address) to/from Puerto Rico without having to change his/her call sign

The holder of any valid US license may operate from anywhere the amateur service is regulated by the FCC using his/her call sign with no additional ID requirements. (Note, the amateur service in Guantanamo Bay and Antarctica is NOT regulated by the FCC)

73,
Mike K1MK

SB DX ARL ARLD030
ARLD030 DX news

This week's bulletin was made possible with information provided by K1SFA, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SWAZILAND, 3DA0. Operators GI4FUM, G4LDL, GM3TAL, M0VAA, NC4MM and UT5EL are QRV as 3DA0DJ, 3DA0TB, 3DA0MH, 3DA0VA, 3DA0MM and 3DA0EL until August 11. They may also be QRV as 3DA0SS from an international Scout Camp near Manzini. Activity is on 160 to 10 meters with two stations active simultaneously and around the clock. QSL to home calls.

TANZANIA, 5H. Pat, N2IEN plans to be QRV as 5H2PD until August 8. Activity is on 40, 30, 20 and 15 meters using mainly CW with some SSB. QSL direct to home call.

LESOTHO, 7P. Operators HA5AO, K5LBU, W0MM, 9M6XRO and DJ0YI are QRV as 7P8AO, 7P8CF, 7P8MM, 7P8OK and 7P8YI until August 13. Activity is on all HF bands using CW and SSB with two stations active all the time, with a third station active using just RTTY and PSK. QSL 7P8OK via M0URX and all others to home calls.

GERMANY, DA. Members of the Waldkirchen Radio Club are QRV using special event callsign DP3SSKW until December 31 in celebration of the 3rd Shito-ryu Shukokai Karate 2009 Worldcup being held in Waldkirchen. Activity is on the HF bands using CW and SSB. QSL via bureau.

PHILIPPINES, DU. Hans, DL5SDF is QRV as DU9/homecall from Mindanao Island, IOTA OC-130, and is here until June 2010. Activity is on the HF bands using CW. QSL direct.

SPAIN, EA. Special event station EG2LB will be QRV August 1 and 2 in celebration of the 200th anniversary of the birth of Louis

Braille. Activity will be on 80, 40 and 20 meters. QSL via EA3RKR.

ESTONIA, ES. Juri, ES5GP is QRV as ES5GP/8 from Kihnu Island, IOTA EU-178, until August 9. This includes possible activity from Lighthouse WLOTA LH-0775. QSL to home call.

SCOTLAND, GM. Dave, M0GGK will be QRV as MM0GGK/p from the Isle of Lewis, IOTA EU-010, from August 1 to 8. Activity will generally be between 2100 and 0000z. QSL to home call.

DOMINICA, J7. Pierre, HB9CUA is QRV as J79PAK until August 6. He has been active mostly on 6 meters, but with some 17 and 15 meter activity as well. QSL to home call.

BRAZIL, PY. Operators PT2OP and PY6KW are QRV as ZW6LH and PR6S, respectively, from the state of Bahia until August 8. This includes participation in the ILLW contest. QSL to home calls.

EGYPT, SU. Look for a group of operators to be QRV as SU8LH from August 1 to 9 from Ras El-Bar island. Activity will be on all HF bands and 6 meters using CW and SSB. This includes an entry in the ILLW contest. QSL via SU1SK.

GREECE, SV. Operators HA8UT, HA8TU, HA8TT, HG8AA and HA8SS are QRV as J42Z, SX2Z and SV2/homecalls until August 4. Activity is on 40 to 6 meters using CW and SSB. QSL via HA8UT.

DODECANESE, SV5. Several members of the Dodecanese Radio Amateur Association are QRV as SX5SYMI from Symi Island, IOTA EU-001, until August 3. QSL via SV5FRI.

ICELAND, TF. Maurizio, IW4BLZ is QRV as TF/homecall until August 11. Activity is on 80 to 6 meters. This includes possible activity from Lighthouse WLOTA LH-2975. QSL to home call.

EUROPEAN RUSSIA, UA. Special event station R45EFIR will be QRV from Efremov from August 1 to 10 to celebrate the 45th anniversary of the founding of the "Efir" radio club. Activity is on all bands and modes. QSL via operators' instructions.

ASCENSION ISLAND, ZD8. Jim, N6TJ is QRV as ZD8Z until August 7. Activity is on all bands using CW and SSB. QSL via AI4U.

CAYMAN ISLANDS, ZF. Dave, W9CGI is QRV as ZF2GC from Grand Cayman, IOTA NA-016, until August 10. Activity is on 17 and 12 meters using mostly SSB and PSK31. QSL direct.

THIS WEEKEND ON THE RADIO. The ARRL UHF Contest, International Lighthouse-Lightship Weekend (ILLW) QSO Contest, North American CW QSO Party, NCCC Sprint CW Ladder, TARA Grid Dip Shindig, 10-10 International Summer SSB Contest, NCCC Sprint, European HF Championship, RSGB RoPoCo 2 and the SARL HF Phone Contest will certainly keep contesters busy this weekend. The ARS Spartan CW

Sprint is scheduled for August 4. Please see August QST, page 76,
and the ARRL and WA7BNM contest web sites for details.

10388. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-30 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10388

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 30 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 211 Issued at 2200Z on 30 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 29/2100Z
to 30/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 29/2100Z to 30/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled with a slight chance for isolated
active periods on days one and two (31 July - 01 August) due to a
favorably positioned coronal hole. Quiet conditions are expected to
return on the third day (02 August).
III. Event Probabilities 31 Jul-02 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 30 Jul 068
Predicted 31 Jul-02 Aug 068/068/068
90 Day Mean 30 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 29 Jul 002/002
Estimated Afr/Ap 30 Jul 002/003
Predicted Afr/Ap 31 Jul-02 Aug 007/007-007/007-005/005
VI. Geomagnetic Activity Probabilities 31 Jul-02 Aug
A. Middle Latitudes
Active 20/20/10
Minor storm 05/05/01
Major-severe storm 01/01/01

From: Tedd Mirgliotta (KB8NW)
Topic: 10389 Message: 10389

SB DX @ WW < KB8NW $OPDX.918.1
Ohio/Penn DX Special Bulletin No. 918.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 918.1
BID: $OPDX.918.1
July 30, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K8YSE and TA1HZ following DX information.

This bulletin is just a reminder that "two" lighthouse activities will be taking place starting this weekend. Lighthouse activities have become very popular over the last several years, especially in August. Be prepared to have all kinds of reference numbers tossed at you when working these stations (ARLHS, ILLW, Member#...etc.). Some may think this is not DX, but you are wrong. It is fun and a challenge to work as many lighthouses as it is working many DXCC entities. Remember, there are awards and prizes (see the following societies' Web pages for details). Enjoy the next few weeks in working the many LH stations (between the two ILLW events - over 600 participants are listed). The scheduled events in August are as follows:

August 1-9th: The International Lighthouse-Lightship Week and QSO Party Contest. This highly popular annual event, now in its 15th year, has been extended to a full week! This activity also takes place during the "National Lighthouse Day", as proclaimed by the U.S. Congress (see <http://www.lighthousefoundation.org/museum/natllighthouseday_info.htm>. Complete details on the "ILLW Special Event" and the "ILLW QSO Party Contest" can be found on the following Web pages:
http://ialhp.org
http://www.illw.org
For a list of ILLW participants: http://illw.org/9-list.html

August 15-16th: The International Lighthouse/Lightship Weekend is held every third full weekend in August starting at 0001z on Saturday and finishing at 2359z on Sunday. It also now coincides on the Sunday with the "International Lighthouse Day" which is an event organized by the "International Association of Lighthouse Keepers" whereby as many world lighthouses will be open to the public for the day." The ILLW event is organized and controlled solely by the "Ayr Amateur Radio Group" of Scotland. The basic objective of

the event is to promote public awareness of lighthouses and
lightships and their need for preservation and restoration,
to promote amateur radio and to foster international
goodwill. The event is NOT a contest. There are no prizes,
certificates or other enticements to participate and
therefore, participation is free. Each station's operators
decide how they will operate their station regards modes
and bands. For complete details on the "ILLW Event", go
to: http://illw.net
For a list of ILLW participants: http://illw.net/2009_list.htm

---
Some late ILLW announcements:

Operators Doug/KD8CAO and John/K8YSE will activate Little Point Sable
(USA-443), the Grand Haven South Pierhead Inner (USA-1077) and Grand
Haven South Pierhead Outer (USA-1078) Michigan lighthouses for the
International Lighthouse-Lightship Week, August 1-9th. Operation from
Little Point Sable LH will be on August 1st. On August 2nd, they will
activate the Grand Haven South Pierhead LH, Inner and Outer. Look for
them on all HF bands. Satellite operations on AO-51, SO-50 and AO-27 are
a possibility. QSL via K8YSE.

Members of the Turkish group called SWAT (Special Wireless Activity Team
- TCSWAT) is proud to announce new TC activities in collaboration with
the Directorate General of Coastal Safety (Web page was provided --
<http://www.kiyiemniyeti.gov.tr/default.asp?id=0&lng=en>). It has been
ten years since the big earthquake of August 17, 1999, hit the Marmara
area of Turkey: http://en.wikipedia.org/wiki/1999_%C4%B0zmit_earthquake
TCSWAT will be on the air to remember those who lost their lives in this
natural disaster. There will be two stations; one from Yalova - TC99Y
and one from Kocaeli- TC99K. Since the anniversary coincides with the
International Lighthouse-Lightship Weekend, stations will be located in
the lighthouses on the coast of Marmara Sea. TC99Y will be active from
Bozburun Lighthouse in Yalova (KN40JM) and TC99K from Yelkenkaya
Lighthouse (TUR-054) in Kocaeli (KN40QS). TC1LHW, a TCSWAT classic,
will also be on the air from Karaburun Lighthouse (TUR-036) on the
Black Sea coast. Activity will be mainly on HF SSB, VHF-UHF FM. Detailed
information about the stations and operators will be at QRZ.com and
<http://www.tcswat.org>. There will be a special award for those who
contact both TC99 stations on more than one band. Details will be
announced later on TCSWAT Web site.

Subject: Re: [DX-IS] Puerto Rico callsign prefix rules?

I found the answer (Perry at ARRL) -
There is no way to use callsign alone to resolve qth for US possessions (other than Guantanamo Bay).
This is because hams can keep their callsign when they move between USA and possessions.
Of course I knew this was true for movement between states, but I 'assumed' possessions were different.

This is a question for the Old Timers. Was call sign allocation ever "perfect?" I know we had none of this "take your call with you when you move" in Canada and the USA in the not to distant past, which helped us know where we were.

However, was there a time (in the 1950s, 1960s, 1970s, whenever) when you heard a VP8 or a KH6 or a VR6 and you could be absolutely sure where they were? As long as I've been around there have been a few anomalies that you had to ask (or know from a DX Bulletin.) For example, was there ever an ITU pattern for 3D2 calls?

I recall my first WAS KH6 on 80M was really loud and he turned out to be in Long Island . . . :-) I finally got a real one on Maui, but the guy on Long Island was so much easier to work!

Paul,

When I was first licensed, VE1 was used for Sable and St. Paul Island also, with no way of really knowing whether a VE1 was there or not unless they signed portable. In the US it became worse when the FCC let you choose a vanity call from any district, but then when has the FCC made a good ruling in the past 15 years or so?

Over the last couple of years, I have consistently put two "lettered" stamps ("First Class Forever") on outgoing mail to Canada. Thus far not a single letter has been rejected or returned. If additional postage was added anywhere, the recipient did not note it.

I think it's much like IRCs - those who truly understand the rule perhaps feel obligated to enforce it.

For many years ZK2 was used for both the North Cook and South Cook islands. When the prefix was changed within the last couple of years, they went to E51 - for both. Another "missed" opportunity to do something like E51 for North and E52 for South.

I guess that's the "penalty" we pay for being so few!

Even worse, most DXpeditions to US territories CHOOSE NOT to use a special prefix telling where they are:

K5K-Kingman Reef
K5D-Desecheo Island
N8S-Swains Island
K7C-Kure Island

In 1979 I worked:
VE1AI now CYØ Sable Island
VE1CR now CY9 St. Paul Island
LU5ZA counted for VP8O So. Orkney
LU3ZY counted for VP8/SA So. Sandwich
LU5ZI counted for VP8/SH So. Shetland
I remember KH6 was Hawaii and VR6 Pitcairn now VP6 (not to be confused with Ducie Island)

This is a question for the Old Timers. Was call sign allocation
ever "perfect?" I know we had none of this "take your call with you
when you move" in Canada and the USA in the not to distant past,
which helped us know where we were.

However, was there a time (in the 1950s, 1960s, 1970s, whenever)
when you heard a VP8 or a KH6 or a VR6 and you could be absolutely

sure where they were? As long as I've been around there have been a few anomalies that you had to ask (or know from a DX Bulletin.) For example, was there ever an ITU pattern for 3D2 calls?

Direttore Responsabile I2VGW

4W - 4W6AL is the callsign issued to Al, CT1GPQ for his activity from East Timor (OC-148) [425DXN 951]. Al hopes to be QRV around 7 August, and will operate in his spare time, mainly CW with some SSB and RTTY, on 40, 30, 20 and 17 metres. QSL via CT1GFK. Updates and on-line log search will be available at http://algarvedx.com
5B - Andy, LZ2HM will be active as 5B/LZ2HM from Cyprus on 4-11 August. He will be QRV on 160-2 metres and will participate in the WAE DX Contest CW (8-9 August) as C4I. QSL via home call. [TNX NG3K]
CE - The Three Stars DX Group (http://www.3stardxgroup.cl/) will be active as XR6B from the Morro Bonifacio lighthouse (ARLHS CHI-103) on 7-9 August. They plan to operate on several bands SSB and CW. QSL via CE6AMN.
DL - Operated by DK8ZM, DL4KWS, DO6KT, HB9KOM, OZ2KIL and PA5UL, special event station DP9S will be active from 29 July to 8 August at the German National Scout Jamboree in Buhlenberg. QSL via DK8ZM. [TNX Southgate Amateur Radio News]
DU - Hans, DL5SDF is back on Mindanao Island (OC-130) and expects to be QRV again as DU9/DL5SDF sometime in August. He operates CW only. QSL direct to Hans Bohnet, Purok 5, Lower Bon-Bon, Libertad, Butuan City 8600, Philippines or via the DARC bureau to DL5SDF (bureau card requests will have to wait until June 2010, when he will go back to Germany). [TNX DXNL]
EA - Five special event stations will be active on 8-23 August for the Formula 1 Grand Prix of Europe that will take place in Valencia: AM5FUV (operated by EC5BZR), AN5FUV (operated by EB5GGB), AO5FUV (operated by EA5UB), EG5FUV (operated by EA5FL) and EH5FUV (operated by EA5GVZ).
F - Alain, F6ENO will be active from Re Island (EU-032) on 2-3 August. He will operate CW QRP on +/- 7030, 10115 and 14040 kHz. QSL via F6ENO, direct or bureau. [TNX F5NQL]
F - Special event call TM9CDX will be aired between 5 and 19 September for the 31st Convention of the Clipperton DX Club, this year to be held at Strasbourg on 18-19 September (details at

http://www.cdxc.org/). QSL via F5CWU.
G - GB4WINGS will be QRV from Windsor Great Park, England on 1-8
August. Expect activity on HF (SSB and digital modes, with some
CW) and 2m (SSB) most of the day and some evenings. This is part
of a communications activity for 5000 Guides and Scouts
participating in international camp WINGS 2009. QSL via M0XDF.
[TNX Southgate Amateur Radio News]
HK - Cody, KC2LSD and Pedro, HK3JJH will be active as 5K5T from Gorgona
Island (SA-017) between 2 and 5 August. They plan to operate SSB
and CW on 40-10 metres. [TNX The Daily DX]
HL - Tai, DS2NMJ will be active as DS2NMJ/2 from Tokchok Island
(AS-090) on 2-3 August. He will operate SSB on 40 and 15 metres,
with less than 50 waats and a GP. QSl via home call, direct or
bureau. [TNX DS2NMJ]
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs
awarded to Guglielmo Marconi, special callsign IY1NGM is being in
use until 10 October. QSL via IZ1LBG, direct or bureau. [TNX
IZ1LBG]
I - Fabio, IW1DFU will be active as IA5/IW1DFU from Elba Island
(EU-028, IIA LI-001) on 1-13 August. He will operate holiday style
mainly CW, with a focus on 30 metres. QSL via home call, direct or
bureau. [TNX IW1DFU]
I - Look for IW6ATQ/p, IW6DLY/p and IZ6PPU/p to be active from a
couple of lighthouses (ARLHS ITA-229 and ITA-230) in Ancona on 8-9
August. They plan to operate SSB and digital modes on 10, 20 and
40 metres. QSL via bureau. [TNX IZ6ASI]
IS0 - Fabrizio, IK5WOB, will be active as IS0/IK5WOB from Sardinia
(EU-024) on 2-12 August. He will operate on 40, 30 amd 20 metres
CW only. QSL via home call. [TNX IK5WOB]
JD_oga - look for JD1BLY (QSL via JI5RPT) and JD1BNF (QSL via JO1LVZ) to be
active from Chichijima (AS-031), Ogasawara on 9-15 August.
Activity will be on 160-6 metres CW, SSB and digital modes, plus
satellite and 2m WSJT EME.QSL via home calls, direct or bureau.
[TNX OPDX Bulletin]
LY - Bronius/LY1CM, Gintautas/LY2GV and Tomas/LY3X plan to be active
from several Lithuanian lighthouses between 6 and 19 August.
Information on the Lithuanian Lighthouses Award can be found at
http://qrz.lt/ly1cm/index_eng.htm [TNX IK3GER]
P2 - After operating from OC-102, OC-231 and OC-205 between 22 October
and 9 November [425DXN 939], Hans, SM6CVX plans to continue the
trip on a solo basis as follows:
11-13 November Hastings Island OC-117
13-14 November Normanby Island OC-116
15-16 November Loloata Island OC-240
The callsign will be P29VCX and QSL via SM6CVX. The web page for
the expedition is at http://www.425dxn.org/dxped/p29_2009 [TNX
IZ1CRR]
SV - Pista, HA8UT and his "fhamily" - including HA8TU (wife), HA8TT
(younger daughter), HG8SS (elder daughter) and HA8SS (son-in-law)
- are spending their summer holidays at Neo Potidea, Greece until

4 August. They are active as SX2Z and/or SV2/homecall on 40-6
metres CW and SSB. QSL via HA8UT, direct or bureau. [TNX HA0HW]
T6 - Steve, W7VOA will be in Kabul to report on the Afghan national
elections between 8 and 22 August. He plans to operate as T6AD
when time permits, using 100 watts and a G5RV antenna with a focus
on 40, 20 and 15 metres CW (and maybe PSK). QSL via K2AU. [TNX
NG3K]
TK - Laurent, F8BBL will be active as TK8B from Corsica (EU-014) on
1-15 August. He will operate holiday style mainly SSB, with some
SSB. Weather and sea dependent side trips to the Lavezzi Islands
(EU-164, 6 August) and the Sanguinaires Islands (EU-104, 11
August) are also being planned. QSL via F8BBL, direct or bureau.
On 8 August he he hopes to go to Punta di Corna Caprunu (535m
a.s.l.) for the SOTA programme. [TNX F5NQL]
UA - Jurij/UA1OC, Aleksej/RN1ON and Vladimir/UA1OMP will be active as
UE1OLH from a couple of lighthouses (ARLHS ERU-002 and ERU-146) on
Mud'yugskiy Island (EU-153) from 31 July to 4 August. They plan to
operate CW and SSB on 80, 40, 30, 20 and 15 metres. QSL via
RK1OZM, direct or bureau. [TNX RN1ON]
W - The Cape Ann Amateur Radio Association will be active again as W1T
from Thacher Island (NA-148) between 1 and 9 August, with main
operation on the 8th and the 9th. Activity will take place from
either the North Tower (ARLHS USA-1027) and the South Tower (ARLHS
USA-105). QSL via W1GLO (direct). [TNX VA3RJ]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CONWAY REEF 2009 ---> The website for the 1-10 October DXpedition to Conway
Reef [425DXN 948] is now up and running at http://www.conwayreef2009.de.
Jan, DJ8NK reports that everything is on schedule: "the paperwork is done,
the flights are booked, the catamaran is chartered, and the hardware is in
store". [TNX DJ8NK]

EU HF CHAMPIONSHIP ---> Organized by the Slovenia Contest Club, this year's
event will take place on 1 August, from 12 UTC to 23.59 UTC. Only Europe to
Europe contacts count. Rules at http://lea.hamradio.si/scc/euhf/euhfc.htm

GEOPARK CERTIFICATE ---> The English Riviera Geopark is offering a special
commemorative European Geoparks Network certificate for contacts made (or
heard, for SWLs) with GB6GEO and other Geopark stations. Details can be
found at www.qrz.com under GB6GEO [TNX G3VOF]

ILLW ---> The 11th annual International Lighthouse/Lightship Weekend,
organized and managed by the Ayr Amateur Radio Group, will take place from
00.01 UTC on 15 August until 23.59 UTC on the 16th. Complete information on
this popular event can be found at http://illw.net. The list of

participating stations (320+ so far) is at http://illw.net/2009_list.htm

+ SILENT KEYS + Recently reported Silent Keys include Volker Winterscheid (DF7IT), Paul Homer (G4BXT), Sandro Jose Tafarelo (PY2OW), Igor V. Kovalyov (RU6FZ, ex-UA6HCW), Robert J. Hudson (W4HR), George W. Edwards (W4OSE) and Robert J. Templin (W5OE).

ARLP031 Propagation de K7RA

ZCZC AP31
QST de W1AW
Propagation Forecast Bulletin 31 ARLP031
>From Tad Cook, K7RA
Seattle, WA July 31, 2009
To all radio amateurs

SB PROP ARL ARLP031
ARLP031 Propagation de K7RA

No sunspot activity this week, and if no sunspot appears today, July 31, the average sunspot number for July will be 5.1, down from June's average of 6.6.

The monthly average of the daily sunspot number, January through July 2009, is 2.8, 2.5, 0.8, 1.3, 4, 6.6 and 5.1.

The three-month averages for October 2008 through June 2009 were 4.5, 4.4, 3.6, 2.2, 2, 1.5, 2, 4.2 and 5.2. This takes into account all the daily sunspot numbers for September 2008 through July 2009, and those numbers are for the center months of each of those three month moving average periods.

Last week's bulletin mentioned W5THT and his question about volcanic ash spewing from Sarychev Peak, and whether this could affect propagation if it were conductive. A note from Kaz Siwiak, KE4PT of Coral Springs, Florida pointed out, ''The ash need not be conductive, it just needs to have dielectric parameters different from air/vacuum, which it does. Yes definitely airborne ash will reflect radio waves.'' At http://www.qrz.com/ke4pt/ you can see a photo of his operating position, and click in the upper right corner of the page for an image of his simple antenna system. Beware of his ''Secret Ham Message''. I clicked on it, and soon found myself trying to solve the cipher instead of writing the bulletin.

Terry Rogers, WA4BVY of Chapel Hill, North Carolina says he is really enjoying this solar cycle bottom. He writes, ''A friend of mine just got back into ham radio bewailing he picked a poor time with no sunspots. Not so. I got into ham radio in 1958 right when 6 meters was open most days but I have never heard E skip every other day and all the way to 6 meters multi-hop (I heard N5OMG comment that night he got a JA7 on 6, and I heard him on 6). I don't even have a 6 meter antenna (80/40/20 inverted vees up 20'. I'm retired in an apartment) but I use the wire I have with good

results out past 1500 miles. 10M E skip comes down just one state away a lot of times.

I never was able to call CQ on 6 CW before and get several answers. I worked the first PSK31 ever for me on 6 the other night. Also, I came in here yesterday at 5:30 PM EDT about and found the strongest signal on 40 SSB which turned out to be EA7GAK, Javier, near the Strait of Gibraltar. Wow. Broad daylight 40M DX. 40M is the new 20M. The path was only half dark. Not only that, but I come in here in the evenings and talk SSB with Italy for 15 minutes or so using 100 watts. 5 watts PSK31 to Italy is easy on 40 with low QRN. So if this is how 160/80/40 F layer and 10/6 E layer are with no sunspots, the sun can keep its ole sun spots.''

Terry sent a recording of Javier's booming 40 meter signal, and he was indeed loud. On the recording EA7GAK mentioned he is running a kilowatt and a shortened 4-element monoband 40 meter Yagi one-half wavelength up the tower, which no doubt helps.

Tomas Hood, NW7US, who writes the monthly Propagation column for CQ Magazine, now offers a weekly podcast devoted to radio propagation. Go to http://podcast.hfradio.org/ to listen. He has produced two so far, for July 18 and 25, so the next one should be on Saturday, August 1.

World Radio magazine ceased publishing a hard copy of their monthly journal, but they are still publishing by posting PDF documents on the web. Best of all, Carl Luetzelschwab, K9LA still writes his monthly propagation column for them.

Go to http://www.cq-amateur-radio.com/WorldRadio.html and click on Back Issues in the left column. You can download the entire content of all 2009 issues by right-clicking on the link below each month, then saving to your drive. Carl's column is always in the higher numbered pages, so if you want to get to his column quickly, just download the last section only. Carl is very knowledgeable about propagation, and his articles are always interesting and informative. Also check out Carl's website at http://mysite.verizon.net/k9la/ to read more of his writing.

Seems that great sporadic-E propagation continues. Mike Schaffer, KA3JAW in Tampa, Florida was searching for television DX last Saturday, July 25, when he received HIJB in the Dominican Republic on channel 2 with fair video quality and moderate audio during the 1230z hour. At 1330z he received TGV on channel 3 from Guatemala, and at 1400z on channel 4 he received a station in Managua, Nicaragua. He notes that the previous weekend had poorer sporadic-E propagation.

Several days earlier, Wednesday, July 22 around 11:00 PM Central Time (0400z Thursday) Trent Fleming, N4DTF of Germantown, Tennessee (EM55) worked 14 stations in Northern Illinois, Minnesota and

Wisconsin on 6 meters. The grid squares were EN52, EN53, EN25, EN34 and EN62, and all signals were at least S7. First QSO was with KK9H, then a pileup ensued, and the last worked was KN0V. After signing with KN0V, the band dropped out completely.

Trent runs 50 watts into a horizontal loop at 25 feet.

Dale Drake, AA1QD of Dover, New Hampshire (FN43mf) noted in last week's bulletin the story about working JA7QVI on six meters, and said they worked each other on 6 meter CW on July 8 at 2304z. Dale said it was quite a thrill, and noted that JA7QVI is running stacked Yagis on six, eight over eight. Dale says, ''Overall the 6M E skip season here started out a bit slower and later than usual in May but it really picked up in June and July. I ended up working 12 new countries for me on 6 so far this season. Im now up to 86 worked in my quest for 6M DXCC.

Victor Androsov, VA2WDQ worked quite a bit of sporadic-E on 2 meters on Wednesday, July 29. He uses a 7 element Yagi that he designed, and it is on a 2 wavelength boom. He wrote, ''That was the biggest 2m Es I've ever heard since I've licensed as VA2WDQ in 2003. I found 144 MHz opened to W0 at around 18 EST (22 UTC). The first station I've worked at 18:13 EST was N0IRS from EM29 coming with strong and clear signal. The last one QSO with WR0F (EM29) logged at 19:48. Anyway I heard other stations I've worked before until 20:00. That was a great opening. Sometimes MUF dropped down and the 2m band got quiet. But after 10-15 minutes W0, W9, W5 jumped up from noise again''.

''That Es opening I worked 17 stations: N0IRS, KC0CFB, WB0NQD, W9RM, KA9CFD, K9AKS, N0PB, N0MST, W6ZI, KD5ZVE, K0CIY, N4LI, N0DIS, W5MRB, KM0T, K5OMC, and WR0F in these grid squares: EM25, EM26, EM27,EM29,EM39, EM44, EM55, EN10, EN13, EN22, EN40, EN41, and EN52''.

Larry Lambert, N0LL of Smith Center, Kansas had his own adventure on 2 meters on the same evening. He wrote, ''With all the sporadic E this summer this happen last evening July 29th at 2343z. K1WHS in Maine was worked on 2m for state number 48 on 2m. All states were non EME and non digital. My state number 47 was W1AIM in Vt. during the 1998 Leonids meteor shower, so number 48 has been 11 years in the coming. I've been on 2m weak signal for 33 years. W9GKA, Kevin, says I am number 13 to do all contiguous 48 states on 2 meters. One has to live in the Midwest to do it. My 2m signal was heard in Maine in July 17th 1980 and that is as close as it got till last evening. Long time to wait for another cloud to be in the correct location as this was near the theoretical 1500 mile limit for one hop of sporadic E on 2m. Also worked 7 others in New England. Was quite a thrill''.

For this weekend, the planetary A index is predicted at 7, which is slightly more active than it has been lately. A solar wind from a coronal hole would be the cause. We are hoping for a return of a

recent sunspot group, but only a weak sunspot was spotted from European observatories this morning.

Geophysical Institute Prague predicts unsettled conditions July 31, quiet to unsettled August 1, quiet August 2-4, quiet to unsettled August 5, and unsettled August 6.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 23 through 29 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 67.8, 68.3, 69.1, 67.6, 68.4, 68.7, and 68.3 with a mean of 68.3. Estimated planetary A indices were 8, 6, 7, 3, 4, 4 and 2 with a mean of 4.9. Estimated mid-latitude A indices were 8, 5, 5, 1, 2, 3 and 2 with a mean of 3.7.

10401. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-07-31 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10401

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Jul 31 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 212 Issued at 2200Z on 31 Jul 2009
IA. Analysis of Solar Active Regions and Activity from 30/2100Z
to 31/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The solar disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 30/2100Z to 31/2100Z:
The geomagnetic field was at quiet to unsettled levels. Solar wind
observations from the ACE spacecraft indicted the presence of a
coronal hole high speed stream. Velocities increased from around
340 km/s to 420 km/s, with +/- 5nT fluctuations in the IMF Bz.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be at quiet to unsettled levels with a chance for
isolated active conditions for day one (01 August). Predominantly
quiet conditions are expected for days two and three (02-03 August).
III. Event Probabilities 01 Aug-03 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 31 Jul 069
Predicted 01 Aug-03 Aug 068/068/068
90 Day Mean 31 Jul 069
V. Geomagnetic A Indices
Observed Afr/Ap 30 Jul 002/003
Estimated Afr/Ap 31 Jul 005/007
Predicted Afr/Ap 01 Aug-03 Aug 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 01 Aug-03 Aug

John;

" but then when has the FCC made a good ruling in the past 15 years so?"

When they stopped wasting my tax dollars, and got those friggin listening stations outta my back yard! I had one less than 50 miles from me.....issued me a pick slip to me for "infringing on the extra portion of 40 meters"

I think big brother measured my less than 75 watts on 7.024

IMHO the government has better things to do!

Dale K8TS (in 8-land)

Paul,

When I was first licensed, VE1 was used for Sable and St. Paul Island also, with no way of really knowing whether a VE1 was there or not unless they signed portable. In the US it became worse when the FCC let you choose a vanity call from any district, but then when has the FCC made a good ruling in the past 15 years or so?

This is a question for the Old Timers. Was call sign allocation ever "perfect?" I know we had none of this "take your call with you when you move" in Canada and the USA in the not to distant past, which helped us know where we were.

However, was there a time (in the 1950s, 1960s, 1970s, whenever) when you heard a VP8 or a KH6 or a VR6 and you could be absolutely sure where they were? As long as I've been around there have been a few anomalies that you had to ask (or know from a DX Bulletin.) For example, was there ever an ITU pattern for 3D2 calls?

I recall my first WAS KH6 on 80M was really loud and he turned out to be in Long Island . . . :-) I finally got a real one on Maui, but the guy on Long Island was so much easier to work!

etc...

They don't really have much of a choice, as I understand it. Note that those are all special callsigns in relatively recent years to US territories.

The reason for this is that the ONLY special, temporary callsign you can get anymore, DXPedition or not, is a 1x1.

You cannot be temporarily assigned KH8S or KH5DX... the only way to get the "right" prefix is to sign:

homecall/prefix.

That doesn't work so well for a big multi-multi DXpedition who wants to have "max rate" and not spend lots of superfluous time sending:

N3OX/KH5K QRZ?

Some DX groups have gone so far as to secure a permanent call in anticipation of an activation. I think that's why the American Samoa DX Group has KH8SI.

But don't expect the 1x1's to go away any time soon. That's what a special call in the US or its territories looks like, even for a DXpedition.

Dan,

Curious what about the KP1 and KP5 blocks, for example? (and
KH2, KH3, KH4, etc.?) If it is only possible to get things like K5D,
etc, are the historical call sign blocks associated with the above
prefixes being released for general use or being locked up for good?

I gather from your message that if a group went to Navassa, for
example, they could not get KP1A or KP1DX and would have something
like K1N or N1N. Is that correct? I thought the proliferation of
1X1 calls was simply because they could and they were shorter and

more efficient, not a significant FCC change like you are describing.

I'm not a guru on US calls. I'm just curious what the rationale
is for removing all of these traditional prefixes. Seems to me KP1A
could be just as easily assigned for 2 weeks to a DXpedition as K1N.

73, Paul VE1DX

Dan,

Curious what about the KP1 and KP5 blocks, for example? (and KH2, KH3, KH4, etc.?) If it is only possible to get things like K5D, etc, are the historical call sign blocks associated with the above prefixes being released for general use or being locked up for good?

I gather from your message that if a group went to Navassa, for example, they could not get KP1A or KP1DX and would have something like K1N or N1N. Is that correct? I thought the proliferation of 1X1 calls was simply because they could and they were shorter and more efficient, not a significant FCC change like you are describing.

I'm not a guru on US calls. I'm just curious what the rationale is for removing all of these traditional prefixes. Seems to me KP1A could be just as easily assigned for 2 weeks to a DXpedition as K1N.

Paul,

The FCC will only issue callsigns for a place with a post office, so Kingman Reef, Navassa, Desecheo and the like are out. Same for KH1, and KH4

The assignment of special calls is now handled by one of five Volunteer Examiner Coordinator organizations, not the FCC itself. I suppose they just didn't want to do any paperwork regarding these assignments anymore, and I suspect the FCC chose the 1x1's so there could be *no possible overlap* with official FCC callsign assignment, ever.

It sorta makes sense to me, in terms of streamlining the process.

But I do find it little annoying to have to use the internet or DX bulletin to know whether N8S is a new DXCC counter or the Ohio Sorghum Festival ;-)

Gonna be a hard one to get changed though... you'd have to write more stuff into Part 97 about how the KP1, etc were allowed for special callsigns but ONLY for allowed operations from those locations, etc.

Right now you can get any 1x1 for any operation from anywhere in the U.S., so there's not much that needs to be checked or verified by the VECs who administer it. Just that there's a valid license associated and a not-stupid-or-disallowed reason to request it. No one has to check that there's landing permission for KP1 or KH4.

OK, John, I follow that logic. In fact, I recall reading that a few years ago somewhere in the famous Part 97 that is often quoted. Makes sense . . . if they need to contact a licensee they need an address where he or she can be reached.

I have in my hand a QSL card from AH3D - Johnston Atoll dated 2003-02-04 with operators OH2BH, OH2PM and W3UR. There would be no postal service there, unless FPO service was still being maintained when they (the military) were completing munitions disposal, etc. That is possible, I suppose. What I'm getting from this is that if the same OPs went back today they would be K3J or similar because the FPO is certainly gone now. In fact a few years ago Johnson Atoll was for sale. Might still be.

Looking at another card, AH1A, from 1993, I'm sure Howland Island never had mail service. Is that explained by a change in FCC rules?

Something is inconsistent because I have AH1A (1993), AH3D (2003) and KP2A/KP5 (1991) . . . this appears at first glance to be a mis-mash of "real" calls and "stroke" calls. Pacific and Atlantic handled differently?

I really don't see the any difference between AH1A (a call that indicates where the operation took place) and A1A (a call which indicates nothing to me.) Neither would have a mailing address and both would be temporary calls. Could AH1B or AH1C be issued today? What am I missing?

OK! That's the change I was looking for. The VECs handle it
and not the FCC. That probably was not the case 15-20 years ago, and
explains my perceived dilemma with the AH1A call, etc.

I knew there was an answer . . . the knowledge of the group
outweighs the knowledge of any single member. Thanks, Dan!

Well... here's the thing.

Martti still holds AH3D, mailing address Jackson, WY.

And here's the weirder thing.

Not a vanity call!

The "Radio Service" box on the FCC ULS website for AH3D lists "HA-Amateur," not "HV-Vanity."

AH3D is just Martti's US call! He's held it for a long time, at least since 1990.

I don't know how he got it... but this *is* a guy who actually was allowed to operate from P5 ;-)

So I Googled about for AH1A. That was once *also* a "regular" U.S. call, held by Luigi Attainese, now N2UR and I8ULL, KF1P before AH1A.

At the time, the AH1A mailing address was Framingham, MA.

I don't know where to find "old" FCC rules, but there must have been a loophole at some point in the 80's/90's before the vanity system but after the "self select" Extra calls of the late 60's early 70's... so we're getting to obscure stuff I don't know about either.

But Martti is still AH3D and I think N2UR coulda stayed AH1A if he'd wanted to.

There WAS a US Post Office on Johnston Island and that expedition was the LAST before the USAF closed the installation on that island (destroying various old war gasses). So AH3 was available then for Johnston Is.

The address for AH1A was in the W1 callarea. The EXPEDITION to Baker/Howland had the benefit of that callsign.

The FCC (no doubt to save money) STOPPED issuing callsigns except to a valid address and shifted the issue of 1x1 special event callsigns to a volunteer group of hams.

Enjoy it, it is not likely to change. The DXCC Desk will KNOW when a callsign was valid for some "entity" vice the yellow bird festival in podunk. It is EASIER to get the hams to issue a 1X1 callsign anyway.

WFWL!!!

I had an old US callbook (remember those) that listed the mailing address for AH1A as

1 Seashore Drive
Canton Island

The FCC later determined that this wasn't a legitimate address (among other things, there is no US post office on Canton Island) so they terminated the callsign.

I think they could still use AH3D because that is a valid call. Once a call is issued, it doesn't matter whether there is still a post office there, as long as they had a valid address somewhere in the US, like on the mainland somewhere.

< Looking at another card, AH1A, from 1993, I'm sure Howland
< Island never had mail service. Is that explained by a change in FCC
< rules?

That was a problem and the FCC eventually cancelled that call.

< Something is inconsistent because I have AH1A (1993), AH3D
< (2003) and KP2A/KP5 (1991) . . . this appears at first glance to be a
< mis-mash of "real" calls and "stroke" calls. Pacific and Atlantic
< handled differently?

It is handled the same. I had WD8QGQ/KH7 from Kure back in 1982, as well as KH6IMX/KH4 from Midway in the same year. It just depends on whether you want to use your home call and sign portable, or whether you somehow received a call from that territory. I also have a KH7AA QSL which was the first call issued for Kure using the KH7 prefix. IT was issued to WD8QGQ (see above). KH7AA has since been reissued to a Hawaiian club.

< I really don't see the any difference between AH1A (a call that
< indicates where the operation took place) and A1A (a call which
< indicates nothing to me.)

A1A isn't a legal US call, but it is the best mode to use overall :)

< Could AH1B or AH1C be issued today?

No, and AH1A wasn't supposed to be issued. Unless they build a post office on Baker or Howland Island and have a legal Baker or Howland address(and I wouldn't hold my breath on this) an AH1, KH1, NH1, WH1 call can't be issued.

I used to have CALLBOOKs back to 1948 when I first got interested. "USED TO" I don't know anything about a former AH1A on Canton, BUT in 1993 with AH1A was on Baker/Howland Island the license and callsign were for the W1 call area (with a valid postal address). I think the license was not renewed by the FCC since they decided "AH1" was not appropriate for the K/W/N New England area...or something.

Don't sweat the callsign, WFWL!

This is a question for the Old Timers. Was call sign allocation ever "perfect?" I know we had none of this "take your call with you when you move" in Canada and the USA in the not to distant past, which helped us know where we were.

However, was there a time (in the 1950s, 1960s, 1970s, whenever) when you heard a VP8 or a KH6 or a VR6 and you could be absolutely sure where they were? As long as I've been around there have been a few anomalies that you had to ask (or know from a DX Bulletin.) For example, was there ever an ITU pattern for 3D2 calls?

I recall my first WAS KH6 on 80M was really loud and he turned out to be in Long Island . . . :-) I finally got a real one on Maui, but the guy on Long Island was so much easier to work!

Gino I8ULL/KF1P got AH1A issued for "1 Seashore Drive, Canton Island,
EQ" in 1983. In 1988 the mailing address was changed to a Framingham, MA
PO box. License cancelled by the FCC in 2001

What you're seeing Paul is the Law of Unintended Consequences at work.

For a time, after the present US Callsign structure was put into place in 1978, it was possible to obtain calls for some of the US possessions without actually living there. (And I'm not talking about the subterfuge that KH2D used to complain so bitterly about, regarding the KH2 and KH0 Extra Class calls). I can think of a few 2x1 calls issued under such circumstances -- although in one case, the amateur holding the call finally did actually use it from said location, but I digress.

Somewhere along the lines, for reasons I don't know, someone in the FCC decided that in order to issue a call to one of these possessions -- such as KH1, KP1, KP5, etc. -- said possession must have mail delivered to it by the US Postal Service, and thus, have a USPS address.

This first came to light, AFAIK, in 2001 when the FCC pulled the AH1A license (see http://www.arrl.org/arrlletter/01/0810/). It also appears from the description of the cancellation that this policy may go as far back as 1993.

And for those who don't care for 1x1's being assigned to DXpeditions, it's noted in the same news story that the ARRL Board about this time voted to petition the FCC to modify the 1x1 rules so that 1x1's could be used for DXpeditions for these territories. Which they obviously now permit. Interesting.

In the ideal world, a petition to the FCC to revamp this part of the call system might be in order. Of course, you'd have to show why it's in the public (and the FCC's) interest, and I'm sure they'd also want to know how they could do it without spending a lot of money reprogramming their creaking database system [answer: Subcontract it to AE7Q!] and all that other fun stuff.

But knowing the FCC these days, if they didn't utterly ignore such a suggestion, they'd find some way to turn such a proposal against us, all while telling us that it's for our own good and how much we'll be better off...

Dan,

Curious what about the KP1 and KP5 blocks, for example? (and
KH2, KH3, KH4, etc.?) If it is only possible to get things like K5D,
etc, are the historical call sign blocks associated with the above
prefixes being released for general use or being locked up for good?

I gather from your message that if a group went to Navassa, for
example, they could not get KP1A or KP1DX and would have something
like K1N or N1N. Is that correct? I thought the proliferation of
1X1 calls was simply because they could and they were shorter and
more efficient, not a significant FCC change like you are describing.

I'm not a guru on US calls. I'm just curious what the rationale
is for removing all of these traditional prefixes. Seems to me KP1A
could be just as easily assigned for 2 weeks to a DXpedition as K1N.

Sorry Paul, I'm trying to get caught up on my mail, and I didn't see this one when I replied to the prior email!

The two cases you site are two of the ones I was referring to.

In the case of AH1A... the assignee of the call, I8ULL, had applied for a (sequential) call change from his (then) US call, KF1P. In 1982. And made up an address on Canton Island (not Baker or Howland), because there are no streets or street addresses on Canton. Compound this with his not filing a change of address until 1988, even though ownership of Canton wasn't transferred to Kiribati in 1982. And he never responded to the FCC's 2001 letter inquiring into the whole thing. Multiple "gotchas" in this one. I'd bet you apples to oranges that if Gino had changed his address shortly after the call was issued, he might have kept it. Ironic that it ended up being used on Baker, so many years after it was issued.

In the case of AH3D... well, that is Martti's US callsign. I don't know how he obtained it (I'm sure he did so legally, I don't wish to imply otherwise -- I just don't know the details). But at the time it was issued, Johnston Island was still occupied by the military, and was receiving mail service. As was the case through the demolition of the facility, when Martti, Bernie, and Pertti operated from there.

Hmmm. Johnston and Midway both at one time had valid USPS mailing addresses and, more importantly, ZIP codes. Do they still, or did the USPS cancel/reassign those ZIP codes? But I digress.

KP2A/KP5 simply did it the "old fashioned" way. Didn't apply for a "special" call, didn't create a fake club to get a club call that could be changed to a prefix-specific call for entity... simply added the portable designator to show where they were really operating from. Don't see a problem with that!

...oh yes. I wonder if the "for sale" government surplus posting for Johnston was actually serious or just someone's idea of a joke (or required for some legal reason). I don't believe the web site with that listing currently exists, although I did enjoy putting the information in my newsletter's DX page at the time. I understand, though, that there's nothing (and I mean nothing) left on the main island; even what's left of the road & runway are in ruins. No infrastructure, and a dump containing plutonium and other radioactive remnants on one end... and a sea wall that is just barely keeping the sea out of the dump. Not exactly a DX'ers dream trip, is it?

OK, John, I follow that logic. In fact, I recall reading that a few years ago somewhere in the famous Part 97 that is often quoted. Makes sense . . . if they need to contact a licensee they need an address where he or she can be reached.

I have in my hand a QSL card from AH3D - Johnston Atoll dated 2003-02-04 with operators OH2BH, OH2PM and W3UR. There would be no postal service there, unless FPO service was still being maintained when they (the military) were completing munitions disposal, etc. That is possible, I suppose. What I'm getting from this is that if the same OPs went back today they would be K3J or similar because the FPO is certainly gone now. In fact a few years ago Johnson Atoll was for sale. Might still be.

Looking at another card, AH1A, from 1993, I'm sure Howland Island never had mail service. Is that explained by a change in FCC rules?

Something is inconsistent because I have AH1A (1993), AH3D (2003) and KP2A/KP5 (1991) . . . this appears at first glance to be a mis-mash of "real" calls and "stroke" calls. Pacific and Atlantic handled differently?

I really don't see the any difference between AH1A (a call that indicates where the operation took place) and A1A (a call which indicates nothing to me.) Neither would have a mailing address and both would be temporary calls. Could AH1B or AH1C be issued today? What am I missing?

No Dave.....I believe we lost proper incentives and enforcement long ago. Riley Holenworth was the best thing that happened to amateur radio in a long time. I favor the old times.....when you had to know something to pass the tests.....lived up to a higher bar, so to speak.

At the time, it just *P---ed* me off that as a Novice, an had yet to learn that you need to be inside the band at least one kc. to safely operate within your privileges. A "pink slip" was ok.....but to have to "respond with in x amount of days........" or else.

With out getting into politics, I think the government has better ways to spend my money than to sit in a chair, with a staff to boot, well I think you know where I'm going with this..... If they have too enforce like that, I'd like to see some more action on the 11 mtr band where they have 50 foot towers, running a kw, or the lids that jam our repeaters and/or on the air activities.

No, I am all enforcment, or at least some.

Hmmm ... ?

Am I to understand from your example that you do not approve of incentives [set aside sub bands] for operators who have demonstrated higher skill and knowledge??

And if your example has an element of truth, am I to understand that you do not advocate enforcement?

Hmmm ... ?

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-July, through Sunday, 2nd-August there were 205 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TN, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week that "all is working to schedule, paperwork is done, flights are booked, boat (a catamaran) is chartered and hardware is in store." During the next few weeks the team will test all of their antennas by taking them to a beach resort by the salt water on the North Sea. Their Web page is now active at: http://www.conwayreef2009.de

3DA0, SWAZILAND (Just a Reminder). Operators David/GI4FUM, Tony/G4LDL, Malcolm/GM3TAL, Gerry/M0VAA, Michael/NC4MM and Yuri/UT5EL are now active as 3DA0DJ, 3DA0TB, 3DA0MH, 3DA0VA, 3DA0MM and 3DA0EL until August 11. The group will operate mainly from the Hawane Resort, but will also be active as 3DA0SS from the international scout camp near Manzini. Activity is expected on 160-10 meters using two stations. Over the past weekend there has been plenty of activity on 80/40/30/20/17 meters using mainly CW/SSB but some RTTY. QSL via their home callsigns.

4W, TIMOR-LESTE (Update). AL, CT1GPQ, will be active as 4W6AL from Timor Lorosae between August 7th and October 3rd. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. His station setup will be an Icom IC-706 MK2g, a dipole for 40 and 30 meters and square loops for 20 and 17 meters. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@...
Activity logs will be online (possibly daily) on: http://algarvedx.com
All information will be sent first via the Algarve STAR DX Team Mailing List. Subscriptions are available on team's WEB site. PLEASE NOTE: This is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time.

5B/C4, CYPRUS. Andy, LZ2HM, will be active as 5B/LZ2HM between August 4-11th. Activity will be on the HF bands plus 6 meters and possibly VHF/UHF bands (KM64HV). QSL via info on QRZ.com. ADDED NOTE: Andy was also active during the WAEDC CW Contest this past weekend as C4I.

5H, TANZANIA. Pat, N2IEN, will be active as 5H2PD until August 8th. Activity will be on 40/30/20/15 meters using CW and SSB. Over the past weekend Pat was on 30 meters CW after 1600z. QSL via N2IEN.

7P, LESOTHO (Update). A team of five operators are now active from the "Trading Post Lodge" in Roma until August 13th. They have two stations on the air at all times with a third station to possibly be on for PSK and RTTY. Activity will be on all bands, but with a special effort on 160/80 meters. Operators are: Pista/HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK via M0URX, others via their home callsigns. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net/7p8.html

A2,BOTSWANA. Operators Les/W2LPL and his son Dan/W2DBL will be active as A25/W2LPL from the Tuli Block in Mashatu, after their South African operation (see below), between August 16-19th. Activity will be mainly 20 meters using SSB and PSK31. They will use a FT-857 into an end feed antenna running 100 watts. QSL via W2LPL.

A3, TONGA. Paul, A35RK, informs OPDX that changes are (and will be) taking place in Tonga. He informs that he has recently made a visit to Nuku'alofa, the capital city, and during his stay there, Paul had a very productive meeting with the Radio Licensing Officer and the Technical Officer in the newly formed Department of Communications. In the past amateur radio issues have been managed by a variety of different government agencies: Tonga Telecom, Marine and Ports, the Post Office, the Treasury, and most

recently the Prime Minister's Office. Pauls states, "All that has changed, and we now have a 'one-stop-shop' for amateur radio licensing and regulation. Virtually all radio-related legislation is currently under review, and a number of changes will be coming soon. A brief summary of our discussion, and the outcomes, follows:
INFORMATION AVAILABILITY - The Department of Communications is building a website. They intend to make license application forms available online.

LICENSING PROCEDURES - Licensing procedures for visiting operators and yachts in transit will be simplified, especially for those entering the country somewhere other than Nuku'alofa (ie Vava'u). They may also make it possible to actually apply for a license online. However, they still want to 'see' an applicant before actually issuing a license.

ENTRY LEVEL LICENSE CLASS - A 'Novice' type of entry level license may be created, in order to encourage more activity. The formation of a club station and licensing classes (possibly thru the Tonga Maritime Training Institute) was discussed.

CALLSIGN ALLOCATION -
1) A35x (single letter suffix) callsigns may soon be issued to resident 'Advanced Class' licensees, and possibly to special event and contest operations.
2) A35xx (2 letter suffix) callsigns may be issued to entry level licensees.
3) A35xxx (3 letter suffix) callsigns may be issued to short-term visitors and transitting yachts.
4) The existing callsign registry will be 'purged' of all inactive callsigns, thus allowing for more new issues. An effort will be made to publish a list of 'current' licensees annually.

POWER LIMITS - Permitted output power will increase from the present 100 watts to 400 watts. This will bring Tonga up to the same level that is authorized in New Zealand and Australia.

ADDITIONAL 40 METER ALLOCATION - The current 40M allocation is 7.0-7.1 MHz. In addition, 7.1-7.2 MHz operation will be permitted on a secondary basis.

60 METER ALLOCATION - This was discussed, but no allocation will be considered until further studies and consultations are made, possibly next year.

EMERGENCY COMMUNICATIONS - Tonga now has a government Emergency Response Plan, and amateur radio participation is authorized in conjunction with the Tonga Defense Force, the Tonga Meteorological Service, the Ministry of Civil Aviation, and the Tonga Red Cross.

MONITORING and ENFORCEMENT - The government intends to more carefully monitor amateur and maritime communications in an effort to reduce 'boot-legging' and to insure compliance with regulations.

I'll keep you advised as things develop. Discussions continue, and I must say that the new Department of Communications is very open and cooperative. If anyone needs further information, they may contact: Fe'ao Vakata (That's pronounced "Fay AH oh Va ka TAH"), Radio Licensing Officer <fvakata@...>"

A3, TONGA. Ramon, XE1KK, is planning to be active from Tonga in October during the CQWW DX SSB Contest (October 24-25th). His callsign will be announced later. He is expected to use 100 watts into some dipoles. QSLs are preferred via LoTW, but the Bureau is "OK".

AM5/AN5/AO5/EG5/EH5, SPAIN (Special Event). Look for the following special event callsigns to be active between August 8-23rd. Activity is to celebrate the "Formula One Grand Prix of Europe" in Valencia, Spain. The following special callsigns will be activated by the following operators:
AM5FUV - Juan/EC5BZR EG5FUV - Jose/EA5FL
AN5FUV - Vincent/EB5GGB EH5FUV - Nando/EA5GVZ
AO5FUV - Pepe/EA5UB
Activity will be mainly on the HF bands using CW, SSB and the Digital modes. A special award will be issued to those who make at least 3 QSOs with 3 different stations. QSL Manager is Jose, EA5FL; QSL direct or by the Bureau. For more information see QRZ.com.

GB111, ENGLAND (Special Event). Viv, G4PLY, will activate special event station GB111HP on the air during the month of August. This is a tribute to Harry Patch (GB90WWI) who sadly passed away on Saturday, July 25th, 5 weeks after celebrating his 111th birthday. He was the oldest surviving combatant living in the UK who fought in World War I. QSL via G4PLY, direct or by the Bureau. NO e-QSL or LoTW.

GB4, ENGLAND (Special Event). Look for special event station GB4WINGS to be active between now and August 8th. Activity will be on HF (SSB/Data with some CW) and 2m (SSB), mostly during the day and some evenings. The special event is during the "WINGS 2009" (Windsor INternational Guide and Scout camp, see <http://www.wings2009.org.uk> in Windsor Great Part, England. Some 6,000 Guides and Scouts from over 40 countries across the globe will be attending this 7 day event of fun, adventure and challenge. QSL via the bureau or direct to M0XDF (QRZ.com).

IOTA NEWS.....
AF-019. Tony, IK1QBT, will once again be active as IG9X from Lampedusa Island (African Italy) during the CQWW DX CW Contest (November 29-29th) as a Single-Op/High-Power entry. He will concentrate on the lower bands prior to contest as IG9/IK1QBT. QSL via his home callsign, by the Bureau or direct.

OC-130. Hans, DL5SDF, has returned to Mindanao (OC-130) and will be active again as DU9/DL5SDF until June 2010. His activity will be CW only, once all his antennas are installed (sometime in August). QSL via DL5SDF, by the DL bureau or direct to: Hans Bohnet, Purok 5, Lower Bon-Bon, Libertad, Butuan City 8600, Philippines. PLEASE NOTE: All bureau requests will have to wait until he returns.

J7, DOMINICA. Pierre, HB9CUA, is once again active as J79PAK from Nature Island (FK95ii) until August 6th. Activity has been mainly 6 meters using CW and SSB. There has been activity on 20/17/15 meters. QSL via home callsign.

JU85, MONGOLIA. Look for special event station JU85TTC to be on the air to celebrate the 85th anniversary of "Technique Technology College of Mongolia" between now and September 31st. Activity over the past weekend has been on 20 meters CW. QSL via JT1DN.

KH6BZF PROPAGATION FORECAST/REPORT (For July August 3-9th).....
Aug 3 AN SOLAR REFERENCE
Aug 4 AN ---------------
Aug 5 AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 6 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 7 AN GEOMAGNETIC REFERENCE
Aug 8 AN ---------------------
Aug 9 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ACTIVITY/NEWS.....
Hector, CE3FZL, will be active as CE2P from Punta Panul Lighthouse (ARLHS-073) in the San Antonio Harbor, Chile, during the upcoming International Lighthouses/Lightships Weekend (ILLW), August 15-16th. Activity will be on 40 meters SSB. QSL CE2P via EA5KB (QRZ.com).

Members of the "Radio Club Uruguayo" will be using the special callsign CW1R from the Punta del Este Lighthouse (ARLHS URU-008, Grid Locator GF25ma) during the upcoming International Lighthouse/Lightship Weekend between August 14-16th. Activity will be on 80-15 meters using CW, SSB and the Digital modes. They will have at least two stations on the air. This will be the first activation of Punta del Este Lighthouse. QSLs for this activity are only DIRECT to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA (w/SAE and 1 new IRC or 2 green stamps).

LAST MINUTE CHANGE. Operators Doug/KD8CAO and John/K8YSE activated "Big Red" Holland Harbor South Pierhead Lighthouse (USA 375), Michigan, instead of Grand Haven South Pierhead LH on August 2nd. QSL via K8YSE.

Members of the "Air Mobile Radio Operator Society" (ND3E) will activate Reedy Island (Not IOTA, USI DE-001, New Castle County, Delaware), plus Old Reedy Island lighthouse (ARLHS USA-568) between 1700z, August 7th and 1900z, August 8th. Activity will be on 80/40/20 meters using CW, SSB and PSK31. QSL by the Bureau or direct to AE3J with SASE.

Members of the "Valley of the Moon Amateur Radio Club" will be active as N6P from the Point Reyes lighthouse (ARLHS USA-636, WW Loc. CM87LX, Marin County, California) between August 7-9th. Bands/modes of activity were not provided. QSL via W6AJF: VOMARC, c/o K. McTaggart, 402 Fourth St. E, Sonoma, CA 95476. Visit their Web page at:

http://www.vomarc.org/index.html

Members of the "Grupo Mistongo DX Tandil" will activate the following lighthouses in the city of Puerto Quequen, Necochea, during the International Lighthouses/Lightships Weekend (ILLW), August 15-16th:
Baliza Pescador Posterior - ARLHS ARG-113
Baliza Espigon Este - ARLHS ARG-114
Other activity pending: Baliza Las Grutas - ARLHS ARG-115 (Rio Negro)

Three radio clubs in Argentina will activate the following lighthouses for the upcoming ILLW and the "Faros del Litoral Atantico Argentino 2009 Award". Look for the following between August 14-16th:
* GRUPO DX BAHIA BLANCA (GDXBB - LU3DXG):
- Recalada Lighthouse (ARLHS ARG-009) - LU5DRV/D and other
- El Rincon Lighthouse (ARLHS ARG-036) -LU4ETN/D and other
- Claromeco Lighthouse (ARLHS ARG-014) - LU4DBP/ and other
- Punta Conscriptos Lighthouse (ARLHS ARG-052) - LU1WJF/W and other
- Malecon Este Beacon (New one! ARLHS ARG reference number to be issuedd) - LU3DXG.
QSL all via: R.C. GDXBB, C. de Correo 709,8000 Bahia Blanca.
* GRUPO MISTONGO DX TANDIL (GMDXT - LU2EE):
- Pescador Posterior Beacon (ARLHS ARG-113) - New one!
- Espigon Este Beacon (ARLHS ARG-114) - New one!
QSL all via: GMDXT, C. de Correo 184, 7000 Tandil.
* AVELLANEDA RADIO CLUB (LU7EO)
- Punta Medanos Lighthouse (ARLHS ARG-008) - LU7EO.
- KM. 0.900 Beacon (ARLHS ARG-110) - LU9DPD/D.
QSL all via: Avellaneda Radio Club, C. de Correo 41, 1870 Avellaneda (BA).

Helmich, PA0HEL, will be active as TM0LHG from the Gravelines Lighthouse (ARLHS FRA-751, ILLW FR-0002) at Petit Fort Philippe during the ILLW (August 15-16th). QSL direct or by the VERON Bureau only (Not the French Bureau).

P2, PAPUA NEW GUINEA (IOTA Op). Hans, SM6CVX, is expected to continue his IOTA hopping in Papua New Guinea (this time solo) during the month of November. He is going to activate three IOTAs this time. Activity will probably be mainly CW using the callsign P29VCX. QSL via SM6CVX.
His current schedule is as follows:
November 11-13th - Hastings Island (OC-117)
November 13-14th - Normanby Island (OC-116)
November 15-16th - Loloata Island (OC-240)
Look for more details and updates on the following Web page at:
http://www.425dxn.org/dxped/p29_2009

PZ, SURINAME (Update). Mike, AJ9C, will be active as PZ5M between October 22-29th. He is expected to be active on 160-6 meters using CW, SSB and RTTY, as well as an entry in the CQWW DX SSB Contest (October 24-25th). QSL to his home callsign with SASE/USD(s) for return postage.

QSL INFO AND NEWS.....

QSLS VIA LOTW: A7/M0FGA

QSLS RECEIVED VIA MAIL: 3D2YA, 3DA0ZO, 3XM6JR, 4U1UN, 5T5DC, A7/M0FGA, AT9RS, E44M, EX8MLE, EZ8AQ, HZ1FS/p, K5D, LU7YS, OJ1ABOA, R1FJT, S92LX, T47C, TF3CW, V63TO, VP5/K5CM, ZF2XP and ZY0F

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

SPECIAL GEOPARK AWARD AVAILABLE (Update/Be The First!). Martin, G3VOF/ GB6GEO, reports: For amateur radio stations/SWLs around the world who contact/hear Geopark stations, the English Riviera Geopark is offering a special commemorative European Geoparks Network radio amateur certificate for contacts with GB6GEO (instant qualifier), or two Geopark stations excluding GB6GEO. (This award will also apply to SWLs on a heard basis). This certificate is endorsed by our Queens husband H.R.H The Duke of Edinburgh with his own words congratulating the holder. Certificates will cost 2.20 UK(pounds) each, 3 Euro's and rest of the world 5 USDs. Alternatively certificate holders to be the first in their country to claim the certificate will have an 'FC' suffix following the certificate number. This denotes the first person in their country to claim the 'Geoparks' award. These certificate holders will be worth one point towards the basic certificate, and two holders are required to claim the award, or work any five (5) non first country certificate holders to claim it. Certificate Manager is Martin Foster, G3VOF. QSL direct via the address on QRZ.com. Only log details are necessary. Also see QRZ.com for more details and the latest updates. Only log details are necessary. First country holders so far include, G4FCN, ON4CAS, K7IWH, 2E0WAI, S53EO, IW2CAM, GW4BKG, and DL3FJK. (You will need only two of these callsigns worked/heard to claim the award) Other callsigns include M6PHD, G7URW, G6CLD, 2E0TAD, G3LQX, M0XLT, G3LHJ, G3PVB, G1FON, G4VUD, 2E0PDL, G7JHE, G3BIT, M1AEI, G3GHS, G0KEK, G3SNU, 2E0JWJ, DJ6WX, 2E0TAG, 2E0GHR, G4VFG, G3SVK, G3JSR, G4VTO, G3NJA/A, 2E0TQR, and M0HEM. (Any five of these callsigns worked/heard will enable you to claim the certificate) Many of these certificate holders can be found on the Torbay Amateur Radio Society LF/HF/VHF nets, details from the Web site: http://www.tars.org.uk To see a picture of the special Geopark certificate, go to: http://www.globalgeopark.org/publish/portal1/tab80/info4187.htm

SX2, GREECE. Pista, HA8UT, and his family are currently on a summer holiday in Neo Potidea (KN10qe) on the Kassandra Peninsula until August 4th. They are using the callsign SX2Z. The family consists of: Pista/ HA8UT (aka HA8Z and HG8Z), Erzsi/HA8TU (XYL), Eliz/HA8TT (the younger daughter of Pista), Andrea/HG8SS (the older daughter of Pista) and her husband Dezso/HA8SS. Their rig is an IC-706 MK2G, and they will be using a vertical and dipole antennas. Activity will be on 40-10 meters plus 6m on CW and SSB. QSL via HA8UT, by the HA Bureau or direct (QRZ.com address).

T6, AFGHANISTAN. Steve, W7VOA, will be in Kabul for national election news reporting between August 8-22nd, and will be active as T6AD when time permits. Activity will be on 40/20/15 meters CW (and maybe PSK) using 100 watts and a G5RV antenna. QSL via K2AU.

TK, CORSICA (Update). Laurent, F8BBL, is on holiday on the main island of Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) between now and August 15th. His QTH will be located in the Valinco Gulf, near the city of Olmeto (Department South Corsica/2A, WW Loc. Loc JN41KQ). His activity will be QRP using a FT-817 and a new MP1 antenna. He is signing TK8B. Activity is on the HF bands, mainly CW, but some SSB during his spare time. His other possibly activities (weather and sea permitting) will be:
August 6th - Activity from the Lavezzi Islands (EU-164, DIFM TK-011, Loc JN41OI) starting around 0900z.
August 8th - Laurent will climb the summit Punta di Buturetu (SOTA TK/TK112, 870m ASL, WW Loc. JN41KR) and expects to be on the air around 1000z.
August 11th - Activity from the Sanguinaires Islands (EU-104, DIFM TK-002, Loc JN41HV) starting around 0900z.

Suggested frequencies are: 7032 kHz/CW, 7096 kHz/SSB and 10118 kHz/CW. QSL via his home callsign, direct or by the REF-Union Bureau only or by the LoTW. Visit his web page at: http://rnb.dx-cw.net

TM9, FRANCE (Special Event). The 31st Clipperton DX Club Convention will be held in Strasbourg, France, between September 18-19th. Look for special event station TM9CDX to be on the air between September 5-19th. Operators mentioned are: Gerard/F2VX, Thierry/F4TTR, Laurent/F5AEG, Rafik/F5CQ, Flo/F5CWU, Alain/F5LMJ, Maurice/F5NQL, John "Gun"/F5VHQ, Serge/F6AML, Maurice/F5NQL, Laurent/F1JKJ, David/F8CRS and Laurent/F8BBL. Activity will be on all HF, VHF and UHF bands using CW/SSB/FM/Digital modes. QSL via F5CWU, direct (SAE + postage) or by the French REF-Union Bureau (please only this bureau.). PLEASE NOTE: Number designator will now change every year and represent the year of the convention (ex. 2010 will be TM0CDX, 2011 TM1CDX, etc...)

VK9N, NORFOLK ISLANDS (Op QRT!). Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) are now QRT as VK9NI as of 2110z, July 28th. According to their Web page, the HARAOA Group made 11199 QSOs with 5397 unique callsigns. A complete breakdown of QSOs can be seen at: http://www.clublog.org/charts/?c=VK9NI#r
PLEASE NOTE: QSL via VK3HR (NOT W3HNK as first announced). More details and updates are available at: http://www.vk9ni.com
Also on Twitter at: http://twitter.com/VK9NI

WFF ACTIVITY. Plamen, LZ3FM, plans to activate the Biosphere Reserve Kamchia (LZFF-011) during his holiday between August 10-20th. Callsign to be used will be either LZ01WFF/2 or LZ3FM/2. Equipment will be IC-746 plus a 4-band GP and dipole antennas. Activity will be on HF + 6m, mainly CW with some SSB. QSL via LZ1PJ, direct or by the Bureau. E-mail requests for Bureau cards are accepted (via lz1pj@...). Write QSO details and callsign worked, since Ivan, LZ1PJ, manages other callsigns too. PLEASE NOTE: LZ01WFF is used for activation for other WFF references by other operators. Ivan, LZ1PJ, will manage this activation only. For other activations listen to operator's instructions.

ZS6, SOUTH AFRICA. Operators Les/W2LPL and his son Dan/W2DBL will
be active as ZS6/W2LPL between August 11-15th. Activity will be mainly
20 meters using SSB and PSK31. They will use a FT-857 into an end feed
antenna running 100 watts. QSL via W2LPL.

10426. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-02 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10426

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 02 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 214 Issued at 2200Z on 02 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 01/2100Z
to 02/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 01/2100Z to 02/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on days one and two (03 - 04 August). By day
three (05 August), the field is expected to be quiet to unsettled
due to a recurrent coronal hole high speed stream that is expected
to rotate into a geoeffective position.
III. Event Probabilities 03 Aug-05 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 02 Aug 068
Predicted 03 Aug-05 Aug 068/068/068
90 Day Mean 02 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 01 Aug 003/004
Estimated Afr/Ap 02 Aug 002/005
Predicted Afr/Ap 03 Aug-05 Aug 005/005-005/005-007/007
VI. Geomagnetic Activity Probabilities 03 Aug-05 Aug
A. Middle Latitudes
Active 05/10/20
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10427. Re: [DX-IS] Puerto Rico callsign prefix rules?

Yahoo group: DX-IS (2009)
Date: 2009-08-03 11:44:19 UTC
From: Deacon Dave
Topic: 10384 Message: 10427

Like you, I favor the old times also. - - -
The USA government really has no desire to enforce, no desire to be involved in licensing, and has delegated their ITU responsibilities with regard to Amateur Radio to an NGO, aka, The ARRL.

To paraphrase and misapply a biblical teaching ... " By their fruits you shall know them." We hear the "fruits" on 75 [outrageous language] and 20 [frequency dictator].

Pink slips used to mean Big Brother is Listening!

Today Big Brother doesn't care, isn't funded by the USA Congress to care, isn't equipped by the USA Congress to care, and isn't staffed by the USA Congress, appropriations [$$$$] for Amateur Enforcement.

No Dave......I believe we lost proper incentives and enforcement long ago. Riley Holenworth was the best thing that happened to amateur radio in a long time. I favor the old times.....when you had to know something to pass the tests......lived up to a higher bar, so to speak.

10428. Re: Puerto Rico callsign prefix rules?

Yahoo group: DX-IS (2009)
Date: 2009-08-03 14:01:58 UTC
From: Art Burke
Topic: 10384 Message: 10428

The FCC will not issue KP1A or KP1DX except to "valid" addresses on/in the territory. Since there are likely to never be any valid mailing addresses for Navassa, Desecheo and the like, you're either going to have to sign portable (longer call) or use a "special" call like K5D, K4M, etc.

Well, I understand the reason, Art, and given that, you should
be able to get WH4A if you wanted for use in your Florida QTH. There
are thousands of 2X1 "territorial" calls tied up in limbo that, as
you say, will likely never be issued due to no mailing address.

I guess we beat this to death! It's a FCC issue, and I'm only
interested as a DXer. From that standpoint, I'd really like the QSL
to have KP5 something printed on it as opposed to K5D. It seems
illogical to work a station in KP5 when no KP5 calls are allowed! :-)

However, as Zack pointed out, as DXers we really shouldn't care
what they sign as long as they go there and the DXCC desk accepts
it. That's why we are DXers . . .

As someone who chases prefixes, and is on the CW WPX Honor Roll, I do like to get new prefixes. Luckily I already have KP1 and KP5 confirmed from 6Y5NR/KP1, MF6S/KP1 and KP2A/KP5. Also have Kingman Reef covered from KH6ND/KH5 when he was on Palmyra Is. and Kure since they started issuing KH7 calls for Hawaii.

Still, It would be nice to get a NP1 or WP5 out of some of these DXpeditions instead of just a K1 or K5 prefix.

It doesn't seem to make a lot of sense to say that KP1 is reserved for Navassa Island calls, but then not to issue any calls for it. Of course, when is the last time the FCC did make any sense...

10434. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-03 22:11:04 UTC
From: Paul Dunphy
Topic: 9721 Message: 10434

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 03 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 215 Issued at 2200Z on 03 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
The geomagnetic field was quiet to unsettled with one isolated active
period observed at middle latitudes between 03/0600 - 0900Z. An
extended period of southward IMF Bz (-5 to -6 nT) was observed
between 02/2000Z - 03/1000Z that contributed to the unsettled to
active conditions.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on day one of the forecast period (04 August).
On days two and three (05 - 06 August), field conditions are
expected to be mostly quiet to unsettled as a recurrent coronal hole
high speed stream will become geoeffective.
III. Event Probabilities 04 Aug-06 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 03 Aug 067
Predicted 04 Aug-06 Aug 068/068/068
90 Day Mean 03 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 02 Aug 002/003
Estimated Afr/Ap 03 Aug 010/007
Predicted Afr/Ap 04 Aug-06 Aug 005/005-007/007-007/007
VI. Geomagnetic Activity Probabilities 04 Aug-06 Aug
A. Middle Latitudes
Active 05/20/20
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10443. C21TI LAST NEWS

Yahoo group: DX-IS (2009)
Date: 2009-08-04 11:59:28 UTC
From: ARMIC EA3RKR ONCE
Topic: 10443 Message: 10443

Dani reports from China, where this work, which is already being prepared and all the way, already has all the material, then return to Malaysia for only a few hours, Sydney-Nadi-Suva, to be in a regional meeting Disaster in the Pacific. At the conclusion of that meeting, he returned to Brisbane and then to Nauru and Solomon.

Finally solved the issue of the amplifier, which broke down in Malaysia for some tests, thanks to UT2XD friend has finally been replaced item amplifier.

Is expected to be operational in DX Expedition dates announced, the information is available at QRZ.COM the indicative is used is the C21TI.

Remember that you can still make donations to defray the huge cost of the expedition.

A greeting and thanks to all who have and are collaborating on the project.

Remember that the ship will also be active on 50 Mhz.

There is SOME TRUTH TO THAT. When Stalin FIRST allowed the Russian hams to talk to the USA, I was in a Submarine in San Diego and hamming from my KWM2 in the car. (It was safe in a parking lot back them!) I called a UA9 who was loud and it was nice QSO until I started chatting with him in RUSSIAN! I thought he was having a heart attack! KGB GRU at the door. QRT in PANIC.

A benefit (perhaps the only one) of the Soviet Union was free QSL service for hams via BOX 88 the Radio Klub in Moskva.

Remember too, in the old days, you not only had to wait on Box 88 in Moscow, but, at times, the printing of the QSL cards was heavily delayed. Apparently not just anyone was allowed to print non-Cyrllic cards. If the two or three printers who were responsible for them got backed up...

I had a similar experience along about 1983. I joined the US Air Force and as soon as I arrived at my duty station and rented a house I put up a trap dipole. Eastern Europe was in on 20 almost every night and I worked SO many of those guys. Places I had never heard of became common place. Sofia was exceptionally strong, both the hams and the SW broadcasts.

After about 6 months of this I happened to tell my boss about it and he told me I had to go to OSI and report them all so that evening I gathered all my logs. The next day I showed up at the OSI office and explained why I was there, and they interviewed me for about an hour and I went back to work.

After the THIRD time I did this they politely asked me not to come back! I guess 300-500 contacts per interview was a bit of a strain! Ha!

SB DX ARL ARLD031
ARLD031 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AGALEGA AND ST. BRANDON ISLANDS, 3B6. Rachid, 3B8FQ will be QRV as 3B7FQ from St. Brandon, IOTA AF-015, and be here until August 30. Activity will be on 40 to 10 meters using CW and SSB. QSL via K5XK.

AZERBAIJAN, 4J. Gerard, 4J/F2VX and Yannick, 4J/F6FYD will be QRV from August 11 to 29. Activity will be mostly on the HF band using SSB. QSL to home calls.

TIMOR-LESTE, 4W. Al, CT1GPQ is QRV as 4W6AL until October 3. Activity is on 40 to 17 meters using mostly CW but with some SSB and RTTY as well. QSL via CT1GFK.

CYPRUS, 5B. 5B/LZ2HM is QRV until August 11. This includes being active as C4I in the Worked All Europe DX CW contest. Activity is on 160 to 2 meters. QSL both calls to home call.

MOROCCO, CN. Richardo, EA5UM is QRV as CN2UM from Ouazzane until August 23. Activity is on 80 to 10 meters using SSB. QSL to home call.

HUNGARY, HA. Special event station HG8NAVIGA is QRV until the end of 2009 to promote the 2009 FSR Radio Controlled Powerboat European Championship taking place in Oroshaza. Activity is on 80 to 2 meters, including 70 cm., using CW and SSB. QSL via bureau.

SARDINIA, IS0. Fabrizio, is QRV until August 12. Activity is on 40, 30 and 20 meters using CW. QSL to home call.

OGASAWARA, JD1. Makoto, JI5RPT and Yoshihi, JO1LVZ will be QRV as JD1BLY and JD1BNF, respectively, from Chichijima, IOTA AS-031, from

August 9 to 15. Activity will be on 160 to 2 meters using CW, SSB and various digital modes, and 2 meter EME and satellites. QSL to home calls.

MONGOLIA, JT. Special event station JU85TTC is QRV until September 30 in celebration of the Technique Technology College of Mongolia's 85th anniversary. QSL via JT1DN.

ALAND ISLANDS, OH0. Alexander, OH0/DL4NO will be QRV from Finstoem from August 10 to 21. Activity is on 40, 30 and 20 meters using CW near the usual QRP frequencies. QSL to home call.

FAROE ISLANDS, OY. Janusz, OY/SP6IXF and Mek, OY/SP7VC plan to be QRV from August 10 to 16. Activity will be on 160 to 2 meters. QSL to home calls.

NETHERLANDS, PA. To celebrate the 80th anniversary of the first PA0 callsign, special event station PA80ZERO is QRV by various operators during the entire month of August. QSL via PA3CAL.

GREECE, SV. A group of operators are QRV as J48LH from Dukato Lefkas Island Lighthouse, ARLHS GRE-060, until August 9. Activity is on all HF bands using CW and SSB with three stations active. QSL via SV3DCX.

INDIA, VU. Special event station AT8LHC is QRV from Kadalur Point Lighthouse, Calicut, Kerala until August 16. Activity is on 40 and 20 meters using CW, SSB and various digital modes. QSL via VU2JHM.

THIS WEEKEND ON THE RADIO. The International Lighthouse-Lightship Weekend QSO Contest, Worked All Europe CW DX Contest, NCCC CW Sprint Ladder, Maryland-DC QSO Party and the SKCC Weekend CW Sprint are all on tap for this weekend. The MMMonVHF/DUBUS 144 MHz Meteorscatter Sprint Contest and the NAQCC Straight Key/Bug Sprint are scheduled for August 12. Please see August QST, page 76, and the ARRL and WA7BNM contest web sites for details.

10454. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-06 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10454

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 06 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 218 Issued at 2200Z on 06 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 05/2100Z
to 06/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 05/2100Z to 06/2100Z:
The geomagnetic field was quiet to active. Solar wind observations
from the ACE spacecraft indicated the onset of a high-speed stream
from a recurrent coronal hole. Velocities increased from around 380
km/s to 520 km/s with +/- 13 nT fluctuations in the IMF Bz.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled with a slight chance for isolated
active periods for day one (07 August) as the recurrent coronal hole
high-speed stream remains geoeffective. Quiet conditions are
expected on day two (08 August). Quiet to unsettled conditions with
a slight chance for isolated active periods are expected for day
three (09 August) due to the next recurrent coronal hole.
III. Event Probabilities 07 Aug-09 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 06 Aug 067
Predicted 07 Aug-09 Aug 067/067/067
90 Day Mean 06 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 05 Aug 005/006
Estimated Afr/Ap 06 Aug 011/012
Predicted Afr/Ap 07 Aug-09 Aug 007/007-005/005-007/007
VI. Geomagnetic Activity Probabilities 07 Aug-09 Aug
A. Middle Latitudes
Active 20/05/20
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10455. 7P8YI

Yahoo group: DX-IS (2009)
Date: 2009-08-07 03:31:13 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 10455 Message: 10455

7P8YI on 40M CW at 02:00 UTC 7 AUG 2009 with good signals. I worked him at about 35WPM, up 1.1 KHz, 100 Watts to a ground mounted vertical. To be honest it took longer to switch from my Corsair II (on 20M PSK-31) to the OMNI VI+ (controlled with Commander) than the time spent calling. I think I only sent my call three times and he came back with a 9M? on the second call. Great Op with good ears.

73 ES DX,

Gary - AB9M

10456. Re: Puerto Rico callsign prefix rules?

Yahoo group: DX-IS (2009)
Date: 2009-08-07 12:52:46 UTC
From: john.brewer@us.schneider-electric.com
Topic: 10384 Message: 10456

I was a novice (WN5AUW) and an active SWL at that time, receiving cards from R. Havana Cuba,
and R.Tirana Albania, as well as the occasional QSL card from eastern bloc DX snagged on 15m.
My father was vice commander of the Air Force Special Weapons Center at the time. He *did* hear about my DXing activities in an official way. It didn't cause any difficulty (I dont think) and I never had to stop doing what I was doing, but eyes were watching our inward mail
(we lived on an air force base).

John K5MO

10457. [425ENG] 425 DX News #953

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B7 - Rachid, 3B8FQ [425DXN 948] will leave Mauritius by boat on 11 August and will be active as 3B7FQ from St. Brandon Island (AF-015) starting on the 12-13 through the end of the month (and possibly for a few extra days in early September). He will operate CW and SSB in his spare time. Look for him on 30-10 metres, although Rachid expects 40 and 20 metres to be most productive. He will use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily. Rachid's anticipated frequencies are 7008, 10108, 14008, 18078, 21008, 24898, 28008 kHz (CW) and 7050, 14191, 18141, 21241, 24941, 28491 kHz (SSB). QSL via K5XK, direct preferred. [TNX K5XK]
3D2_cr - Uwe, DJ9HX has joined the 1-10 October DXpedition to Conway Reef [425DXN 948], which means that they will be able to run up to four stations simultaneously. The callsign will be 3D20CR (3D Twenty CR), to mark the 20th anniversary of the first operation (3D2CR) from the newly born DXCC Entity. QSL via DJ8NK. The website for the expedition is at http://www.conwayreef2009.de [TNX DJ8NK]
4J - Gerard, F2VX and Yannick, F6FYD will be active as 4J/homecall from Azerbaijan on 11-29 August. They will operate SSB on the HF bands. QSL via home calls, direct or bureau. [TNX F5NQL]
5B - Terry, G4MKP will be active as 5B/G4MKP from Cyprus (AS-004) on 14-25 August. He will operate mainly CW on 80-10 metres. QSL via M0URX. [TNX NG3K]
9M - Mirek, VK6DXI will be active in his spare time as 9M8DX/2 from Kuala Lumpur, West Malaysia until 13 August. Then he will go and operate holiday style as 9M8DX from Kuching, Sarawak (OC-088), East Malaysia until the 18th. He will operate mainly CW from both locations. QSL via SP5UAF. [TNX VK6DXI]
BY - A group of six operators will be active as BA7IO/4 from Heng Sha Island (AS-136) on 8-17 August. QSL direct to BA7IO. [TNX www.rsgbiota.org]
C2 - Dani, EA4ATI (9M2TI) expects to be active as C21TI from Nauru (OC-031) on 17-23 August. Plans are to operate SSB and CW on 160-6

metres. QSL via EA4ATI. Further information can be found at
http://c21ti.madrono.net/index.html
CE - Hector, CE3FZL will be active as CE2P from the lighthouse at Punta
Panul (ARLHS CHI-073) on 15-16 August. He plans on 40 metres SSB.
QSL via EA5KB. [TNX EA5OL]
CE0Y - XR0YA is the callsign issued to the expedition to Easter Island
(SA-001) which will take place between 31 October and 15 November
[425DXN 945]. The six team members (namely Marco/CE6TBN,
Leszek/NI1L, Art/PA3C, Zbig/SP7HOV, Stan/SQ8X and Victoria/SV2KBS)
have been granted permission to operate on all bands, and they
plan to focus on 160, 80, 40 and above all 30 metres (CW only, as
digital modes on 30m are not allowed). Working Europe on 30 metres
will be their priority during the first week on the island. XR0YA
will have three stations with two amplifiers and several antennas.
Although SSB will not be neglected, CW will be the main operating
mode, with some RTTY being planned as well. QSL route TBA. Further
information can be found on the expedtion's web site
(http://rapanui2009.org/). [TNX MM0NDX]
CT7 - CT1GZB, CT1CSY and CT2JXT will be active as CR6LH from the
lighthouse at Cabo Espichel (ARLHS POR-009) on 15-16 August. They
plan to operate SSB, RTTY, PSK31 and some slow CW on as many bands
as possible. QSL via CT1GZB, direct or bureau. [TNX CT1GZB]
CT8 - Frank, DK5FT will be active holiday style as CT8/DK5FT from Sao
Miguel (EU-003), Azores on 10-22 September. [TNX DK5FT]
CX - The Radio Club Uruguayo will be active as CW1R from the lighthouse
at Punta del Este (ARLHS URU-008) on 14-16 August. They plan to
have at least two stations up and running on 80-15 metres CW, SSB
and digital modes. QSL direct to Radio Club Uruguayo, P.O. Box 37,
11000 Montevideo, Uruguay. [TNX CX3AL]
DL - Michel/HB9DLO, Pierre-Yves/HB9OMI and Pierre/HB9SMU will be active
as DL/HB9LH from Schleimunde lighthouse (ARLHS FED-217) on Lotsen
Island (not IOTA, O-020 for the German Islands Award) on 8-16
August. They plan to operate SSB and CW on 80-6 metres. QSL via
HB9DLO, direct or bureau. [TNX I2JJR]
EA8 - EA8ANE, EA8AZM, EA8CAC and EA8DP will be active as AO8FLH from La
Entallada Lighthouse on Fuerteventura Island on 15-16 August. They
plan to operate CW, SSB and RTTY on 10, 12, 15, 17, 20, 30, 40 and
80 metres. QSL via EA8AKN, direct or bureau. [TNX EA8CAC]
F - Martin, F4UKP will be active as F4UKP/p from Ile de Re (EU-032) on
15-22 August. QSL via home call, direct or bureau. He plans to
operate SSB and CW, with some PSK31 and RTTY. [TNX
www.rsgbiota.org]
FO - FO8RZ is the callsign issued to Phil, F5PHW (http://f5phw.chez.com)
for him to use during his two-year stay on Tahiti, French Polynesia
[425DXN 945]. The vertical antenna has been set up, he says, the
others will follow in due course. QSL via F8BPN, direct or bureau.
Phil's log will be uploaded to LoTW. [TNX F5NQL]
G - Viv, G4PLY will be active as GB111HP for the rest of August. The
special callsigns is a tribute to Harry Patch, who passed away on
25 July, a few weeks after his 111th birthday. He was the oldest

surviving World War I veteran living in the UK. QSL via G4PLY, direct or bureau. [TNX OPDX Bulletin]
G - Celebrating the 60th anniversary of the first British amateur radio station (H. Woodhead, G2NX) to use SSB, the Marches Amateur Radio Society will be active as GB1SSB on 8-9 and 22-23 August. QSL via the RSGB bureau. [TNX VA3RJ]
G - The Border Reivers Amateur Radio Society (MX0BRS) will be active as GB4SML from St Mary's Lighthouse on St Mary's Island (EU-011) on 15-16 August. QSL via M1DZT.
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marconi, Frank, IZ7AUH is active as IY7GM through the end of the year. On 9 August he will operate on 6 metres during the Alessio Ortona 50MHz Memorial (7-15 UTC). QSL via home call (see qrz.com under IY7GM for QSLling instructions). [TNX IZ7AUH]
I - Giorgio, IZ4AKS will be active as IE9X from Ustica Island (EU-051, IIA PA-001) on 16-21 August. He will operate mainly SSB, with some RTTY and CW, on 40-10 metres. All of the QSOs will be confirmed automatically via the bureau. [TNX IZ4AKS]
JD_oga - Tack, JE1RXJ is active as JD1BNE from Chichijima (AS-031), Ogasawara until 9 August. He operates CW, SSB and digital modes on 80-6 metres. QSl via home call. [TNX JE1RXJ]
JW - This year's SYLRA (http://www.sylra.is/) meeting will be held in Kolbotn, Norway on 3-6 September (special callsign LA1SYL). After that, on 7-11 September, Ingrid/LA8FOA, Unni/LA6RHA and several other YL operators will be active as JW1SYL from Longyearbyen (EU-026), Svalbard. QSL via LA8FOA, direct or bureau.
KL - Boris, N3SY will be active on 40-10 metres as KL7/N3SY from the Denali National Park on 6-15 August. QSl via home call. [TNX NG3K]
KP - The Caribbean Amateur Radio Group (WP4CRG) will be active as W4L from the Arecibo Lighthouse (ARLHS PUR-001), Puerto Rico (NA-099) between 14 and 23 August. QSL direct to CARG, P.O. Box 140031, Arecibo, PR 00614-0031, USA. [TNX VA3RJ]
LA - Henk/PA3FMC, Ruud/PE1BTV and Hans/PH0V will be active from Utvaer Island (EU-055) on 11-17 August. Expect LA/PE1BTV and LA/PH0V to be QRV on 2 and 6 metres respectively, while LA/PA3FMC will operate SSB, CW and PSK on the HF bands. Further information can be found at http://la2009.dxpedition.nl/ [TNX www.rsgbiota.org]
LA - Mario will be active as LA2NK and/or LA/DL5ME from Mageroya (EU-044) on 13-16 August. He plans to operate CW and SSB on 40, 30 and 20 metres. QSL direct to DL5ME. On 19 August he will operate for some eight hours as OH9AA/p from Syvaletto (EU-126). QSL direct to DH5MM.
LU - The Radio Club Argentino will be active as LR5D from Martin García Island (SA-055) and lighthouse on 14-17 August. They plan to operate CW, SSB and FM on 160-6 metres, plus 2m and 70cm. QSL via LU4AA, direct or bureau. Further information can be found at http://www.lu4aa.org/mgi2009.htm [TNX LU1BCE]
LZ - Plamen, LZ3FM will be active as LZ02WFF from Biosphere Reserve Kamchia between 11 and 18 August. He will operate mainly CW with

some SSB on the HF bands and 6 metres. QSL for this activation via LZ1PJ, direct or bureau. [TNX F5NQL]
OJ0 - OJ0B and OJ0J have been active from Market Reef (EU-053) since 6 August. During the weekend, Pertti/OH2PM will participate in the Worked All Europe CW Contest as OJ0B, while Pekka/OH2TA and Henry/OH3JR will operate OJ0J mainly on 30, 17 and 12 metres CW, SSB and RTTY. On 10 August OJ0B will go QRT, but OJ0J will continue until the 12th with a new team including Masaru/JA5AQC, Taka/JA5AUC, Katsu/JA4JBZ and Jaakko/OH1TX. QSL OJ0B via OH2BH, QSL OJ0J via OH0RJ. [TNX The Daily DX]
ON - ON4CB, ON4LO, ON5GQ and ON6HP will be active as OR9W from the lightship "Westhinder 1" on 15-16 August. They plan to operate SSB on various bands. QSL via ON4CB, bureau preferred. [TNX ON4LO]
PA - Special event station PD55EA (http://www.pd7bz.nl/pd55ea) will be active until 28 August to celebrate the 55th anniversary of the open.air museum "Ellert and Brammert" in Schoonoord, The Netherlands. Expect activity on 10, 20 and 40 metres SSB and digital modes. All of the QSO will be confirmed automatically via the bureau. Direct cards should be sent to PD7BZ. [TNX PD7BZ]
PA - Members of the PI4VPO group will operate CW, SSB and PSK on the HF and VHF bands from Stenen Baak old lighthouse (ARLHS NET-071) on 15-16 August. QSL via PA2CNR. [TNX PA0AKN]
PY - Jose/PY6HD, Beto/PY6RT and Nilzo/PY6AWU will be active once again as ZZ6Z from Itaparica Island (SA-023) on 14-16 August. They will operate SSB only on 80, 40, 20, 17, 15 and 10 metres. QSL via PY6HD, direct or bureau. The log will be uploaded to LoTW. [TNX PT7WA]
PY - Mor, PT7ZT will be active as PT7ZT/p from Pecem Lighthouse (ARLH BRA-285) on 15-16 August. QSL via home call, direct or bureau. [TNX PT7ZT]
SP - Wilhelm, SP8AJC and Henryk, SP9JPA will be active as 3Z8WFF from Krempna, Magurski National Park on 20-23 August. QSL via SP8AJC, direct or bureau. [TNX SP9JPA]
SP - Special event station SN120OSP will be active from 21 August to 31 October from Gorowo Ilaweckie, Poland to celebrate the 120 anniversary of the creation of the volunteer fire brigades. QSL via SP4CUF. [TNX SP4CUF]
SV - Look for J48LH to be in use from the lighthouse at Cape Dukato on Levkas Island (not IOTA) on 6-9 August. Plans are to have three stations active on CW and SSB. QSL via SV3DCX. [TNX www.southgatearc.org]
SV - Kostas, SV2MAC will be active as SV2MAC/8/p from Samothraki Island (EU-174) on 16-30 August. He plans to operate SSb on all the HF bands. QSL via home call, direct or bureau. [TNX SV2MAC]
TA - On 17 August 1999 a major earthquake struck northwestern Turkey and killed some 17,000 people. In remembrance of those who lost their lives, the Turkish Special Wireless Activity Team (http://www.tcswat.org) will operate as TC99Y (from Bozburun Lighthouse at Yalova) and TC99K (from Yelkenkaya Lighthouse at Kocaeli) on 15-16 August. QSL via TA1HZ. [TNX TA1HZ]

TK - Heinz, DF6ZY will be active as TK/DF6ZY from Corsica (EU-014) from
16 September to 3 October. He plans to operate on 10-80 metres
mostly RTTY, with some SSB and SSTV on request. QSL via home call,
direct or bureau. [TNX DF6ZY]
UR - The Ternopil Amateur Radio Club will use special callsign EM360B
on 14-18 August to commemorate the 360th anniversary of the
historical battle of Zboriv. QSL via UY5BC. [TNX UR5BCP]
VE - Neil, VE3SST will be active Salisbury Island (not IOTA, CIsA
ON-284) on 15-20 August. QSL via home call. [TNX VE3SST]
VE - Cezar, VE3LYC reports that his VY0O IOTA trip to the Ottawa
Islands (NA-230) [425DXN 950] has been rescheduled for 5-8
September. The islands are quite far from the mainland, and
weather conditions can influence his schedule. [TNX MM0NDX]
VK - Wally, VK6YS (http://www.westozdx.net/index.html) is in the process
of organizing an IOTA expedition to Robertson Island, Houtman
Abrolhos (OC-211) to take place between 29 December and 4 January
2010. QSL via VK4AAR. Permissions, lodging and transport have been
For the time being the team includes Wally and Nigel/VK6NI, but
they are looking for another two operators to share the costs.
Please contact Wally (vk6ys@...) if interested. The
Abrolhos were activated for the first and only time by VK9XZ/6 back
in January 1996. [TNX www.rsgbiota.org]
VU - Special event station AT8LHC will be active on 20 and 40 metres
CW, SSB and digital modes from Kadalur Point Lighthouse (ARLHS
IND-013) on 7-16 August. QSL via VU2JHM, direct or bureau. [TNX
F5NQL]

*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

QSL 3DA0 ---> It seems that some of the qrz.com QSL routes for the current
operation from Swaziland (3DA0DJ, 3DA0EL, 3DA0MH, 3DA0MM, 3DA0TB and
3DA0VA) are not correct. David Hutchinson, GI4FUM/3DA0DJ says he is "the
QSL manager for the group" and that "there will be one card printed with
all 6 individual calls on it". [TNX GI4FUM]

QSL S50HQ ---> The QSL route for S50HQ (IARU HF World Championship HQ
station for Slovenia) is no longer via S57XX. The new QSL manager is S54G
(direct and bureau). The log has been uploaded to LoTW. [TNX S50U]

QSL VIA VE7DP ---> Frank, VE7DP says that the cards for 4F1VEM/9, 4F4PA and
DY1C were printed and mailed a month ago, and the package "should arrive
any day now". All direct requests will be processed by end of August,
please be patient. Bureau cards can be requested by sending an e-mail to
Frank (ve7dp@...), who might also be able to help with DV4ADC and DW4DLJ
(if you are getting no response via the address on qrz.com). [TNX VE7DP]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now
available at http://www.425dxn.org/awards/toplist/index.html. Please note
that QSOs confirmed through LoTW or included in on-line logs are eligible
for listing. Send send your scores, as well as any request for further
information, to Erminio Pandocchi, I2EOW (i2eow@...)

WORKED ALL MOLDOVA ---> The Assotiatia Radioamatorilor din Moldova (ARM)
sponsors the "Worked All Moldova" award for contacts made (or heard, for
SWLs) with Moldovian amateur radio stations since 1 June 1993. Complete
information can be found at http://qrz.ru/awards/detail/616.html or from
the Award Manager (Valery Metaxa, er1da@...). [TNX ER1DA]

QST de W1AW
Propagation Forecast Bulletin 32 ARLP032
>From Tad Cook, K7RA
Seattle, WA August 7, 2009
To all radio amateurs

SB PROP ARL ARLP032
ARLP032 Propagation de K7RA

We had some nice sunspot activity from July 3-10, and were hoping for a return 27-28 days later, but it never happened. Varying by latitude, the sun rotates relative to earth about every 27.5 days. If that same region was still active or activity renewed, then we might have seen something between July 30 and August 7, which is today. Instead, the quiet continues.

Some rather odd numbers appeared on August 5. Check out the eight planetary K index readings on that date at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt and note that they never varied.

Dean Lewis, W9WGV of Palatine, Illinois wrote this week asking about the most likely path that his signal took on July 12. Because of local restrictions, he uses inside wire for an antenna, so he can't tell for sure which direction a signal is coming from. At 0620z in the IARU HF World Championship he worked VK2AYD on 20 meter CW. He wondered if the path was most likely over the Pacific, or the Atlantic Ocean and Africa?

I ran some numbers on W6ELprop (download from http://www.qsl.net/w6elprop/) and used a location of 42.148 deg N and 88.014 deg W for Dean, and according to the entry on QRZ.com, VK2AYD is in grid square QF68in, which W6ELprop translates to 31.44 deg S, 152.71 deg E. W6ELprop indicates that the short path is 9,069 miles with a beam heading from Illinois of 262 degrees. Long path is at 82 degrees from Dean, at 15,806 miles.

With a smoothed sunspot number of 3, it shows that they worked each other at the optimum time for that band. From 0400-0600z the program predicts signals at 19, 21, 23, 24 and 25 db above .5 microvolt, on half hour intervals. After that, signals drop out, which is exactly what Dean experienced.

Any possible long path opening would be much weaker and also earlier, according to the software. It says 2300-0000z is most likely.

Among six meter reports this week, Bill Turner, W4WNT says he was mobile running 40 watts on the beach at Oak Island, North Carolina (FM03) when he worked EA8CQS (IL18) in the Canary Islands on phone on July 29. Bill was using one of those popular and inexpensive monoband whips on the back of his car.

Jon Jones, N0JK of Wichita, Kansas had a lot of 2 meter e-skip excitement on July 29-30, but missed openings the following day. One July 29 he worked (with UTC, call, grid square and state abbreviation) 2242 W1AIM FN34 VT, 2245 K1WHS FN43 ME (heard off and on for over an hour.) 2,300 km, 2252 W2RJO FN23 NY, 2332 KC2RDC FN14 NY, 2349 VE2DFO FN25 QC. He sent a link showing the K1WHS station, at http://www.directivesystems.com/144MHZ.htm. Jon was using a 7 element Yagi on a stepladder in his bedroom. It was facing northeast, but Jon didn't say if the antenna was pointed out the window.

George Ackinclose, W4GNE of Chesterfield, Virginia had an exciting time with that same sporadic-e 2 meter opening on July 29 from 2200-0000z. He was using a 12 element Yagi on a 20-foot boom, but just 25 feet above ground. George reports that he worked ''K0AWU in EN37, Minnesota (approx 1,000 mi.), K0SIX in EN35, Minnesota, KA9CFD in EN40, Illinois, WB0ULX in EN04 South Dakota (approx 1,200 miles.), K0KFC in EN35, Wisconsin, K0CJ in EN34, Minnesota and N0UK in EN34, Minnesota''.

''I have only been in amateur radio since Dec. 2002 and that was the most heart racing, adrenaline pumping action on ANY band that I have been a part of... so far. I'm certain that if I had a little better antenna height I would have worked a lot more, I heard many others just too far down in the noise for me to pick out''. All these contacts had good signals, S5-S9.

Roger Harrison, VK2ZRH sent an interesting email concerning a 3-month running mean of sunspot numbers he has been looking at. You can see his analysis and discussion at http://www.vklogger.com/forum/viewtopic.php?f=43&t=8661. Roger wrote, ''During the late-1980s, I worked with Dr Leo McNamara to produce a series of 9 articles titled ''Radio Communicators' Guide to the Ionosphere'', published in Australian Electronics Monthly (I was Editor/Publisher), Dr McNamara subsequently developed that into a book - ''Radio Amateurs Guide to the Ionosphere'', published by Kreiger. More recently, from around 2002, I began re-acquainting myself with the world of sporadic E research and sporadic E VHF propagation''.

This weekend is the Worked All Europe DX CW Contest. Conditions should continue to be quiet, although currently on Friday morning the interplanetary magnetic field is pointing south, leaving our

earth vulnerable to a solar wind stream. Predicted planetary A index for August 7-11 is 5, 5, 7, 5 and 5.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for July 30 through August 5 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68, 68.7, 68.1, 68.1, 67.4, 65.8, and 66.2 with a mean of 67.5. Estimated planetary A indices were 3, 5, 4, 3, 10, 4 and 6 with a mean of 5. Estimated mid-latitude A indices were 2, 4, 3, 2, 7, 4 and 5 with a mean of 3.9.

10460. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-07 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10460

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 07 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 219 Issued at 2200Z on 07 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 06/2100Z
to 07/2100Z: Solar activity was very low. No flares occurred during
the past 24 hours. The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 06/2100Z to 07/2100Z:
The geomagnetic field was quiet to unsettled. Solar wind
observations from the ACE spacecraft indicated the continued
presence of a recurrent coronal hole high-speed stream. Velocities
varied between 450 km/s and 500 km/s during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on day one (08 August). For days two and three
(09-10 August), quiet to unsettled conditions with a slight chance
for isolated active periods are expected as the next recurrent
coronal hole becomes geoeffective.
III. Event Probabilities 08 Aug-10 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 07 Aug 068
Predicted 08 Aug-10 Aug 067/067/067
90 Day Mean 07 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 06 Aug 008/014
Estimated Afr/Ap 07 Aug 007/007
Predicted Afr/Ap 08 Aug-10 Aug 005/005-007/007-007/007
VI. Geomagnetic Activity Probabilities 08 Aug-10 Aug
A. Middle Latitudes
Active 05/20/20
Minor storm 01/01/01
Major-severe storm 01/01/01

MFJ Acquires Cushcraft (Aug 7, 2009) -- On August 7, MFJ Enterprises announced they had purchased the Cushcraft Amateur Radio antennas product line from Missouri-based Laird Technologies effective July 31. According to MFJ, Cushcraft -- makers of HF/VHF/UHF vertical, beam and Yagi antennas for the Amateur Radio community -- will continue to be manufactured in Manchester, New Hampshire. "We are excited to have the Cushcraft Amateur Radio Antennas product line alongside our other five companies," said Martin F. Jue, President and founder of MFJ Enterprises, Inc. "This product line increases our ability to offer our customers a wide range of antenna options at different prices. Customers will be able to choose from Cushcraft Amateur Radio antennas, Hy-gain and MFJ antennas through one source. " MFJ purchased Hy-gain in 2000 the company also owns Ameritron, Mirage and Vectronics. Jue said that the Cushcraft line will bring more than 50 new products to MFJ's Amateur Radio product line. "We will add more new products to this antenna line and will continue the Cushcraft Amateur Radio antennas name long into the future. Cushcraft Amateur Radio antenna product customers will appreciate the continued and expected top-quality manufacturing of this product in New Hampshire and the MFJ commitment to superb after-the-sale service and tech support in Mississippi," said Jue. The 120 page 2010 MFJ catalog will include the entire Cushcraft Amateur Radio antennas product line. MFJ has set up a special customer support line -- 662-323-5803 -- to handle Cushcraft antenna product technical support, parts requests and customer services.

10462. Re: [DX-IS] Re: Puerto Rico callsign prefix rules?

John, I don't know when you were a novice, but before I became a ham (in 1973) and was on active duty (with a nuclear duty position security clearance), we were once briefed with the statistic that over fifty percent of the U.S. adult population had been "under surveillance" and had a file at one US agency or other. And with your father in "Special Weapons" your mail wasn't the only thing that was being watched.

Being a dependent with a ham station on base must have been a real experience.... and 15 meter DXing as a Novice good fun.

73 ES DX,

Gary - AB9M

Subject: [DX-IS] Re: Puerto Rico callsign prefix rules?

I was a novice (WN5AUW) and an active SWL at that time, receiving cards from R. Havana Cuba,
and R.Tirana Albania, as well as the occasional QSL card from eastern bloc DX snagged on 15m.
My father was vice commander of the Air Force Special Weapons Center at the time. He *did* hear about my DXing activities in an official way. It didn't cause any difficulty (I dont think) and I never had to stop doing what I was doing, but eyes were watching our inward mail
(we lived on an air force base).

During my ham radio lifetime, 55+ years, I held too many DOD/DOE clearances and various endorsements. I served as Chief of Nuclear Weapons Effects, followed by Chief Engineer on the MX-Missile Reentry System and Reentry Vehicle [LGM-118A]. I spent almost 4 years into and out of the Nevada Nuclear Weapons Test Site, and my contracts had several specific UGTs, etc.

During that portion of my engineering career I never worked DX! Any "contact" with a person associated with the Soviet Union or other Communist nations was a reportable "incident". So, no HF DX! I became very active in USAF MARS and spent several years as Region I Communications Manager, AFF1C. Non MARS hammin' was limited to 2 meter FM mobile to and from work.

After retirement I assembled a reasonable HF station and started chasing DX.

Today, well into retirement, I'm too lazy to jump into the pile-ups. I've become a casual DXer on my time and my schedule.

DD, W1MCE and USAF MARS AFW1MCE/AFB1JX/AFF1C

10464. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-08 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10464

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 08 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 220 Issued at 2200Z on 08 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 07/2100Z
to 08/2100Z: Solar activity was very low. No flares were detected
and the visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 07/2100Z to 08/2100Z:
Geomagnetic field activity ranged from quiet to unsettled levels. ACE
solar wind measurements indicated the unsettled conditions were due
to a period of southward IMF Bz coupled with increases in velocities
and IMF Bt associated with a coronal hole high-speed stream. Solar
wind velocities reached a peak of 533 km/sec at 08/0615Z, then
gradually decreased to a low of 429 km/sec by the end of the summary
period as the high-speed stream subsided.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels during days 1 - 2 (09
-10 August), with a chance for active periods, due to another
recurrent coronal hole high-speed stream. Activity is expected to
decrease to mostly quiet levels by day 3 (11 August) as the
high-speed stream subsides.
III. Event Probabilities 09 Aug-11 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 08 Aug 067
Predicted 09 Aug-11 Aug 067/067/067
90 Day Mean 08 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 07 Aug 008/008
Estimated Afr/Ap 08 Aug 003/005
Predicted Afr/Ap 09 Aug-11 Aug 007/007-007/007-005/005
VI. Geomagnetic Activity Probabilities 09 Aug-11 Aug
A. Middle Latitudes
Active 20/20/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

_____

Dear Friends,

the latest issue (July 2009) of the 425 ARI DX Magazine is now available for free download in .pdf format at www.425dxn.org/monthly the official web site of 425 Dx News.

It includes the weekly bulletins published in July, Qsl Managers and News from the Web.

Suggestions, advice, articles and photographs are welcome! Closing date for contributions is ten days prior to publication date. Please send your articles and pictures to iz3eba@...

Thank you for the attention, de

Nicola Baldresca, IZ3EBA

Ohio/Penn DX Bulletin No. 920

The Ohio/Penn DX PacketCluster
DX Bulletin No. 920
BID: $OPDX.920
August 10, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W2VU, K3LR, NG3K, K4UEE, N4AA & QRZ DX, K5XK, KH6BZF, AA7JV, K8YSE, Southgate Amateur Radio Club Web Site, DJ8NK, DL5ME, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA8CAC, F5NQL & UFT, HB9DLO, I1JQJ/IK1ADH & 425 DX News, IZ4AKS, LU1BCE, LZ1ZF, OD5NJ, Pete's-DX-Newsdesk, PT7WA, RSGB IOTA Web Site, S50U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and VU2TS for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-August, through Sunday, 9th-August there were 208 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FW, FY, G, GD, GI, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V8, VE, VK, VP2V, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND. Ron, K5XK, updates OPDX that Rachid, 3B8FQ, will leave Mauritius by boat on Tuesday, August 11th, enroute for St. Brandon (AF-015). Rachid will operate solo as 3B7FQ from August 12th through the end of the month--and possibly a few extra days in early September. Look for him on all bands, 30-10 meters, although Rachid expects 40 and 20 meters to be most productive. He will use both CW

and SSB, as conditions allow. As in Rachid's earlier travels to 3B6 and 3B7, operating time will be shared with his primary mission of performing maintenance on the island's meteorological equipment. He expects to use the island's G5RV and a vertical with a 100 watt transceiver powered by a 12 volt battery that will be charged daily. Rachid likes to use "the 8s" whenever possible on CW. Here are his anticipated frequencies:
CW - 7008, 10108, 14008, 18078, 21008, 24898 and 28008 kHz
SSB - 7050, 14191, 18141, 21241, 24941 and 28491 kHz

If future plans come together, Rachid may operate from 3B9 sometime after his return and hopes to operate from 3B6 again in November. QSL via K5XK, direct preferred.

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week that they have added one more operator to the crew. Uwe, DJ9HX, is the new added operator. Now with the fourth operator they will be able to run 4 stations simultaneously in order to serve the pile-up. They have also announced their callsign for the operation - 3D20CR. The callsign of this DXpedition was issued to commemorate a DXpedition 20 years ago when DK9KX as organizer and leader of a crew, which included today's member DJ9ON, visited this island for the first activation ever. The DXpedition is still looking for sponsors. The total amount of the operation is estimated at 64.000 USDs. For details/updates and on how to donate funds for this operation, please visit their Web page at: http://www.conwayreef2009.de

3DA0, SWAZILAND. Only a few more days to work 3DA0DJ, 3DA0TB, 3DA0MH, 3DA0VA, 3DA0MM and 3DA0EL. Activity is expected to end August 11th. QSL via their home callsigns.

4J, AZERBAIJAN. Operators Gerard/F2VX and Yanick/FYFYD will be active as 4J/homecall, August 11-29th. Activity will be mainly HF bands using SSB. QSL via their home callsign, direct (SAE + postage) or by the French Ref-Bureau (please only this bureau).

4W, TIMOR-LESTE. No QSNs reported yet on Al, CT1GPQ, as 4W6AL from Timor Lorosae. He will be there until October 3rd. Remember, this is "NOT A DXpedition"! CT1GPQ will be in Timor-Leste with a Medical Team and radio operations will take place only during his spare time. Activity will be on 40/30/20/17 meters SSB, RTTY and preferably CW. Pilot station and QSL Manager is Toze, CT1GFK. The pilot station will be in daily contact with CT1GPQ. Any questions or suggestions should be sent to: star@...
Activity logs will be online (possibly daily) on: http://algarvedx.com

6W, SENEGAL. Stan, EI6DX, will be active as 6W/EI6DX from Somone which is located 70 km southeast of Dakar, between November 7-16th. He will concentrate on the lower bands and CW. Stan will take part in JA DX Contest. QSL via RX3RC, by the Bureau or direct. Look for updates at: http://www.ei6dx.com/senegal

7P, LESOTHO (Update). You have until August 13th to work operators Pista/ HA5AO (7P8AO), Frosty/K5LBU (7P8CF), Laurent/W0MM (7P8MM), John/9M6XRO (7P8OK) and Ben/DJ0YI (7P8YI). QSL 7P8OK only via M0URX, others via their home callsigns. They will have a log search page after the conclusion of their operations. For more details, please visit the Texas DX Society's Web site at: http://www.tdxs.net/7p8.html

A6, UNITED ARAB EMIRATES (Update). Philippe, F5LTB/9Q1TB, is now active on the air as A65BI thanks to Abdullah, A61Q, for the support he gave to obtain the necessary authorization from his landlord to erect an antenna on the roof of the building. His activity has been on 20 meters SSB at various times during the day. His QSL Manager will continue to be SM5DJZ, direct ONLY (eQSL are welcome for eDX100, eWAS and eZ40). QSL design for a standard QSL and an eQSL will be ready shortly. Watch QRZ.com for updates.

A9, BAHRAIN. Dave, EI3IO, will be leaving Ireland and will move to Bahrain for at least 2 years. He has not received his callsign yet but plans to be active on 160m (especially during the winter) through the VHF bands. Look for him on 20 meters starting in September. Hopefully more details will be forthcoming. Visit his Web page at: http://EI3IO.com

CQ NEWS. A press release by Richard Moseson, W2VU, Editor of CQ Amateur Radio, dated August 4th, states: "2008 CQ World Wide CW Contest Marks Major Milestone for K0DQ Becomes Possibly the Only Person Ever to Win All Six Major Ham Radio Contests -- Scott Redd, K0DQ, operating the 2008 CW weekend of the CQ World Wide DX Contest from Aruba as P40Q, racked up over a million more points than his closest competitor in the Single-Operator Low Power Class, and became perhaps the only person ever to win single-op world championships in all six major ham radio DX contests. 'I don't know of anyone else' who has won all the major contests, said CQWW Contest Director Bob Cox, K3EST, in announcing the results, which will be published in the September issue of 'CQ' magazine.
Scott had his first taste of contest victory back in 1966, as a young Navy officer posted to Uruguay and operating CX2CO in the phone weekend of the CQ World Wide DX Contest. Over the succeeding years, Scott worked his way through the Navy ranks to Vice Admiral and became Commander of the Fifth Fleet, then served as a civilian in the Iraq Coalition Provisional Authority and as Director of the National Counter terrorism Center before retiring in late 2007. But ham radio and contesting were never far away, and operating from Mexico as XE1IIJ in the early 1970s, Scott won single-op world championships in the CQWW Phone Contest, the ARRL DX Phone and CW Contests and the CQ WPX Phone Contest. Thirty years later, when his professional life permitted a little more hamming time, Scott added the WPX CW crown as P41P, operating from P43P's station in Aruba, in 2002. The only prize that eluded him -- until now -- was the CQWW CW.
'I've been trying like a son-of-a-gun to win (the) CQ World Wide CW,' Scott commented in a 2008 interview with 'CQ'. 'I've come in number two, I've come in number three, but I've never won that one.... so that's still my goal, every time I get close, in CQ World Wide CW, to win the world.'

When informed that he had finally achieved that goal, K0DQ said, 'I guess the message is if you keep at it long enough good things happen. In this case, four decades. It's been a great ride ... and it's still magic!'
CQ congratulates Scott -- already a member of the CQ Amateur Radio Hall of Fame, for his contesting achievements on top of all his other achievements."

CTU IN ENGLAND. Tim, K3LR, announces that if you missed CTU Dayton and CTU Italy this year - here is another chance to attend ConTest University (CTU in England) - this time hosted by Mark, M0DXR. CTU will be conducted during the RSGB 2009 Convention (October 9-11th; formerly unknown as HFC) on Saturday, October 10th. Complete details are available at the following Web pages at: http://www.contestuniversity.com/main/page_uk.html
http://www.rsgb.org/rsgbconvention/events_programme.php
The next CTU during the Hamvention in Dayton, Ohio, United States, will be on May 13, 2010. Details at:
http://www.contestuniversity.com/main/page_home.html

FJ, ST. BARTHELEMY (NA-146). Operators Gary/W2VQ and his son Paul/WQ2N will be active as FJ/W2VQ and FJ/WQ2N between August 18-25th. Activity will be on 80-6 meters using CW, SSB and RTTY (possible PSK31). They will be using only 100 watts into dipoles and beams. An online log will be available during and after the operation at:
http://www.logsearch.org/lsd/logsearch.php?Switch=46
They will be listening for JA/AS and EU a lot, so listen!

FO8, FRENCH POLYNESIA. Phil, F5PHW, who will be in Tahiti for the next two years starting this month, has received his new callsign on his 40th birthday - FO8RZ. He was on the air this past week using a vertical antenna. He was heard on 30 and 20 meters CW. He has other antennas that will be set up later (wires for 80-40m, and a triband beam 20/15/10m). Phil is still moving in, so they have a lot of things to do before being active on the radio. QSL via LoTW or via F8BPN, either direct or via the French Ref-Union Bureau. His Web page will be updated sometime soon at:
http://f5phw.chez.com

GB2/GB4/M0, ENGLAND. Members of Sands Amateur Radio Contest Group will be operating a number of special event stations on Saturday, August 15th, to celebrate the Galloways Society for the Blind's "25th Anniversary of the Cross Bay Walk" led by Queen's Guide Cedric Robinson MBE. The walk generally takes around 3 hours and needs the Queen's Guide to navigate between Arnside and Kents Bank safely because of the quicksands around the bay that have taken many lives over the years. The first appointment was in 1536. Cedric, who is the 25th appointed Queen's Guide to the Sands and local fisherman, has been leading the walks since 1963. The special callsigns to listen out for are:
GB2GSB - Located at Arnside Knott which overlooks Arnside and a good part of the walk.
M0SCG/M - Will be operating from the tractor which follows the walkers and can be used if anybody becomes too exhausted or ill during

the walk.
GB4GSB - Located at the end of the walk at Kents Bank.

A special certificate is offered for amateurs and SWLs who work any of the stations. To obtain a certificate, send an A4 SAE and a check for 2.50 (pounds) made out to SARCG, and send it to their QSL Manager G0VGS (see QRZ.com or: Ian Maude, 21 Colwyn Avenue, Bare, Morecambe, Lancs, LA4 6EQ. Once printing costs are covered, any money left over will be donated to the Galloways Society for the Blind. For more details about the walk, visit the following Web pages:
http://www.galloways.org.uk/main/pages/baywalk09.html
http://www.timetravel-britain.com/articles/country/sandwalker.shtml

IOTA NEWS.....
AF-019. Emilio/IZ1GAR will be active as IG9W from Lampedusa Island (African Italy) during the CQWW DX CW Contest (November 28-29th). He will concentrate on the lower bands prior to contest as IG9/IZIGAR. QSK via his home callsign.

EU-005. Steve, G0UIH, will be active as homecall/p from Piel Island (CU-005 for English Islands), August 14-16th. This island is the "Jewel in the Crown" of the Islands of Furness. The island has a history going back to the 11th century. Expect activity on all HF bands. QSL via his home callsign, direct or by the bureau.

EU-044. Mario, DL5ME, will be active as LA2NK or LA/DL5ME from Northcape on the Island of Mageroya, August 13-16th. Activity will be on 40/30/20 meters using CW and SSB. QSL direct ONLY to DL5ME (address on QRZ.com).

EU-051. Giorgio, IZ4AKS, will be active as IE9X from the Island of Ustica (IIA PA-001, MIA MI-116) between August 16-21st. Activity will be on 40-10 meters (mainly SSB, but also RTTY and CW) with 100w and vertical antenna. QSL Policy: A special QSL in advance to all via Bureau.

EU-055. Operators Henk/PA3FMC, Ruud/PE1BTV and Hans/PH0V will be active as LA/homecall from Utvaer Island, August 10-18th. QSL via their home callsigns, direct or by the bureau.

EU-126. Mario, DL5ME, will be active as OH9AA/p from the Lappi Province Group for only a few hours on August 19th. Activity will be on 40/30/20 meters using CW and SSB. QSL direct ONLY to DL5ME (address on QRZ.com).

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from Samso Island (DIA JY-008, WLOTA 0726) between August 22nd and September 4th. Activity will be on all HF bands, mostly CW. QSL via DL2VFR, by the bureau or direct.

EU-174. Members of the J42ARET club will be active as SX8DI from Penna Island (GIOTA NAS-045, WLOTA 2124, WW Loc. KN10XH), one of the Drenia Islands between August 28-31st. The group also plan to activate the lighthouse on Frini Island as SX8DI/LH. Operators mentioned are: Demetrius/SV2GWY, Angelo/SV2GWR, Cleanthis/SV2XI, Dimitris/SV7HRJ, Nick/SV7HVI, Themistokles/SW2HQF and Nikos/ SW2HVD. Activity will be on HF, VHF and UHF, and all modes. QSL via the Bureau, eQSL or direct (enclose 1 IRC or 2 GSs + SAE) to SV2GWY. For more information and log search, visit the Web page at: http://sx8di.blogspot.com

NA-230. (Update/Change) Cezar, VE3LYC, will attempt his most difficult operation to date: activating for the first time the Ottawa Islands (IOTA NA-230) group in Hudson Bay. Name of the specific island is not available at this time, but the dates have been announced, August 31st to September 3rd. The callsign will be VY0O. Cezar is still looking for financial support for this project. Information for donors as well as QSL information will be posted in due course on VY0O page at QRZ.com. For more information see OPDX.916.

OC-211. Operators Wally/VK6YS and Nigel/VK6NI plan to be active as VK6YS from Robertson Island, in the Pelsaert Group (WW Loc. OG71AC) between December 29th and January 4th, 2010. They are looking for up to two operators to join them. Please contact Wally at vk6ys@... if you are interested. More information will become available closer to the DXpediton date. Visit their Web site at: http://www.westozdx.net

SA-023. Operators Jose/PY6HD, Beto/PY6RT and Nilzo/PY6AWU will be active as ZZ6Z from Itaparica Island between August 14-16th. Activity will be SSB only on 80/40/20/17/15/10 meters. QSL via PY6HD, direct, LoTW or by the Bureau.

JD/O, OGASAWARA. Just a reminder that operators Makoto/JI5RPT (JD1BLY) and Yoshihi/JO1LVZ (JD1BNF) will be active from Chichijima Island (IOTA AS-031) between now and August 14th. Activity will be on 160-6 meters using the satellites, CW, SSB, Digi modes and 2m WSJT EME. QSL via their home callsigns. Log searches will be available on the following Web sites:
JD1BLY: http://www.ji5rpt.com/jd1/
JD1BNF: http://www.hattsan.com/

KH6BZF PROPAGATION FORECAST/REPORT (For July August 3-9th).....
Aug 10 AN SOLAR REFERENCE
Aug 11 AN ---------------
Aug 12 AN AN - Above Normal/Geomagnetic Level is QUIET

Aug 15 AN ----------------------
Aug 16 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between

7-16 and "K" index will be 3 or less
ADDED NOTES BY LEE: Lee informs that "SpaceWeather.com" is reporting that this year's Perseid meteor shower may be even better than usual, especially on the peak day of August 12th. The Web site is reporting that, "According to NASA's Meteoroid Environment Office, a filament of comet dust has drifted across Earth's path, and when Earth passes through it sometime between 0800-0900z (1-2 am PDT) on August 12th, the Perseid meteor rate could surge to twice its normal value. Check <http://spaceweather.com> for details and observing tips." The peak hourly rate could reach 200 meteors. Many hams who enjoy making meteor scatter contacts look forward to the Perseids each August, along with backyard astronomers who take advantage of the warm summer weather to sit outside late at night and watch the sky show.
MORE NOTES BY EDITOR: Cycle 24 Webinar - Well-known propagation expect Carl Luetzelschwab, K9LA, will be giving a Webinar presentation on Cycle 24, August 19th at 8 PM EDT (August 20th - 00:00 UTC). The Webinar is hosted by the Potomac Valley Radio Club (PVRC) and is free. All you have to do to register is go to <http://www.pvrc.org> and click on the Webinar link. You will receive an E-mail with additional details about the Webinar and login instructions.

KL7, ALASKA. Boris, N3SY, is expected to be active as KL7/N3SY from the National Park "Denali", between now and August 15th. Activity will be on 40-10 meters using a Yaesu FT-100D into dipoles and MFJ-1622 vertical 1.5m long. QSL via his home callsign (QRZ.com).

LIGHTHOUSE ACTIVITY/NEWS.....
Members of the Grupo DX Gran Canaria, Seccion Local URE Las Palmas (EA8URL), will activate La Entallada Lighthouse (ARLHS CAI 041 - Punta Lantailla) as AO8FLH on Fuerteventura Island (AF-004, DIE S-006, FEA D-2795, DME 35030, WLOTA LH-0883) in the Canary Islands during the International Lighthouse-Lightship Weekend (August 15-16th). Activity will be on 80-10 meters including 30/17/12m using CW, SSB and RTTY. Operators mentioned are: Marino/EA8DP (CW), Juan/EA8CAC (CW/RTTY/SSB), Jesus/EA8ANE (SSB/RTTY) and Federico/EA8AZM (SSB/RTTY). QSL via EA8AKN, by the Bureau or direct.

Operators Michel/HB9DLO, Pierre-Yves/HB9OMI, and Pierre/HB9SMU will be active as DL/HB9LH from Schleimunde Lighthouse (ARLHS FED-217, ILLW DE-0073) on Lotseninsel Island (Pilot Island)(German Island Award O-020; Grid Locator: JO54AQ) between now and August 16th. QSL via HB9DLO, by the Bureau or direct. For more info: http://www.hb9lh.ch

Members from the Radio Club Argentino will operate from Martin Garcia Island (SA-055), August 14-17th, and plan to activate its lighthouse during the 2009 International Lighthouse and Lightship Weekend (ILLW). The callsign to be used will be LR5D and activity will be on CW, SSB and FM, on 160-6 meters and 70cm. QSL via LU4AA, direct or by the Bureau. Updates and more info will be available at:
http://www.lu4aa.org/mgi2009.htm

Look for a special event activation of the Centenarian Kadalur Point Lighthouse (ILLW IN0002, ARLHS IND-013), located on the west coast of India, tp take place between now and August 16th, using the callsign AT8LHC. Look for activity on all bands and modes, propagation permitting. QSL via VU2JHM, direct or by the bureau. Details of this lighthouse is available on: http://www.dgllnoida.gov.in/cochin/kadalur.html
ADDED NOTES: This lighthouse will be celebrating its 100th anniversary during the month of October. Also, look for activity on 40 and 20 meters on CW, SSB and the Digital modes, as well as VHF and Echolink, by the following individuals using their own callsigns: VU2JHM, VU2LU, VU2FI, VU2LX, VU2UR, VU2GUR, VU2KGN, VU2OJ or clubstation callsigns of VU2ARC, VU2IIH or VU2LCI. Lions Club of Bangalore North Club (#026596 that is District 324-D6) through its Lions Clubs International Amateur (Ham) Radio Club has lent their HF equipment and accessories. This activity is part of Bangalore Amateur Radio Club's Golden Jubliee and Hamfest India 2009.

NWR 2009. The KP1-5 Project, which brought you the 2009 Desecheo Island DXpedition, is pleased to announce that it is serving as national coordinator for Amateur Radio's observation of the "2009 National Wildlife Refuge Week", Sunday, October 12th to Saturday, October 18th, 2009. The goal is to combine your communication skills with your enjoyment of the outdoors to help others learn about the National Wildlife Refuge System. Only authorized, responsible access to refuges is sanctioned by this event. This year the National Wildlife Refuge System celebrates 106 years of conservation and quality recreation. Amateur Radio operators can help spread the word about the National Wildlife Refuge System by operating in or near a refuge during National Wildlife Refuge Week. For more details on this event, please visit the following Web page at: http://www.nwrweek-radio.info

OH0, ALAND ISLANDS. Alexander, DL4NO, is expected to be active as OH0/DL4NO from Finstoem on the main island of the Alands (EU-002) between August 10-21st. Activity will be limited because he is on holiday, but look for him on CW on the usual QRP frequencies for 40/30/20 meters mainly during his evening hours. He will be using a FT-817 and a GP antenna. QSL via his home callsign.

OH0, ALAND ISLAND (EU-002). Operators Ari/OH5DX, Tomi/OH6EI, Juha/OH6XX and Timo/OH6GLE will be active as OH0Z during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via W0MM.

PJ5, NETHERLANDS ANTILLES. Dave, AH6HY, will be active as PJ5/AH6HY from Sint Eustatius (NA-145) between September 26th and October 1st. Activity will be holiday style with operations on 40-10 meters, mostly SSB with some CW. QSL via AH6HY, by the bureau or direct.

QSL INFO AND NEWS.....
QSL FJ/VE3EY via VE3EY

5K0T QSL STATUS. George, AA7JV, reports that about 2000 QSLs so far have gone out since mid-July. A large batch of US/Canada bound cards was bulk-shipped to him last week and will be sent to their final

destinations as soon as the package arrives. (It seems that mail from Hungary takes about 10 days to get to Florida.)

Photos and QSL route of the OD5WPX contest operation by Gabby, OD5NJ, are available at: http://www.qrz.com/db/OD5WPX/1249804149
Contest location was 1460m ASL from Gabby's summer home in a village called Aintoura el-Maten (population 500).

S50HQ QSL STATUS/CHANGE. It has been reported that S57XX is not handling QSL cards for S50HQ anymore! S50HQ QSL requests received via the bureau will receive a return card via the QSL bureau by Milos, S54G. If you wish to exchange QSL card direct, please use S54G's QRZ.com address. Cards with insufficient postage or no return envelope will be returned via the QSL Bureau. S50HQ 2009 log is also uploaded on "Logbook of The World" (LoTW). Feel free to match your log for digital certification.

TK8B LOGS. Laurent, F8BBL, is currently uploading his logs from his Corsica operation at: http://www.dx-cw.net/logsearch/logsearch.php
He will be there until August 15th.

George, AA7JV, reports that the VK9GMW QSL cards were received from the printer last weekend, and they will start shipping them by August 15th.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3XY5M, H6VA, JD1BMM, PZ5WP, S92LX, TL0A, V63MY and ZF2ZB

QSLS RECEIVED VIA THE BUREAU: YK9G

WFF ACTIVITY.....
(Update) Plamen, LZ3FM, plans to activate the Biosphere Reserve Kamchia (LZFF-011) during his holiday between August 11-18th. Callsign to be used will be LZ02WFF, not LZ01WFF/2. Equipment will be IC-746 plus a 4-band GP and dipole antennas. Activity will be on HF + 6m, mainly CW with some SSB. QSL via LZ1PJ, direct or by the Bureau. E-mail requests for Bureau cards are accepted (via lz1pj@...). Write QSO details and callsign worked, since Ivan, LZ1PJ, manages other callsigns too. PLEASE NOTE: LZ01WFF is used for activation for other WFF references by other operators. Ivan, LZ1PJ, will manage this activation only. For other activations listen to operator's instructions.

WFF enthusiasts (5 to 10 operators), plan to activate the Biosphere Reserve "Steneto" (LZFF-017) in the National Park "Central Balkan" (LZFF-001) between August 20-24th. Activity will be on all HF bands, as well as 6m and 2m, using CW and SSB from mountain hut "Dermenka" - 1504 meters A.S.L. (Grid Locator: KN22IR). QSL via LZ1ZF.

XR0, EASTER ISLAND. An international team of operators will be active as XR0YA from Rapa Nui between October 31st and November 15th. This will be a lite and small DXpedition with 6 operators. Operators mentioned are: Marco/CE6TBN, Leszek/NI1L, Aart/PA3C Zbig/SP7HOV, Stan/SQ8X and Victoria/

SV2KBS. Although Easter Island is no longer among the "100 Top Most Wanted DXCC Entities", it is still most wanted on some bands such as 30 meters and any activity on this band is very seldom due to a fact a special, temporary license submitted by Chilean Ministry of Telecommunication is obligatory. The group has obtained a license for all bands, and they decided to dedicate their DXpedition to 30 meters (CW section only! Digi-modes on 30m are not allowed in Chile), and 160, 80 and 40 meters. The group thanks the support from "Radio Club de Chile" to help obtain and have this unique opportunity to activate Rapa Nui on 30 meters. A QSL route has not been announced yet, but it will be shortly. They plan to use an "Online QSL Request System" (OQRS) for direct requests and also the standard QSLing via direct and bureau options. Their logs will be uploaded to the LoTW after the DXpedition after some period of time. They will NOT nor plan to use eQSL. For more details and update, visit the XR0YA Web site at: http://rapanui2009.org

10467. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-09 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10467

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 09 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 221 Issued at 2200Z on 09 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 08/2100Z
to 09/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 08/2100Z to 09/2100Z:
Geomagnetic field activity was at quiet to unsettled levels. ACE
solar wind data indicated the unsettled conditions observed during
09/0300 - 0900Z were associated with a period of sustained southward
IMF Bz (minimum -4 nT at 09/0300Z). Solar wind velocities ranged
from 408 - 481 km/sec during the period.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet to unsettled levels with a chance for active
levels on day 1 (10 August) due to a recurrent coronal hole
high-speed stream. Activity is expected to decrease to quiet levels
during days 2 - 3 (11 -12 August) as the high-speed stream subsides.
III. Event Probabilities 10 Aug-12 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 09 Aug 067
Predicted 10 Aug-12 Aug 067/067/067
90 Day Mean 09 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 08 Aug 002/004
Estimated Afr/Ap 09 Aug 007/007
Predicted Afr/Ap 10 Aug-12 Aug 007/007-005/005-005/005
VI. Geomagnetic Activity Probabilities 10 Aug-12 Aug
A. Middle Latitudes
Active 20/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10469. nauru c21ti last news

Yahoo group: DX-IS (2009)
Date: 2009-08-11 01:26:14 UTC
From: ARMIC EA3RKR ONCE
Topic: 10469 Message: 10469

The Team Leader of the desired C21TI DX expedition to Nauru, Pacific Adventure 2009, the Spanish EA4ATI, tells us that everything is on the march, is currently in Suva, on the way to Nauru where they are expected to arrive shortly, and if not There is nothing new or setback, the station will be in the air as planned.

The promotional video available on youtube in www.youtube.com/ea3rkr.

All the info QRZ.COM activity and the event's official website.

Upcoming videos in other languages

You too can help the success of this expedition longed to this DXCC entity that is among the most wanted, consider a donation and works with this adventure.

C21TI

Genuine commitment to the radio.

Please spread this news on lists, forums and newsletters, as well as other websites.

Thank you very much.

10470. RE: [DX-IS] Re: Puerto Rico callsign prefix rules?

Yahoo group: DX-IS (2009)
Date: 2009-08-11 08:30:31 UTC
From: Lance Martin
Topic: 10384 Message: 10470

In my opinion call signs give each of us our identity. Part of our identity is our geographical location.

Seems as though this logic went out the window years ago...

So we are to just get on with the current system....guess I am getting old...

73, Lance - VK6DU

Well, I understand the reason, Art, and given that, you should be able to get WH4A if you wanted for use in your Florida QTH. There are thousands of 2X1 "territorial" calls tied up in limbo that, as you say, will likely never be issued due to no mailing address.

I guess we beat this to death! It's a FCC issue, and I'm only interested as a DXer. From that standpoint, I'd really like the QSL to have KP5 something printed on it as opposed to K5D. It seems illogical to work a station in KP5 when no KP5 calls are allowed! :-)

However, as Zack pointed out, as DXers we really shouldn't care what they sign as long as they go there and the DXCC desk accepts it. That's why we are DXers . . .

73, Paul VE1DX

10473. Cycle 19 and MUF

Yahoo group: DX-IS (2009)
Date: 2009-08-11 21:29:06 UTC
From: John Geiger
Topic: 10473 Message: 10473

Although we didn't have all of the measuring techniques we do today, does anyone know what the estimated MUF was of Cycle 19 at its peak? Did it get even close to 2 meters at all?

73s John AA5JG

10474. Maybe this applies to some of us!

Another Question Answered

by Hugh Cassidy, WA6AUD

(Originally Published in the West Coast DX Bulletin)

One of the younger QRPers was up the hill last week, anxious as the young always are to gain DX stature. "I keep hearing about the Mysteries of the Ages," he charged us, "but what are they? And why are they so difficult to understand?" We almost heard a tiny sigh within us when we again heard these words for well we know how the young and restless are always questioning. But they must have their answers so we hauled him up the back roads to the hill to the Old Timer, who listened to the query stated again.

"What will you do when you get the 300-DXCC sticker?", the Old Timer asked, and the QRPer had to stop and think. "I guess I will just keep on going," he said. "Jut keep looking for a few more I need and any new stuff that comes along. What else is there to do?"

The Old Timer was silent for awhile before speaking again. Finally we heard the words again, "Eventually, most will learn some of the Mysteries of the Ages," he said, "though understanding may be long in coming. But keep in mind, as you may just have indicated, that the young often tend to believe that things go on forever. The old realize that there is an end to everything, even DX." And that was that. For as Albert would so often say, all things are relative, some more so. And on the way down the hill the QRPer was still asking his questions. "What does he mean?" he asked and we realized again how difficult it is to understand the Mysteries. But we tried to explain. "DX is a state of mind," we said, possibly for the thousandth time, "and each day is a day of DX to itself. Enjoy the good days of DXing while you can. But one of these days you will realize that the good days of DXing, maybe even the Great Days of DXing, come to an end."

The QRPer was silent for awhile but later on he spoke again. "You know something," he said. "I think that when I am a little older I will understand these things better. But right now what could be more interesting than working some new DX?" And we left things at that for everyone gets a bit smarter with the years, and the old lose the fears and uncertainties of youth. And all of this may be a bit hard to understand but if you do, certainly you are ready for more of the Eternal Enigmas.

Subject: [DX-IS] Maybe this applies to some of us!

Another Question Answered

by Hugh Cassidy, WA6AUD

(Originally Published in the West Coast DX Bulletin)

One of the younger QRPers was up the hill last week, anxious as the young always are to gain DX stature. "I keep hearing about the Mysteries of the Ages," he charged us, "but what are they? And why are they so difficult to understand?" We almost heard a tiny sigh within us when we again heard these words for well we know how the young and restless are always questioning. But they must have their answers so we hauled him up the back roads to the hill to the Old Timer, who listened to the query stated again.

"What will you do when you get the 300-DXCC sticker?", the Old Timer asked, and the QRPer had to stop and think. "I guess I will just keep on going," he said. "Jut keep looking for a few more I need and any new stuff that comes along. What else is there to do?"

The Old Timer was silent for awhile before speaking again. Finally we heard the words again, "Eventually, most will learn some of the Mysteries of the Ages," he said, "though understanding may be long in coming. But keep in mind, as you may just have indicated, that the young often tend to believe that things go on forever. The old realize that there is an end to everything, even DX." And that was that. For as Albert would so often say, all things are relative, some more so. And on the way down the hill the QRPer was still asking his questions. "What does he mean?" he asked and we realized again how difficult it is to understand the Mysteries. But we tried to explain. "DX is a state of mind," we said, possibly for the thousandth time, "and each day is a day of DX to itself. Enjoy the good days of DXing while you can. But one of these days you will realize that the good days of DXing, maybe even the Great Days of DXing, come to an end."

The QRPer was silent for awhile but later on he spoke again. "You know something," he said. "I think that when I am a little older I will understand these things better. But right now what could be more interesting than working some new DX?" And we left things at that for everyone gets a bit smarter with the years, and the old lose the fears and uncertainties of youth. And all of this may be a bit hard to understand but if you do, certainly you are ready for more of the Eternal Enigmas.

This sentence was the jest of the article:

"Eventually, most will learn some of the Mysteries of the Ages," he said, "though understanding may be long in coming. But keep in mind, as you may just have indicated, that the young often tend to believe that things go on forever. The old realize that there is an end to everything, even DX."

I understand it, but don't like it! 2-3 years of the flux being at 67 might be problematic. :-)

I checked the calendar and it is not April 1st. However I also looked
at the ARRL site and nothing there and I would expect, hope, there would be.

Yes, I hope as I have the card.

From: Lee Jennings
Topic: 10483 Message: 10483

Amazing news
73, Lee ZL2AL
DXCC Card Checker

The following operation has been approved for DXCC:

7O1YGF ☐ Yemen

Operation from August 16, 2000 through August 26, 2000

After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:

* Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.

Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute.

Oh no!

This is terrible, horrible news!

Next spring, how am I going to spend 5 hours going to & from Dayton with K3AIR if we don't have 7O1YGF to chew over?

((OK, OK, I'm taking the tongue firmly out of the cheek now, for those of you who are humor impaired))

Seriously, this is great news, and congratulations to all who were lucky enough to work them and patient enough to wait it out!

DXCC Card Checker

The following operation has been approved for DXCC:

7O1YGF ☐ Yemen

Operation from August 16, 2000 through August 26, 2000

After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:

* Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.

Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute.

August ... April ...

Both begin with "A" !!

Most likely a typo (that's right, blame the typist !!).

But it's a new one on RTTY, 10 & 17.

Anyone remember how long it took G3JKI's operation

in 5A to get approved ??

Good grief, Dick, you'd a thunk I'dve known better. After all, I did just make out the bloody card!!! Yes, it was April. Yes, it appears to have been a typo making me (and, I hope, others) think it was August. Now I'll keep my mouth shut!

And no, I don't recall how long it took for the G3JKI mess to clear the hurdles but I was sure glad when it did :-).

DXCC Card Checker

The following operation has been approved for DXCC:

7O1YGF ☐ Yemen

Operation from August 16, 2000 through August 26, 2000

After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.

Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:

* Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.

* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.

In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.

Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute.

Good grief, Dick, you'd a thunk I'dve known better. After all, I did just make out the bloody card!!! Yes, it was April. Yes, it appears to have been a typo making me (and, I hope, others) think it was August. Now I'll keep my mouth shut!

And no, I don't recall how long it took for the G3JKI mess to clear the hurdles but I was sure glad when it did :-).

10502. RE: [DX-IS] Yemenites rejoice...

Yahoo group: DX-IS (2009)
Date: 2009-08-13 03:05:24 UTC
From: Alan Leith
Topic: 10478 Message: 10502

Although I have a couple of SSB confirmations, I want a QSL from 7O1YGF for CW. I'm afraid that LoTW won't cut it for me. I don't mind spending several buckeroonskis for a QSL because it is one of the few CW confirmations I need. So my card will be mailed to Germany by the weekend.

Subject: RE: [DX-IS] Yemenites rejoice...

I would wait a bit before sending off for the card. I read in one post they were working on uploading the logs to LoTW.
Makes a lot of sense, saves a lot of work for all.

Holy Cow! I never sent for the card either.

I guess I (we) better do that. I hope DJ3XD is still the QSL manager for CW QSO's.

Maybe but while you're waiting there is the possibility of a "new one"
being approved. If 70 is your last one, waiting may not be the best option.

I'm not on LoTW yet. Plus, I want the card. So off mine went this morning. I think that will put me at 321 or 322 when it arrives.

I'll bet DJ3XD and the other manager(s) are going to be busy for a while!

Just shows how one sometimes *must* have patience!

A couple of years ago at Visalia, a well-known DXer told me this would never be approved - he felt the right palms had not been greased.

Although I didn't work this group, it's nice to see the thing finally got ironed out.

From: RICHARD SOLOMON
Topic: 10478 Message: 10509

According to one source, the logs will be uploaded to LoTW within

a week or two.

Subject: Re: [DX-IS] Yemenites rejoice...

I'm not on LoTW yet. Plus, I want the card. So off mine went this morning. I think that will put me at 321 or 322 when it arrives.

I'll bet DJ3XD and the other manager(s) are going to be busy for a while!

DX Bulletin 32 ARLD032
>From ARRL Headquarters
Newington CT August 13, 2009
To all radio amateurs

SB DX ARL ARLD032
ARLD032 DX news

This week's bulletin was made possible with information provided by CE3FZL, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

AGALEGA AND ST. BRANDON ISLANDS, 3B6. Rachid, 3B8FQ is QRV as 3B7FQ from St. Brandon Island, IOTA AF-015, until the end of August and possibly into early September while here on work assignment. Activity is on 40 to 10 meters using CW and SSB. QSL direct via K5XK.

CYPRUS, 5B. Terry, 5B/G4MKP is QRV from the village of Tsada until August 25. Activity is on 80 to 10 meters using mostly CW. QSL via M0URX.

BOTSWANA, A2. Les, W2LPL and Dan, W2DBL will be QRV as A25/W2LPL from August 16 to 19. Activity will be on 20 meters using SSB and PSK31. QSL via W2LPL.

CHINA, BY. A group of operators are QRV as BA7IO/4 from Heng Sha Island, IOTA AS-136, until August 17. QSL direct via BA7IO.

NAURU, C2. Dani, EA4ATI will be QRV as C21TI from August 17 to 23. He will eventually be joined by Ruben, C21RK. Activity will be with two stations on 160 to 6 meters using CW and SSB. QSL via EA4ATI.

CHILE, CE. Hector, CE3FZL will be QRV as CE2P from the Punta Paneul Lighthouse, ARLHS-073, in San Antonio harbor, on August 15 and 16. Activity will be on 40 meters using SSB. QSL via EA5KB.

URUGUAY, CX. Members of the Radio Club Uruguayo are QRV as CW1R until August 16 from the Punta del Este Lighthouse, ARLHS URU-008. Activity is with two stations on 80 to 15 meters using CW, SSB and various digital modes. QSL direct via bureau.

GERMANY, DA. Operators HB9DLO, HB9OMI and HB9SMU are QRV as DL/HB9LH until August 16 from the Schleimunde Lighthouse, ARLHS FED-217, on Lotsen Island. Activity is on 80 to 6 meters using CW and SSB. QSL via HB9DLO.

CANARY ISLANDS, EA8. Operators EA8DP, EA8CAC, EA8ANE, EA8AZM will be QRV as AO8FLH from Fuerteventura Island, IOTA AF-004, from the La Entallada Lighthouse, ARLHS CAI-041, on Fuerteventura Island, IOTA AF-004, during the International Lighthouse-Lightship Weekend on August 15 and 16. QSL via EA8AKN.

ST. BARTHELEMY, FJ. Operators Gary, W2VQ and Paul, WQ2N will be QRV as FJ/W2VQ and FJ/WQ2N, respectively, from August 18 to 25. Activity will be on 80 to 6 meters using CW, SSB, RTTY and possible PSK31. QSL via operators' instructions.

PANAMA, HP. Look for special callsign H81L to be QRV from the Canal Miraflores Lock Lighthouse, ARLHS PAN-030, on August 15 and 16. QSL via HP1RCP.

ARGENTINA, LU. Members from the Radio Club Argentino are QRV as LR5D from Martin Garcia Island, IOTA SA-055, until August 17. They plan to activate its lighthouse during the International Lighthouse and Lightship Weekend. Activity is on 160 to 6 meters, including 70 cm, using CW, SSB and FM. QSL via LU4AA.

MOUNT ATHOS, SV/A. Monk Apollo has been active using RTTY on 20 meters around 1900 to 2130z. QSL direct.

TURKEY, TA. Members of the Turkish Special Wireless Activity Team will be QRV on August 15 and 16 as special event station TC99Y from the Bozburun lighthouse in Yalova and TC99K from the Yelkenkaya lighthouse in Kocaeli to honor the lives lost in the August 1999 earthquake in northwest Turkey. QSL via TA1HZ.

UKRAINE, UR. Several members of the Ternopil amateur radio club are QRV with special event station EM360B until August 18 to remember the battle of Zboriv 360 years ago. QSL via UY5BC.

INDIA, VU. Special event station AT8LHC is QRV until August 16 from the Centenarian Kadalur Point Lighthouse, ARLHS IND-013. Activity is on all bands and modes, propagation permitting. QSL via VU2JHM

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Prince Edward and Marion Island, ZS8T, recent operation conducted by ZS6GCM; Yemen, 7O1YGF, operation from April 16 to 26, 2000.

THIS WEEKEND ON THE RADIO. The ARRL 10 GHz and Up Contest, North American SSB QSO Party, SARTG World Wide RTTY Contest, the International Lighthouse and Lightship Weekend, NCCC Sprint, Russian District Award Contest, Keyman's Club of Japan CW Contest, Feld Hell Sprint, ARCI Silent Key Memorial CW Sprint and New Jersey QSO Party are all scheduled for this upcoming weekend. The Run for the Bacon

QRP CW Contest is scheduled for August 17. Please see August QST,
page 76, and the ARRL and WA7BNM contest web sites for details.

10511. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-13 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10511

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 225 Issued at 2200Z on 13 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity was very low. No flares were observed
and the visible disk remained void of spots.
IB. Solar Activity Forecast: Solar activity is expected to be very
low through the period.
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
Geomagnetic field activity was at quiet levels through most of the
period. ACE solar wind measurements indicated velocities gradually
decreased from 369 to 326 km/sec during the period.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at mostly quiet levels during the period (14 - 16
August).
III. Event Probabilities 14 Aug-16 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 13 Aug 067
Predicted 14 Aug-16 Aug 067/067/067
90 Day Mean 13 Aug 069
V. Geomagnetic A Indices
Observed Afr/Ap 12 Aug 002/005
Estimated Afr/Ap 13 Aug 006/005
Predicted Afr/Ap 14 Aug-16 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 14 Aug-16 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Hey Paul,

I am 45 years old and hope that I have a few more solar cycles left in me...

I keep trying to think positive on the current situation, but cricky! How long can it go on?

And now another 34 days without a sunspot, surely the Sun must wake up soon...

Thanks for the QRPer stories, priceless!

This sentence was the jest of the article:

"Eventually, most will learn some of the Mysteries of the Ages," he said, "though understanding may be long in coming. But keep in mind, as you may just have indicated, that the young often tend to believe that things go on forever. The old realize that there is an end to everything, even DX."

I understand it, but don't like it! 2-3 years of the flux being at 67 might be problematic. :-)

The Maunder Minimum lasted nearly 100 years and caused a mini ice age in Europe. The SUN will wake up when enough DXers have given up and the LIDS have found another hobby.

The US Air Force thinks it will wake up soon, the flux currents in the Sun are not far below the surface. Patience! It is giving us time to paint the house and work in the yard.

15 August 2009 A.R.I. DX Bulletin
No 954
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3B7 - Rachid, 3B8FQ [425DXN 953] was expected to arrive to St. Brandon (AF-015) around 2 UTC on 12 August. Barring unforeseen circumstances, he now expects to extend his stay on the island, and to be operate as 3B7FQ until sometime on 3 September. Operating time will be shared with Rachid's maintenance responsibilities at the local meteorological station. QSL via K5XK, direct preferred. [TNX K5XK]
9M - Hans, DF5UG (9M2QQ) has been in Malaysia for a few days. On 15-16 August he will participate in the ILLW activity from Cape Rachado Lighthouse (9M4LHN); then, between 19 August and 7 September, he will be travelling to Sarawak (9M8QQ), Sabah (9M6QQ) and Brunei (V85QQ). QSL via home call. [TNX DXNL]
9M2 - Participating stations in the International Lighthouse/Lightship Weekend from West Malaysia include: 9M4LHB (Bukit Melawati Lighthouse, Selangor), 9M4LHC (Tanjung Gelang Lighthouse, Pahang), 9M4LHE (Bukit Jugra Lighthouse, Selangor), 9M4LHJ (Bukit Segenting Lighthouse, Johor), 9M4LHN (Cape Rachado Lighthouse, Melaka) and 9M4LHP (Fort Cornwallis Lighthouse on Penang Island, AS-015).
9M6 - Members of the Borneo Amateur Radio Club will operate as 9M4LHS from the lighthouse on Pulau Layang (also known as Pulau Layangan, OC-133), Sabah, East Malaysia for the ILLW on 15-16 August . This will be a camping and generator operation using 100 watts to vertical or wire antennas on 40-10 metres, mainly SSB, plus 2m FM. QSL via operator's instructions. [TNX 9M6DXX]
A2 - Les, W2LPL and Dan, W2DBL will be active as A25/W2LPL from Botswana on 16-19 August. The will operate SSB and PSK-31 on 20 and 40 metres in their spare time. QSL via W2LPL. [TNX The Daily DX]
CT8 - Jan, DL7JAN and Egon, DL2IX will be active as CT8/DL7JAN and CT8/DL2IX from Faial (EU-175), Azores on 21-31 August. They will operate CW, SSB and RTTY on 80-6 metres. QSL via home calls, direct or bureau. [TNX NG3K]
CX - The Centro de Radioaficionados de Rocha will operate as CW4T from

the lighthouse at Cape Polonio (ARLHS URU-005) on 15-16 August.
Expect activity on 160, 80, 40, 20, 6 and 2 metres. QSL via EA5KB.
[TNX CX2TG]
DL - DF6CQ, DG3XA, DG7TG and DJ5KK will be active on 6 metres as DF0IT
from Helgoland (EU-127, JO34we) during the ILLW. QSL for this
activity via DG7TG. [TNX www.mmmonvhf.de]
DL - Chris, OE3CHC and Mike, OE3MDC will be active as DL/homecall from
Spiekeroog Island (EU-047) on 17-21 August. They will operate
holiday style on 80-20 metres CW, SSB and RTTY. QSL via home
calls. [TNX rsgbiota.org]
FJ - Gary, W2VQ and Paul, WQ2N will be active as FJ/W2VQ and FJ/WQ2N
from St. Barthelemy (NA-146) on 18-25 August. They plan to operate
CW, SSB, RTTY and possibly PSK31 on 80-6 metres. QSL both calls
via WQ2N. [TNX The Daily DX]
GM - Amateur radio operators who are resident in Scotland may apply for
special permission to replace the letter 'M' in their prefix with
'A' (for Alba, the Gaelic name for Scotland) until 30 November, as
part of the "Homecoming Scotland 2009" celebrations
(www.homecomingscotland.com). [TNX 9M6DXX]
IS0 - Giorgio, IZ3KVD says he will be active as IS0/homecall from
Cagliari, Sardinia (EU-024) on 16-31 August. He plans to operate
holiday style on SSB and digital modes. QSL via home call.
LA - Ben, DL7BY will operate mainly CW as LA/DL7BY from Hinnoya
(EU-033) on 15-22 August. QSL via home call, bureau preferred.
[TNX DXNL]
LU - Dario, LU3DR will be active as AY0DX from Baliza Espigon Este
(ARLHS ARG-114) for the ILLW. He plans to operate SSB on 80, 40,
20 and 17 metres. QSL via LU3DR. [TNX LU3DR]
OZ - Ric, DL2VFR will be active as OZ0FR/p from Vesborg Fyr lighthouse
(ARLHS DEN-046) on Samso Island (EU-172) fom 22 August to 4
September. CW is his preferred mode. QSL via DL2VFR, direct or
bureau. [TNX DL2VFR]
PA - Promoting the World Statues Festival that will take place in
Arnhem at the end of the month, Fred, PA0FAW will be active as
PA09WSF on 14-30 August. QSL via home call, direct or bureau. [TNX
K1XN]
SP - Look for special station SN2NP to be active from the historic
lighthouse at Gdansk Nowy Port on 14-16 August. QSL via SP2BIK.
[TNX SP2BIK]
TA - In recognition of their key role in emergency communications, the
Turkish IARU member society, TRAC, has been invited take part in
the official Memorial Event for the tragic earthquake that struck
northwestern Turkey on 17 August 1999. Special event station TC17A
is expected to be active from around 16 UTC on 16 August until at
least 1 UTC on the 17th. Look for activity on 40 and 20 metres
mainly SSB, and on 30 metres CW and PSK. [TNX www.iaru-r1.org/]
VE - Cezar, VE3LYC announces that his VY0O operation from the Ottawa
Islands (NA-230) [425DXN 953] has been re-scheduled again, and is
hoped to take place from 31 August to 3 September. [TNX MM0NDX]
W - Alan, WD4AC will be operating portable from Core Banks (NA-067) on

19-22 August. Activity will be concentrated on 20 metres. QSL
direct to home call. [TNX VA3RJ]

425 DX NEWS MAGAZINE ---> The latest issue (July 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

DXCC NEWS ---> ZS8T (Prince Edward & Marion Island, operated by ZS6GCM) and 7O1YGF (Yemen, 16-26 April 2000) have been approved for DXCC credit. As for 7O1YGF, this is the official release from Bill Moore, NC1L:
"After reviewing recently-received information regarding the 7O1YGF operation, and after additional dialogue with a leader of the DXpedition, the DXCC desk has approved this operation.
Considering the length of time that has passed since this operation, we ask that DXCC participants who would like to claim credit for 7O1YGF follow the options below:
* Send the 7O1YGF card ONLY to DXCC with a SASE, or return postage if outside the US; DXCC will process the card and applicants will not be charged a submission fee. 7O1YGF cards included with other cards will be handled as part of a normal submission.
* Bring the card to a DXCC Card Checker. The card checker will forward the confirmation to the DXCC desk for processing. Again, there will be no submission fee if this is a single-card submission. You must fill out an application form, however.
In all other cases applicants can include their QSL card with their next submission, and it will be handled normally. We will work with the 7O1YGF team to use Logbook of the World if possible.
Remember, the cutoff date for the 2009 DXCC Annual listing and Honor Roll list is December 31, 2009. We encourage applicants to handle this sooner rather than wait until the last minute".

30 METRES ---> The 30 Meter Multi Mode Weekend will be held on 22-23 August to promote experimenting and using different digital modes on that band. Information can be found on the 30 Meter Digital Group's website at http://30mdg.net/Events.html [TNX F5NQL]

QSL 7O1YGF ---> Those who still need a paper QSL card for 7O1YGF can send their request to DJ3XD (he was the original QSL manager for CW QSOs, but now he will handle SSB and RTTY as well). The logs are expected to be uploaded to LoTW within a couple of weeks' time. [TNX The Daily DX]

QSL ZK2V ---> "We are in the process of finalizing the QSL design for ZK2V and expect to have cards in hand in about 6 weeks", N3SL says. "Please be patient and do not re-QSL".

I wonder if this one is finally going to happen? It's the last FR island I haven't worked.

Propagation Forecast Bulletin 33 ARLP033
>From Tad Cook, K7RA
Seattle, WA August 14, 2009
To all radio amateurs

SB PROP ARL ARLP033
ARLP033 Propagation de K7RA

Another quiet week on the Sun. Last week on Earth we neglected to mention the Perseids meteor shower, which peaked this week on August 12-13. A nice statistical display from the International Meteor Organization is at http://www.imo.net/live/perseids2009/.

A look at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html on August 13 showed possible heightened geomagnetic activity returning around August 18-19, with a planetary A index of 20 and 12, respectively.

Geophysical Institute Prague expects quiet conditions August 14, unsettled August 15, quiet August 16-17, unsettled August 18, quiet to unsettled for August 19 and quiet on August 20 The predicted planetary A index from the Space Weather Prediction Center for those same dates is 5, 5, 5, 5, 20, 12 and 8. Check the link in the previous paragraph to see if the forecast changes and is updated.

The autumnal equinox is less than 40 days from now, to occur on September 22 at 2118z. Even if there are no sunspots, we should see a shift and seasonal improvement compared to summer. Comparing the first day of fall to mid-July, 20 meter conditions from New England to the Czech Republic shows an end to openings during the evening on the USA end, and daytime openings shifting to earlier hours. The July 20 meter opening from 1930-0200z shifts to 1330-2200z in September. 17 meters shows very little chance of propagation over the same path in summer, but in fall opens 1330z to 1900z.

A similar shift occurs on the West Coast. From California to Japan, in summer the 20 meter opening is in local nighttime at the W6 end, strongest 0630-1030z. In the fall it happens earlier, 2200-0330z. On 17 meters over the same path, signals are much stronger in the fall, with openings around 2200-0230z.

Jim Spears, N1NK of Tiverton, Rhode Island, wrote to comment on the current sporadic-E season, which he noted should be winding down. Jim says he hasn't seen much sporadic-e activity, and checked six meters most days, but June was very good for him into Europe. Jim wrote, ''With a 5 element Yagi at 40 feet and THP 1.5Kfx amp I improved my distance record to the east by working 4X4DK, DK1MAX, and OE5D as new ones. A number of other new ones in EU (mostly southern) and Caribbean along with 8R1TO and PV8ADI in South America were also worked leaving me with a current total of 73 worked and 67 confirmed, all via Es. I also failed to work any west coast US stations, something that has been a regular occurrence the past few years''.

Jim noted that July was extremely wet and stormy in New England, and doesn't know if this is coincidental, but he saw little six meter propagation to anywhere. ''It seemed that the propagation was completely skipping over or bypassing us. There were very few moments when I would hear any signal on the band at all''.

In an email Jim received from Mick, W1JJ, also in Rhode Island, but with a better antenna system, the 6 meter E season was about average for Mick, who has been active on 6 meters for 50 years. He worked 3 new countries, bringing his 6 meter total to 186. Mick says openings were slow in May, much better in June, but he had only a couple of good openings to Europe. In July he worked 4X4, SV, SV9, SV5, OD, TZ and TA. To the west, he had a couple of good openings to W6 and one to KH6. He sent along an audio file of JA7QVI on six meters, who was quite loud, and the only JA he worked in the past couple of years. Mick worked him at 2258z on July 8. In the Six Meters Marathon he totaled 94 countries from the first week in May through August 3.

Pat Dyer, WA5IYX of San Antonio, Texas wrote about digital television vs. the old analog system and its usefulness as an indicator of VHF propagation. ''Some have had much more luck than myself at decoding DTV via Es, but here are two samples of my best, http://www.qsl.net/wa5iyx/images/wbra-dt-3.1z.jpg (1187 mi) and http://www.qsl.net/wa5iyx/images/whbf-dt-4.1z.jpg (950 mi)''.

''A vivid example of what was available on low-VHF TV for Es from here vs. now on DTV is shown on these maps http://www.qsl.net/wa5iyx/lovesavd.htm. A prime problem in getting DTV Es decoded stems from the system's intolerance for co-channel signals (unless one is dominant by 15 db). Many a time the 54.310 MHz DTV pilots can be heard on my FT-847 as a mixture of signals with a 4-Hz beat rate (note how many US DTV Ch 2 stations are to my NW-N, and can come in simultaneously). Ch 5, with the most US DTV stations of any low- VHF channel, has been occupied by ''local'' KCWX-DT-5 (23kw ERP at c. 50 mi) since Jul 1. Rapid QSB and multipath (ghosting common on Es) also contribute to complicating any decodes. Also, unlike with NTSC, the entire 6-MHz wide channel of data needs to be in well for ATSC to work - if the Es MUF is

''sharp'' you're doomed, where with NTSC video without audio was not uncommon''.

Ken Miller, K6CTW of Rancho Cucamonga, California also wrote this week. ''Although this is now over 2 weeks old, I did want to let you know that I was able to work the VK9NI DXpedition on 40 CW while commuting to work here in Southern California. Since I'm only running about 60 watts I found it amazing that I was able to ''make the trip''. They must have had some super ops and a great antenna on 40 but never the less, conditions do seem to be holding in the early morning here to the Western pacific. I hear all sorts of DX on when I'm driving in, and it really makes the commute bearable''.

So nice to hear of good results from a modest setup. Since a standard mobile antenna would only be about one-sixteenth wavelength on 40 meters, running 100 watts into a much more efficient half-wave dipole from home should surely net a contact with Norfolk Island.

Ken along with Chip Margelli, K7JA, were the heroes who demonstrated Morse code speed and efficiency by beating a champion text messager (or is that messenger?) in a contest on the Tonight Show in 2005. Many have seen it, but you can watch it again at http://www.kkn.net/~n6tv/Text_vs_Morse_Leno_2005_05_13.wmv. In light of financial travails of the past couple of years, pay special attention to the comments by the YL that Jay Leno interviews at the start of the segment.

July 31 Propagation Bulletin ARLP031 mentioned Kai Siwiak, KE4PT and his Secret Ham Message, linked from the page at http://www.qrz.com/ke4pt/. Kai wasn't expecting the puzzle's mention in the bulletin, and reported an overwhelming response from readers who solved the problem.

Now that two weeks have passed, we can mention a clue to folks who didn't quite get it, like the author of this bulletin. Yes, you can use standard techniques for solving simple ciphers, such as counting the occurrence of each character, ranking them, then solving by examining the frequency of occurrence for each letter of the English language. This assumes it is in English, which it is, but there is an easier way for CW operators to solve this. Contemplate the page visually, then think of Morse. Don't quite see it? Look again.

CW operators' ears perk up when Morse code appears in motion picture soundtracks, and various online forums and websites over the years have listed films containing telegraphy. One is http://www.qsl.net/e20tcm/morse.html, a Thai website from Jeerasak Pitiwatsakul, E20TCM, which reproduces data from the now defunct Morse Goes to the Movies site.

Early Thursday morning I ran across another film with Morse, but this time only in the soundtrack, seemingly unrelated to the action on the screen. I checked out a DVD from the public library, the

mid-eighties movie ''Runaway Train''
(http://www.imdb.com/title/tt0089941/) and I might have missed the
Morse, except I was wearing headphones.

Forty minutes into the movie, there is a scene in a railway control
room that was supposed to look hi-tech at the time. Perhaps it was
an attempt to lend a sort of authenticity for the audience, but the
audio contains various bleeps and blurps under the dialog, as the
characters stare into old monochrome CRT monitors in horror. I
nearly fell off the couch between minute 40:10 and 40:15 when I
heard, ''DE K7VVV''. K7VVV happens to be my callsign before K7RA, and
now held by a ham in California. However, at the time the movie was
produced my call was KT7H, so I claim no connection. Perhaps others
will hear DE KZVVV instead, but as my mind attempts to construct
patterns from many sensory inputs, it tends to fall back on familiar
patterns.

If you would like to make a comment or have a tip for our readers,
email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL
Technical Information Service at
http://www.arrl.org/tis/info/propagation.html. For a detailed
explanation of the numbers used in this bulletin, see
http://www.arrl.org/tis/info/k9la-prop.html. An archive of past
propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve
overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this
bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for August 6 through 12 were 0, 0, 0, 0, 0, 0, and 0
with a mean of 0. 10.7 cm flux was 66.8, 67.8, 67, 67.2, 67.1,
66.6, and 66.5 with a mean of 67. Estimated planetary A indices
were 14, 8, 4, 8, 4, 4 and 5 with a mean of 6.7. Estimated
mid-latitude A indices were 8, 8, 2, 6, 3, 2 and 2 with a mean of
4.4.

Paul;

I agree with Lance. No amount of money could recreate the images of wisdom through the head as the trips to the "hill". Where do you get these gems? Or does that require a trip to the hill also? There's always much to learn.

Hey Paul,

I am 45 years old and hope that I have a few more solar cycles left in me...

I keep trying to think positive on the current situation, but cricky! How long can it go on?

And now another 34 days without a sunspot, surely the Sun must wake up soon...

Thanks for the QRPer stories, priceless!

This sentence was the jest of the article:

"Eventually, most will learn some of the Mysteries of the Ages," he
said, "though understanding may be long in coming. But keep in mind,
as you may just have indicated, that the young often tend to believe
that things go on forever. The old realize that there is an end to
everything, even DX."

I understand it, but don't like it! 2-3 years of the flux being
at 67 might be problematic. :-)

I think the complete collection of Hugh Cassidy's West Coast DX Bulletin is on line. He was a member of the No Calif DX Club with me back in the 1960s and had a great sense of humor. All the original work was his. Those were great days for DX! Great to remember them.

Many of them are collected here
http://www.ve1dx.net/Stories/stories.html

I thought there was an ARCHIVE of all the WCDXB but didn't find it. I used to have all the issues but they were too much to keep around during moves.

I don't know if this is complete as far as Cass's work but quite a few are here:

http://www.geocities.com/k2cddx/dxstories.html

There are some WCDXB's there but not a complete set of those.

Also more of Paul's stories too.

I have the complete set of WCDXBs. All 550 original issues sent to me by WA6AUD on the promise I would keep them safe. Every single issue from 1968 until 1979. The only time they left my possession was at Cass' request to loan them to K1TN as reference material when he was researching for his book "YASME The Danny Weil and Colvin Radio Expeditions" - ISBN: 0-87259-893-4. That book is a must read for anyone interested in the history of DXing. K1TN has since returned them and they are safety stored.

The URL listed above was a collaborative effort by K2CD and myself in the 1990s, and there is material there that is not on my web site:

http://www.ve1dx.net/Stories/stories.html

I transferred all of the stories from the Geocities site to my own site a number of years ago as K2CD no longer updates his site. In terms of just stories, my collection is more complete. However, there are some reproductions and articles written by others on Mike's site (K2CD) that are not available on mine.

One thing on my "to do" list is to scan in all 550 copies of the WCDXB and put them on the Internet. It would preserve WA6AUD's legacy and provide excellent reference material to The Great Days of DXing. What is holding me back is the size of this project. Most of the WCDXBs are multiple pages, some 4-6 pages. Scanning them in would be a big job. Also, it would generate about ~2500 images. These could be consolidated in ~550 downloadable zip files of the resultant .JPEG, TIFF or whatever format is best (my preference would be .PDF.) Any way you look at it, it is a huge job for a limited audience, and it would be expensive from a server storage perspective. Hence the procrastination on my part.

Paul, regarding the potential size of of 550 WCDXB scanned, I've found that scanning documents to Word 2007 and then saving them to PDF and "publishing" them for internet results in a significant compression. Still a significant effort.

I have the complete set of WCDXBs. All 550 original issues sent to me by WA6AUD on the promise I would keep them safe. Every single issue from 1968 until 1979. The only time they left my possession was at Cass' request to loan them to K1TN as reference material when he was researching for his book "YASME The Danny Weil and Colvin Radio Expeditions" - ISBN: 0-87259-893-4. That book is a must read for anyone interested in the history of DXing. K1TN has since returned them and they are safety stored.

The URL listed above was a collaborative effort by K2CD and myself in the 1990s, and there is material there that is not on my web site:

http://www.ve1dx.net/Stories/stories.html

I transferred all of the stories from the Geocities site to my own site a number of years ago as K2CD no longer updates his site. In terms of just stories, my collection is more complete. However, there are some reproductions and articles written by others on Mike's site (K2CD) that are not available on mine.

One thing on my "to do" list is to scan in all 550 copies of the WCDXB and put them on the Internet. It would preserve WA6AUD's legacy and provide excellent reference material to The Great Days of DXing. What is holding me back is the size of this project. Most of the WCDXBs are multiple pages, some 4-6 pages. Scanning them in would be a big job. Also, it would generate about ~2500 images. These could be consolidated in ~550 downloadable zip files of the resultant .JPEG, TIFF or whatever format is best (my preference would be .PDF.) Any way you look at it, it is a huge job for a limited audience, and it would be expensive from a server storage perspective. Hence the procrastination on my part.

73, Paul VE1DX

10528. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-08-15 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10528

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 15 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 227 Issued at 2200Z on 15 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 14/2100Z
to 15/2100Z: Solar activity was very low. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 14/2100Z to 15/2100Z:
Geomagnetic field activity was at quiet levels.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels during days 1 - 2 (16 - 17 August).
Activity is expected to increase to unsettled levels on day 3 (18
August) as a recurrent coronal hole high-speed stream begins to
disturb the field.
III. Event Probabilities 16 Aug-18 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 15 Aug 068
Predicted 16 Aug-18 Aug 068/068/068
90 Day Mean 15 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 14 Aug 002/004
Estimated Afr/Ap 15 Aug 002/005
Predicted Afr/Ap 16 Aug-18 Aug 005/005-005/005-007/007
VI. Geomagnetic Activity Probabilities 16 Aug-18 Aug
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/01
Major-severe storm 01/01/01

Paul,
When the WAC started, it was harder on LF and spark.

>73 John K1ER

I'm using spark (I said CW because it is Morse Code and the new
comers intermix them.) I thought everyone used spark. I have a coil
out of a 1948 Ford truck as the main component. Same year you were licensed!

It works on all bands w/o retuning!

Ohio/Penn DX Bulletin No. 921

The Ohio/Penn DX PacketCluster
DX Bulletin No. 921
BID: $OPDX.921
August 17, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AD1C, K1XN & GoList, NC1L, NJ1Q, WV2B, K3GV, K3IXD, N3SL, NG3K, K4VUD, N4AA & QRZ DX, W4QN, K5WW, K5XK, KH6BZF, N7RO, K8YSE, W8EH, AL5A/JH0MGJ, A35RK, CM2IR, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, F5PHW, GM4FDM, HB9EDM, I1JQJ/IK1ADH & 425 DX News, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), ZL1DK and ZL2CQ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-August, through Sunday, 16th-August there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, JA, JD/o, JT, JW, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B7, ST. BRANDON ISLAND. Ron, K5XK, updates OPDX that Rachid, 3B8FQ, has departed Mauritius for St. Brandon Island (AF-015) on Tuesday last week and was expected to be active as 3B7FQ on Wednesday, August 12th, after arriving around 0200z. However, as of press time no QSNs have been reported. According to Ron, barring unforeseen circumstances, Rachid now expects to extend his trip, operating until sometime on September 3rd, when the ship departs for 3B8. Remember, operating time will be shared

with Rachid's maintenance responsibilities at the St. Brandon meteoro-
logical station. Look for him on all bands, 30-10 meters, although Rachid
expects 40 and 20 meters to be most productive. See OPDX.920 for suggested
frequencies. He will use both CW and SSB, as conditions allow. Courtesy of
Carl, K9LA, the following propagation predictions for August HF conditions
to North America, Europe, and Japan, were made available (all times UTC):

Area	80m	40m	30m	20m	17m	15m
NA	....	1300-1700	2000-0400	0200-0500	1300-1700	....
	2100-0300					
EU	1600-0200	1300-0400	1300-0400	0300-0700	0700-1600	0400-1900
	1000-2300					
JA	1300-0100	1100-0200	1000-0300	0100-2200	0200-1700	0200-1400

NO PROPAGATION for NA on 12 and 10 meters
EU - 12m (0700-1500) and 10m (1100-1200)
JA - 12m (0400-1200) and 10m (0600-1000)

QSL all of Rachid's operations via K5XK, direct preferred, as indicated
on QRZ.com

5B, CYPRUS (Update). Terence, G4MKP, will be active as 5B/G4MKP from Tsada
village near Pafos between August 14-25th. Activity will be mainly CW/RTTY
on 80-10 meters. Look for him during the mornings and evenings on CW/RTTY,
and if he can figure out how to do it, SSB also. Suggested CW frequencies
are around 7010, 14010, 21010 and 28020 kHz. RTTY anywhere in the band
segment. QSL via M0URX, direct or via E-mail request for a bureau QSL.
LoTW will be uploaded after the operation.

5Z, KENYA. Ernie, W8EH, informs OPDX that his brother Steve, W8SMH, has
just received his Kenyan license. He will active from Nairobi, Kenya, for
the next 3 years. His Kenyan callsign is 5Z4/W8SMH. Steve is on assignment
with the Salvation Army as second in command at their headquarters in
Nairobi. His travel schedule may limit his operating, and he is a rookie
at DX operations (So please be patient!). His other limiting factor is
that Nairobi is experiencing power shortages and as a result they are
doing rolling blackouts 2 or 3 days a week in his area. His equipment is
an Icom IC-718, dipoles and a multiband vertical. QSL direct to his home
callsign (QRZ.com) with an IRC or SASE. Logs will be uploaded to LoTW
and eQSL. His blog is at: http://howardskenyanadventures.blogspot.com/
Kenyan club site: http://www.qsl.net/arsk

9H, MALTA (EU-023). Wim, PA2AM, will be active as 9H3DZ between September
4-14th. Activity will be active mostly on 30/17/12 meters using CW and
RTTY. QSL via his home callsign.

A3, TONGA (News). OPDX contacted Paul, A35RK, this past week to make
sure Paul and his family were not on board the "Princess Ashika" which
capsized last Wednesday, 86km northeast of the Tongan capital of
Nuku'alofa. Some 93 people are presumed drowned after being trapped
in the vessel. Paul informed OPDX that "We're all OK, but the whole
country is dressing in mourning clothes. The search team found the wreck

yesterday, using sonar, but its too deep (110M) to dive to it. I don't know if there will be a further attempt to recover the remains of the 94 souls trapped on board. I'm not sure where you folks in the States are getting the news, but we're looking at: http://www.matangitonga.to http://www.nzherald.co.nz
Again, we appreciate your concern."
ADDED NOTES FROM PAUL (August 16th): Paul states that he just got a telephone call from Dave, W6ZL, and here's what he said:
"He arrived in Nuku'alofa late last night. He will only be able to stay in Tonga until Tuesday, August 18th, departing at 10am.

He said that it was pouring rain and the power was out, so he didn't know if he could get an antenna up and get on the air today. If he isn't QRV today, then A35KL won't be QRV at all this trip.

Dave said that he was only able to make 1 contact as YJ0ZL. The Tanna Island generator only ran for a couple of hours per day.

Dave said that he will be back in Tonga later this year, but he has no definite return date set."

C2, NAURU. By the time you read this the C21TI DXpedition by Dani, EA4ATI/9M2TI, and should be on the air until August 23rd. According to his Web page, Dani seems to be alone on this operation. The Web page states he will be staying at the "OD-N Aiwo Hotel", were previous DX-peditions have operated from, and he asks for patience especially on CW where he is not an expert. There is a chance he may meet C21RK. Activity will be on all HF bands including 60m and 6m. The suggested frequencies mentioned (as of now) are:
CW - 1825.5, 3505, 7005, 10110, 14025, 18075, 21025, 24895 and 28025
SSB - 1825.5, 3799, 7065, 14195, 18145, 21295, 24945 and 28495 kHz
60m - 5403.05 (SSB)
6m - 50.115 MHz (CW/SSB)
QSL via EA4ATI (see details on QRZ.com or the Web below). Look for possible updates on the Web page at: http://c21ti.madrono.net/index.html

C6, BAHAMAS. Once again operators Pete/W2GJ, Ed/K3IXD, Dallas/W3PP and Randy/K4QO will operate as C6APR in the CQWW DX SSB Contest (October 24-25th) as a Multi-Operator/Two-Transmitters (M/2) entry from the Crooked Island Lodge (Grid FL22), Crooked Island, The Bahamas. The team will be active from October 22-26th. Before and after the contest, look for C6AQO on HF CW and SSB, and C6AXD on HF RTTY. Both C6AQO and C6AXD will be on 160-10 meters including the 30/17/12m bands. All the QSOs are good for IOTA NA-113 and ARLHS lighthouse BAH-005. All QSLs via K3IXD.

CM1, CUBA. Fred, CM2IR, informs OPDX that he has been working tropospheric ducts on VHF (145.500 MHz) from Cuba (IOTA NA-015, GRID LOC: EL83TC) since August 11th and will continue until August 20th. He is using a collinear antenna and 50 watts. QSL is preferred DIRECT (1 USD or IRC) using the QRZ.com address.

CR3, MADEIRA ISLANDS. Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 28-29th) as a Single-Op/ All-Band entry. All QSOs will be uploaded into LoTW or QSL via CT1BOH direct. See his station at: http://www.qsl.net/ct1boh

DXCC NEWS. If you missed special OPDX bulletin (OPDX.920.1) Bill Moore, NC1L, Awards Branch Manager, reports that the following operations are approved for DXCC credit:
7O1YGF Yemen; Operation from April 16-26th, 2000; See special details in OPDX.920.1 or visit the DXCC's Awards Weblog at: http://www.arrl.org/blog/Century%20Club%20Awards
ZS8T - Prince Edward & Marion Island; Recent operation conducted by ZS6GCM

FO8, FRENCH POLYNESIA (Update). As reported last week Phil, F5PHW, who will be in Tahiti for the next two years starting this month, has received his new callsign on his 40th birthday - FO8RZ. Phil informed OPDX this past week that he has installed the HF6V (GP) antenna last week and plans to be active on 80-10 meters using CW. He states that propagation is very poor especially to Europe and Asia, and he has worked mostly North America stations on 30/20/15 meters. Phil will install a 3 elements beam 6 meters up at the end of August and a dipole for 80/40m. He adds, "I have many trees in the garden, so it's difficult to find a good place for antenna. The online log is 'OK' on my Web site <http://f5phw.chez.com/> and it will be updated every week or more. QSL is now 'OK' on LoTW. I received the authorization from ARRL yesterday (August 14th). The log will be sent every week or more to LoTW. QSL is also 'OK' via F8BPN, either direct or via the French Ref-Union Bureau. QSLs are not printed yet."

GA/MA/2A, SCOTLAND (Special Prefix). Look for some Scottish amateurs to use a special prefix until November 30th, to celebrate "The Year of Homecoming". Only Scottish amateurs can replace the letter "M" in their prefix for the letter "A" (for ALBA) after they apply for a callsign variation (ex. GM4FDM = GA4FDM, GM4AGL = GA4AGL, 2M0AAW = 2A0AAW... etc.). To celebrate Homecoming Scotland 2009, have a look at: http://www.homecomingscotland.com

HB9, SWITZERLAND (Special Event). Members of the Tera Radio Club (HB9OK) <http://www.hb9ok.ch> will be activating the special callsign HB9VELO during the month of September. Activity will be on all HF bands using CW, SSB, PSK and RTTY. QSL Manager is HB9OCR. Their activity is to promote the cycling "UCI Road World Championships" being held in Mendrisio between September 23-27th. For more details, see: http://www.mendrisio09.ch
The Tera Radio Club is organizing an award; more details are expected.

HL9, SOUTH KOREA. Mike, KE7WRJ, will be here for over 2 months starting September 9th. He plans to be active as HL9QST no later than the 11th. His tentative schedule is to operate from 4 different locations in South Korea as follows: September 10-12th: Seoul
September 14-24th: Camp Casey
September 25th-October 18th: Camp Humphreys
October 19-29th: Camp Carroll
October 30th-November 13th: Seoul

Activity will be on 40-10 meters, depending on the propagation, using CW and SSB. Look for him to be in both the Extra and General portions of the bands. His Equipment will consist of a 5000A by Flex Radio, a 3 element Yagi in a Bag from Super Antennas. QSL via KE7WRJ.

INTERESTING WEB SITE OF THE WEEK! "Club Log" is a web-based application which uses a database to analyzes amateur radio log files which are uploaded in the common ADIF format. Using the logs, it is possible to build band-mode league tables of amateurs' QSOs, provide efficient log search tools and create most wanted lists for DXCC entities (both over all time and in recent history, or by mode for example). Also, "Club Log" can give back to its users the ability to find "wanted" DX spots, and other analysis of their logs which might be hard to do with normal logging software. More information at: http://www.clublog.org

IOTA NEWS.....
EU-011. Kevan, 2E0WMG, will be active from St. Agnes, Scilly Isles (WAB SV80), September 22-23rd. Activity will be on 80/40/20 meters SSB only. QSL via his home callsign, direct or by the Bureau.

EU-038. Operators Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA LH 0043) between October 16-22nd. Activity will be on the HF bands, propagation permit-ting. QSL via their home callsigns, the Bureau is preferred.

EU-088. Bernd, DL8AAV, will be active as OZ/DL8AAV/p from Laeso Island (DIA NK-003) between September 14-26th. Activity will be on all HF bands. QSL via his home callsign, direct or by the Bureau.

EU-174. Kostas, SV2MAC, will be active as SV2MAC/8 from Samothraki Island between now and August 30th. Activity will be on the HF bands. QSL via his home callsign.

NA-010. Duane, WV2B (VA1ZZ), informs OPDX that he will be active from Cape Breton Island between August 17-23rd. He will activate as many lighthouses and Canadian Islands Award islands as possible during his visit. Suggested frequencies are: between 14260-14270 and 7180-7190 kHz. On August 24th, Duane will visit Sable Island (CY0) for a day trip, however authorities will not give him permission to bring radio equipment.

NA-029. George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (CIA PE-001) between September 1-28th. Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via his home callsign, direct or by the Bureau.

NA-067. Alan, WD4AC, will be active as WD4AC/p from Core Banks between August 19-22nd. Activity will be concentrated on 20 meters. QSL direct to his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For August 17-23rd).....
Aug 17 AN SOLAR REFERENCE
Aug 18 AN ---------------
Aug 19 HN-AN AN - Above Normal/Geomagnetic Level is QUIET
Aug 20 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 21 AN GEOMAGNETIC REFERENCE
Aug 22 AN ---------------------
Aug 23 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LIGHTHOUSE ACTIVITY/NEWS.....................
Members of the Associacao de Radioamadores da Vila de Moscavide (ARVM)
signed CT1RVM/p during ILLW 2009, for the first time from within the
premises of Forte de Santa Marta in Cascais (ILLW PT-0006, ARLHS POR052).
This activity is also valid for the Portuguese Lighthouse Award (DFP
FES06) and the Portuguese Castles and Fortresses Award (DCFP-F097).
QSL will be sent 100% via the Bureau to confirm all contacts. Visit
their Web page at: http://www.arvm.org/index.illw2009.html

Members of the Radio Club of Panama (HP1RCP) and Panama Canal Amateur
Radio Association (PCARA) activated the Miraflores Lock's Lighthouse
(PAN-030) in the Panama Canal using the special callsign H81L during
the ILLW this past weekend. QSL via HP1RCP. Visit the following Web
page to see a picture of the lighthouse at:
http://www.geocities.com/canallights2000/miraflorespics.html

Members of the "LIGHTHOUSE AMATEUR RADIO ALLIANCE" operated during the
ILLW this past weekend from "Station J", the WWII designation of the
JUPITER INLET LIGHT HOUSE (USA-025). The callsign was K4LRA. QSL via
K4LRA, using the QRZ.com address, or W4TBB.

Members of the Papakura Radio Club Inc have participated in the Inter-
national Lighthouse/lightship Weekend with the callsign ZL6LH. Since
1998 they have almost always been at a different location. This past
weekend they were active from East Cape Lighthouse. Look for a video
to be on the Web linked to: http://www.qsl.net/zl1vk
QSL via ZL1VK, by the Bureau or direct to: Papakura Radio Club,
PO Box 72-397, Papakura, New Zealand. Visit their ZL6LH Web page
at: http://www.qsl.net/zl1vk/ZL6LHIndex.html

PA09, NETHERLANDS (Special Event). Fred, PA0FAW, will use the special
event callsign PA09WSF until August 30th. Activity is to celebrate the
"World Statues Festival" in Arnhem <http://www.worldstatues.nl/> which
takes place between August 29-30th. A special QSL will be issued and
will be available via the Bureau, direct, e-qsl and LoTW, and of course
SWLs 100%.

QSL INFO AND NEWS.....................
5R8KD QSL STATUS. Wayne, W5KDJ, reports that he has received 2000
cards from UX5UO and will start working on the 325 SASEs he has received.

7O1YGF QSLS. It has been reported that those who still need a 7O1YGF QSL can send their request to August, DJ3XD. August was the original QSL Manager for all CW QSOs. However, he will now handle SSB and RTTY QSOs as well. It was also announced that the 7O1YGF logs are expected to be uploaded to LoTW within a couple of weeks.

IRC AVAILABLE. Dick, N7RO, has some IRCs for sale at 1.50 USDs while the supply lasts. You can E-mail him to assure that he still has some left. His E-mail address is: n7ro@...

NO LONGER THE QSL MANAGER. Erik, K5WW, advised OPDX readers that as of August 15, 2009, he is no longer QSL Manager for P40L (and P4/W6LD).

ONLINE LOGS AVAILABLE. A log search for BA4ALC/4, BA7IO/4, BA8AG/4, BD4QH/4, BD7JSQ/4 and BG4ENK/4 from Hengsha Island (AS-136) is now available at: http://www.qrz.cn/2009hengsha

PIRATE ALERT. Paul, ZL2CQ, reports that a PIRATE station on 80m was active this past weekend signing ZL2BHE/mm, calling CQ, giving his name as Peter on a commercial fishing boat and operating around 3630-3700 kHz. The callsign actually belongs to David Walker in Wellington, NZ. Paul personally knows this family.

ZK2V QSL STATUS. The ZK2V team is in the process of finalizing the QSL design for the ZK2V QSL and expects to have cards in hand in about 6 weeks. Please be patient and do NOT re-QSL.

QSLS VIA LOTW: None reported this week!

QSLS RECEIVED VIA MAIL: CE9/K2ARB, CT1ANO, CT3FQ, CT4NH, CU3EQ, D44TXO, EA1GAR, EA8YT, EI7IX, EX8M, G4DEZ, GM4NFC, GM4WJA, HZ1FS/P, I4EAT, MM0AMW, ON4IQ, P43A, RG9A, UK9AA, V29JKV, VK9GMW, VY0A, WP2B and XW1B

QSLS RECEIVED VIA THE BUREAU: None reported this week!

TA3, TURKEY (Special Event). Members of the Izmir Konak Branch of TRAC, which is the biggest HAM club in Turkey, will be active as TA3KM during the 78th Izmir International Fair between August 28th and September 6th. The club will be there to promote amateur radio activities. Activity will be on all HF bands using CW, SSB and RTTY, between 1300-2000z. For more details, visit the following links:
Izmir International Fair: http://ief.izfas.com.tr
TRAC Izmir Konak Branch web page: http://www.ta3km.org

VU, INDIA. Charly, VU3CHE (K4VUD), will be in India in September. He informs OPDX that his on-the-air plans are not yet determined. Stay tuned!

WH0, MARIANA ISLANDS. Kuro, AL5A (JH0MGJ), will be active as AL5A/WH0 from Saipan Island (OC-086), Northern Mariana Islands (KH0), between August 28-31st. Activity will be on 80-6 meters. He plans to listen especially for "weak" European stations. QSL direct to JA7JEC. Send Bureau QSLs to the JARL Bureau to JH0MGJ.

From: Paul Dunphy
Topic: 9721 Message: 10533

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 16 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 228 Issued at 2200Z on 16 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 15/2100Z
to 16/2100Z: Solar activity was very low. No flares were detected
and the visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 15/2100Z to 16/2100Z:
Geomagnetic field activity was at quiet levels throughout the summary
period.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be at quiet levels on day 1 (17 August). An increase to
quiet to unsettled levels is expected on day 2 (18 August) as a
recurrent coronal hole high-speed stream (CH HSS) begins to disturb
the field. A further increase to unsettled to active levels (with a
slight chance for minor storm levels) is expected on day 3 (19
August) as the CH HSS persists.
III. Event Probabilities 17 Aug-19 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 16 Aug 069
Predicted 17 Aug-19 Aug 068/068/068
90 Day Mean 16 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 15 Aug 001/003
Estimated Afr/Ap 16 Aug 001/005
Predicted Afr/Ap 17 Aug-19 Aug 005/005-007/007-015/020
VI. Geomagnetic Activity Probabilities 17 Aug-19 Aug
A. Middle Latitudes
Active 05/10/30
Minor storm 01/01/10
Major-severe storm 01/01/01
```

From: Art Burke
Topic: 10529 Message: 10534

Several years ago a friend of mine had several videos that appeared to have been programs at a large club up the east coast. One of them was a really OT who put together a spark-gap station using modern equipment. It was both interesting and humorous.

The guy said one of the problems back then was you had to be really careful you didn't set your shack on fire!

10535. Atlas

Yahoo group: DX-IS (2009)
Date: 2009-08-17 16:27:06 UTC
From: Dale Cole K8TS
Topic: 10535 Message: 10535

Until just recently, I had a copy of the DX'ers World Atlas. It had a yellow jacket, with geographic index and locations. Each page gave a different area of the world and had the call signs located on the map. Was about 16 pages, and I think it was published by some German guy. Mine was recently destroyed (that is another subject) and I can't seem to find a place to purchase a new one. Checked ARRL and RSGB but nil.

Anybody know, see, hear, etc...

TIA

Dale K8TS

Dale, it's one of the first two aids I recommend to new DXers. The actual name is Radio Amateurs World Atlas. A current ARRL DXCC listing is of course the other.

Try http://tinyurl.com/dxatlas. The ARRL stock number is 5226. I also found it in the AES online catalog. I did not check with either to see if it is actually in stock though.

Well Jack . . . I don't know the symptoms. There is definitely something wrong with me! Might be ozone. :-)

Bands are good today (relatively speaking, that is.) I don't see anything in the numbers to explain it, but it's been getting better the last few days. Possibly the beginning of the autumn enhancement, although it is early. I hear some pretty strong EU stations on 17 and 20 is wide open to EU right now (13:25 UTC.)

The bottom of the front cover shows:

C by DARC Verlag, Baunatal - Callbook Inc., Lakewood NJ

On the inside front cover:

ISBN 3-88692-020-8
Gesamtherstellung:
Hessendruck, Baunatal-Rengershausen

Nachdruck, auch auszugsweise, nur mit
Genehmigung des DARC Verlags!

Printed in Germany

Hope that info helps. I think I bought mine at a hamfest quite some time back. Like so many maps that go back a little, this one is most likely somewhat out of date as well.

Over the last couple of years, if I needed something in the way of a detailed map (related to amateur information) I peruse AC6V.com

From: Scott Stembaugh
Topic: 10474 Message: 10543

When I was first licensed in the early 90s I put out a request on rec.ham.dx(?) looking for a copy of 'DX Is!". WA6AUD was kind enough to reply and send me an autographed copy at a very reasonable price. I truly treasure that book and flip through it often. It is great to see that our problems and concerns aren't new and there are answers for the faithful.

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 921.1
BID: $OPDX.921.1
August 17, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and NC1L following DX information.

The logs for 7O1YGF have now been uploaded to LoTW. Please follow this procedure if you want to claim credit:

As with paper applications if you submitted 7O1YGF in the past and had it rejected, we will accept an e-application via LoTW and you will not be charged a submission fee for 7O1YGF only.

Make sure you have uploaded your QSOs. DXCC cannot open and search the logs for your QSO since doing this will not show the match that is required for a LoTW confirmation;

Access your account and begin the application process;

If you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;

Complete the application (all 4 parts) and DXCC will place your e-application on the list for processing;

Special note for 7O1YGF applications ONLY: On Part 4 of the LoTW application click "Payment by mail" This step is VERY important to assure proper handling. If you clicked on part one any QSOs other than 7O1YGF you must make proper payment.

Again: The above is ONLY for 7O1YGF submissions. Applications with other QSOs will be handled, and charged, as a regular submission.

DXCC will not acknowledge completion of the application. When finished, your numbers in LoTW will reflect the completion of your e-application.

If you achieve Honor Roll or Top of the Honor Roll from this submission and you would like to order the wall plaque, you can send me an e-mail or fax your order or send the order form by regular mail.

73 es DX!

10554. CW from Goat Island

Yahoo group: DX-IS (2009)
Date: 2009-08-20 03:10:40 UTC
From: AD5VJ Bob
Topic: 10554 Message: 10554

I am working CW this weekend from Goat Island, helping to bring up Goat Island as a new US Island.

This is a new Island entity and we are attempting to get as many contacts as possible in order to qualify it.

http://www.wc5c.org/WC5CClub/Island/tabid/404/Default.aspx if you get a chance please mention us on the air, on the reflectors, and
come by and give us some contacts, as we need as many contacts as we can get.

Bob AD5VJ

10555. Apology to DX Cluster - PSK-31 operators.

Yahoo group: DX-IS (2009)
Date: 2009-08-20 03:48:32 UTC
From: CSM(r) Gary Huber - AB9M
Topic: 10555 Message: 10555

My apologies for the eight worthless PSK-31 spots I sent over the cluster shortly after 13:00 UTC on 8/19/09. I had been testing with my primary station and missed the fact that the frequency of my SSB/CW station had overwritten the TX/RX freq of the PSK-31 station and its outgoing spots to the cluster.

73,

Gary - AB9M

10556. FT5GA Glorieuses DXpedition

Yahoo group: DX-IS (2009)
Date: 2009-08-20 08:51:19 UTC
From: Aishwarya
Topic: 10556 Message: 10556

Hello all,

Some news from the FT5GA team.
73, Cedric HB9HFN

Source: http://glorieuses2008.free.fr/e-glorieuses_news.htm

The FT5GA team has in hand, the flight tickets from Paris CdG to the St Denis R?union Island airport.
The departure is scheduled on September 11^th and the return on October 8^th .

The information about the French Forces Transall flight from Saint Denis to Grande Glorieuse will be published as soon as the FASZOI Hq will have confirmed them. (FASZOI = French Armed Forces for the South Indian Ocean Zone)

The stay on Grand Glorieuse is considered having about three weeks length.

All the gear has been picked up and is now ready packed on pallets, to be sent to the Reunion island, in the next few days.
Thanks especially for that to the Provins ARC, F6KOP members Serge, F6AML and Frank, F4AJQ.

/73's de Didier, F5OGL - Gloriosos 2009 team leader/

10558. Another 7O operation? How safe is it to to go Yemen?

Yahoo group: DX-IS (2009)
Date: 2009-08-20 20:29:41 UTC
From: Mark Lunday
Topic: 10558 Message: 10558

Excellent article in the latest version of the Economist. Appears it's a proxy war in Yemen between Sunni Muslim (Saudi Arabia) and Shi'ite Islam (Iran).

http://ow.ly/15LKR5

The losers are the non-combatants, as usual.

SB DX ARL ARLD033
ARLD033 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

TIMOR-LESTE, 4W. Chris, VK4FR is QRV as 4W6FR from Dili until mid October while on work assignment. Activity is mainly on 30, 20 and 17 meters using PSK31 and Olivia. In addition, Al, 4W6AL is QRV until October 3. Activity is on 40 to 17 meters using mainly CW with some SSB and RTTY. QSL 4W6FR via VK4FW and 4W6AL via CT1GFK.

KENYA, 5Z. Steve, W8SMH is now QRV as 5Z4/home call and is active from Nairobi for the next three years while on work assignment. He is active as time permits. QSL direct to home call.

NAURU, C2. Dani, C21TI and Ruben, C21RK are QRV until August 23. Activity is on 160 to 6 meters using CW and SSB with two stations. QSL via EA4ATI.

AZORES, CU. Jan, DL7JAN and Egon, DL2IX are QRV as CT8/home calls from Faial Island, IOTA EU-175, until August 31. Activity is on 80 to 6 meters using CW, SSB and RTTY. QSL to home calls.

FRENCH POLYNESIA, FO. Phil, F5PHW is QRV as FO8RZ and is here for the next two years. He is active on 80 to 10 meters using CW. QSL to home call.

SAUDI ARABIA, HZ. Abdul, 7Z1CQ has been active on 40 meters around 0300z. QSL direct to home call.

SARDINIA, IS0. Giorgio is QRV as IS0/IZ3KVD from the capital city of Cagliari until August 31. Activity is on the HF bands using SSB and various digital modes. QSL to home call.

NORWAY, LA. Ben, DL7BY is QRV as LA/home call from Hinnoya Island, IOTA EU-033, until August 22. Activity is on the HF bands using mostly CW. QSL to home call.

BULGARIA, LZ. Special event station LZ01WFF is QRV from the national parks Steneto and Central Balkan until August 24. Activity is on the HF bands, including 6 and 2 meters, using CW and SSB. QSL via LZ1ZF.

NETHERLANDS, PA. Fred, PA0FAW is QRV using special event station callsign PA09WSF until August 30 to celebrate the World Statues Festival in Arnhem. QSL via bureau.

POLAND, SP. Special event station SN120OSP is QRV until October 31 in celebration of the 120th anniversary of the city of Gorowo Ilaweckie auxiliary fire brigade. Activity is on all bands. QSL via SP4CUF.

GREECE, SV. Max, IZ4JMA will be QRV as SV8/home call from the islands of Paxoi and Kerkira, both IOTA EU-052, from August 24 to September 9. This includes possible operations from various Lighthouses. Activity will be on 80 to 10 meters. QSL to home call.

MOUNT ATHOS, SV/A. Monk Apollo, SV2ASP/A has been active using CW on 10 meters around 0900z. QSL direct.

CRETE, SV9. Ron, WB2GAI is QRV as SV9/WB2GAI/p until October 5. Activity is on 80 to 17 meters using CW. QSL to home call.

MARSHALL ISLANDS, V7. Fuminor, JA2DSQ and Yuji, JH2BNL will be QRV as V73NF, and V7XX or V73J, respectively, from Majuro Island, IOTA OC-029, from August 24 to 29. Activity is on 80 to 10 meters using CW, SSB and RTTY. QSL to home call.

CHAGOS ISLANDS, VQ9. Larry, VQ9LA has been active on 80 meters using CW between 0000 and 0100z. QSL direct to home call.

SOUTH AFRICA, ZS. Peter, ZS1JX has been active using CW on 160 and CW and SSB on 80 meters between 0330 and 0445z. QSL to home call.

THIS WEEKEND ON THE RADIO. The EPC Russia DX Contest, The NCCC Sprint, Hawaii QSO Party and the Ohio QSO Party are all on tap for this weekend. The RSGB 80-Meter Club SSB Sprint and SKCC CW Sprint are scheduled for August 26. Please see August QST, page 76, and the ARRL and WA7BNM contest web sites for details.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 232 Issued at 2200Z on 20 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 19/2100Z
to 20/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 19/2100Z to 20/2100Z:
Geomagnetic field activity was at mostly quiet to unsettled levels.
One isolated active period was observed between 20/0300 - 0600Z. The
activity was in response to a recurrent coronal hole high-speed
stream.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be quiet for the next three days (21 - 23 August).
III. Event Probabilities 21 Aug-23 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 20 Aug 068
Predicted 21 Aug-23 Aug 068/068/068
90 Day Mean 20 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 19 Aug 008/010
Estimated Afr/Ap 20 Aug 009/007
Predicted Afr/Ap 21 Aug-23 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 21 Aug-23 Aug
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3D2 - Jacek, SP5EAQ (3D2MJ) and Jacek, SP5DRH (3D2KJ) will be active from Viti Levu (OC-016), Fiji from 1 October for four weeks. They will operate on all bands, with an emphasis on the low bands, with two stations using small amplifiers and vertical antennas. QSL via home calls. [TNX SP5DRH]
5B - Gab, HA3JB has postponed his announced activity from Monaco [425DXN 947] and will be going to Cyprus instead. Look for him to be active as 5B/HG3IPA from 25 September to 2 October, including an entry in the CQ WW RTTY DX Contest. This activity will be good for the Hungarian International Police Association Award (on-line log and information on the award can be found at http://www.ha3jb.com). QSL via HA3JB. [TNX HA3JB]
6W - Stan, EI6DX (UA1OUT) will operate as 6W/EI6DX from Senegal on 7-16 November. He will concentrate on the low bands CW, and will take part in the Ukrainian DX and Japan Internation DX contests. QSL via RX3RC, direct or bureau. Updates and further information at http://www.ei6dx.com/senegal [TNX UA1OUT]
9H - Once again a group of Dutch operators will be going to Qawra, Malta (EU-023) for annual holiday/DXpedition. They will be active on 80-6 metres CW, SSB and digital modes between 6 and 27 September. The callsign for the group is 9H9PA (QSL via PB9ZR), but they will also operate under their individual callsigns: 9H3AB (QSL via PA1SL), 9H3DZ (QSL via PA2AM), 9H3FD (QSL via PA3FHR), 9H3ON (QSL via PG9W), 9H3S (QSL via PA3HGP), 9H3X (QSL via PE1NGF), 9H3YM (QSL via PE1OFJ), 9H3ZR (QSL via PB9ZR). [TNX PG9W]
C6 - Ed/K3IXD, Randy/K4QO, Pete/W2GJ and Dallas/W3PP will be active from Crooked Island (NA-113), Bahamas on 22-26 October. They will participate in the CQ WW DX SB Contest as C6APR (Multi-Two); before and after the contest look for C6AQO (CW and SSB) and C6AXD (RTTY) to be active on 160-10 metres. All QSLs via K3IXD. [TNX K3IXD]
F - Marc, F6HQP is currently active as F6HQP/p from Brittany until 26 August. He will try to go and operate from a few more islands,

such as Ile Callot (not IOTA, DIFM MA-017) and Ile de Batz (EU-105, DIFM MA-018). QSL via home call, bureau preferred. [TNX F6AJA]
FT5G - The FT5GA team [425DXN 948] will depart Paris on 11 September, destination St. Denis, Reunion Island. The date for the military flight to Glorioso will be announced as soon as FASZOI (the French Armed Forces in the South Indian Ocean Zone) confirm it. The team will remain on Grande Glorieuse for about three weeks, and the return flight from Reunion to Paris will be on 8 October. Bookmark http://glorieuses2008.free.fr/ for further information and updates.
H4 - Mike, KM9D (H44MY) and Jan, KF4TUG (H44TO) are now lying to anchor at Tesauma, Rennell Island (OC-127) and might be QRV soon. QSL via OM2SA.
HB9 - Tera Radio Club (www.hb9ok.ch)will be active as HB9VELO on in September for the Road Cycling World Championships that will be held in Mendrisio, Switzerland on 23-27 September. Activity will be on CW, SSB, PSK and RTTY on the HF bands. QSL via HB9OCR. [TNX HB9EDM]
I - Celebrating the 100th anniversary of the Nobel Prize in physiscs awarded to Guglielmo Marconi, ARI Vigevano will operate as IY2M between 1 September and 31 January 2010. Concurrent special events will be organized in cooperation with the Museum of Electrical Technology of the University of Pavia. QSL via IW2NOH, direct or bureau. [TNX IK2AVH]
I - Gerry, IZ1DSH and Pasquale, IZ1MLQ will be active as IL7T from San Domino Island (EU-050, IIA FG-001) on 24-27 September. They will have two stations active on 40-10 metres SSB, CW and digital modes. QSL via IZ1DSH, direct or bureau. Further information can be found at http://www.aritorino.it/IL7T.htm [TNX IZ1DXS]
J7 - Lot, DJ9ZG and Babs, DL7AFS will be active as J79ZG from Dominica (NA-101) from 27 September to 15 October. They plan to operate RTTY, PSK and SSB on 80-6 metres. QSL via DL7AFS, direct or bureau. Their website is at www.qsl.net/dl7afs [TNX DJ7ZG]
KH0 - Kuro, JH0MGJ will operate on 80-6 metres as AL5A/WH0 from Saipan (OC-086) on 28-31 August. QSL via JA7JEC (direct) or JH0MGJ (bureau). [TNX OPDX Bulletin]
KH2 - Look for George, K6SV/KH2 and Dennis, K7BV/KH2 to be active from Guam (OC-026) on 25-28 August. They will operate operating SSB and CW on the HF bands and 6 metres from the WH2DX rental QTH (http://www.wh2dx.com/). QSL via K6HRO. [TNX N4GN]
SV - Max, IZ4JMA will be active as SV8/IZ4JMA from the islands of Paxoi and Kerkira (both counts for EU-052) from 24 August to 9 September. He will operate holiday style on 80-10 metres, with digital modes activity being planned. [TNX IZ4JMA]
SV - Demetrius/SV2GWY, Angelo/SV2GWR, Cleanthis/SV2XI, Dimitris/SV7HRJ, Nick/SV7HVI, Themistokles/SW2HQF and Nikos/SW2HVD will be active as SX8DI from the Drenia Islands (EU-174) on 28-31 August. Their base camp will be on Penna Island, and they also try to go and operate from the lighthouse on Frini Island. QSL via SV2GWY, direct or bureau. Further information and log search can be found

at http://sx8di.blogspot.com/ [TNX VA3RJ]
VE - George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (NA-029) between 1 and 28 September. Activity will be on 15 and 20 metres around the usual IOTA frequencies. QSL via home call, direct or bureau. [TNX K3GV]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7O1YGF & LOTW ---> The logs for 7O1YGF have now been uploaded to LoTW. The procedure to follow in order to claim credit is described on the Century Club Awards Weblog (http://www.arrl.org/blog/Century%20Club%20Awards). Please note that "if you select only the 7O1YGF QSOs you will not be assessed the fees that LoTW will report back to you", but if you select also other QSOs, the application will be handled and charged as a regular submission. [TNX NC1L]

CIS DX QPSK63 ---> The European PSK Club invites amateur radio operators to participate in the CIS DX QPSK63 Contest, that will be held from 12 UTC on 19 September until 12 UTC on the 20th. Complete rules and other information can be found at http://www.cisdx.srars.org/ [TNX MM0DFV]

FO8RZ ---> Updates from Phil, FO8RZ (F5PHW) can be found on his website (http://f5phw.chez.com/), along with a log search that will updated on a weekly basis. QSL via F8BPN, direct or bureau. Phil uploads his log to LoTW on a regular basis. [TNX FO8RZ]

HOMECOMING SCOTLAND TROPHIES ---> The GMDX Group sponsors the Homecoming Scotland Engraved Challenge Trophies to be awarded to (1) the top three stations outside Scotland who contact the largest number of different GA, MA and 2A stations, and to (2) the top three Scottish stations who using the GA, MA and 2A prefixes work the largest number of stations outside Scotland between 10 August and 30 November 2009. Details can be found at http://www.gmdx.org.uk/ [TNX MM0NDX]

LOGS ---> A logsearch for DU1/G0SHN (and for other 106 callsigns, for a total of 322,449 QSOs) is available on the Nouvelles DX's website (http://LesNouvellesDX.fr/voirlogs.php). Also, the log for HB0/F5LMJ is now on line at http://www.tuduri.net/f5lmj/Hb0/Hb0.htm [TNX F6AJA]

NOT THE MANAGER ---> As of 15 August 2009 Erik, K5WW is no longer the QSL manager for P40L and P4/W6LD. [TNX K5WW]

QSL 7P8AO ---> A log search for 7P8AO (as well as for 7P8CF, 7P8MM, 7P8OK and 7P8YI) can be found at http://ha5ao.novolab.hu/. QSL 7P8AO via HA5AO, direct only (Istvan Gaspar, Rakoczi u. 85, 1196 Budapest, Hungary), as proceeds will be donated entirely to charity (details on this project can be found on the website above).

QSL J79PAK ---> The Daily DX reports that, following HB9CUA's tragic death, the new QSL route for J79PAK is via HB9HLM.

QSL VIA IK3GES ---> It has been reported that Gabriele, IK3GES QSLs only direct. This is not true. As for his latest activities from Greek islands, all of the direct requests have been replied to, and all of the remaining QSOs will be confirmed automatically through the bureau system in late August. As for his recent IOTA activities from Gokceada (Turkey, EU-186) and Sveta Anastasiya (Bulgaria, EU-181), when the blank cards arrive from the printer he will apply the same procedure as above. On-line logs can be found at http://www.ik3ges.it [TNX IK3GES]

YO DX HF CONTEST ---> The Romanian Amateur Radio Federation (FRR) invites amateur radio operators all over the world to participate in the annual YO DX HF Contest, which will be held on 29-30 August (from 12 UTC to 12 UTC). Participants in the contest who meet the award requirements will receive the YO BZ Award (1st class) free of charge. Complete contest rules and results of lats year's edition can be found at http://www.hamradio.ro/ [TNX YO2DFA]

+ SILENT KEYS + Pierre-Aime Kubler, HB9CUA (J79PAK) lost his life on 5 August, at 46 years of age, while on vacation in Dominica. He was trying to rescue his eight-year-old daughter (who survived) from the sea, when he was swept under a wave. He was found dead the day after.
Other recently reported Silent Keys include Medzit "Kico" Dautovic (E72C, former Secretary of ARABiH), Jiro Manaka (JA1MCU, the first operator from Japan to receive the 5 Band DXCC Award), Igor A. Lambrianov (UA6JW), Mickey Hicks (WO6T) and antenna designer Giovanni Carnevale (I1UJX).

QSLs received direct or through managers: 3D2NB, 3XY5M, 4K0CW, 4KT9W, 4L0A, 4T6I (SA-098), 5C2C, 5C2F, 5H3VMB, 5K0T (NA-132 and NA-133), 6Y8XF, 8Q7GP, 9H1BT, 9U0VB, A25VB, AO5KB, C37NL, C4SV, C6AGU, C91VB, CE9/K2ARB, CO2NB, CO6CAC, CP1FF, CP6XE, CS9L, CT3FQ, CT9L, CU3EQ, CX2TG, D44TXO, D4C, D93I (AS-060), EA9PY, EW3EW, EX8M, EY7AF, H44MY (OC-162), H6VA, HC2SL, HC7AE, HD2M, HH4/K4QD, HR9/IK2QPR, HZ1FS/p (AS-192), IL7G (EU-050), J39BJ, JD1BMM, JT1CO, KH2L, KP4KE, LY70W, N5BEK/TI7, OA4BHY/2 (SA-075), OA4TT, OY/G3TXF, OY9JD, P33W, P43A, PZ5WP, RG9A, S92LX, SX9JZ, T31DX, T32YA, T32YY, T33ZZ, T77C, TA3J/7, TA7KI, TJ3G, TL0A, TO3R, TS7C, TT8JT, TZ6EI, UK9AA, UN7MMM, V29JKV, V44KAI, V63MY (OC-259), V63TO (OC-163),VK9GMW, VP2EFB, VP8DLM, VR2EH, VU2PAI, VU2SWS, VU4MY, VY0A, W3STX/KH0, WP2B, XW1B, YI9TM, YS1G, Z2/UA4WHX, ZF2ZB, ZS1JX, ZS4TX.

10564. ARLP034 Propagation de K7RA

Yahoo group: DX-IS (2009)
Date: 2009-08-21 19:34:38 UTC
From: jjreisert@alum.mit.edu
Topic: 5860 Message: 10564

SB PROP @ ARL $ARLP034
ARLP034 Propagation de K7RA

ZCZC AP34
QST de W1AW
Propagation Forecast Bulletin 34 ARLP034
>From Tad Cook, K7RA
Seattle, WA August 21, 2009
To all radio amateurs

SB PROP ARL ARLP034
ARLP034 Propagation de K7RA

The quiet sun continues to baffle us. If there are no sunspots today, and I don't expect any to emerge, this will be the forty-second day in a row with no sunspots. July 10 was the last day we saw any spots. There is really no way to predict when the next sunspot will appear. If we see no sunspots through the end of the month, then nearly 80 percent of 2009 so far will have been spotless.

Unsettled to active geomagnetic conditions were predicted for August 19, with a planetary A index of 20, lowered to 15 by August 17. As seen at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt, the planetary A index rose to only 10 on August 19 and 11 on August 20. The current prediction from the NOAA Space Weather Prediction Center shows a predicted planetary A index of 5 for every day through the end of August. Geophysical Institute Prague also predicts quiet and stable geomagnetic conditions through the rest of the month.

The summer sporadic-e season appears over, or at least there were no reports this week. There is a shorter, less intense winter sporadic-e season, and December's ARRL 10 Meter Contest often benefits from that mode.

George Munsch, W5VPQ, who lives in Medina County just west of San Antonio, Texas (EL09ok) sent comments responding to Pat Dyer's (WA5IYX, who is about a dozen miles east of W5VPQ, in EL09ql) remarks about digital vs. analog television as VHF propagation indicators.

George wrote, ''I have not had the pleasure of meeting Pat Dyer, but have followed his exploits on monitoring commercial signals for many years. Some early background on TV allocations may give some perspective.

Back after WW2, Ken Bullington's 1947 smooth earth models were just about all the FCC and anyone else had to use for VHF propagation predictions. Ham reports of extended propagation were dismissed, or downplayed as rare. So the initial table of VHF-TV allocations was developed. After a few stations were finally constructed along the Gulf coast, the extent of commonplace temperature inversions and thus extended VHF propagation became horribly evident. Florida stations were often stronger than ''local'' Texas stations. So, the ''Freeze'' happened. No new VHF TV licenses were issued for several years in the 1950s until a new allocations table could be worked out. Even so, interference problems continued to July 2009. I would occasionally catch UHF openings where EVERY UHF channel (except 39) displayed a signal of some kind, and VHF interference could make the low channels unusable. In the early days of (ham) VHF-FM, one Saturday I listened to a new repeater being set up, and mobiles going out to range check. I called in from my mobile and told them they were full quieting in San Antonio. This kind of broke up their party, as they were in Ft. Walton Beach, FL.

Fast forward to DTV. I have a converter which scans the spectrum and records station information whenever it is ''off''. (Hisense DB-2010) So far, several New Orleans stations have appeared on the list. I haven't tallied the list lately, but many of the VHF and most of the UHF channels are now represented. Houston stations are regularly seen, and often in the mornings, local stations do not manage the 15 dB margin over the distant signals, and are unavailable. I thought that the locals were having transmitter problems until I fired up the spectrum analyzer. Big noise there, but the TV refuses to present a picture. Again, the FCC ignored the real world in developing the allocations table, putting too many co-channel stations in ducting range of each other. Since I have an unamplified 10 way distribution system off my antenna, I don't have quite the sensitivity that Pat does, but I still see a lot of out of area digital stations''.

Thanks, George for the fascinating comments. I tried responding to George, but unfortunately the address that his arrl.net email address forwards to is rejecting incoming email.

George refers to ''Ken Bullington's 1947 smooth earth models'', and this was an early model describing a simplified method for calculating propagation over a theoretical smooth spherical earth on frequencies above 30 MHz.

Carl Luetzelschwab, K9LA has a new propagation column in the September issue of World Radio Online. This month's column concerns making propagation predictions for the public, and whether to assume small station or big station capabilities when making the calculations. You can download it for free at http://www.worldradiomagazine.com/wro_issues/2009/0909_toc.html which shows the table of contents. Just right-click on the four sections numbered at the left to download.

In response to the mention in last week's bulletin of the K7JA and K6CTW televised victory with Morse code over text messaging, Tom Segalstad, LA4LN mentioned a similar demo that he and LA8AJA did for Norwegian television. You can watch the ''Eksperimentet'' at http://www1.nrk.no/nett-tv/klipp/222270, which is a children's science program called ''Newton''.

Tom wrote, ''We asked if the Morse receiver could copy the message by ear and reproduce it from memory, but that was not accepted. In that case we could have exchanged the Morse message much faster. Next we asked if the receiving ham could type the received message into a computer, because that would also permit a faster exchange. But that was not accepted either. The message would have to be recorded by handwriting. Then we would be limited to the speed of the receiver's handwriting, which is 30 words per minute. We objected that this was not reasonable, because the receiving SMSer would not have to write down the message, but our objection was overruled.''

''The Morse code message was transmitted at a speed of 150 characters per minute, and was completed in 45.5 seconds. The SMS message was completed in 2 minutes. The conclusion was that the Morse code exchange won with a wide margin''.

''The received message was controlled vs. the original, and was found to be identical. 'But even though the Morse code is faster, the cell phone is much smaller than the radio', says the anchor. But LA4LN replies that your use of cell phone is restricted to where you have coverage by an operator company, while amateur radio telegraphy has no limits -- even from a desolated island in the Pacific Ocean''.

''Can you flirt on Morse code?'', the female SMSer asks. 'Sure', LA4LN answers, ''On Morse code we can transmit the code 88, which means love and kisses. 88 was chosen because it pictures the cross section of kissing lips''.

I didn't know this about 88 having a graphic reference, but you can watch LA4LN explaining it with the aid of his hands, while saying something in Norwegian which sounds to me like ''octo octo''.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for August 13 through 19 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 67.2, 67.6, 68.1, 68.8, 68.1, 67.4, and 67.1 with a mean of 67.8. Estimated planetary A indices were 5, 4, 3, 3, 3, 4 and 10 with a mean of 4.6. Estimated mid-latitude A indices were 3, 2, 1, 0, 2, 2 and 8 with a mean of 2.6.

charset=iso-8859-1"></HEAD><BODY><PRE>:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Aug 21 2200 UTC
Prepared jointly by the U.S. Dept. of Commerce, NOAA,
Space Weather Prediction Center and the U.S. Air Force.
#

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 233 Issued at 2200Z on 21 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 20/2100Z
to 21/2100Z: Solar activity was very low. The disk is spotless, and
no flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 20/2100Z to 21/2100Z:
The geomagnetic field was quiet to unsettled due to the waning
effects of a recurrent coronal hole high-speed stream.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for day 1 (August 22), and quiet
for days two and three (August 23, 24).
III. Event Probabilities 22 Aug-24 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 21 Aug 066
Predicted 22 Aug-24 Aug 068/068/068
90 Day Mean 21 Aug 067
V. Geomagnetic A Indices
Observed Afr/Ap 20 Aug 008/011
Estimated Afr/Ap 21 Aug 005/005
Predicted Afr/Ap 22 Aug-24 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 22 Aug-24 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10566. Re: [DX-IS] Report of Solar-Geophysical Activity

From: Deacon Dave
Topic: 9721 Message: 10566

I can't wait until the day you can report some SSNs greater than 70 :-)

Maybe it will happen before I pass to the Lord.

DD, W1MCE

Wish I could take the credit (or blame) for those results,
Dave! They are simply a forwarding by me of what NOAA and the USAF
come up with. We are now sitting at 42 days straight without a
single sunspot and no one (even the solar physics gurus) have the
slightest idea what is going on.

I agree with your sentiment. These are trying times for the
seasoned DXer. My agony may be ended tomorrow if that hurricane Bill
thing swings north 50-100 nautical miles and knocks all of my gear
down. I'd be hard pressed to find the enthusiasm and funds to
replace it given conditions show no sign of improving. I suppose I
could be the sacrificial lamb and save you guys, because if the day
comes that I have no antennas in the air, you can bet the flux will
skyrocket to 150! :-)

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 234 Issued at 2200Z on 22 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 21/2100Z
to 22/2100Z: Solar activity was very low. The disk was spotless, and
no flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 21/2100Z to 22/2100Z:
The geomagnetic field was quiet to unsettled due to the residual
effects of a recurrent coronal hole high-speed stream that rotated
off the disk yesterday (21 August).
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet during the forecast period (23 - 25 August).
III. Event Probabilities 23 Aug-25 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green

10576. C21TI in NA

Yahoo group: DX-IS (2009)
Date: 2009-08-23 13:03:26 UTC
From: Norman Alexander
Topic: 10576 Message: 10576

Worked in on 40m CW, I missed him on 80m, however K4PB locally worked him. He was in several days on 20m SSB (at 04:00 UTC) an got him there and also on 17m SSB.

He had good signals on 17m, 22 Aug, at 00:41 UTC with very few callers. Not strong, but also not much competition. Started out simplex then went split.

Regards,

Norm W4QN

My wife (N4BU) worked him on both 17 and 20 SSB and I worked him on
20 SSB. (Only needed it on phone.) This past Thursday morning (local time) he had a very good signal into central Florida - an honest 59 - on 20M SSB. Hadn't heard him at all prior to that.

It was my understanding his amp quit functioning and then he got it working again.

10581. Dr. Phil & Ham Radio

Yahoo group: DX-IS (2009)
Date: 2009-08-23 16:58:12 UTC
From: WB6PSY/N6AXK
Topic: 10581 Message: 10581

The Dr. Phil Show

DANNY: Im depressed. Turning things off, 3rd time in 24 hours we have had thunderstorms coming thru. I was out taking down the 6 meter quagi, to repair a quad arm, and put it on a rotatable fiberglass pole that can be easily rotated from the ground. Its on the ground and unhooked, and here she comes outta here. ar ee beep beep etc.

DR. PHIL: Uhmmm... You're depressed? Why are you depressed?

DANNY: It's like I said Dr. Phil, I'm tired of all these storms coming through. Just let something come up on my ham radio that I need, and a storm will pop up every time. I can't stay on the computer without a storm coming up. I gotta unplug everything to prevent damage to my equipment. And let me tell you, I've had damage before. I'm tired of all these storms. I'm tired of 'em, I'm tired of 'em, I'm tired of 'em. If I could write music, I would write a song about the blues and how tired I am of all these (bleep bleep) storms.

DR. PHIL: [Pauses, cocks his head sideways, and looks at Danny funny for a moment] OKeeeyyy, you're tired of the storms. Did you not say a few years back that Virginia was suffering from draught? Danny, the world is an orderly place. Not every year has perfect weather. Some years we don't get enough rain, some years we get too much, but it all comes out in the wash. No pun intended... [Laughter from the audience] And what in the world is it with you ham radio operators? You guys seem to center your whole lives around setting in front of a box with knobs and meters. You'll stay up all night trying to talk to some island out in the middle of the ocean that's uninhabitable for humans, and most people don't even know exists.

DANNY: But Dr. Phil, I know we need rain. It's just that storms come up right when it's most inconvenient for me. And they just keep coming, one after the other. As for those little islands, they are very important to us DXers.

DR PHIL: The forces of nature don't cater to any of us. DXers? What are DXers? And why are you hams so obsessed with radio and islands?

DANNY: DXers are hams that communicate to the far corners of the earth. We eat, sleep, and dream of DX. It's the center of our universe.

DR PHIL: Danny, this is really, really, sad. And you aren't alone. I also have on the show a ham from Georgia, two from Kansas, one from California, and another one from Australia. I've talked to them, and their situations are also sad. At least the one from California sees a bit more to life than ham radio. He dresses up funny and chases meaty bees, or yellow jackets as we called them in Texas. And unlike other ham stations, you'll get a sure, quick, and electrifying response from those rascals. [Laughter from the audience]

I have a plan for you guys. I'm not sending you to a rehab center. Instead, I'm sending all of you to an uninhabited island in the Pacific. You love islands so much, this should be right up your alley. We've had nice huts set up for you to live in. The fishing is good,

but we'll deliver food and drinking water every day. We'll also deliver beer on ice. For each of you, there will be three beautiful women sent in. You will have the good life. Well, it will be good all except for what you value most. You will not have ham radio or computers. If you did they wouldn't work, because you will have no electricity. You will stay on the island for a year. It is very hot and humid there, and it rains most every day. You will learn to appreciate the rain, because without air conditioning, it's all you will have to cool things off.

We'll break now for a commercial. When we come back, we'll hear from a guy who married his goat.

Rene (in California)

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-August, through Sunday, 23rd-August there were 201 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TK, TL, TN, TR, TY, UA, UA2, UA9, UK, UN, UR, V5, V6, V7, V8, VE, VK, VP2V, VP8, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Operators Jacek/SP5EAQ and Jacek/SP5DRH will be active as 3D2MJ and 3D2KJ, respectively, from Viti Levu (OC-016), starting October 1st for four weeks. Activity will be on all bands, but with an emphasis on the lower bands. They plan to use two stations with small amps and vertical antennas. QSL via their home callsigns.

4W, TIMOR-LESTE. Currently, two operators are active from here. Al, CT1GPQ, now active as 4W6AL, will be there until October 3rd. Remember,

this is "NOT A DXpedition"! CT1GPQ is in Timor-Leste with a medical team and radio operations will take place only during his spare time. He was heard this past weekend on 20 meters CW at various times between 0800-1300z. QSL via Toze, CT1GFK. Online log is now available at: http://algarvedx.com
Second operator is Chris, VK4FR, now active as 4W6FR, will be there until mid-October. He is also on a work assignment. Chris was heard this past weekend mainly on 30 and 20 meters using PSK31. QSL 4W6FR via VK4FW.

5B, CYPRUS (New IPA Op!). Gab, HA3JB, will be active as 5B/HG3IPA between September 25th and October 2nd. This is a new IPA activation and is valid for HA-IPARC Award (Hungarian International Police Association). Find IPARC Award info at: http://www.ha3jb.com/award.html
Gab plans to be in the CQWW RTTY Contest (September 26-27th). Online log will be available on his Web page at: http://www.ha3jb.com
ADDED NOTE: Gab reports, "I'm very sorry that the 3A/HG3IPA expedition was postponed due to technical reasons."

9H, MALTA. Members of the Dutch Society of Radio Amateurs (VRZA) will once again be active using their special callsign 9H9PA from Qawra between September 5-28th. Activity will be on 80-6 meters using CW, SSB and the Digital modes. QSL via PB9ZR, by the Bureau or direct to: Ruben van der Zwet, Van Speykstraat 238, 2161 VT Lisse, The Netherlands. NO IRC coupons, they are not valid anymore in the Netherlands (2 USDs only). PLEASE NOTE: Operators will also operate under their individual callsigns. The following callsigns were mentioned: 9H3AB (QSL via PA1SL), 9H3DZ (QSL via PA2AM), 9H3FD (QSL via PA3FHR), 9H3ON (QSL via PG9W), 9H3S (QSL via PA3HGP), 9H3X (QSL via PE1NGF), 9H3YM (QSL via PE1OFJ) and 9H3ZR (QSL via PB9ZR).

9M6, EAST MALAYSIA. Operators Miki, JJ2CJB/AC2AI will be active as 9M6/JJ2CJB from "Langkah Syabas Beach Resort" located near the city of Kota Kinabalu on the Island of Borneo (OC-088) for the CQWW DX SSB Contest (October 24-25th). He plans to run 400 watts into a Force12 C4 beam. QSL via LoTW, e-QSL or the JA Bureau.

AH0, MARIANA ISLANDS. Kuny/W1FPU (7L1FPU) and his nine-year son Yoshiki/KH0UA (JF1UCV), Tomo/N2QP (JQ1OCR), his wife Yuri/KE7TWK, Hajime/AH0BR and Moto/W1NDE will be active from the Mariana Islands between September 4-7th. Activity will include a Multi/Multi entry in the All Asian DX SSB Contest (September 5-6th) as AH0BT. QSL via 7L1FPU, by the Bureau and direct.

EA6, BALEARIC ISLANDS (EU-004). Adrian, AA5UK, will be active as EA6/AA5UK from Ibiza (JM09tb), October 14-29th. Activity will be holiday style on 160-10 meters using mostly SSB and various Digital modes. Also, look for satellite activity on various birds. He will also be active during CQWW DX SSB Contest (October 24-25th). QSL via his home callsign, by the bureau, LoTW or eQSL.

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader, announced this past week (on August 19th) that "the Glorioso 2009 team

has in hand the flight tickets from Paris CdG to the St. Denis Reunion Island airport. The departure is scheduled on September 11th and the return on October 8th. The information about the French Forces Transall flight from Saint Denis to Grande Glorieuse will be published as soon as the FASZOI Hq will have confirmed them. (FASZOI = French Armed Forces for the South Indian Ocean Zone) The stay on Grand Glorieuse is considered having about three weeks length. All the gear has been picked up and is now ready packed on pallets to be sent to the Reunion island in the next few days. Thanks especially for that to the Provins ARC, F6KOP members Serge, F6AML and Frank, F4AJQ." For more details and updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr

HL9, SOUTH KOREA (Update/Attention PFX Hunters!). Mike, KE7WRJ, will be here for over 2 months starting September 9th. He plans to be active as HL9QST, September 10th, but no later than 11th. This is a rare prefix only assigned to U.S. Service members assigned to Korea. His tentative schedule is to operate from 4 different locations in South Korea as follows: September 10-12th: Seoul
September 14-24th: Camp Casey
September 25th-October 18th: Camp Humphreys
October 19-29th: Camp Carroll
October 30th-November 13th: Seoul
Activity will be on 40-10 meters, depending on the propagation, using CW and SSB. Operations will be at least 8 hours a day during the week and longer over the weekends. Look for him to be in both the Extra and General portions of the bands. His equipment will consist of a 5000A by Flex Radio, a "3 element Yagi in a Bag" from Super Antennas. QSL via KE7WRJ, direct or LoTW.

IOTA NEWS.....
EU-008. Operators Ivan/G3IZD, Nick/G0HIK and Norman/G7MRL will be active as GM3IZD, GM0HIK and GM7MRL, repsectively, from the Isle of Islay (IOSA NH22, SCOTIA CS25, WLOTA L-1826) between September 12-18th. Activity will be on all HF bands, pro-pagation permitting. QSL direct only to each operator's home callsign.

EU-125. Michael, DK5NA, will be active as 5Q5NA from Romo Island (NS-001 for the Danish islands award) between September 6-25th. Activity will be on all bands, propagation permitting. QSL via his home callsign, bureau is preferred.

EU-172. Ric, DL2VFR, will be active as OZ0FR/p from the Vesborg Fyr Lighthouse (DEN-046) on Samsoe Island (DIA JY-008) between now and September 4th. Activity will be mostly CW on all HF bands. He was spotted this past weekend on 30 meters. QSL via DL2VFR, by the bureau or direct. DO NOT QSL via the OZ Bureau!

OC-127. Reports indicate that operators Mike/KM9D (H44MY) and Jan/KF4TUG (H44TO) are now lying anchor at Tesauma, Rennell Island. They might be active soon. QSL via OM2SA.

JD/O, OGASAWARA. Operators Makoto/JI5RPT (JD1BLY) and Taka/JO2JDJ (JD1BLP) will be active from Chichijima Island (IOTA AS-031) between September 19-22nd. Activity will be on 40-6 meters using the satellites, CW, SSB and Digi modes. QSL via their home callsigns. Log search for JD1BLY will be available on the following Web site: http://www.ji5rpt.com/jd1/

KH2, GUAM. Operators George/K6SV and Dennis/K7BV will be active from Guam signing their respective callsign/KH2 between August 25-28th (JA time). Activity will be CW/SSB on the HF bands and 6 meters from the WH2DX rental QTH <http://www.wh2dx.com/>. QSL via K6HRO.

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press release number 6 dated August 22nd (edited): "The K4M team has passed two important milestones this week. First we are pleased to present our transportation to Midway on October 9th, 2009. The team has chartered the G1 with the callsign N8E as shown (or will be available) on K4M Web page at: http://www.midway2009.com/kh4news.html (picture taken on Palmyra)
Secondly, all radios, computers, antennas, coax, and the rest of the tons of gear have left Hawaii on a supply ship to Midway and will wait for the team there.
Fundraising continues on our Web site, <http://www.midway2009.com/> .
If you haven't visited it in a while stop by and help support our effort.
All pre expedition contributors who are on LOTW will receive their confirmations within a week of the end of the DXpedition.
This month we are highlighting three more team members. You can read all their history at: http://www.midway2009.com/meettheops5.html "

KH6BZF PROPAGATION FORECAST/REPORT (For August 24-30th).....
Aug 24 AN SOLAR REFERENCE
Aug 25 AN ---------------
Aug 26 HN AN - Above Normal/Geomagnetic Level is QUIET
Aug 27 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Aug 28 AN GEOMAGNETIC REFERENCE
Aug 29 AN ----------------------
Aug 30 AN QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Operators Theo/PA1TK, Kees/PA5WT and Rob/PA3GVI will be active as LX/homecall between September 4-7th. Look for Kees and Rob to focus on the HF bands between 80-10 meters using CW and SSB. While Theo operates in the IARU VHF Contest on 144 MHz (2m). QSL via their home callsigns.

MOBILE DXPEDITION (Ops Needed!). OPDX received the following interesting report this past week stating:
"Three-to-six month mobile DX expedition via restored 1971 VW van from Mexico to Tierra del Fuego... beginning plus-or-minus November-December '09.
- Men and women wanted for arduous journey

- Low price
- High drama
- From the searing heat of the Amazon jungle to the bitter cold of windswept Cape Horn
- Safe return anticipated
- Honor and recognition among hams worldwide

For more information, please E-mail gorvonj4@...
or phone/fax K0GMO John Croonquist 406-837-0525."

P29, PAPUA NEW GUINEA. Allan, VK2GR, will be active as P29CW from the Western Province between September and December. Activity will be only during his spare time because he is there working with "Australian Doctors International" (ADI - <http://www.adi.org.au>). Due to the limited availability of power, Allan may not be active on the many field trips during his stay. QSL direct to Tommy, VK2IR, with 3 USDs or new IRCs. PLEASE NOTE: DO NOT send QSLs to the Papua New Guinea address.

PSK CONTEST. The European PSK Club (EPC) has the honor to invite the radio amateurs all over the world to participate in the "2009 CIS DX QPSK63 Contest" (September 19-20th). This year's contest is being handled completely by the EPC. They would like to invite you to take part in the contest, the rules and other information can be found on the Web site at: http://www.cisdx.srars.org
Please check the rules as there are important changes. It is strictly a QPSK63 contest now, no other modes are allowed. The maximum output power is 100 watts. Georgia has been removed from the CIS Regions List. Moldova now has only 4 regions (MD01, MD02, MD03, and MD04). Kyrgyzstan has new additional territorial unit - Osh City (KG09). Please do not confuse this list with their EU Areas list, this is a completely different story.
"All the very best and see you all in the Contest! 73!"...
European PSK Club
CIS DX QPSK63 Contest Committee

QSL INFO AND NEWS.....
Franz, DK1II (ex-7O1YGF), announced this past week (August 17th) that he uploaded the 7O1YGF log to LoTW. He states, "Thanks to Bernd, DF3CB, for helping with the log conversion!"

CLEARING THE CONFUSION (ON FEE SUBMISSION) FOR THE 7O1YGF QSL! Wayne Mills, N7NG, reported this week: "There appears to be some confusion over the fees charged for submitting 7O1YGF cards. Here's the story, verified by Ms. Sharon Taratula at ARRL:
THERE IS NO 12.00 USDs APPLICATION FEE FOR SUBMITTING ONLY 7O1YGF CARDS VIA A LOTW APPLICATION.
This fact was mentioned in the release, but perhaps it was not entirely clear:
'If you select only the 7O1YGF QSOs you will not be assessed the fees

that LoTW will report back to you. If you choose other QSOs a regular submission fee will apply;'
The fees mentioned above are both credit fees and DXCC application fees. Just IGNORE any fees reported on your application as long as you don't submit anything other than 7O1YGF credits." 73, Wayne, N7NG

MORE 7O1YGF SUBMISSION CLARIFICATION. Bill Moore, NC1L, Awards Branch Manager, reported on Friday, August 21st: "The 7O1YGF-ONLY submission is free. LoTW notes a submission fee (automatically) and I have no control over this. When I process the submission the fee is waived. The 'payment by mail' notation is to avoid having the fee being charged, accidentally. If you click 'payment by mail' you do not need to enter your credit card information.
Note: This free submission offer will end on December 31, 2009. After this, applicants can include 7O1YGF with their regular 2010 submission."

7P8AO QSL POLICY. Pista, HA5AO (one of the operators of the 7P8AO Lesotho operation), states: "I will send my QSL cards of my Lesotho operation for direct request, only. Please send SAE with 2 USDs and up. Please no IRCs. All the cash will be transferred to the Leratong Community Centre, Roma, Lesotho, to support the orphans and vulnerable children. I will upload the QSOs to the LoTW when I receive your direct request, only. The expenses of printing the cards and the post fee of the return QSL card will be covered by my own. Thank you for your kind understanding, and hoping your support." For more details, see: http://ha5ao.novolab.hu

ET3JA BUREAU QSLS. Milan, OK3AA, the QSL Manager for Josef, ET3JA (OK1XV), informs OPDX that by the time you read this, ET3JA will have finished his job in Ethiopia and should be QRT. He is expected to start working on QSLs (this week) that were received by the Bureau.

IRCS FOR SALE. OPDX: John, K1XN, (from the GoList) informs OPDX that he has several bundles of IRCs for sale *CHEAP* while they last. All are stamped and have an expiration date of Dec 31, 2009. Serious inquiries can E-mail him at: golist@...

K5D QSL STATUS go to:
http://69.89.25.185/~trexsoft/t-rexsoftware.com/desecheo/qsls.htm

QSL OH7QR/M via Erkki's home callsign, direct or by the Bureau. He was active from Hailuoto (Hailuoto, EU-184, WLOTA L-0580) this past week.

TA3J/7 AND TA7KI QSL STATUS. Berkin, TA3J, reports that the TA3J/7 and TA7KI QSL cards for the ARI 2009 and 2009 CQ WPX9CW Contests have been sent out direct on August 17th. QSLs for Bureau cards will be sent in September.

TK8B LOGS (Update). Laurent, F8BBL, has uploaded his logs to the following Web page from his recent TK8B and TK8B/P Corsica operation (which included EU-014, EU-104, EU-164 and TK/TK-112) at:
http://www.dx-cw.net/logsearch/logsearch.php
Also, a video is available at: http://www.youtube.com/watch?v=SHYDPTeyZdk

QSLS VIA LOTW: 5K0T, 5R8KD, 6W1RW, 7O1YGF, 7P8MM, 7P8OK, CT1ILT, D93I, EK6TA, F6KNB, KH7Q, LX8RTTY, NU1AW/KH6, W1C, ZF1A, ZM4G and ZP6CW

QSLS RECEIVED VIA MAIL: 4U1UN, 5J0BV, 5K0T, 7O1YGF, AX0BP, C37NL, CP1FF, EA8CQS, HD2M, IL7G, LZ2009KM, TO5E, TZ6EI, V29JKV, V63MY and ZC4RAF

QSLS RECEIVED VIA THE BUREAU: 3B7C, 4K9W, 4O60BH, 5R8RJ, 5Z1A, 6W7I, 9A/VE3ZIK, 9K2CQ, A25SL, AM1TDH, AO5EH, AO5MB, C52C, CO6WD, CU1F, CX4AAJ, DA0T, DE1KDC, DF0COC, DJ9JY, DL1CWI, DL2008DKT, DL40RRDXA, DL50DARX, E21YDP, EG5FUV, EI5GUB, EI0CZ, ER0FEL, ES5JR, ES90Z, EW1IP, EW5HQ, FG/F5OJU, FJ/G3TXF, FO/N6JA, G4MR, HB2008FS, HB9FS, HG9X, HK3JJH/HK0B, HP2/CX2AM, HP3FTD, HQ2A, HQ9L, IB0CW, IK2DZN, IK2FIQ, J3/DL7VOG, J6/DL7AFS, J75RZ, LA2MOA, LZ7HQ, OH0/PA3BAG, OH0X, OJ0MI, OM3CAQ, OX3DB, OX3KQ, OX5AA, P33W, PA143ITU, PA6BF, PA7KG, PT7CB, PY7VI, PZ5XX, RA1QQ/p, RA3AJ, RA9LI/9, RK1QWB, RK3IWT/p, RT6A, RW1AI/MM, RX3FS, RZ6AZZ/p, SA7AUH, SF700BF, SG3U, SK3W, SN0MTB, SP3SLO, SP4TXI, SV9/DJ7RJ, SV9/IZ4DPV, T88CJ, TC3EC, TF/DL2VFR, TF/LA9SM, TG9ANM, TK/F5TVG, TO5RZ, TU2/F5LDY, TX1A, UE4FCR, UE6LHT, UR5FEL/p, V25OP, V25WJ, V26H, VA6AK, VP2EFB, VP2MRM, VP2MVX, YO8RIJ, YU8/OH2R and YW0DX

SN120, POLAND (Special Event). Look for special event station SN120OSP to be active between now and October 31st. Activity will be on all bands and modes. Operations are to celebrate the 120th anniversary of the auxiliary fire brigade of the Polish City "Gorowo Ilaweckie". QSL via SP4CUF.

SPECIAL EVENT. The ARRL announced that the Hiram Percy Maxim Birthday celebration is back! This year, the ARRL is honoring the 140th anniversary of the birth of the League's first president and co-founder. Hiram Percy Maxim, W1AW, was born September 2, 1869 and died February 17, 1936. The special event is open to all amateurs, and the goal is to work the stations adding /140 to their callsigns, and contact as many as possible during the event period, September 2-9th. A special certificate is available for making at least 25 contacts with /140 stations, with endorsement increments of 25, and a maximum endorsement of 100. Who is eligible to sign /140? ARRL members who hold ARRL appointments, ARRL elected volunteers (such as ARRL Directors and Section Managers), ARRL Life Members, ARRL Head-quarters staff and VEs, AECs, QSL bureau workers and awards managers (who are ARRL members). The complete list of eligible positions can be found on page 20 of the September 2009 issue of QST. For more details, read ARRL Letter (Aug. 21st, Vol. 28, No. 33) or go to the ARRL Web page at: http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1

T31, CENTRAL KIRIBATI. Craig, N3BQR, will be on a research trip to Phoenix Island (OC-043) and expects to be active as T31AA between September 10-25th. Part of his research will involve Craig trying to land on at least six of the eight islands in the chain, although this is subject to local sea state conditions. Activity is expected on 20 meters SSB using vertical and/or dipole. QSL route to be announced later.

TI5, COSTA RICA. Operators Lewis/WW4LL and Andrei/EW1AR/NP3D will be active as TI5/homecall between September 23-28th. Activity will be on all bands using RTTY, SSB, and perhaps some CW. QSL via LoTW, also

direct per QRZ.com address.

XW, LAOS. Bruce, XW1B, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via E21EIC.

YO DX CONTEST 2009. Ovidiu, YO2DFA, informs OPDX that he is the Contest Manager of the 2009 YO DX Contest this year. He would also like to inform all the OPDX readers that the contest takes place August 29-30th. The YO DX Contest rules could be found at:
http://www.yodx.ro/en/hf-contest/rules
The 2008 results of last year's contest can also be found at:
http://www.yodx.ro/en/hf-contest/2008
Official sponsor's list can be found at:
http://www.yodx.ro/en/hf-contest/list-of-sponsors
Ovidiu states, "Please inform your readers that all the participants which will fulfill the necessary conditions during the contest will receive a free YO BZ AWARD (I-st Classe)."

ZK2, NIUE. Koji, JM1CAX (ex-D2NX), will be active as ZK2NX between September 19-25th. Activity should be on all bands, especially 30/17/12 meters, mostly CW, but some SSB. QSL via JM1CAX, by the Bureau or direct.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 235 Issued at 2200Z on 23 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 22/2100Z
to 23/2100Z: Solar activity was very low. The disk was spotless, and
no flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 22/2100Z to 23/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the forecast period (24-26 August).
III. Event Probabilities 24 Aug-26 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 23 Aug 067
Predicted 24 Aug-26 Aug 068/068/068
90 Day Mean 23 Aug 067
V. Geomagnetic A Indices
Observed Afr/Ap 22 Aug 003/005
Estimated Afr/Ap 23 Aug 005/005
Predicted Afr/Ap 24 Aug-26 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 24 Aug-26 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10584. Re: [DX-IS] Dr. Phil & Ham Radio

Yahoo group: DX-IS (2009)

From: Alek Petkovic
Topic: 10581 Message: 10584

Literary Masterpiece!

Alek.

PS: Hey boys, I've got a 80W solar panel and batteries here . . . .
and a Wilson tribander that packs down to a real small size. A
generator and plenty of Texas Tower aluminium sections. After the
first week, We'll arrange the shipment of this stuff to the eyeland
and it'll be fun for the rest of the year.

10585. Brag - VQ9LA on 80 meters

Yahoo group: DX-IS (2009)
Date: 2009-08-24 01:19:29 UTC
From: Mark Lunday
Topic: 10585 Message: 10585

With the Zero-Five 43 foot vertical and 100 watts. As Confucious says, even the blind squirrel will discover a nut occasionally.

It helps that Larry, VQ9LA, has beverages on his end and he is an outstanding CW op.

I have been trying this path for about a year, and I could occasionally hear him but he never did hear me until tonight.

My sacrifice to the DX gods last week, in preparation for the move to my new QTH with more land and more trees, was apparently received with favor.

Would help if I could ever get my beam up--been laying in back yard for at least 2 years. When I moved here in 2002, the radio club I joined was a few miles away. Never got involved in local--was told they were mostly vhf guys. Now I need an antenna party, but should I really asked the locals after I have snubbed them for sole long?

Hang in there Al. My sympathies. The "..better near the equator..." works the other way as well - the hurricanes are much more prevalent down here!

On the plus side, Florida is not burning up like it tried to back in '98. On the negative side, those summer thunderstorms roll in virtually every day, knocking us off the air in the afternoons.

Very suprising not to see a single HC8 in the log for all of 2009.
Last year there were ten. They would be on in every contest.

Interesting point, Brian. I also have not worked an HC8 in a while. Maybe people who have routinely gone there in the past decided to go to other places for a change.

Hopefully there will be more activity from there in this coming contest season!

Maybe some day I can work an A9, EP or YA. I know there's activity from those places; I just haven't been able to get one in the log.

From: Zack Widup
Topic: 10594 Message: 10594

Wow! I sent my card direct to DJ3XD on August 13, 2009 and just got the 7O1YGF card today. Fast turnaround!

I'm sure he knows he's going to be getting a lot of QSL requests for a while.

Now if I could just get a card for Montenegro. I've been waiting over half a year for cards sent direct to three different stations.

Well, Art, conditions on HF way up here yesterday were as bad as the weather. But for all the predictions of possible damage we fared well. Plenty of rain and the winds gusted up to 90 mph for a bit but there was no major damage reported in this area. Lots of people headed to the shore to watch the surf -- idiots all -- but no one was swept out to sea. We did get a lot of rain, some flooding and we were without power for four hours. I sat on the stairs to my second floor, near a window, and I listened to my iPod and read. It was relaxing!!!

All I have in the log for yesterday are a GA0 and an LY2.

Yahoo group: DX-IS (2009)
Date: 2009-08-24 20:09:21 UTC
From: aburkefl
Topic: 10568 Message: 10600

Marsha was just reading on the internet that a girl in Maine was swept away from the shore and killed by a big wave. She was apparently there with her father, who ignored warnings from officials in the area. Never fails.

Aside from the C21, about the only thing I have lately in my log is mobiles - county hunting!

We went through the counties in south Florida a couple of weeks ago. Humorous stint through a little piece of the Everglades! (Monroe county) In a couple of weeks we're running through most of the counties in north Florida and then in the middle of September we're going to run all 82 counties in Mississippi. Can I count that as DX? hi hi

lad the storm didn't give you too much grief. Here in the heart of central Florida, we're generally somewhat protected. Five years back, Hurricanes Frances and Jean gave us the nastiest weather here in about 50 years. From a hurricane perspective, it's been very quiet here since then - thank heavens.

:Issued: 2009 Aug 24 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 236 Issued at 2200Z on 24 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 23/2100Z
to 24/2100Z: Solar activity was very low. The disk is spotless and
no flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 23/2100Z to 24/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet during the forecast period (25-27 August).
III. Event Probabilities 25 Aug-27 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 24 Aug 068
Predicted 25 Aug-27 Aug 068/068/068
90 Day Mean 24 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 23 Aug 003/005
Estimated Afr/Ap 24 Aug 005/005
Predicted Afr/Ap 25 Aug-27 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 25 Aug-27 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Art,

I will be retired on June 5 2010 and will be going over in Late August 2010 to set up something's. I am working on A25 foe CQWWSSB contest in Oct 2010 and could do the CW contest in November if anyone wants to go.

Have you retired or close enough to retirement to go to Africa other than during the (our) summer?

Zack;

Don't feel bad, 38 years here and have yet to hear a YA. Did finally snag an A9 this last ARRL. Cost me bucket of bolts though. QRZ lookup told to send registered. SASE ($3.00). Registerd ($11.00), and couple green stamps for good measure. Took only about 60 days though.

Interesting point, Brian. I also have not worked an HC8 in a while. Maybe people who have routinely gone there in the past decided to go to other places for a change.

Hopefully there will be more activity from there in this coming contest season!

Maybe some day I can work an A9, EP or YA. I know there's activity from those places; I just haven't been able to get one in the log.

There will be activity for at least CQWW-CW this year. Trey N5KO
is more of a family/business fellow these days and the station was
originally designed to be around for 10 yrs - it's been activated
since 1992, and there can be few people who still need to work 'em!

Topic: 10594 Message: 10607

Congrats on the 7O1 QSL !

My neighbor (quarter mile) AC9S, found a 7O1YGF QSO in his paper log over this past weekend; one that he had somehow overlooked when he transferred his logs to computer. He uploaded to LOTW and shortly had the confirmation. I have 7O8AA on the wall; now if I could just find a couple I need in my old contest (paper) logs.....

Subject: [DX-IS] 7O1YGF card received

Wow! I sent my card direct to DJ3XD on August 13, 2009 and just got the 7O1YGF card today. Fast turnaround!

I'm sure he knows he's going to be getting a lot of QSL requests for a while.

Now if I could just get a card for Montenegro. I've been waiting over half a year for cards sent direct to three different stations.

From: Lance Martin
Topic: 10592 Message: 10608

A lot of VKs including myself, still need Mt. Athos, I know Monk Apollo is somewhat active, but he never seems to be able to get a signal out this way... Well, not very often. I did hear him faintly once on 20m SSB a couple of years ago but not strong enough to work...

The ones that I have missed (mainly due to lack of propagation) over the last 3 years have been 7O, CE0X, 3Y0B, SV2/A, TI9, FR/J

Oh well, keep at 'em,

10610. Re: HC8 extinct?

Yahoo group: DX-IS (2009)
Date: 2009-08-25 11:35:19 UTC
From: aburkefl
Topic: 10592 Message: 10610

I have something like 328 mixed, 320 CW and 299 on phone. Worked an EY8 a few weeks back and he also suggests registered mail. Haven't sent for the QSL yet. Often wonder if registered is any better (secure) in the former Soviet satellites than regular mail.

Also worked C21TU on SSB - that QSL might prove to be a tad easier!

Over the years, I generally never really complained about the cost of QSLing. Had a great job, nice income (wife also worked and no children). Fortunately, now that it's really getting much more expensive, I need very little, so the cost has gone way down. LotW has helped and even eQSL has helped some.

James was off the air for a few months, but seems to be back again on a regular basis. He's probably everyone's best chance for a 9V QSO. And the QSL should be easy - N5ID took over from me a few years back but had health problems and the mgr is now Randy W5UE (who is also the current HC8N manager). He's a wonderful manager.

I'd like a 9V on 80m - I tried a sked with James one time, he heard me but I didn't hear him. My only Zone 28 on 80m was with a /MM in CQWW-CW one time, and it doesn't count for WAZ. Oh well, it must be boring to work everything...

Mark
I saw spots for him from starting at 1315 UTC, but I didn't hear him
here near Atlanta until about the same time you did.
He was very readable but disappeared in about 5 minutes. I know he was
still there because there were still US hams working him.
Frustrating but the most hopeful yet (I hadn't heard a 9V before either).

I am not familiar with Monk Apollo's story. Are DXpeditions not
allowed on SV/A? It would seem a natural for European DXers to activate.

Mark
I saw spots for him from starting at 1315 UTC, but I didn't hear him
here near Atlanta until about the same time you did.
He was very readable but disappeared in about 5 minutes. I know he was
still there because there were still US hams working him.
Frustrating but the most hopeful yet (I hadn't heard a 9V before either).

Back in the 70 and 80's there were several DXpeditions to Mt. Athos. Then someone went and did not have permission from the top guy? The Monk got mad and then went QRT for several years. Since that time no one else has operated from there except the Monk.

There was a German guest op from Monk Apollo's QTH in the mid-90's, I believe. I worked him. He was a great CW op. Monk Apollo did all the QSL'ing for it himself.
Other than that, I have a feeling Monk Apollo isn't going to agree to any DXpedition operating from there. Mt. Athos is a very closed-off conclave.

Then someone went and did not have permission from the top guy?
The Monk got mad and then went QRT for several years. Since that
time no one else has operated from there except the Monk.
Joe K0BX

I know Baldur DJ6SI managed to operate from there for ~3 days when
I was out of town in 1991 - the operation was DXCC-approved but
apparently offended the Greeks. The only time I've heard/worked
it was when Apollo's friend DL5EBE operated the station for a few
days in Sep 98, and that was all, or mostly, CW. So I have him
to thank for my only SV/A and 7O CW contacts.

Mt Athos is a strange place - do some Googling on it!

You can a feel for some of the problems by looking at:

http://www.eham.net/articles/3131

and there are probably more recent discussions.

I remember that when I was QSL manager for HC8N, I either sent
or received a card for the first SV/A - HC8 QSO on 80m SSB!

Phone, RTTY and CW are relatively easy from there. What is really
needed is a YL operation ....

For those with access to it there was a very interesting article on Mt.
Athos in the August 1999 issue of the Smithsonian Magazine.

10626. Re: [DX-IS] SV/A

Yahoo group: DX-IS (2009)
Date: 2009-08-25 20:23:09 UTC
From: Zack Widup
Topic: 10624 Message: 10626

It seems Mt. Athos has always been a Pandora's box as long as I can remember. People have requested that it be removed from the DXCC list but it never has been. It looks like getting an operation going from KP1 or KP5 is even an easier project than operating from Mt. Athos.

If Monk Apollo were making regular QSO's from there like the one-man operations of A22MN, 7P8SR, TL8NG, 9X5HG, XT2BW, etc. of the past it might be a different story. But it appears he doesn't work much CW and has more limited operating times than those mentioned above had. I worked these people numerous times; they were living in those countries for extended periods of time and worked the pileups down considerably. Near the end of his stay, 7P8SR would call CQ on 40 CW with no takers.

YLs? Not from SV/A this century!

I dunno about 'relatively easy' - relative to what, North Korea?
The call is often pirated, especially on CW, and Monk Apollo tends
to be active on bands/times that are hard/imposssible for the US.
Ah well, he does get on the air, but he doesn't spoon-feed us.

If anyone cares, and I'm pretty sure no one does, my first QSO with Mt. Athos was in 1973 and the last, with Apollo's station operated by DL5EBE on CW, was in 1998. While I have heard Apollo several times in the last 11 years, I have not bothered to enter the fray. My QSOs were only on 15 and 20 CW & SSB.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 237 Issued at 2200Z on 25 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 24/2100Z
to 25/2100Z: Solar activity was very low. No spotted regions were
visible on the disk, and no flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 24/2100Z to 25/2100Z:
The geomagnetic field was quiet. The wind speed at ACE continues to
decline through the period (approx. 330km/sec).
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the forecast period (26-28 August).
III. Event Probabilities 26 Aug-28 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 25 Aug 067
Predicted 26 Aug-28 Aug 068/068/068
90 Day Mean 25 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 24 Aug 001/003
Estimated Afr/Ap 25 Aug 005/005
Predicted Afr/Ap 26 Aug-28 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 26 Aug-28 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Sorry, John, but in all the years I have been a ham I have NEVER had any interest in 6M. In fact, the first time I ever listened to the band -- within the last month!!! -- I heard absolutely nothing. Years ago, long before cable TV, a local near me had great success on 6 but he had no friends in his neighbourhood. Perhaps that scared me off.

10637. Re: [DX-IS] HC8 extinct?

Yahoo group: DX-IS (2009)
Date: 2009-08-26 02:40:06 UTC
From: Ted Melinosky
Topic: 10592 Message: 10637

Hi Derek:

This may be what you are thinking of. NE8Z/HC1MD is a US doctor who maintains connections with Ecuador and often volunteers medical services to folks in that country.
He offers the following two awards as taken from my Awards Directory:

*ECUADOR DX-TA-SEA DX Club Series*
General Requirements: Sponsored by DX-TA-SEA Club (WW8DX). Available for amateurs/SWL's. Contacts must be after 20 Nov 1945. Contacts may be made under different personal callsigns, but all must be made from same country. Endorsements by band, mode or QRP (<5w). GCR list and fee of $US5 (or equivalent foreign currency accepted at current rates) or 10 IRC's. Endorsements are SAE and $US2 or 4 IRC's. All of the awards are free to Ecuadorean stations and Ecuadorean SWL's. Apply to Dr. Rick Dorsch NE8Z/HC1MD, PO Box 616, Hamburg, MI 48139-0616.

* Equatorial Line Diploma*
Confirm contacts with the 20 different Ecuadorean HC and HD prefix areas HC1-0 and HD1-0, including HC8/HD8 Galapagos Islands and HC9/HD9 and HC0/HD0 Special Event and Contest stations.
Class D - Brass - Contacts with 1-5 prefixes.
Class C - Bronze - Contacts with 6-10 prefixes.
Class B - Silver - Contacts with 11-15 prefixes.
Class A - Gold - Contacts with 16-20 prefixes.
A special trophy awarded free of charge to those holding the Class A Gold Diploma and confirming all 20 prefixes.

* HC8/HD8 Galapagos DX Diploma*
Confirm contacts with a minimum of 3 different HC8/HD8 stations in the Galapagos islands. A special endorsement for confirmation with 8 different Galapagos stations, one of which must be a HD8 call sign.

Hope this might be of some value.

Ted Melinosky K1BV

Phone, RTTY and CW are relatively easy from there. What is really
needed is a YL operation ....

For those with access to it there was a very interesting article on Mt.
Athos in the August 1999 issue of the Smithsonian Magazine.

Do I remember a post from a few years ago that the radio at SV/A failed and they were hoping to have a new one 'donated'?

Phone, RTTY and CW are relatively easy from there. What is really
needed is a YL operation ....

YLs? Not from SV/A this century!

I dunno about 'relatively easy' - relative to what, North Korea?
The call is often pirated, especially on CW, and Monk Apollo tends
to be active on bands/times that are hard/imposssible for the US.
Ah well, he does get on the air, but he doesn't spoon-feed us.

From: Deacon Dave
Topic: 10624 Message: 10640

A monastery has a complete time discipline 24/7 beginning with a full prayer life, up to seven times a day for structured prayer [Liturgy of The Hours], possibly taking more than 4 hours a day, Mass, a personal commitment to physical work [labor] to sustain the community, a time for advanced study, and disciplined community interaction [socially].

Time for purely personal 'pleasure' is simply very low on the priority scale.

If you really want to have SV/A on the air get permission from the Superior of the Community for a month long retreat, and give up one or two hours of sleep a night to operate. :-) ... really, it is a fully disciplined community with very little non scheduled time for worldly pursuits.

DD, W1MCE [Reverend]

Subject: Re: [DX-IS] SV/A

It seems Mt. Athos has always been a Pandora's box as long as I can remember. People have requested that it be removed from the DXCC list but it never has been. It looks like getting an operation going from KP1 or KP5 is even an easier project than operating from Mt. Athos.

If Monk Apollo were making regular QSO's from there like the one-man operations of A22MN, 7P8SR, TL8NG, 9X5HG, XT2BW, etc. of the past it might be a different story. But it appears he doesn't work much CW and has more limited operating times than those mentioned above had. I worked these people numerous times; they were living in those countries for extended periods of time and worked the pileups down considerably. Near the end of his stay, 7P8SR would call CQ on 40 CW with no takers.

You can a feel for some of the problems by looking at:

http://www.eham.net/articles/3131

and there are probably more recent discussions.

I remember that when I was QSL manager for HC8N, I either sent
or received a card for the first SV/A - HC8 QSO on 80m SSB!

Yawn!!!

"Predicted 26 Aug-28 Aug 068/068/068"

Someday it will change!! The question is WHEN ?????????????

:-)

Thanks for the daily reporting. It lets me mow the lawn, go grocery shopping, go to the mall, buy supplies at Home Depot, etc., in total confidence.

10642. conditions - the magic of radio

Yahoo group: DX-IS (2009)
Date: 2009-08-26 12:30:52 UTC
From: Alan Leith
Topic: 10642 Message: 10642

So, hoping for a repeat of yesterday's "good" HF conditions, I turned on the radio this morning to hear virtually nothing.

I just happened to be here yesterday and was surprised and very pleased when I heard and worked DU3NXE, RW9JZ and a little later VU2RMS. A bit after that I ventured to SSB (one of those rare occasions) and worked GB111HP off the back of his beam and then A71EM. And considering the low point in the sunspot cycle I thought that was pretty good.

I should have known there would not be a second day of this!

Today, with the beam in the same direction at the same time of day, I can hear an HB9 calling CQ, a DJ6 calling someone he has not identified and I cannot hear anyway, and a YU also calling CQ. They're all very weak.

This is exactly why I got into this hobby all those years ago. It is uncertain and magical.

Maybe tomorrow will be better. Maybe not!

Good Morning Gang:

The only possibly good thing about "Aug-28 Aug 068/068/068" is that it has the potential to bring a good season on 160, and it's getting closer. Bring it on!

73,
Mike, W5UC

Newington CT August 27, 2009
To all radio amateurs

SB DX ARL ARLD034
ARLD034 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MALTA, 9H. Members of the Dutch Society of Radio Amateurs will be QRV with special callsign 9H9PA from Qawra from September 5 to 28. Activity will be on 80 to 6 meters using CW, SSB and various digital modes. QSL via PB9ZR.

SOLOMON ISLANDS, H4. Mike, KM9D and Jan, KF4TUG are QRV as H44MY from Rennell Island, IOTA OC-127. Their length of stay is unknown. QSL both calls via OM2SA.

SWITZERLAND, HB. Members of the Tera Radio Club will be QRV as HB9VELO during the month of September to mark the UCI Road World Championships taking place in Mendrisio. Activity will be on all HF bands using CW, SSB, RTTY and PSK. QSL via HB9OCR.

SARDINIA, IS0. Rolf, DL6ZFG will be QRV as IS0/homecall from August 31 to September 18. He will be active holiday style mainly on 40, 30 and 20 meters using all modes. QSL to home call.

JAPAN, JA. Special event station 8J7M will be QRV from Honshu Island, IOTA AS-007, from September 1 to December 31. QSL via bureau.

MARIANA ISLANDS, KH0. Kuro, JH0MGJ is QRV as AL5A/WH0 from Saipan, IOTA OC-086, until August 31. Activity is on 80 to 6 meters. QSL direct via JA7JEC.

LUXEMBOURG, LX. Operators Theo, PA1TK, Kees, PA5WT and Rob, PA3GVI will be QRV as LX/homecalls from September 4 to 7. Activity will be on 80 to 10 meters using CW and SSB. Another station will be active

on 2 meters in the upcoming IARU VHF contest. QSL to home calls.

ALAND ISLANDS, OH0. Peter, OH0JWL, Horst, OH0/DF6FL and Siegfried, OH0/DL9ZE are QRV from Eckeroe until September 12. Activity is mainly on 20, 17, 15 and 10 meters using CW, SSB and RTTY. QSL to home calls.

DENMARK, OZ. Ric, DL2VFR is QRV as OZ0FR/p from the Vesborg Fyr Lighthouse, ARLHS DEN-046, on Samsoe Island, IOTA EU-172, until September 4. Activity is on the HF bands using mostly CW. QSL to home call.

PAPUA NEW GUINEA, P2. Allan, VK2GR is QRV as P29CW until December from the Western Province while on work assignment with the Australian Doctors International. Activity is in his spare time. QSL direct via VK2IR.

GREECE, SV. Gabi, HA1YA is QRV as J48YA from Thassos Island, IOTA EU-174, until September 8. QSL via operator's instructions.

CANADA, VE. George, K3GV will be QRV as homecall/VY2 from Prince Edward Island, IOTA NA-029, from September 1 to 28. Activity will be mainly on 20 and 15 meters. QSL to home call.

THIS WEEKEND ON THE RADIO. The NCCC Sprint, ALARA Contest, SCC RTTY Championship, YO DX HF Contest, Kansas QSO Party and the SARL HF CW Contest are all on tap for this weekend. Please see August QST, page 76, and the ARRL and WA7BNM contest web sites for details.

10648. Four-square or hex beam for 20 meters?

Yahoo group: DX-IS (2009)
Date: 2009-08-28 13:52:42 UTC
From: Mark Lunday
Topic: 10648 Message: 10648

Maybe both? I have the hex, it works great at 32 feet, but not for very low angles.

Looking into a 20 meter four-square. This will get me the low angles (as I understand it) but the gain won't be near what the hex is, right?

Mark Lunday

Seattle, WA August 28, 2009
To all radio amateurs

SB PROP ARL ARLP035
ARLP035 Propagation de K7RA

Last week's Propagation Forecast Bulletin ARLP034 reported that the sporadic-E season was probably over, but then we heard from Mark Bell, K3MSB of Airville, Pennsylvania (FM19ut). He reports that nine days ago on August 19 he worked KG4NL in Guantanamo Bay (FK29) on 6 meter CW at 2208z.

KG4NL was weak in Pennsylvania with significant QSB, where Mark was running 100 watts into a five element Yagi at 20 feet.

Bill Rinker, NE9Z in Moran, Wyoming wrote in to ask how the Solar Flux Index is measured. Bill is in the Teton National Forest, about 20 miles south of Yellowstone National Park.

The solar flux readings are done at an observatory in Penticton, British Columbia, three times per day. The one we use for the official solar flux is the noon reading. The other readings are done in the morning and afternoon.

You can see all of those readings for the past few years at http://tinyurl.com/ks8tvn. The ones to pay attention to are the readings at 2000z (which are shown in the table as 200000 in the second column) and the observed flux values are in the fifth column. The sixth column shows adjusted flux values, which are corrected for variations in the distance from Earth to Sun. The adjusted values may be useful for measuring what the Sun is doing, but the observed flux gives an indicator of the relative amount of 2.8 GHz energy that is reaching Earth. 10.7 cm is the approximate wavelength at 2.8 GHz.

The page at http://www.spaceweather.ca/sx-eng.php has more detailed information about the solar flux under "Information about the Programme."

Mark Lunday, WD4ELG of Hillsborough, North Carolina notes that as the Summer season slowly wanes, static on the lower frequencies is subsiding. Mark recently worked VQ9LA on 80 meters CW with 100 watts and a modest vertical.

Jeff Lackey, K8CQ of St. Simons Island, Georgia has written to us before with his observations on the number of zero sunspot days between cycles. This time he sent a graphic showing how this minimum is similar to the one prior to Cycle 19 (the big one) and earlier cycles, rather than more recent cycles after 19.

Currently we have had 48 continuous days of zero sunspots. Jeff said if this continues for the next couple of days, it will be the only cycle minimum since 1855 with two greater than 50 day runs of zero spots. Back then it was the transition to Cycle 10. It is happening right now, and it happened in 2008 also.

He notes, "There is still DX to be worked. You just have to be very patient. I heard the V73NF station on 40m CW earlier this week (Aug 24) about 1100 UTC but they didn't seem to be coming back to anyone in NA. So I'm not sure they were hearing very well. They finally went QRT and left a lot of us exasperated. This morning the KH2/K7BV operation was quite strong but the QRM for me was too much to be heard. They worked several NA stations from 1230 to 1300 UTC but I never could crack the pile up. I've got both DXCC entities before in previous operations; so I wasn't totally bummed out."

Jeff works all his DX with a flagpole antenna and by loading up his rain gutter.

Geophysical Institute Prague predicts quiet to unsettled conditions August 28, quiet August 29-30, quiet to unsettled August 31, September 1 quiet, quiet to unsettled September 2, and active conditions on September 3.

NOAA and the U.S. Air Force predict planetary A index for August 28 through September 6 at 5, 7, 10, 7, 5, 12, 7, 5, 8 and 6.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for August 20 through 26 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 67.6, 66.4, 66.6, 67.3, 67.6, 67.1, and 67.3 with a mean of 67.1. Estimated planetary A indices were 11, 8, 5, 5, 3, 3 and 4 with a mean of 5.6. Estimated mid-latitude A indices were 8, 6, 3, 3, 1, 2 and 4 with a mean of 3.9.

**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

F - Members of the Radio Club Haute Saintonge (F5KLJ) will operate SSB, CW and digital modes as TM1MAD from Ile Madame (not IOTA, DIFM AT-024) on 5-6 September. QSl via F5KLJ, bureau preferred. [TNX F5NQL]
F - Commemorating the 150th anniversary of the birth of radioactivity pioneer and Nobel laureate Pierre Curie, special event stations TM150RPC (QSL via F5KAZ) and TM0RPC (QSL via F5KEB) will be active on 6-20 September and 19 September-2 October respectively. [TNX F1SIU]
G - The Cray Valley Radio Society will be holding a "Ham Radio Summit Festival" on 30 August (10-19 UTC) from Shooters Hill, the highest point in South East London. Expect activity on the HF bands and 2 metres using the special callsign GB4SH. QSL via G4DFI. More details at www.qrz.com [TNX 2E0RCV]
KH0 - Kuny/7L1FPU (W1FPU) and his nine-year-old son Yoshiki/JF1UCV (KH0UA), Tomo/ JQ1OCR (N2QP) and his wife Yuri/KE7TWK, Hajime/AH0BR and Moto/W1NDE will be active as AH0BT from the Mariana Islands (OC-086) on 4-7 September, including a M/M entry in the All Asian DX Contest (SSB). QSL via 7L1FPU, direct or bureau. [TNX NG3K]
LX - Theo/PA1TK, Kees/PA5WT and Rob/PA3GVI will be active as LX/ homecall from Luxembourg on 4-7 September. Theo will operate in the IARU VHF Contest (144 MHz), while Kees and Rob will focus on the HF bands (80-10 metres, CW and SSB). QSL via home calls. [TNX PA3GVI]
OH0 - Peter (OH0JWL, CW), Horst (OH0/DF6FL, CW and SSB) and Siegfried (OH0/DL9ZE, SSB and RTTY) will be active from Eckeroe, Aland Islands (EU-002) from 28 August to 12 September. Expect them to be QRV on 10, 15, 17 and 20 metres as preferred bands. QSL OH0JWL via DL5FF, others via home calls. [TNX DXNL]
OH - OH1BOI, OH1JJO and OH1FEQ will be active as OH1AV/2 from Vormo Island (EU-097) on 28-30 August. QSL via OH1BOI. [TNX www.rsgbiota.org]

ON - Special callsign ON4DAMIAN will be in use on 5-6 September and 3-4 October to mark the canonization of Father Damiaan de Veuster (1840-1889), a Belgian missionary who helped lepers on the Hawaiian island of Molokai. QSL via ON7LR, direct or bureau. [TNX The Daily DX]
P2 - Allan, VK2GR will be active in his spare time as P29CW from Kiunga, Papua New Guinea (OC-034) between September and December. QSL direct only via VK2IR. [TNX MM0NDX]
PA - In October 1934 the KLM Douglas DC-2 "Uiver" (callsign PH-AJU) won the handicap section of the MacRobertson Trophy Air Race from London to Melbourne. Celebrating the 75th anniversary of that event, special station PA75AJU will be active on 1-29 September. QSL via PA3CAL, direct or bureau. [TNX PA3CAL]
SP - The Second World War started on 1 September 1939 with the invasion of Poland. A large number of "No More War" special stations will be active from that country between 1 September and 6 October: HF70NMW, SN70NMW, SO70NMW, HF70A, HF70E, HF70M, HF70N, HF70O, HF70R, HF70W, SN70A, SN70E, SN70M, SN70N, SN70O, SN70R, SN70W, SO70A, SO70E, SO70M, SO70N, SO70O, SO70R and SO70W. The event is organized by PZK, the Polish IARU society, and is supported by the Ministry of National Defence. Information on the relevant award can be found at http://www.pzk.org.pl/nomorewar [TNX F5NQL]
SV - A group of 11 operators will be active on the HF bands SSB as SX2IMA from Mount Rachia for the Greek Field Day on 5-6 September. QSL via SV2JAO (direct only). [TNX SV2LZX]
UA - Mike/RA1ALA, Alex/RX1AW and George/RW3AKN will be active as homecall/1 from Nemetskiy Kuzov Island (EU-147) from 29 August to 4 September. QSL via home calls, direct or bureau. [TNX VA3RJ]
V5 - Look for V5/DJ2HD, V5/DK1CE and V5/DH3WO to be active from Namibia on 5-26 September. They will operate holiday style on 40-10 metres SSB and CW. QSL via home calls. [TNX NG3K]
VE - Juergen, DL7RV will be active again as VO2/NF6J from Battle Island (NA-044) on 4-11 September. Look for him on 30, 20 and 15 metres CW only. QSL via DL7RV, direct or bureau. [TNX www.rsgbiota.org]
W - Dick/N7RO, Johnny/KE7V and Yuri/N3QQ are expected to be active as N7RO/p from Tatoosh Island (NA-169) until 30 August. QSL via N7RO. [TNX N3QQ]
W - A large number of stations from the US will add /140 to their callsigns on 2-9 September to celebrate the 140th anniversary of the birth of Hiram Percy Maxim, W1AW (1869-1936), co-founder and first president of the American Radio Relay League. Information on the event and the relevant certificate can be found at http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1
ZS - Special event callsign ZS10WCS will be aired from South Africa from September through 12 July 2010 for the FIFA World Cup (http://www.fifa.com/worldcup/index.html). Expect activity on a daily basis from 1 June through 12 July, while during the months leading up to the event the callsign will be in use during the weekends. QSL via the South African Radio League's bureau, whose mailing address for direct QSLling is: SARL, P.O. Box 1721,

Strubensvallei 1735, South Africa.

PACIFIC TOUR ---> Don/G3BJ and Hilary/G4JKS will be active as FO/G3BJ from the Austral Islands (Rurutu, OC-050 and Tubuai, OC-152) on 4-16 September, and as ZK2BJ from Niue (OC-040) on 18-25 September. They will operate holiday style mainly on CW on 10, 15, 20, 30, 40 and 80 metres. [TNX The Daily DX]

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

AGB NEMIGA CONTEST ---> The Activity Group of Belarus sponsors the AGB-NEMIGA Contest to be held on 18 September, from 21 to 24 UTC, on 80 metres CW and SSB. Participation certificates in PDF format will be e-mailed to all entrants. Complete rules can be found at http://www.ev5agb.com/contest/agb_nemiga.htm [TNX EU1EU]

FT5GA ---> Propagation predictions for 6m from Glorioso do not look promising at all, and the only available antenna would be a 2-element HB9CV. The FT5GA has decided that it would not be worth the trouble, and therefore they will be QRV only on the HF bands (160-10 metres). [TNX http://glorieuses2008.free.fr/]

LOGS ---> The logsearch for 4W6AL is at http://www.algarvedx.com/.

SCC RTTY CHAMPIONSHIP ---> Organized by the Slovenia Contest Club, it will be held on 29-30 August (from 12 UTC to 11.59 UTC). Rules and results can be found at http://lea.hamradio.si/~scc/rtty/rtty.htm [TNX S50XX]

+ SILENT KEYS + Recently reported Silent Keys include Heinz Topp (DJ2LE), William Allen (N6XD) and Denis Yakovlev (RA3LL). Vlad, UA6JD and his family would like to express their gratitude to the dozens of radio amateurs from all over the world who have offered their sympathy and condoncolences for the loss of Harry, UA6JW (www.qrz.com/db/ua6jw).

Prepared jointly by the U.S. Dept. of Commerce, NOAA,
Space Weather Prediction Center and the U.S. Air Force.
#

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 240 Issued at 2200Z on 28 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 27/2100Z
to 28/2100Z: Solar activity was very low. No flares were detected.
The visible disk was spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 27/2100Z to 28/2100Z:
Geomagnetic field activity was quiet.
IIB. Geophysical Activity Forecast: Geomagnetic field activity is
expected to be quiet for the next three days (29 - 31 August).
III. Event Probabilities 29 Aug-31 Aug
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 28 Aug 068
Predicted 29 Aug-31 Aug 068/068/068
90 Day Mean 28 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 27 Aug 004/005
Estimated Afr/Ap 28 Aug 005/007
Predicted Afr/Ap 29 Aug-31 Aug 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 29 Aug-31 Aug
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10653. IRC's

10654. Re: [DX-IS] IRC's

Yahoo group: DX-IS (2009)
Date: 2009-08-29 02:35:28 UTC
From: KIR
Topic: 10653 Message: 10654

When do these expire? I assume the PO has stamped in the appropriate place. What is the payment method? Thanks.

Ken, W4OFE

The Ohio/Penn DX PacketCluster
DX Bulletin No. 923
BID: $OPDX.923
August 31, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, K3GV, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, N0TG, W0YR, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, ON9CDR, PC2A, Pete's-DX-Newsdesk, RSGB IOTA Web Site, SV8CYV, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and ZL2TZE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 23rd-August, through Sunday, 30th-August there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H2, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U30VIC, AUSTRIA. The Vienna International Centre Amateur Radio Club (4U1VIC) will be on the air during the Worked All Europe DX Contest (WAEDC), September 12-13th. This will be a SSB only operation. The station is located in the secured United Nation campus in Vienna, Austria, and due to access restrictions, they will not be able to operate the full 48 hours continuously. They will try to be on the air as much as possible. 4U1VIC will send QSL cards for all QSOs via bureau. If you are in a hurry

you can send it direct including SAE and return postage to: AMATEUR RADIO CLUB, VIENNA INTERNATIONAL CENTRE, P.O.BOX 500, A-1400 VIENNA, AUSTRIA.
ADDED NOTE: A new video about the 4U1VIC Radio Club in Vienna is available online at: http://www.vimeo.com/6301009

6Y, JAMAICA. Look for 6Y1V to once again be active in this year's CQWW Contests. The 6Y1V team has also announced that they will also once again sponsor one young ham operator (21 or under) to join their team and receive an all expense paid trip to operate in the 2009 CQWW SSB or CW Contest with the 6Y1V team. You can reside in any country in the world and be considered for this opportunity provided you hold a valid amateur radio license in your country and have some contest experience. This is a gift to a young ham whom has a passion for Ham Radio and contesting. It is their way of giving something back to this great hobby that has given so much to them! Complete details are available at: http://www.6y1v.com/youth.htm

911 ACTIVITY. Mike, W0YR, will once again (as for the past several years) be active as W0YR/911 on September 11th, to honor/commemorate those lives lost in a terrorist attack at the Twin Towers of the World Trade Center in New York City, the Pentagon in Arlington, Virginia, and the plane that crashed into a field near Shanksville,PA. He plans to operate as much of the day as possible. Mike states, "I just wanted to do it to remind those I work on the air of what this country endured because of hatred -- and also remind those who want to minimize it or forget it, that this WAS an Act of Terror and, even though they would like to revise history, the memory of those (among them, two of my friends) who perished on September 11th, 2001, will NEVER be forgotten or sullied." A special QSL will be issued. QSL via his home callsign.

C3, ANDORRA. Ruben/EA5BZ and possibly other operators from the URE Contest Group will be active as C37URE during the CQWW DX RTTY Contest (September 26-27th) as a Multi-Multi entry. QSL via EA5BZ.

CY0, SABLE ISLAND (Update/Postponed). OPDX has received the following press release on Friday, August 28th (edited):
"The Sable Island DXpedition scheduled for October 19, 2009, by Randy - N0TG, Ron - AA4VK, and Murray - WA4DAN is being placed on 'hold'. Unfortunately, Randy's son, Carter (who was part of the KP1 and KP5 team in 1992), has developed kidney cancer which has spread to the lungs. Although there will be challenging days ahead for Carter and the family of N0TG, we trust the prayers of friends will strengthen this family and successfully bring all through this trial.
The team appreciates the many sponsors who were willing to provide their support, even though CY0 was not at the top of the most needed list, the support of the DX Community from around the world, and the interests shown by the many DX'ers that 'signed' the website Guestbook. We will leave the website up and updates will be posted from time to time on Carter's progress, as well as our plans to reschedule the DX-pedition to CY0. <http://www.cy0dxpedition.com/>
Our hope is that Carter will beat this disease and be able to join us

at Sable Island. We do consider this a 'hold' and we intend to reschedule as health concerns permit.
Thanks again to our ham radio friends for your support. We wish the best for Randy's son Carter and all the Rowe family. Randy's (N0TG) contact information is listed on QRZ.com..... Thanks for your prayers."

FG, GUADELOUPE (NA-102). Anthony, F4EUG, will be active as FG/F4EUG between September 3-10th. Activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

FT/G, GLORIOSO ISLAND (Update/Magic Band). Didier, F5OGL, Glorioso 2009 team leader, announced this past week (on August 25th)(edited): "The propagation forecast for the Magic Band from Gloriosos is very bad at the expedition time; quiet in all directions. Taking advice from the 6 meters specialists, they inform us that chances to give FT5GA to the world hams are very low and even less. The only one antenna available is a 2 element HB9CV, with no other possibility to bring another or several other more efficient one(s), included for EME; So it has been considered we had to focus on HF bands. So we sadly decided to concentrate our activity only from 160 to 10 meters... We ask the 6m community to understand our decision." For more details and updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr

HS8, THAILAND. Voravut, HS8JYX, is planning to be in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSL via HS8JYX.

IOTA NEWS.....
EU-001. Willem, PA1WLB, on holiday, is active as SV5/PA1WLB from Kos Island (Loc. KM36OV) between now and September 6th. Activity will be on 40 and 20 meters SSB (14189 and 7070 kHz; 5 kHz up/down). He will also be on RTTY (14089 kHz) or PSK (14071.5 kHz). QSL via his home callsign, by the Bureau or direct (see details on QRZ.com).

EA-145. Operators from the Cambridge University Wireless Society will be active as CT/homecall from Ilha Deserta, Portugal, between September 4-6th. Activity will be on most HF bands using CW and SSB. QSL via the operator's home callsign, direct or by the Bureau. For details, see: http://www.domsmith.co.uk/amateur-radio/dxpeditions/2009/ct

NA-044. Juergen, NF6J, will be active as VO2/NF6J from Battle Island (CISA NF-049) between 1300z, September 4th to 2300z, September 11th. Activity will be on 30/20/15 meters CW only. QSL via DL7RV, direct or by the Bureau.

OC-127. As reported last week, Mike/KM9D (H44MY) and YL Jan/KF4TUG (H44TO) continue to be anchored at Tesauma on Rennell Island, Solomon Islands; length of stay is not known. Mike was heard this past week on 40/30/20/15 meters CW. QSL via OM2SA, direct or by LoTW.

SA-054. Members of the 4M5DX Group will be active as YW5O from La Orchila Island. Activity will be on all bands and modes. The group is awaiting the transportation schedule from the Venezuelan Navy. The exact days and team will be posted soon on the following Web page: http://www.yw5o.4m5dx.info

KH6, HAWAII. Esa, OH7WV, is planning to be active from here during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) or possibly Single-Op/All-Band entry. Callsign for the contest TBA. QSL via OH7WV.

KH6BZF PROPAGATION FORECAST/REPORT (For August 31st-September 6th)....
Aug 31 AN SOLAR REFERENCE
Sep 1 AN ---------------
Sep 2 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 3 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 4 AN GEOMAGNETIC REFERENCE
Sep 5 AN ----------------------
Sep 6 AN QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

N4, UNITED STATES (Submarine Activity). A group of amateur radio operators in Charleston, South Carolina, will activate N4H from the site of the Confederate Submarine H.L. Hunleyon, September 19-20th. The H.L. Hunleyon was raised on August 8th, 2000, and located at the Warren Lasch Conservation Center on the old Charleston navy base and is currently being preserved in a 90,000 gallon water tank as archeologists investigate the cause of the vessels sinking. The Hunley disappeared without a trace on a return journey after using a 135 lb. torpedo to sink the U.S.S. Housatonic four miles off the coast of Charleston, SC., on February 17th, 1864, making it "The World's First Successful Combat Submarine". The special event station N4H will be on the air to commemorate this historic event and is expected to be on ALL bands 160-10 meters. Operating times will be between 1300-2100z (may be extended). A specially designed QSL card will be available. QSL via: Edward Padgett, PO Box 61362, North Charleston, SC 29419. A donation of 2.00 USDs is required, no SASE is needed. All proceeds after expenses will be donated to "The Friends of The Hunley for Research and Conservation". Visit their Web page at: http://www.nn4f.com/n4h

NA5, UNITED STATES (Grid Activation/VHF Contest). Joey, W5BAK, will be heading to Big Bend National Park (DL88) for the January VHF Contest and plans to be active as NA5RC between January 15-20th (2010). He states, "Send me an E-mail to get on the mail list, and I will keep you updated. We will be rover from several of the other area grids too but DL88 is the goal." QSL via his home callsign.

NP2, U.S. VIRGIN ISLANDS. Members of the Florida Contest Group will be active as NP2B during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are John/NP2B, Brian/KP2HC,

Ann/KP2YL, Frederick/K9VV and Lisa/W4LIS. Visit the Florida Contest Group's Web page at: http://www.floridacontestgroup.org

OH0, ALAND ISLANDS. Operators Peter/DL5FF, Horst/DF6FL and Siegfried/DL9ZE will be active as OH0JWL, OH0/DF6FL and OH0/DL9ZE, respectively, from Eckeroe Island (EU-002) between now and September 12th. Activity will be on 20/17/15/10 meters using CW, SSB and RTTY. QSL via their home callsigns.

ON4, BELGIUM (Special Event). Members of the Radio Club of Binche (ON7RY) will activate the special event station ON4WAR, September 5-6th. Activity is to commemorate the Belgian resistance fighters (WWII), especially those of the Refuge B 40 in Waudrez (Belgium). The scheduled timetable of activities is as follows:
Saturday 6th - From 09:00 AM up to 06:00 PM (0700-1600z)
Sunday 7th - From 08:00 AM up to 04:00 PM (0600-1400z)
They announced, "At the hour up to the hour and a half CW transmissions with a Whaddom Paraset MK VII on 3560, 3579, 3583 and 7025 kHz. At the hour and a half up to the next hour, SSB transmissions on HF bands. QSL information via ON7RY (direct or by the Bureau)." For more details, visit their Web page at: http://www.on7ry.be

OY, FAROE ISLAND. Trygvi, OY4TN, reports that Johan, OY2J, is once again active after being QRT for many years. He has retired from his job and has finally found time to set up his radio station again. QSNs show he has been on 20 meters CW and SSB.

PACIFIC TOUR. Just a reminder that Don/G3BJ and Hilary/G4JKS will be on vacation in the South Pacific during September. Their activity schedule is as follows:
September 4-16th - Austral Islands (from Rurutu [OC-050] and Tubuai [OC-152]); callsign will be FO/G3BJ
September 18-25th - Niue (OC-040); callsign ZK2BJ
Operations will be mostly CW on 80-10 meters (no 17/12m). They will use a K3 transceiver and a Butternut HF6.

PACIFIC DXPEDITION/TOUR (Update/Reminder). Just a reminder that Gerben, PG5M, will be activating three DXCC entities in the Pacific between September 6-27th. His schedule is as follows:
September 6-7th: Fiji (OC-016); prefix 3D2 (callsign not known yet)
September 8-14th: Tarawa Island (OC-017), W. Kiribati; Callsign is T30G
September 15-16th: Fiji; prefix 3D2 (callsign not known yet)
September 17-23rd: Tuvalu (OC-015); Callsign will be T2G
September 24-27th: Fiji; prefix 3D2 (callsign not known yet)
The callsign is not known for Fiji, but he has requested 3D2G. This will be an ultra light solo DXpedition and CW only. He will use an Elecraft K3, and his antennas are a 2x20m doublet, an ECO R7+ vertical for 40-10 meters and a 15m tall DX-Wire glass fiber pole for a 80m vertical. Suggested frequencies are: 3503, 7005, 10105, 14005, 18073, 21005, 24985 and 28005 kHz. Gerben will try to monitor the DXclusters and E-mail for feedback on possible useable frequencies. QSL via PG5M, by the Bureau or direct. For direct requests, please enclose a minimum of 2 USDs for return postage.

More details and updates will be available on: http://www.dx.to

PACIFIC DXPEDITION/TOUR. Operators Andrea/IK1PMR, YL Claudia/K2LEO/PA3LEO, Wil/PA0BWL, Joe/AA4NN, Franz/OE2SNL, Gerhard/DJ5IW, and Kenneth/OZ1IKY are planning a DXpedition to three semi-rare entities (and possibly some other operations) in the Pacific between November 11th and December 13th. The tentative schedule is as follows:
Samoa (5W) - November 11-18th; minus OE2SNL; Vaiala Beach Resort on the northern side of the Island of Upolu (OC-097)
Tonga (A3) - November 19th- December 9th; Otuhaka Beach Resort on the western side of the Island of Tongatapu (OC-049)
New Zealand - December 2-5th; Auckland (logistics, possible activation of some IOTA group)
South Cook Islands (E5) - December 5-13th; minus OZ1IKY
Singapore (9V) - December 13-17th (possible radio operations)

Callsigns have not been announced yet. Focus will be on the lower bands, but activity is planned for 160-10 meters using CW, SSB and the Digital modes. The team will use three Elecraft K2/100 with DSP and amps. For more information and updates, watch:
http://www.ik1pmr.com/plans/a3/index.php?s=intro

PJ4, NETHERLANDS ANTILLES. Operators Peter/PJ4NX, Marco/PE2MC and Michiel/PG4M will be active from Bonaire (SA-006) between September 10-16th. They will take part in the WAE SSB Contest (September 10-11th) as PJ4NX. Before and after the contest they will use PJ4/homecall. QSL via their home callsign (QRZ.com addresses). Logs and photos will be available online at: http://www.pi4cc.nl/pj4

QSL INFO AND NEWS.....
QSL GB0BME via the Bureau or direct to G7WAW. This is a special event station by the Craven Radio Amateur Group (CRAG) from the Bancroft Mill Engine in Barnoldswick, Lancashire, England. See QRZ.com for more info.

PIRATE ALERT. Station signing C31LJ/m on August 27th, was pirated. Nenad, VE3EXY, reports that Peter is in Canada.

PIRATE ALERT. Phillip, ZL2TZE, informs OPDX that "Emma", ZL5SP, is again operating CW on 40m claiming to be in ZL5 Antarctica. He states, "It's the winter there at the moment, 24/7 darkness and it is highly unlikely that any workable propagation from ZL5 would be happening now, maybe in 2 or 3 months when their summer comes around. There is no ZL5SP in SMART which is the ZL Radio Frequency Service database where all callsigns are recorded. There is also no record held by NZART our National body..." Save your green stamps!

QSL V7XX via JH2BNL (NH0AA/NH2): Yuji Oda, 348-1 Nazukacho, Naka-ku, Hamamatsu-shi, Shizuoka 430-0811, JAPAN

QSL V73NF via JA2DSQ (KH2/JA2DSQ): Fuminori Nakayasu, 344 Ichinocho, Higashi-ku, Hamamatsu-shi, Shizuoka 435-0051, JAPAN

VC1W (CISA-132) QSL STATUS. Nenad, VE3EXY, reports that the QSLs are designed and sent to the printer. He will send the cards directly to him when printed, and Nenad will start procssing immediately.

VE1OTA QSL CHANGE. Nenad, VE3EXY, reports that they have decided to 'extend' the coverage to the year 2006. Feel free to send Nenad any VE1VOX/VE1OTA QSLs from 2006 onwards.

QSLS VIA LOTW: K5D

QSLS RECEIVED VIA MAIL: 3V9A, 4T6I, 5K5T, 5K0T, 5R8KD, 7O1YGF, 7P8CF, 7P8R, 9J2CA, DY1C, HK5QGX/0M, IY8WAP, PX8W, TZ6EI, VP8DLM, XW1B and YO9HP

QSLS RECEIVED VIA THE BUREAU: None reported this week!

SX5, DODECANESE. Members of Aegean DX Group will activate Agathonisi Island (IOTA EU-001, GIOTA DKS 063 [for Greek Islands On The Air Award <http://www.5-9report.gr/giota>] as SX5AG between September 4-7th. Operators mentioned are Alexandros/SV8CYR, Vassilis/SV8CYV, Ilias/SV8FMY, Giorgos/SV8IJZ, Giannis/SW8MFF and Dirk/ON5CT. Activity is planned for 80/40/20/17 meters using SSB and the Digi modes mainly on the IOTA frequencies. Depending on the propagation, look for activity on 12/10/6 meters SSB. Suggested frequencies are:
SSB - 3785, 7055, 14260, 18124, 24950, 28460 and 50150 kHz
RTTY - 3580, 7035 and 14080 kHz
PSK - 3570 and 14070 kHz
QSL via their manager SV8CYR. For more info, see: http://www.qrz.com/db/SX5AG

T7, SAN MARINO. Operators Gerd/DJ5TT, Thomas/DK9FEC, Peter/DL1FX and Rainer/DL1ZBO will activate the Amateurs Radio Republic of San Marino (A.R.R.S.M.) club station T70A during the CQWW DX RTTY Contest (September 26-27th) as a Multi-? entry. QSL route TBA.

V5, NAMIBIA. Operators Wolf/DH3WO, Mathias/DJ2HD and Ulmar/DK1CE will be active as V5/homecall between September 5-26th. Activity will be holiday style on 40-10 meters using CW and SSB. QSL via their home callsigns.

VK6, AUSTRALIA. Operators Bernd/VK2IA and Kevin/VK6LW will be active as VK6AA during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via DL8YR. Activity will be from the Northern Corridor Radio Group's (VK6ANC) club station situated about 20 km north from the city center in Perth, Western Australia. See the station at:
http://www.ncrg.org.au

VP8, SOUTH GEORGIA ISLAND. It has been reported that Lars, VP8DIF, will arrive on South Georgia around the second week of October. He will stay at Husvik (WAP GBR-27). QSL via DJ9ZB, by the Bureau or direct. For more info and updates, visit Lars's Web site at:
http://www.lars-boehme.de/vp8dif/

VY2, CANADA (PEI). George, K3GV, will be active as K3GV/VY2 from Prince Edward Island (IOTA NA-029, CIA PE-001) between September 1-28th. Activity will be on 15 and 20 meters around the usual IOTA frequencies. QSL via

his home callsign, direct or by the bureau.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) will be active as Z37M during the CQWW DX RTTY Contest (September 26-27th) as a Multi-? entry. QSL via Z37M, by the Bureau or info on QRZ.com.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 242 Issued at 2200Z on 30 Aug 2009
IA. Analysis of Solar Active Regions and Activity from 29/2100Z
to 30/2100Z: Solar activity was very low. No spots and no flares
were observed on the visible disk.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 29/2100Z to 30/2100Z:
The geomagnetic field was at quiet to minor storm conditions. The
solar wind increased from 350 to 450 km/s. The Bz varied from +10 to
-10 through the UT day. This activity was due to the onset of a
southern coronal hole high speed stream becoming geoeffective.
IIB. Geophysical Activity Forecast: The geomagnetic field will be
quiet to unsettled with isolated periods of active conditions
possible on day one (31 August) and mostly quiet for the remainder
of the forecast period (1 - 2 September).
III. Event Probabilities 31 Aug-02 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 30 Aug 067
Predicted 31 Aug-02 Sep 068/068/068
90 Day Mean 30 Aug 068
V. Geomagnetic A Indices
Observed Afr/Ap 29 Aug 002/002
Estimated Afr/Ap 30 Aug 012/015
Predicted Afr/Ap 31 Aug-02 Sep 007/010-005/005-005/005
VI. Geomagnetic Activity Probabilities 31 Aug-02 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10661. Mail from Russia ?

Yahoo group: DX-IS (2009)
Date: 2009-08-31 01:30:53 UTC
From: k8pg
Topic: 10661 Message: 10661

Hello All ,

Iam just wondering how long it my take to get a letter from Russia?
I know their is a lot of mail that never gets to its distination,
Even when regitered mail dont get through-Taking USD/IRC wonder
when the Govt will crack down on these crooks? Ivge been waiting for
a letter going on 2 mos. now Crazy !

Paul K8PG

10662. Island Activation this weekend

Yahoo group: DX-IS (2009)
Date: 2009-08-31 03:10:24 UTC
From: AD5VJ Bob
Topic: 10662 Message: 10662

Our club is activating US Islands, with commemorative QSL cards, until October and wanted everyone to know we had a blast this
weekend from our reactivation of Pelican Island.

We worked around 5 DX stations including France, Italy, Mexico, Japan and Canada along with many US stations as well. Around 300
contacts in all from 9am Central until around 1700 Central time. Using only one transceiver, 100W and a dipole up 20 feet.

This weekend Sep25th2009 Central time we will be working a new activation (never been on the air before) from Willow Island

("TX061L" US Island designator).

Starting around 1400Z until around 2200Z.

http://www.wc5c.org/WC5CClub/Island/tabid/404/Default.aspx

Dx stations please look for us this coming Saturday around 9AM Central Time. I hope to be operating on 30 meters QRP, but shouldn't
be a problem from the Island for DX or anyone else for that matter.

We will also have guys on 40 meters phone and 20 meters phone.

If I can I will try working CW on 40 and 20 as well. Somewhere around 7050 and 14050.

73 fer nw

es hope to work you from Willow Island.

Bob AD5VJ

10663. Re: [DX-IS] Mail from Russia ?

Yahoo group: DX-IS (2009)
Date: 2009-08-31 03:46:07 UTC
From: k8ztt@mho.com
Topic: 10661 Message: 10663

Paul,

All I can tell you is that I have found the service from Russia to the US to be "hit or miss". Some cards seem to come through without any problems at all, where others never seem to arrive. I have been waiting for over 6 months now for cards from UA4WHX after sending him 25 bucks via PayPal to his "business account".

Below are two email I exchanged with him back in Mar. To date I have not received the cards, nor does he answer any emails I have sent since!

15.03.09, 23:40, "Vladimir M. Bykov"
<vladimir.m.bykov@...>:
> Date: Sunday, March 15, 2009, 7:42:45 PM
> Vladimir,
> I just sent you a $25 donation for your DXPedition efforts via PayPal to the address you gave me (payment@...). Below is the list of QSO's that I would like to get confirmed from your Africa trips. Same call as my email address (K8ZTT).
>
> 5Z4/UA4WHX 28 Sep 05 2228Z 30M CW
> D20VB 18 Oct 06 0348 80M CW
> 9J2VB 04 Nov 06 1608 12M CW
> 9J2VB 05 Nov 06 1914 12M SSB
> 5R8VB 09 Mar 07 0300 80M CW
> I had sent you a couple of cards in the past via the mail service with cash donations inside each. From what you have written in your QRZ.COM listing, it sounds like there was a high probability that none ever reached you! At least with PayPal, I don't have to worry about mail theft!!
> Looking forward to receiving the cards.

#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 245 Issued at 2200Z on 02 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 01/2100Z
to 02/2100Z: Solar activity was very low. Region 1025 (N17E05)has
decayed to a spotless plage area. No flares were observed.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 01/2100Z to 02/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be mostly quiet with occasional periods of unsettled
conditions on days 1 and 2 (3-4 September). Day 3 (5 September) will
return to quiet conditions.
III. Event Probabilities 03 Sep-05 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 02 Sep 068
Predicted 03 Sep-05 Sep 069/069/069
90 Day Mean 02 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 01 Sep 002/004
Estimated Afr/Ap 02 Sep 005/007
Predicted Afr/Ap 03 Sep-05 Sep 008/010-008/008-005/005
VI. Geomagnetic Activity Probabilities 03 Sep-05 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01

Hey!! The Flux is UP!! 069 was 068!!

Better start tuning of 20 meter CW again :-)

I've been living on 20 and 30 CW for the past 6 months. There
are some surprising gems to be found, and this last week or two the
autumn enhancement seems to be kicking in. Nothing outstanding, but
for example I was able to work the 4W6AL on 20M yesterday AM, so
there is DX to be had on 14 MHz and lower . . . and occasionally in 18 MHz.

Really thinking of retiring my tribander and replacing it with a
204BA or equivalent next spring if the flux is still stuck in the
60s. Better to have 4-elements working for you than 3 trapped ones
that only are ever used on one band. Of course if I do that, the
flux will jump up and 15 and 10 will open!

I've been listening for 4W6AL on 14027 for days -- looking at lots of spots but hearing nothing. It doesn't help that there was a big fat birdie on the frequency on Monday and Tuesday. No birdie today -- spots galore and I could hear the pile-up. But I couldn't hear a thing from him.

I'll be there every day this week! Maybe I'll luck out. YB4IR had a booming signal this morning.

Hi Al,

Well, he (4W6AL) showed up on 1 Sept around 11:30 UTC and we seem to have him for about 20 minutes. Seems consistent with the frequency but I don't know if that is a pattern or not (the 11:30 UTC - 12:00 UTC time.)

After about 20-25 minutes two things happen. He fades into the noise quickly and EU picks him up. I don't think we'd have a shot after the Europeans get propagation as they are obviously a lot louder than east coast NA. Seems like we have a short window.

You and I ought to be more or less in the same skip zone (I was beaming 330) and the time might vary by 20-30 minutes between us, but I would think you have a good shot if you camp out and wait for him all week. At his peak he was S6 and not busy, seemingly not hearing EU and not much west of us either, so that could work well.

I was serious about the 20M monobander. I'll look for one over the winter and come spring it could well replace the TH5. There is a lot of weight up there on that thing that is not being used, and a 4-element monobander would be a lot better. There apparently is no hope of us seeing sunspots in the near future. :-(

Well there are a lot of VKs that still need Mt. Athos, me included.

He has been active several times since I have been back on air (2005)
but only once did I hear him faintly.

What sort of Antenna does Monk Apollo have for HF?

A monastery has a complete time discipline 24/7 beginning with a full
prayer life, up to seven times a day for structured prayer [Liturgy of
The Hours], possibly taking more than 4 hours a day, Mass, a personal
commitment to physical work [labor] to sustain the community, a time for
advanced study, and disciplined community interaction [socially].

Time for purely personal 'pleasure' is simply very low on the priority
scale.

If you really want to have SV/A on the air get permission from the
Superior of the Community for a month long retreat, and give up one or
two hours of sleep a night to operate. :-) ... really, it is a fully
disciplined community with very little non scheduled time for worldly
pursuits.

Subject: Re: [DX-IS] SV/A

It seems Mt. Athos has always been a Pandora's box as long as I
can remember. People have requested that it be removed from the DXCC
list but it never has been. It looks like getting an operation going
from KP1 or KP5 is even an easier project than operating from Mt. Athos.

If Monk Apollo were making regular QSO's from there like the
one-man operations of A22MN, 7P8SR, TL8NG, 9X5HG, XT2BW, etc. of the

past it might be a different story. But it appears he doesn't work much CW and has more limited operating times than those mentioned above had. I worked these people numerous times; they were living in those countries for extended periods of time and worked the pileups down considerably. Near the end of his stay, 7P8SR would call CQ on 40 CW with no takers.

In the last 16 months Marsha has confirmed 195 entities - mostly on phone. During the same time frame I think I've worked two new ones on phone and nothing new on CW! Drat!

Not much to do except work on my shack construction project. Now that it's complete (see QRZ.COM), the nerd in me has turned to serious county hunting. Oh, and fightin with the guvmint to get my Medicare ID card - official old fartness approaches!

Hi Paul,

Got on at 1100 and tuned around but heard only a few watery weak Asians -- R-0, JAs -- and MU0FAL calling CQ incessantly on 14027. Then at 1200, there was 4W6AL. He was very weak but I called once.

Exactly at 1202 the birdie came on the frequency and there's no way I can filter it out. I don't know if he's under it or not. It has to be a TV in the neighbourhood.

I've turned down the AF on the rig, turned off the amp and I'm going back to bed.

So that damned birdie has been on all week, except yesterday and I didn't hear him, even though he was spotted.

I'm going to crawl back in to bed for an hour.

SB DX ARL ARLD035
ARLD035 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SWAZILAND, 3DA0. Arnold, WB6OJB is QRV as 3DA0JK until September 8. Activity is on 40 to 10 meters using SSB. QSL to home call.

MALTA, 9H. Wim, PA2AM will be QRV as 9H3DZ from September 4 to 14. Activity will be mainly on the newer bands using CW and RTTY. QSL to home call.

BOLIVIA, CP. Rene, DF9GR is QRV as CP6/DF9GR until September 10. He is active mainly on 80 meters. QSL to home call.

FRANCE, F. Look for special event stations TM150RPC and TM0RPC to be active from September 6 to 20 in commemoration of the 150th anniversary of the birth of radio pioneer and Nobel Prize winner Pierre Curie. QSL via F5KAZ.

GUADELOUPE, FG. Anthony, F4EUG is QRV as FG/F4EUG until September 10. Activity is on all bands and modes. QSL to home call.

AUSTRAL ISLANDS, FO. Don, G3BJ and Hilary, G4JKS are QRV as FO/G3BJ from Rurutu Island, IOTA OC-050 and Tubuai Island, IOTA OC-152, until September 16. Activity is on 80 to 10 meters using mostly CW. QSL to G3BJ.

ITALY, I. Members of the ARI Vigevano club are QRV as IY2M until January 31, 2010 in celebration of the 100th year anniversary of Marconi's Nobel Prize. QSL via IW2NOH.

JAPAN, JA. Special event station 8J7M is QRV until December 31 from Honshu Island, IOTA AS-007, in celebration of the 60 years of the Amateur Radio Morioka Club and the 120th anniversary of Morioka-city

in the Tohoku region. QSL via bureau.

SVALBARD, JW. Ingrid, LA8FOA and Unni, LA6RHA and other operators will be QRV as JW1SYL from Longyearbyen, IOTA EU-026, from September 6 to 13. QSL via operators' instructions.

MARIANA ISLANDS, KH0. A group of operators are QRV as AH0BT until September 7. This includes an entry in the All Asian SSB DX contest. QSL via 7L1FRU.

LUXEMBOURG, LX. Operators PA1TK, PA5WT and PA3GVI are QRV as LX/home calls until September 7. Activity is on 80 to 10 meters using CW and SSB. This includes a 2-meter entry in the IARU VHF Contest. QSL to home calls.

FAROE ISLANDS, OY. Johan, OY2J is now QRV. QSL direct to home call.

DENMARK, OZ. Michael, DK5NA will be QRV as 5Q5NA from Romo Island, IOTA EU-125, from September 6 to 25. Activity will be on all bands. QSL via bureau.

NETHERLANDS, PA. Special event station PA75AJU is QRV until September 29 to commemorate the flight 75 years ago of the KLM Douglas DC-2 that won the handicap section of the Mac Robertson Trophy Air Race from London to Melbourne in October 1934. QSL via PA3CAL.

GREECE, SV. A group of operators will be QRV as SX2IMA from Mount Rachia on September 5 and 6 during Greek Field Day. QSL direct via SV2JAO.

DODECANESE, SV5. Members of Aegean DX Group are QRV as SX5AG from Agathonisi Island, IOTA EU-001, until September 7. Activity is on 80 to 6 meters using SSB and various digital modes near the IOTA frequencies. QSL via SV8CYR.

NAMIBIA, V5. Operators DJ2HD, DK1CE and DH3WO will be QRV as V5/home calls from September 5 to 26. Activity is on 40 to 10 meters using CW and SSB during their holidays. QSL via operators' instructions.

VENEZUELA, YV. Pasquale is QRV as YV5KAJ/YV7 from Margarita Island, IOTA SA-012, until September 11. Activity is on 40, 30 and 20 meters using digital modes. QSL via EA5KB.

THIS WEEKEND ON THE RADIO. The All Asian DX Phone Contest, Russian World Wide RTTY Contest, IARU Region 1 SSB Field Day, RSGB SSB Field Day, DARC 10-Meter Digital Contest, NCCC Sprint, International G3ZQS Memorial Straight Key CW Contest, Wake-Up. QRP Sprint, Colorado QSO Party, AGCW Straight Key CW Party and Tennessee QSO Party will certainly keep contesters busy this weekend. The Michigan QRP Labor Day CW Sprint is scheduled for September 7. The ARS Spartan CW

Sprint is scheduled for September 8. The Hiram Percy Maxim 140th Birthday Celebration event runs until September 9. Please see September QST, page 78, and the ARRL and WA7BNM contest web sites for details.

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 246 Issued at 2200Z on 03 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 02/2100Z
to 03/2100Z: Solar activity was very low. No flares were observed
during the past 24 hours. The visible disk remained spotless. A slow
CME off the west limb was first visible on SOHO C2 imagery at
03/0254Z.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 02/2100Z to 03/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet, with isolated periods of unsettled levels, on
day 1 (04 September). Predominantly quiet levels are expected on
days 2 and 3 (05-06 September).
III. Event Probabilities 04 Sep-06 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux

10678. RE: [DX-IS] Mail from Russia ?

Yahoo group: DX-IS (2009)
Date: 2009-09-04 01:25:04 UTC
From: Lance Martin
Topic: 10661 Message: 10678

Hey Dick,

I am still waiting on UA4WHX here as well, I can't remember the exact date (I sent my direct request) but I think I have been waiting about 18 months for his cards. I am guessing they will show up via the bureau one of these days...

From most sources I have heard that he is a reliable QSLer, you do need to send IRCs though.

Good luck, 73, Lance - VK6DU

Paul,

All I can tell you is that I have found the service from Russia to the US
to be "hit or miss". Some cards seem to come through without any
problems at all, where others never seem to arrive. I have been waiting
for over 6 months now for cards from UA4WHX after sending him 25 bucks via
PayPal to his "business account".

Below are two email I exchanged with him back in Mar. To date I have not
received the cards, nor does he answer any emails I have sent since!

Not to brag, but sent sase and got both my Z2 and 9J back quite a while back (in same envelope). He also dropped in a qsl for another ham living in same town. Do not know how he done that, but when I took the card over to the other guy (who I did'nt even know) he sure got a grin on his face!

As I understand it, he is some type of tour operator who can operatate on his tours. I heard he was planning on another tour, but where, and when I don't remember.

I am a firm believer in sase. No fuss, no muss on qsl processing. They don't have to worry about IRC's (if the local postal office even knows what they are) and $$ that somehow dissapear through postal system. SASE often get's out first as the manager can move them out faster and make his pile smaller. Have even got a book in the shack on it. Can tell you where to get it, but will not advertise on the board. Email me direct if you want to know the source.

From: John Geiger
Topic: 10661 Message: 10680

I sent a collection of QSLs to Vlad with some IRCs and after several months he sent me an email telling me that one of my QSLs was for a different EU operator, and which ones he was confirming. It still look a few months after that to actually get the QSLs, so I guess some post offices move at a different speed than ours. I did get the QSLs, though! Several African countries confirmed on 40m for me.

How is Vlad about QSLing via the bureau? I sent him quite a few bureau cards for some Pacific entities.

Hey Dick,

I am still waiting on UA4WHX here as well, I can't remember the exact date (I sent my direct request) but I think I have been waiting about 18 months for his cards. I am guessing they will show up via the bureau one of these days...

From most sources I have heard that he is a reliable QSLer, you do need to send IRCs though.

Good luck, 73, Lance – VK6DU

Subject: Re: [DX-IS] Mail from Russia ?

Paul,

All I can tell you is that I have found the service from Russia to the US to be "hit or miss". Some cards seem to come through without any problems at all, where others never seem to arrive. I have been waiting for over 6 months now for cards from UA4WHX after sending him 25 bucks via PayPal to his "business account".

Below are two email I exchanged with him back in Mar. To date I have not received the cards, nor does he answer any emails I have sent since!

10683. the hunt for 4W6AL

Yahoo group: DX-IS (2009)
Date: 2009-09-04 13:36:29 UTC
From: Alan Leith
Topic: 10683 Message: 10683

Having heard no sign of 4W6AL yesterday (Sept. 3) between 11-1200Z, I decided not to listen before 1200 today. When I listened around 14027 at 1205, there was nothing to be heard -- not a single signal, in fact, nothing on the band. It was as if my antenna wasn't working. There wasn't even a birdie to be heard!

However, sure enough, at 1125 there was a spot from W1JR (almost on my back doorstep). So, I'd obviously blown yet another chance to get this elusive quest into my log.

Tomorrow through the end of next week I'll be looking for him from 1100Z and perhaps I'll be able to bag him.

This is more fun than hunting for a rare leopard or a zigzag zebra!

Joe must live by his radio. I don't think I would be able to do that, even
if I ever retire!
:-)

4W would be a very tough path from here with no sunspot activity. I worked
one on 20 CW back when we still had sunspots. I have also listened for 4W6AL
and haven't heard a thing here in the Black Hole.

From: Alan Leith
Topic: 10683 Message: 10685

Yes, Zack, 4W is a very difficult path from here also. My only QSO was with Bernie on 15 SSB several years ago so it will be a new CW country for me when I do work it. However, I have heard 4W6AL -- if only briefly yesterday -- so I know he can be heard from here, even with crappy conditions.

One has to be there early, before the path to Europe opens. I suspect it will be all but impossible once the Europeans start hearing him.

As for Joe: I actually think he has a room in his radio and he sleeps there.

05 September 2009 A.R.I. DX Bulletin
No 957
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3DA0 - Arnold, WB6OJB will operate SSB only as 3DA0JK from Swaziland until 8 September around 12 local time. QSL via WB6OJB. [TNX The Daily DX]
5B - Andy, LZ2HM will be active as 5B/LZ2HM from Cyprus on 10-15 September. He will be QRV on 160-2 metres and will participate in the WAE DX SSB Contest as C4I. QSLs via home call. [TNX NG3K]
6W - Sebastien, F8IJV will be honeymooning at Le Calao, Senegal on 15-30 October and will participate in the CQ WW DX SSB Contest as 6V7Q. He might also be active (SSB and digital modes) before and after the contest. QSL via F8IJV, direct or bureau. [TNX F6AJA]
8Q - Andy, G7COD will be active again as 8Q7AK from Embudu, Maldives (AS-013) on 11-25 October. He plans to operate SSB and CW on 80-12 metres (suggested frequencies and operating schedule at http://www.qrz.com/db/8q7ak). QSL via home call, direct or bureau. [TNX G7COD]
CE0Y - The 31 October-15 November DXpedition to Easter Island [425DXN 953] has received permission to shorten their call from XR0YA to XR0Y. This callsign was used twice in the past (1995 and 2000), and the QSL route for this year's event will be announced soon. Bookmark http://rapanui2009.org/ for updates, further information and details on how to contribute. [TNX MM0NDX]
CT7 - A group of operators from the Cambridge University Wireless Society (G3ZAY, M0BLF, M0HSW, M0RLM and M0TJH) will be active as CT7/homecall from IOTA group EU-145 on 5-6 September. They plan to operate SSB and CW on 40-10 metres with two stations and wire antennas. QSL via home calls, direct or bureau. Web page at www.domsmith.co.uk/amateur-radio/dxpeditions/2009/ct/ [TNX M0BLF]
CY0 - The 19-26 October DXpedition to Sable Island [425DXN 938] by WA4DAN, N0TG and AA4VK has been postponed sine die because of serious health problems affecting one of the team members' son (read the news release at http://www.cy0dxpedition.com/). Hopefully the operation will be rescheduled, but for the time being it is understandably being placed on 'hold' while waiting

for better times.
EA6 - Adrian, AA5UK will be active again as EA6/AA5UK from Ibiza, Balearic Islands (EU-004) on 14-29 October, including a SOAB entry in the CQ WW DX SSB Contest. He plans to operate holiday style on 160-10 metres SSB and digital modes. Activity on various satellites is also being planned. QSL via home call, direct or bureau. He will upload his log to LoTW and eQSL. [TNX IZ3EBA]
F - The new dates for the operation from Belle Ile (EU-048) [425DXN 947] are 4-7 September. Six operators will be active as F5KKD/p on the HF and VHF bands, SSB, CW and PSK31. QSL via F5KKD. Further information at http://iota2009.crxcluster.com [TNX F5NQL]
F - A group of operators from the Radio Club of Granville (F5KAQ) will be active from Saint-Nicolas Island (EU-094) on 11-18 September. Alain/F5HVI, Jean-Jacques/F5NKX, Denis/F5RJM, Alain/F6ACH, Rene/F6CMC, Alain/F6ENO, Benoit/F8PDR and Rolf/F9ZG will operate CW, SSB and digital modes on the HF bands, with activity also on 6 and 2 metres. Expect them to be signing F5KAQ/p and homecall/p. QSL via F5RJM, direct or bureau. [TNX F5NQL]
F - Special event callsign TM2NN will be aired on 12-22 September for the 21st edition of Les Nuits de Nacre, the annual accordion festival that takes place in the city of Tulle. QSL via F5KTU [TNX F8REF]
FS - Look for Gregg, FS/W6IZT to operate CW, SSB and RTTY on 40-6 metres from St. Martin (NA-105) on 5-13 September. QSL via N7XG direct, bureau and LoTW. [TNX The Daily DX]
G - Special event callsign GB50ATG has been celebrating the Golden Jubilee of BARTG, the British Amateur Radio Teledata Group, since 1 July. GB50ATG will be on the air until 30 June 2010, and it will be operated by four of the BARTG committee on a rota basis. This month the call is being used by GW4SKA, who will also participate in the CQ WW DX RTTY Contest. QSL via M5AEX. Details on the GB50ATG certificate can be found at http://www.bartg.org.uk [TNX K1XN]
G - Celebrating the 100th anniversary of the Girl Guides, special callsign GG100GN will used from several locations through the anniversary year, starting on 5 September at Abington Park (England). It is the first ever use of a GG prefix. QSL via bureau. [TNX MM0NDX]
G - Depending on weather, Jon, M0OVL will be active as M0OVL/p from the Farne Islands (EU-109) on 25 and 26 September. He has been granted permission to operate only between 10 and 14 UTC on both days. Look for him on 20, 40 and 80 metres SSB. QSL via home call, direct or bureau. [TNX M0OVL]
GM - Ken, G0ORH reports he will be active as GM0ORH from the Isle of Arran (EU-123) on 20-27 September.
HL - Mike, KE7WRJ will be active as HL9QST from Korea from 10 September to 13 November. He will operate CW and SSB on 40-10 metres, "at least 8 hours a day during the week, and longer over the weekends". QSL via KE7WRJ. He will upload his log to LoTW. [TNX NG3K]

I - Peter, DJ2OS will be active as IC8/DJ2OS from Capri Island
(EU-031) on 10 September. He will operate QRP on 20 metres SSB and
CW. QSL via home call, direct or bureau. [TNX DJ2OS]
IS0 - Sardinia QRP Club's members Alessandro, IS0ZAJ and Franco, IS0VSU
will be active as IM0/IQ0QP from Isola dei Cavoli (EU-165) on 6
September. They plan to operate CW, SSB and PSK31 from around 9 to
15 UTC on 20 and 40 metres. QSL direct (see qrz.com). [TNX IS0VSU]
ON - The Radio Club de Binche will operate special event station ON4WAR
on 5 September (7-16 UTC) and 6 September (6-14 UTC) to
commemorate the Belgian resistance during World War II. QSL via
ON7RY, direct or bureau. Further information can be found at
http://www.on7ry.be [TNX ON9CDR]
OZ - Michael, DK5NA will be active again as 5Q5NA from Romo Island
(EU-125) on 6-25 September. QSL via home call. [TNX
www.rsgbiota.org]
P4 - Roy/W3TEF and Bob/W3BTX will operate again as P41USA from Aruba
(SA-036) on 8-17 September. The special callsign marks the
anniversary of the tragic events occured on 11 September 2001. QSL
via W3TEF. [TNX NG3K]
PJ4 - Michiel/PG4M and Marco/PE2MC will be active as PJ4/homecall from
Bonaire (SA-006) on 10-16 September. They plan to operate SSB, CW,
RTTY and PSK on 80-10 metres and to participate in the WAE DX SSB
Contest using the callsign of Peter, PJ4NX. QSL via home calls.
On-line logs will be available at http://www.pi4cc.nl/pj4 [TNX
OPDX Bulletin]
S7 - Mauro, HB9ENI will be active as S79MI from Praslin Island
(AF-024), Seychelles on 21-26 October, CQ WW DX SSB Contest
included. He plans to operate SSB and RTTY on the HF bands and 6
metres. QSL via home call, direct or bureau. He will upload his
log to LoTW. [TNX HB9ENI]
SV5 - Aegean DX Group members Alexandros/SV8CYR, Vassilis/SV8CYV, Ilias/
SV8FMY, Giorgios/SV8IJZ, Giannis/SW8MFF and Dirk/ON5CT will be
active as SX5AG from Agathonisi Island, Dodecanese (EU-001) on
4-7 September. They plan to operate SSB and digital modes on 7,
20, 40 and 80 metres, as well as on 12, 10 and 6 metres SSB if
there is propagation. QSL via SV8CYR. [TNX SV8CYV]
T3 - Craig, N3BQR will be active as T31AA from the Phoenix Islands
(Central Kiribati) on 10-25 September. According to The Daily DX,
he will be "on some sort of research trip", and plans "to go to at
least six of the eight islands for one to two days each" and to
operate mainly on 20 metres SSB.
TK - Nicolas, F5TGR will be active as TK/F5TGR from Porto Vecchio,
Corsica (EU-014) on 6-18 September. He plans to operate SSB and CW
on 40-10 metres, and a side trip to IOTA group EU-100 is being
considered as well. QSL via the bureau. [TNX F6AJA]
TK - Rene, DL2JRM will be active as TK/DL2JRM/p from the main island of
Corsica (EU-014) on 10-13 September and from the coastal island of
San Cipriano (EU-164) on 14-15 September. The latter will be a
solar powered QRP operation on 40-10 metres, CW only. QSL via home
call, direct or bureau. [TNX www.rsgbiota.org]

VE - Cezar, VE3LYC (VY0O) has been in the NA-230 area since 29 August. Everything was ready for the trip, but strong winds and heavy rain prevented him and his crew from setting sail for a few days. In his latest report (3 September, 18.30 UTC) Cezar said that the weather was improving, and that if it would continue to do so, he hoped to set sail on 4 September in the local morning hours.
W - The Tri-County Amateur Radio Club of North Texas, WC5C (http://www.wc5c.org/) will be active from Willow Island (not IOTA, USI TX061L) on 5 September and Greer Island (not IOTA, TX058L) on 19 September, from around 14 to 22 UTC. Operations will mainly be on 20 and 40 metres SSB, but they also operate on other bands and modes (PSK31 and CW). [TNX K1XN]
YV - Look for Pasquale, YV5KAJ/7 to be active from Margarita Island (SA-012) until 11 September. He operates on 40, 30 and 20 metres using digital modes. QSL via EA5KB. [TNX The Daily DX]
ZK2 - Koji, JM1CAX (ZL4NX) will be active as ZK2NX from Niue (OC-040) on 18-25 September. He plans to be QRV on 40-10 metres, and to concentrate on Europe especially on RTTY. QSL via JM1CAX, direct or bureau. [TNX ZL4NX]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

6Y1V ---> Once again the 6Y1V team sponsors one young operator (21 or under) to receive an all expense paid trip to operate in the 2009 CQWW SSB or CW contest from Jamaica. The deadline for applications is 30 September. Complete details can be found at http://www.6y1v.com/youth.htm

DX MAGAZINE MOST WANTED SURVEY ---> The DX Magazine's annual Most Wanted Survey is being conducted now through 15 October. The survey form is available at http://www.dxpub.com/dx_survey2009.html (please note that it is not a complete list of all DXCC Entities: if you need something that is not listed, simply use the "Additions or Comments" space at the end of the form). The overall top 100 will be posted on the web site around 15 January 2010. [TNX N4AA]

EZ8CQ ---> Alexander, EZ8CQ says he now uploads his logs to LoTW. Should you not being able to find a QSL record, please drop him a line (alexandrit2001@...).

OY2J ---> Trygvi, OY4TN reports that this is not a pirate, but the genuine Johan, OY2J, who is once again active on the amateur radio bands. He had been QRT for several years, but now, being in retirement, he has found the time to set up his station. [TNX W1AW]

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Twelve different galleries include cards for the ten Most Wanted DXCC Entities (313 QSLs), the 58 deleted DXCC entities (969

QSLs), obsolete prefixes (2652 QSLs), stations from Magrebh from 1947 to 1962 (319 QSLs), Antarctic bases (789 QSLs) & TAAF (Terres Australes and Antarctiques Francaises, 248 QSLs), the various French DXCC island Entities in the Pacific Ocean (270 QSLs) & the Indian Ocean (96 QSLs), pre-1945 countries (682 QSLs), French Departments (551 QSLs) and USA (50 QSLs), plus a gallery for cards not accepted by DXCC (108 QSLs). Several cards are still needed and your participation is encouraged - please visit http://LesNouvellesdx.fr and send your comments to lesnouvellesdx@... [TNX F6AJA]

QSL 4J0FR ---> Please note that Jean-Michel, F6AJA is not the QSL manager for the recent operation (QSL via F6FYD). Jean-Michel only has logs and blank cards for the activities of August 1995 and December 1997-January 1998 (log search at http://www.lesnouvellesdx.fr/voirlogs.php). [TNX F6AJA]

QSL J79PAK ---> Effective immediately, the new QSL route for the late J79PAK (HB9CUA) is via EA7FTR. There is no need to resubmit cards already mailed to HB9CUA or HB9HLM [425DXN 955], as all of the direct requests will be forwarded to EA7FTR. Please be patient, as the hand written log is being typed by N1NK and a new QSL card is being designed.

TONGA ---> A35A is the first special callsign, to be used during contests and special events, issued to Paul, A35RK under the new Tongan licensing procedures that became effective a few days ago. Citizens and long-term residents will get A35xx (ordinary callsigns) and A35x (special callsigns), while visiting operators will get A31xx (ordinary callsigns) and A31x (special callsigns for visiting groups of operators). [TNX The Daily DX]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at http://www.425dxn.org/awards/toplist/index.html. Please note that QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send send your scores, as well as any request for further information, to Erminio Pandocchi, I2EOW (i2eow@...)

WAEDC ---> The SSB leg of the Worked All Europe DX Contest (WAEDC) will be from 00.00 UTC on 12 September until 23.59 UTC on the 13th. Complete details can be found at http://www.waedc.de/

QSLs received direct or through managers: 3D2AG/p, 3V8BB, 3V9A, 4J15TX, 4L8A, 4T6I (SA-098), 4U1UN, 5H2WK, 5J0BV, 5K0T (NA-132 and NA-133), 5K5T (SA-017), 5R8KD, 6W1SJ, 7O1YGF, 7P8CF, 7P8R, 9J2CA, 9Y4D, 9Y4VU, A35ZS, A71AN, AX0BP, C37NL, CG200I (NA-128), CM6YAC, CP1FF, CV5A, D44TD, DY1C (OC-120),EK6TA, EU5ROPE, HD2M, HK7AAG, HZ1FS/p (AS-192), IL7G, IY8WAP, JW/OK1JK, KG4NL, KL7HBK, KP2/K3TEJ, LU1ZA,LU1ZV,LX8RTTY, LZ2009KM, PX8W, T31DX,TI7KK (NA-191), TL0A, TO3R, TO5E, TZ6EI, UN6P, V29JKV, V31NL, V63MY, V63TO, VC8B (NA-129), VE1/DL2JRM/p (NA-127), VE3DZ/VP9, VE8RCS/VYO (NA-008),VK9GMW, VP8DLM, VP8KF, VQ9LA, WX3B/p (NA-139), XW1B, YN2N, YO9HP, ZC4RAF, ZF1A, ZZ6Z (SA-023).

10687. The best QSLers

Yahoo group: DX-IS (2009)
Date: 2009-09-04 15:41:13 UTC
From: John Geiger
Topic: 10687 Message: 10687

I put up a dualband yagi (2m/70cm) at the end of July and got back on the satellites after a break of a couple of years. I have found the satellite ops to be the ultimate QSLers!

These guys will go on a grid expedition to a rare grid, and then send out QSLs to everyone they work, at their own expense, without any solicitation or SASEs on your part. Wow, what QSLers!

I wish some of the DX stations would do this as well, as getting even a bureau card out of some of them seems to be impossible.

73s John AA5JG

SB PROP ARL ARLP036
ARLP036 Propagation de K7RA

This week we saw another one of those fast-disappearing sunspots. It lasted just two days, over the last day of August and the first of September. No other sunspots were observed during the month of August.

The monthly average of the daily sunspot number, January through August 2009, is 2.8, 2.5, 0.8, 1.3, 4, 6.6, 5.1 and 0.4.

The three-month moving averages of daily sunspot numbers for October 2008 through July 2009 were 4.5, 4.4, 3.6, 2.2, 2, 1.5, 2, 4.2, 5.2 and 4. This takes into account all the daily sunspot numbers for September 2008 through August 2009, and those numbers are for the center months of each of those three month moving average periods.

The latest figure, for July 2009, is an arithmetic average of all daily sunspot numbers for June through August. The previous figure, for June, is an average of daily sunspot numbers for May through July. In other words, sum all the daily sunspot numbers from May 1 through July 31, which equals 478. Divide by 92, which is the number of days in those three months, and it equals approximately 5.196, or 5.2 rounded off.

For June and July we saw the moving average drop from 5.2 to 4, and if September has no sunspots after the one on September 1, then the three-month average centered on August will be 2.

So what is coming up in the near term? Continued low solar flux and possibly no sunspots. Geophysical Institute Prague predicts quiet to unsettled conditions for September 4 and 8.

We received many tips and comments this week about the lack of sunspots, and a link at, http://science.nasa.gov/headlines/y2009/03sep_sunspots.htm to an article titled, "Are Sunspots Disappearing?"

It concerns the work of Livingston and Penn at the National Solar Observatory in Tucson, and their observation that magnetic fields from sunspots are declining. It is important to note that most of their measurements are after the peak of Cycle 23, so this may be normal during the decline of a cycle, not just this one. Also, when they say there may be no sunspots by 2015, this is an extrapolation. Since we do not know what has happened in previous cycles regarding this more accurate measurement of magnetic fields from sunspots, it may be unrealistic to assume that the trend will continue.

NW7US interviewed Dr. Penn this week in his podcast, which you can download from http://tinyurl.com/NSWARPP-E04. Very interesting interview with lots of details on his research.

Regarding sunspots disappearing, check out the comments from K6SGH on his web page, http://www.k6sgh.com/index.html.

An interesting comment came from Jim Williams, K5NN of Wichita, Kansas. Jim wrote, "As an old retired Electrical Engineer and a ham dating back to 1952, I'm wondering what the explanation for consistent long skip might be. I have been involved in an informal net on 75 meter SSB for close to 50 of those years (2 uncles and others, lots of silent keys now) before going to work-about 7AM central time. We never used to have consistent problems with long skip, now most mornings short skip is 200 miles. As I have been active through several sunspot minimums, the extended periods of long skip around daylight was never such a problem. Lately it has taken a kilowatt to be just above the noise on a hundred mile path, the path normally has been good, even at 100 watt level. Is a good plausible explanation in existence for these conditions?"

This brings to mind an August 2007 email from Jerry Reimer, KK5CA of Spring, Texas. Jerry mentioned that short skip on low frequencies depends on NVIS (Near Vertical Incidence Skywave) propagation. The propagation out to 100 miles depends on the high angle component of the antenna radiation bouncing or refracting off the ionosphere overhead. Longer skip depends on lower angle radiation. Jerry mentioned that for reliable short skip propagation, the frequency used should be only 50-80 percent of the fMUF.

Recent fMUF values from ionosonde data may be found at http://www.swpc.noaa.gov/ftpmenu/lists/iono_day.html. If I click on the Boulder (Colorado) data, I see that over the past day the fMUF above Colorado may not be high enough to support short skip on 75 meters.

Another source of real time info are the HAP (Hourly Area Predictions) charts at http://www.ips.gov.au/HF_Systems/6/6/1. Select a location from the drop down menu, and you see a map showing propagation for various frequencies from that location.

Go to http://www.ngdc.noaa.gov/stp/IONO/ for more information about ionosondes.

We got a report this week from Luke Steele, VK3HJ, in Benloch, Victoria, Australia. He will soon see the Spring equinox down under (our Autumnal Equinox in the Northern Hemisphere is September 23, nearly three weeks from now), and note at the end of his comments that he echoes K5NN regarding 80 meters.

"Just thought I'd drop a line and offer a DX perspective from my modest station in central Victoria, 50 miles NW of Melbourne."

"My main antenna here is a 520 foot doublet at 60 feet, with open wire to the shack and a 1/4 wave vertical for 40m."

"Conditions the past few months have been very quiet, with very little happening on 20m and up, although I have still been working DX on CW and PSK most evenings (0800-1400z). There are nearly always Russians to be seen on 20m PSK afternoons and evenings here."

"40 and 30m provide continuing interest, particularly CW and PSK. Contacts to the Pacific Islands and S Asia and JA are available in the evenings when I get on the air. Some Indian Ocean contacts to be had, recently with VQ9JC and VQ9LA on Diego Garcia on 20 and 40m, and 4S7NE in Sri Lanka."

"75m SSB looks average for this time of year with USA on most evenings. 40m CW to USA is mostly good, and SSB is light. I've also been hearing some North America on 160m CW most evenings, and have worked a couple. Top band OK out to Western Australia, Queensland and the western Pacific Islands (out to about 2500mi)."

"Nothing much from Europe, Africa, South America and the Caribbean for some months."

"Local club nets on 80m in the evenings have sometimes been difficult, over the past few months with close stations weak, those beyond about 500mi loud. There's also DX to be had in the mornings here, but I usually miss that, not being a 'morning person'!"

"So, there is still DX to be had, but operating modes and methods need to change to suit."

Thanks, Luke!

Bob Karpinski, WB8B from Clinton Township, Michigan has been having fun running QRP on 17 meters.

Bob wrote, "There was a very sporadic opening with very good signals from the far western edge of EU on 17m from 2300-0000z from Michigan. CT1JOP was worked on 17m CW with only 1 watt on 8/27/09 2330z! He lowered his power to 5w during the QSO and we had a 2-way QRP contact with 559 signals."

Steve Ickes, WB3HUZ of Lightfoot, Virginia wrote: "Despite the lack of sunspots, I've been enjoying world wide DX on 40 meters daily. 80 meters has been more active in the last few weeks with very strong

signals (5-9+20) from many stations out of Europe. It can only get better as the static begins to subside with fall coming."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for August 27 through September 2 were 0, 0, 0, 0, 12, 12, and 0 with a mean of 3.4. 10.7 cm flux was 67.7, 67.9, 68, 67.2, 68.3, 69.1, and 68.2 with a mean of 68.1. Estimated planetary A indices were 5, 2, 2, 19, 5, 4 and 3 with a mean of 5.7. Estimated mid-latitude A indices were 4, 2, 2, 12, 5, 2 and 2 with a mean of 4.1.

Conditions are crappy. So, I'm looking through old IOTA QSOs.

Did anyone ever receive a QSL from 5T0AS/P (AF050) from April 1995? If so, how did you get the card?

Subject: [DX-IS] The best QSLers

I put up a dualband yagi (2m/70cm) at the end of July and got back on the satellites after a break of a couple of years. I have found the satellite ops to be the ultimate QSLers!

These guys will go on a grid expedition to a rare grid, and then send out QSLs to everyone they work, at their own expense, without any solicitation or SASEs on your part. Wow, what QSLers!

I wish some of the DX stations would do this as well, as getting even a bureau card out of some of them seems to be impossible.

I'm not sure I want to start a thread on this, John, but since I'm in a QSLing phase, I want to comment on something that has bothered me for some time.

When I first got into hamming, back in the late 50s, a QSL was sent to the station worked as a matter of courtesy. In my case, I got into using an SAE and an IRC (they were pretty cheap in those days and the ones they had for British Commonwealth countries were even cheaper) for rarer stations sometime in the early 60s. I also used the bureau and often waited years for responses.

I didn't really twig to using US postage on my SAEs to the States for some time, I think. And back then, most QSL managers were in the States with a few in other countries. So, IRCs were very common.

Then some folks started including green stamps in their envelopes and today it is not uncommon for QSL managers to expect a "donation" with their requests from fellow hams. It has gotten so that one European ham, who handles a lot of stations, DEMANDS US$2 for each request, with only one card in an envelope for each of the stations. For the cards I need from this one manager it would cost me over US$30 for the cards, the required payment for the cards and the postage to mail them. And this guy doesn't use LoTW. Not gonna happen!!! And, he's not the only such manager.

Quite honestly, I simply can't afford to collect QSLs from these bandits who show up at hamfests all over the world on other people's "donations" to their pockets.

IRCs in Canada are priced out of reach for me. I purchase them from managers who aren't out to make a killing on them (there are a few) or I use ones that come to me. I believe that an IRC can be cashed in the USA for about $1.30 -- perhaps I'm wrong --- and I certainly won't buy them from guys who advertised them for more than $1.50. And no matter what they say, no manager needs more than one IRC to send a reply.

Quite honestly, I would dearly love to see the ARRL take action against these gonifs. I would like to see the ARRL disallow QSLs for credit from managers who take advantage of the system. I know they can't demand LoTW uploads for their awards but I also feel they shouldn't' allow QSLing to become prohibitively expensive, as it now is in many cases. I'm preparing to upload my logs to LoTW but there are still some QSLs I would like to have for my collection. And because RSGB doesn't recognize LoTW, I "need" cards for that award.

Certainly, an SAE and return postage of some sort is acceptable, with an added donation if you're financially capable of sending one. Beyond that, it is highway robbery.

I put up a dualband yagi (2m/70cm) at the end of July and got back on the satellites after a break of a couple of years. I have found the satellite ops to be the ultimate QSLers!

These guys will go on a grid expedition to a rare grid, and then send out QSLs to everyone they work, at their own expense, without any solicitation or SASEs on your part. Wow, what QSLers!

I wish some of the DX stations would do this as well, as getting even a bureau card out of some of them seems to be impossible.

Al,

Why not name the manager, he feels he is not doing anything wrong. The I would send him an email and copy as many of the stations you are trying to get cards for and let them know that you can't afford the "mark up" / profit that the manager is demanding to confirm the contact. I'm sure that they wouldn't want to be associated with a manager that thinks he is running a business for profit rather then providing them a service.

Just my 2 cents...

You can exchange IRC's at the Post Office for one unit of postage

to anywhere in the world. That means one Airmail Stamp.

Now the guys selling IRC's today most likely have the ones that expire

the end of this year. That means you have to mail it to the DX station

and he has to exchange it for postage by then, or else it's just fancy

paper.

I don't see many new IRC's being sold yet. It may take several months

before a manager accumulates enough to sell.

It's not like the "olde dayes" ...

I'm not sure who you're referring to but the most likely candidate is probably F6FNU. I'll say this about him - I have ALWAYS gotten cards from him when I abide by his wishes. If you're in the log it's a sure thing. I've spent far more than $30 trying to get cards from various QSL managers. I've been waiting now for many months for at least one card from someone who is handling Montenegro cards, with none arriving yet.

So it depends on how badly you want to play the DXCC game. If a manager is going to set certain rules for getting a card from him and if it's not an exorbitant fee (F6FNU wanted $2 the last time I knew, and that isn't unreasonable for an envelope from EU) I doubt the ARRL is going to take any action.

I sent a little extra $ for my 7O1YGF card because I really wanted it and hoping maybe the ops would get a small portion of it to defray their expedition costs. Some DXpeditions are not cheap!

I put up a dualband yagi (2m/70cm) at the end of July and got back on the satellites after a break of a couple of years. I have found the satellite ops to be the ultimate QSLers!

These guys will go on a grid expedition to a rare grid, and then send out QSLs to everyone they work, at their own expense, without any solicitation or SASEs on your part. Wow, what QSLers!

I wish some of the DX stations would do this as well, as getting even a bureau card out of some of them seems to be impossible.

Ah yes, Richard! But, for those of us who don't mail letters to Europe and Asia from the USA, just how much does it cost and hence, how much can you get for one IRC, for postage. Sorry, I'm but a dumb Canuck.

Airmail postage to anywhere from the US is around 98 cents or so. It is less than 1 dollar.

10702. RE: [DX-IS] The best QSLers

Yahoo group: DX-IS (2009)
Date: 2009-09-04 20:07:59 UTC
From: Alan Leith
Topic: 10687 Message: 10702

Nope, not F6FNU. But I just can't keep filling my QSL requests with two greenstamps at a total cost to me of nearly Cdn$4.00 to ship the card to a QSL manager. One IRC is worth postage to Canada from Britain, France, Germany, Italy, etc.

I don't recall if I sent anything extra with my 7O1YGF request but if I had a brain that day I suspect I did.

Subject: Re: [DX-IS] The best QSLers

I'm not sure who you're referring to but the most likely candidate is probably F6FNU. I'll say this about him - I have ALWAYS gotten cards from him when I abide by his wishes. If you're in the log it's a sure thing.

I've spent far more than $30 trying to get cards from various QSL managers. I've been waiting now for many months for at least one card from someone who is handling Montenegro cards, with none arriving yet.

So it depends on how badly you want to play the DXCC game. If a manager is going to set certain rules for getting a card from him and if it's not an exorbitant fee (F6FNU wanted $2 the last time I knew, and that isn't unreasonable for an envelope from EU) I doubt the ARRL is going to take any action.

I sent a little extra $ for my 7O1YGF card because I really wanted it and hoping maybe the ops would get a small portion of it to defray their expedition costs. Some DXpeditions are not cheap!

No, John, not him either. But he, F6FNU and others who play this game should, in my opinion (not by any means humble) should be sanctioned by the DXers of the world.

And that's what I thought -- 98-cents. So Managers selling old IRCs (all IRCs at this point) should not be asking more than that.

I'm not planning to send any direct QSLs after Oct. 15 anyway and I seriously doubt I'll be able to afford the new ones when they come out in 2010.

Costs US$0.98 to airmail 1 ounce anywhere outside of US(0.44) VE
(0.75) XE(0.79), and this is what you get for an IRC at your post
office.

From: Alan Leith
Topic: 10687 Message: 10705

I've just written those prices down and attached the post-it to my monitor.
Thanks, Buzz.

Costs US$0.98 to airmail 1 ounce anywhere outside of US(0.44) VE(0.75)
XE(0.79), and this is what you get for an IRC at your post office.

You can exchange IRC's at the Post Office for one unit of postage
to anywhere in the world. That means one Airmail Stamp.

Now the guys selling IRC's today most likely have the ones that expire
the end of this year. That means you have to mail it to the DX station
and he has to exchange it for postage by then, or else it's just fancy
paper.
I don't see many new IRC's being sold yet. It may take several months
before a manager accumulates enough to sell.

It's not like the "olde dayes" ...

From: RICHARD SOLOMON
Topic: 10687 Message: 10706

I think a proposal to the ARRL to dis-allow any contacts via those managers

for DXCC will solve the problem in short order.

Subject: RE: [DX-IS] The best QSLers

No, John, not him either. But he, F6FNU and others who play this game should, in my opinion (not by any means humble) should be sanctioned by the DXers of the world.

And that's what I thought -- 98-cents. So Managers selling old IRCs (all IRCs at this point) should not be asking more than that.

I'm not planning to send any direct QSLs after Oct. 15 anyway and I seriously doubt I'll be able to afford the new ones when they come out in 2010.

I'm not sure who you're referring to but the most likely candidate is probably F6FNU. I'll say this about him - I have ALWAYS gotten cards from him when I abide by his wishes. If you're in the log it's a sure thing.

I've spent far more than $30 trying to get cards from various QSL managers. I've been waiting now for many months for at least one card from someone who is handling Montenegro cards, with none arriving yet.

So it depends on how badly you want to play the DXCC game. If a manager is going to set certain rules for getting a card from him and if it's not an exorbitant fee (F6FNU wanted $2 the last time I knew, and that isn't unreasonable for an envelope from EU) I doubt the ARRL is going to take any action.

I sent a little extra $ for my 7O1YGF card because I really wanted it and hoping maybe the ops would get a small portion of it to defray their expedition costs. Some DXpeditions are not cheap!

On Fri, Sep 4, 2009 at 12:46 PM, Alan Leith <aleith@... .ca> wrote:

I'm not sure I want to start a thread on this, John, but since I'm in a QSLing phase, I want to comment on something that has bothered me for some time.

When I first got into hamming, back in the late 50s, a QSL was sent to the station worked as a matter of courtesy. In my case, I got into using an SAE and an IRC (they were pretty cheap in those days and the ones they had for British Commonwealth countries were even cheaper) for rarer stations sometime in the early 60s. I also used the bureau and often waited years for responses.

I didn't really twig to using US postage on my SAEs to the States for some time, I think. And back then, most QSL managers were in the States with a few in other countries. So, IRCs were very common.

Then some folks started including green stamps in their envelopes and today it is not uncommon for QSL managers to expect a "donation" with their requests from fellow hams. It has gotten so that one European ham, who handles a lot of stations, DEMANDS US$2 for each request, with only one card in an envelope for each of the stations. For the cards I need from this one manager it would cost me over US$30 for the cards, the required payment for the cards and the postage to mail them. And this guy doesn't use LoTW. Not gonna happen!!! And, he's not the only such manager.

Quite honestly, I simply can't afford to collect QSLs from these bandits who show up at hamfests all over the world on other people's "donations" to their pockets.

IRCs in Canada are priced out of reach for me. I purchase them from managers who aren't out to make a killing on them (there are a few) or I use ones that come to me. I believe that an IRC can be cashed in the USA for about $1.30 -- perhaps I'm wrong --- and I certainly won't buy them from guys who advertised them for more than $1.50. And no matter what they say, no manager needs more than one IRC to send a reply.

Quite honestly, I would dearly love to see the ARRL take action against these gonifs. I would like to see the ARRL disallow QSLs for credit from managers who take advantage of the system. I know they can't demand LoTW uploads for their awards but I also feel they shouldn't' allow QSLing to become prohibitively expensive, as it now is in many cases. I'm preparing to upload my logs to LoTW but there are still some QSLs I would like to

have for my collection. And because RSGB doesn't recognize LoTW, I "need" cards for that award.

Certainly, an SAE and return postage of some sort is acceptable, with an added donation if you're financially capable of sending one. Beyond that, it is highway robbery.

No, Dick, not a wise investment!!!

What I was asking was: how much would the USPS allow for an across the counter exchange of one current IRC for postage to Europe or Asia? Buzz answered the question -- 98-cents.

I'm going to labour over the Labour Day weekend on a proposal to ARRL (as a non-member in a foreign country) to do just what you suggest. I figure, based on my days as a QSL manager, that if you're going to be a manager you have to answer via the bureau.

BTW, I still have a couple of hundred of the old CN22 (or CN01) style IRCs. Perhaps you'd like those for 50-cents each, payable in singles or $2.00 bills (which I love). As you know, we don't have one and two-dollar bills in Canada any more.

Ah yes, Richard! But, for those of us who don't mail letters to Europe and Asia from the USA, just how much does it cost and hence, how much can you get for one IRC, for postage. Sorry, I'm but a dumb Canuck.

You can exchange IRC's at the Post Office for one unit of postage
to anywhere in the world. That means one Airmail Stamp.

Now the guys selling IRC's today most likely have the ones that expire
the end of this year. That means you have to mail it to the DX station
and he has to exchange it for postage by then, or else it's just fancy
paper.
I don't see many new IRC's being sold yet. It may take several months
before a manager accumulates enough to sell.

It's not like the "olde dayes" ...

From: RICHARD SOLOMON
Topic: 10687 Message: 10712

We only have 2 Airmail Rates, one to Canada & Mexico and the other

for the rest of the guys.

As for old IRC's, there are Stamp Collectors who specialize in collecting

IRC's. Some of the really old ones can be quite valuable. I think they are

listed in Scott's Specialized US Catalog.

Many years ago, when the "Terrible T's" were becoming active in Africa,

there was a QSL Manager in 9-Land who we called "Dollar Bill". He would

hint (strongly) that an additional GS was required to get the card.

No, Dick, not a wise investment!!!

What I was asking was: how much would the USPS allow for an across the counter exchange of one current IRC for postage to Europe or Asia? Buzz answered the question -- 98-cents.

I'm going to labour over the Labour Day weekend on a proposal to ARRL (as a non-member in a foreign country) to do just what you suggest. I figure, based on my days as a QSL manager, that if you're going to be a manager you have to answer via the bureau.

BTW, I still have a couple of hundred of the old CN22 (or CN01) style IRCs. Perhaps you'd like those for 50-cents each, payable in singles or $2.00 bills (which I love). As you know, we don't have one and two-dollar bills in Canada any more.

From: Alan Leith
Topic: 10687 Message: 10713

I have some reasonably old IRCs and perhaps I'll look in to unloading them -- maybe on eBay.

Dick, W0MLY gave me a good number of the former French colonies when they became independent back in the 60s. As I recall, I sent all of my QSLs in one envelope with an SAE and a $5.00 bill
and got them all back at once. I don't remember any other operations such as the one you mentioned.

Have a good weekend.

IIA. Geophysical Activity Summary 04/2100Z to 05/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on days one and two (06-07 September). Quiet to
unsettled levels, with isolated active periods at high latitudes,
are expected on day three (08 September), as a coronal hole
high-speed stream is expected to rotate into a geoeffective
position.
III. Event Probabilities 06 Sep-08 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux

good luck

send me some luck to work a VO2 or zone 2 in canada for my last WAZ
conditions have sucked for the last year

vo2ff
vo2ns

both both the guys up there this weekend and no 10m band

life is cruel

Gee, Mike, I'll do my best. I know that VO2FF and NS are sometimes on 20 CW (I can hear the pile-up) but those guys are generally pretty rare. The only kind of luck I have is bad luck so I don't know if you really want to rely on me :-(.

10719. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-06 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10719

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 06 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 249 Issued at 2200Z on 06 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 05/2100Z
to 06/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 05/2100Z to 06/2100Z:
The geomagnetic field was predominantly quiet. A single period of
unsettled levels was observed at mid-latitudes between 06/03-06Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be predominantly quiet on day one (07 September). Quiet
to unsettled levels, with isolated active periods possible at high
latitudes, are expected on days two and three (08-09 September). The
increase in activity is due to a recurrent coronal hole high-speed
stream that is expected to become geoeffective.
III. Event Probabilities 07 Sep-09 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF green
IV. Penticton 10.7 cm Flux
Observed 06 Sep 069
Predicted 07 Sep-09 Sep 068/068/068
90 Day Mean 06 Sep 067
V. Geomagnetic A Indices
Observed Afr/Ap 05 Sep 002/002
Estimated Afr/Ap 06 Sep 005/005
Predicted Afr/Ap 07 Sep-09 Sep 005/005-007/008-010/010
VI. Geomagnetic Activity Probabilities 07 Sep-09 Sep
A. Middle Latitudes
Active 05/20/25
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10720. Ohio/Penn DX Bulletin #924

The Ohio/Penn DX PacketCluster
DX Bulletin No. 924
BID: $OPDX.924
September 7, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, N3SL, NG3K, N4AA & QRZ DX, W4VQ, KH6BZF, KM6HB, K8YSE, KG8DP, A35RK, CX3AN, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G0IAS, GW4SKA, HA0HW, I1JQJ/IK1ADH & 425 DX News, LA5HE, PA7DA, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and ZL2TZE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-August, through Sunday, 6th-September there were 203 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, SU, SV, SV/a, SV5, SV9, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V5, V8, VE, VK, VK9N, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5B/C4, CYPRUS. Andy, LZ2HM, will be active as 5B/LZ2HM between September 10-15th. Activity will be on the HF bands plus 6 and 2 meters (KM64HV). Also, he will be active as C4I (on SSB) in the Worked All Europe DX Contest (WAEDC), September 12-13th. QSL via LZ2HM, using info on QRZ.com.

5B, CYPRUS. Nick, G3RWF, will be active once again from the Island of Cyprus (AS-004, MIA MCI-002, WLOTA L0051) as 5B/G3RWF between September

8-22nd. Activity will be on all bands and modes. QSL via his home callsign, direct or by the Bureau.

7Q, MALAWI. QSL Manager Allan, G0IAS, informs OPDX that Harry, 7Q7HB (G0JMU), is again in Malawi for a period of up to 3 months. He is going to be active MAINLY on the Digital modes and CW. QSL as usual is ONLY DIRECT to G0IAS with sufficient funds for return cards. NO BUREAU cards. NO eQSLs. Just old fashioned paper cards DIRECT!

A3, TONGA (News). Paul Kidd, A35RK, reports that the first special non-resident "contest" callsign, A31A, was just issued to a group of European operators who will be in Tonga in November, he presumes for the CQWW DX CW Contest. Also, Paul was granted the first "resident" special callsign, A35A, which he will only use for contests and special events. A35RK is still his "regular" callsign. Paul provides the following special announcement by the Department of Communications (dated September 2nd):
The Radio Licensing Officer for the Kingdom of Tonga, Fe'ao Vakata, has today approved the following changes in licensing procedures:

1) Callsigns issued to citizens and long-term residents of Tonga will be in the A35xx format.
2) A Tongan citizen or long-term resident can, upon request, be issued a "special" callsign for use in contests and special events. This "special" callsign will be in the A35x format.
3) Visiting operators will be issued an A31xx format callsign upon presentation of a valid license from their home country and payment of license fee.
4) Visiting groups of operators, for contest and special event purposes only, may request a special callsign in the A31x format.
Note that, hereafter, all visitors will be issued callsigns from the newly authorized A31 prefix block. The A35 prefix block is reserved for residents only.

Further information and license applications may be obtained from:
Fe'ao Vakata, Licensing Officer
Ministry of Communications and Information
P.O. Box 1380
Nuku'alofa, Tonga
ph: (676) 28-170
email: fvakata@...
fax: (676) 24-861

AN8, CANARY ISLANDS. Operators Luis/EA8AY, Jeronimo/EA8NC and Jose/EA8CCD will use the special callsign AN8R during the CQWW DX CW Contest (November 28-29th) as a Multi-? entry. QSL via EA8AY. Visit the special AN8R Web page at: http://www.ea8ay.com/an8r_team/index.html

B7, CHINA. Look for B7P to be active in this year's CQWW DX Contest by the following group of operators:
CQWW DX SSB Contest (October 24-25th)- Operators Terry/BA7NQ, JinQuan/BA7JC, Paul/BA7JS, Guo/BA7IN, Yang/BD7IXG, Wu/BA7IA, Hu/BD7KSF and Lv/BD7MFB. Possibly as a Multi-Multi or

Multi-Single entry.
CQWW DX CW Contest (November 28-29th) - Operators Terry/BA7NQ, JinQuan/
BA7JC, Paul/BA7JS, Guo/BA7IN, Yang/BD7IXG, Wu/BA7IA and Esa/
OH7WV. Multi-Multi entry.
Activity by both groups will be on 160-10 meters. QSL both operations
via BD7IXG.

CT8, AZORES. Frank, DK5FT, will be active as CT8/DK5FT from the Island of
Sao Miguel (EU-003, DIP AZ-002, WLOTA L2016), September 10-22nd. Activity
will be on all bands and modes, propagation permitting. QSL via his home
callsign, bureau is preferred.

CT8, AZORES. Chris, DL2MDU, will be active as CT8/DL2MDU from the Island
of Sao Miguel (EU-003, DIP AZ-002, WLOTA L-2016), September 13-26th.
Activity will be on all HF bands. QSL via his home callsign, by the
bureau (preferred) and LoTW.

DX MAGAZINE'S MOST WANTED SURVEY. It is that time again to participate
in DX Magazine's annual "Most Wanted Survey". The 2009 survey is now being
taken through October 15th. Carl, N4AA, editor of "QRZ DX" and "The DX
Magazine" <http://www.dxpub.com/> reports that the survey forms are
available at: http://www.dxpub.com/dx_survey2009.html
PLEASE NOTE: Carl states, "THIS IS NOT - REPEAT NOT - A COMPLETE LIST OF
ALL DXCC COUNTRIES. However, if you need something that is not on the
list, you may add it at the bottom of the survey form in the COMMENTS
box. Please pass the word to your DXer friends that the survey is up and
running and will be there until OCTOBER 15th."

EE2, SPAIN. Members of the Ondarroa Group will be active as EE2W from
Ondarroa City (WW Loc. IN83SH, DME: 48073, Province of Biscay) during
the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL
via EB2BXL.

ET3, ETHIOPIA. Jim, WU0I, currently in Addis Ababa as a U.S. Foreign
Service Officer, expects to be on the air by October as ET3JD after
certain formalities are taken care for the importation of his amateur
radio equipment. He expects to have his gear and the permission to
use it completed within 2 weeks. Activity will be mainly 40/20/15
meters, but he would also like to spend more time on the WARC bands ☐
particularly 30 and 17 meters. Modes will be CW, SSB, PSK31 and possibly
RTTY (for contests mostly). Jim mentions, "My CW is pretty rusty, so
please be patient with me!" QSL only direct to: Jim DeLoach, ET3JD,
2030 Addis Ababa Place, Dulles VA 20189-2030, USA. For more details
and updates, visit: http://www.deloach.net/ET3JD.html

FS, ST. MARTIN. Gregg, W6IZT, will be active as FS/W6IZT from St. Martin
Island (IOTA NA-105, DIFO FS-001, WLOTA L-0383, Grid FK88) between now
and September 13th. Activity will be on 40-6 meters using CW, SSB and
RTTY. QSL via N7XG, direct or by the bureau or LoTW.

FS, ST. MARTIN. Dennis, KT8X, will once again be active as FS/KT8X from
March 5-12th. This will be a holiday style operation with an emphasis on

the 30/17/12 meter bands using CW, SSB and RTTY. However, he does plan to enter the ARRL DX SSB Contest as a Single-Op entry. QSL route will be the "Logbook of The World" (LoTW).

FT/G, GLORIOSO ISLAND (Update). As the FR5GA team departs from Reunion Island on September 11th this week to head to Glorioso Island, many DXers world-wide will be crossing their fingers hoping that this operation will take place and not be postponed again.

IOTA NEWS.....
EU-011. Operators Dave/G4IAR and XYL Judith/G4IAQ will be active as G4LAB/p from the Isles of Scilly between October 9-19th. Activity will be on the HF bands, on or near the usual IOTA frequencies. QSL via G4IAR, direct only (QRZ.com address).

EU-014. Nicolas, F5TGR, will once again be active as TK/F5TGR from Porto Vecchio, Island of Corsica (DIFM TK-001, MIA MCO-001, WLOTA L-1390), between September 6-18th. Activity will be on 40-10 meters using CW and SSB. He will also try to be active from an island in the EU-100 group. QSL 100% via the French REF bureau.

EU-025. Angelo, IW9HLM, will once again be active as IR9X from S. Agata Li Battiati Catania, Sicily Island (IIA SC-001, MIA MI-107, WLOTA L-1362, WW Loc. JM77MN) during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL direct to IW9HLM, or LoTW.

EU-094. Members of the Granville ARC (F5KAQ) will be active from Saint Nicolas Island (DIFM AT-010, WW Loc. IN77XR), in the Glenans archipelago (in French Britanny and Province Britanny [DPF 06]), September 11-18th. They will be using the callsign F5KAQ/p and homecall/p. Activity will be on HF bands, as well as 6 and 2 meters, possibly as high as 10 GHz, using CW, RTTY, PSK and SSB. Operators mentioned are: Benoit/F8PDR, Jean-Jacques/F5NKX, Denis/F5RJM, Rolf/F9ZG, Alain/F5HVI, Rene/F6CMC and Alain/F6ACH. QSL via F5RJM, direct to CBA w/SAE (1 IRC or 1 USD for Europe, and 1 IRC or 2 USDs elsewhere) or by the French Ref-Union Bureau. This is the same group that activated Tombelaine (2007) and Brehat (2008).

EU-109. Jon, M0OVL, will be active as homecall/p from the Island of Inner Farne, September 25-26th. However, this will be a short 4 hours operation (each day) between 1000-1400z. This activation will be dependent on the weather conditions. Visit his Web site at: http://www.m0ovl.co.uk

EU-125. Rene, DL2JRM, will be active as OZ/DL2JRM/p from Romo Island (DIA NS-001), September 18-20th. Activity will be on 40-10 meters, mainly CW. QSL via his home callsign, direct or by the bureau.

NA-044. Juergen, NF6J, will be active as VO2/NF6J from Battle Island (CISA NF-049) between now and September 11th. Activity will be on 30/20/15 meters, CW only. QSL via DL7RV, direct or by the bureau.

NA-062. Mark, KG8DP, will once again activate Grassey Key between November 2-9th. Operations will be stationary at Grassey Key and mobile has he travels to Key West and all points on the ocean. He will use the callsign KG8DP, as well as his club callsign NA8KD. This will be a week trip. QSL both KG8DP/NA8KD via info on QRZ.com (w/SASE). Mark will be using an IC-7000, 1.2 kw amp mobile and GLA-1000B portable amp. Antennas were not mentioned.

NA-230. (Rare IOTA) As this bulletin was being written, Cezar, VE3LYC, was active as VY0O from Gilmour Island in the Ottawa Islands group in Hudson Bay (Nunavut Territory). Activity was mainly on 20 meters SSB. The length of his stay will be very short (maybe one or two days left or it possibly may be over by the time you read this).

J6, ST. LUCIA. Bill, WB5ZAM, will once again be active here as J68WI between September 28th and October 11th. He states, "Will have access to G5RV 160m antenna, so maybe I will be on there once it is up at J69MV's QTH. Modes SSB and CW." QSL via WB5ZAM.

JD1, MINAMI-TORISHIMA. Masa, JA6GXK, continues to be active as JD1BMM from Marcus Island (IOTA OC-073, JIIA OC-073-001) until September 28th. Activity is on all bands and modes. Over the past week he was very active on 30/20/17 meters using RTTY and PSK, with some 20 meters SSB. QSL by the bureau or direct (QRZ.com address).

JW, SVALBARD. Just a reminder that Ingrid/LA8FOA, Unni/LA6RHA and some YL members of the Scandinavian YL Radio Amateurs (SYLRA)(and possibly their OM) plan to activate the Longyearbyen radio station this week from Svalbard between September 6-13th. They have already received the callsign JW1SYL for the operation. For more details and updates, please visit the following Web pages at:
http://home.online.no/~la6rha/expedition_to_svalbard.htm
http://www.sylra.is/index2.html

JW, SVALBARD. Operators Just/LA9DL, Erling/LA6VM and Halvard/LA7XK will once again be active from Longyearbyen on Svalbard during the SSB part of the "2009 Scandinavian Activity Contest" (SAC) (September 26-27th). They will operate during the contest with the callsign JW5X. QSL is via LA5X, direct or via the LA bureau. Before and after the contest they will be active with their respective JW callsigns (JW9DL, JW7XK and JW6VM) on all bands and modes. QSL for these contacts are via their home callsigns, direct or by the Bureau. Look for JW7XK to be mainly on BPSK31 and RTTY, while JW9DL and JW6VM will work SSB and CW.

KH6BZF PROPAGATION FORECAST/REPORT (For September 7-13th)....
Sep 7 AN SOLAR REFERENCE

Sep 8 AN ---------------
Sep 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 11 AN LN - Low Normal
Sep 12 AN
Sep 13 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
SPECIAL ADDED NOTES: Does not look too good from what Lee provides.
Lee states there were "NO" sunspots during the month of August 2009.
As this was being written, we are approaching 60 days in row without
any sunspots since July 10th. Lee states, "This is not a typical cycle
start up graphing the last four solar cycles. It has been reported
that this is only the 4th time the sun has been blank for at least 50
days since 1849. The 3rd longest streak on the list is 54 days between
February-April 1879. The record is 92 days in 1913. For more details
on the solar cycle and sunspots, visit the following Web sites at:
http://www.solarcycle24.com
http://users.telenet.be/j.janssens/Spotless/Spotless.html
On band conditions, Lee states that the low bands (160, 80/75 and 40
meters) continue to be very active on the North American continent.
It appears that 6 meter activity has closed down right after our last
meteor shower (Typical!!!).

NEW OFFICERS FOR 2009-2010.....
* The following people will represent the Central Texas DX and Contest
Club (CTDXCC) in the coming year:
President - Susan King, K5DU
Vice-President - Bob Farmer, W9BF
Secretary - Jim George, N3BB
Treasurer - Craig Markley, AD5YJ
DX Coordinator - Gerry Moravec, WD5AAM
Contest Coordinator - Jim Parnell, W5JAW
Web-Master - Ken Harker, WM5R
Visit the CTDXCC Web page at: http://www.ctdxcc.org

* The newly-formed Arizona Outlaws Contest Club announces its lineup of
officers for 2009-2010:
President - Bob Epstein, K8IA
North Region VP - Dick Zalewski, W7ZR
Central Region VP - Mike Fulcher, KC7V
South Region VP - Dave Gilbert, AB7E
Secretary/Treasurer/Webmistress - Sandy Farley, N7RQ
Public Relations/Awards - John Arthurs, K7WP

OD5, LEBANON. Look for special event station OD5F to be on the air from
September 27th to October 6th. Station's location is in the ☐Village
Francophone☐, Lebanese University in Hadath. Activity is to celebrate

the Francophone games which is held every 4 years. Some 3,000+ athletes, youths and artists from 56 French speaking countries will participate in these games. The event is a popular sports and art festival. For more details, see: http://www.libanvision.com/jeux-liban.htm
A special QSL card will be available. More info is forthcoming.

PA09, THE NETHERLANDS (Special Event/LH Activity). Jaap, PA7DA, informs OPDX that during the "Open Monumentendag, European Heritage Days" in The Netherlands, on September 12th, the Noordwijk Lighthouse (NET-019) will be open to the public. Special event station PA09MONUMENT will be active on HF and 2 meters. QSL via the Dutch QSL Bureau (DQB) to PA7DA.

PACIFIC TOUR. Rick, AI5P, will once again head to the Pacific this coming October to activate three different islands. His tentative schedule between October 1-31st is as follows:
FK - Grande Terre, New Caledonia (OC-032, DIFO FK-001, WLOTA L-1280) between October 1-8th; his callsign FK/AI5P.
YJ - New Hebrides, Vanuatu (OC-035) between October 10-18th; his callsign YJ0PX.
VK9N - Norfolk Island (OC-005, WLOTA L-1469) between October 22-31st; his callsign AI5P/VK9N.
Activity from all locations will be mostly CW on all HF bands. QSL via his home callsign, direct or by the Bureau.

PJ4, NETHERLANDS ANTILLES. Operators Tom/ZP5AZL, Dale/N3BNA, Jorge/CX6VM, Noah/K2NG, Peter/PJ4NX, Anibal/ZP5VAY and possibly others will be active from Bonaire (SA-006) as PJ4K during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via ZP5AZL. Operators will be there between October 20-26th and will be active before and after the contest as PJ4/homecall. QSL via operator's instructions.

QSL INFO AND NEWS.....
FT5YI QSL STATUS. Nicolas, F4EGX, has received his QSL cards for his FT5YI activity (between November-December 2008) and will soon be sending them in the mail.

IRCS AVAILABLE.....
Steve, N3SL, reports: "Obviously you all know the current version IRCs expire 12/31/09. Handling ZK2V's recent trip, I now have over 200 of these 'short term' IRCs. If you can find the space, I'd appreciate the ad that I'll sell these at 1.25 USDs each - postage free for 1-19, 1 USD for any quantity over that." His E-mail address is: N3SL@...

John, K1XN, from The GoList, reports that he has only 25 IRCs left. They are all stamped and expire on 12/31/2009. First E-mail gets them at 1.00 USD each plus 75 cents shipping. If you are interested, E-mail him at: golist@...

NOT THE QSL MANAGER. Jean-Michel, F6AJA, reports that he is NOT the QSL Manager for the latest activity of 4J0FR in August (correct route is QSL via F6FYD; the operator). Jean-Michel states, "I have only the

logs/QSLs for the August 1995 and December 1997-January 1998 operations."
The logs are on the web at: http://www.lesnouvellesdx.fr/voirlogs.php

PIRATE ALERT. Phillip, ZL2TZE, reports that ZL callsigns from old operations are being targeted by pirates. The callsign ZL9C was heard on 40 meters August 26th. Phillip states, "If those who think a ZL call is a pirated one please check with the following link and input the callsign and a result will be had in seconds." The Web page is: http://www.nzart.org.nz/call-book/index.html
If you enter a callsign in the "Green Window" (such as ZL9C), you will get the following: Searching SMART for ZL9C
0
Callsign|Name|Address
Results are produced directly from the RSM SMART database.
Data is protected by New Zealand Crown copyright.

QSLS VIA LOTW: 7P8DA, C6APR, CN3A, DV1JM, EA1AKS, EA3GLB, HI8PLE, J5UAP, KH2L, VK9GMW and OE1A

QSLS RECEIVED VIA MAIL: 3D2AG/P, 4J15TX, 7Q7SI, CG200I, EU5ROPE, HK5MQZ/0M, HU1M, JW/OK1JK, V51AS, VC8B, VE3DZ/VP9, VK9GMW, WX3B/p, YL2BJ and Z21SI

QSLS RECEIVED VIA THE BUREAU: 1A0KM, 3XM6JR, 5R8IC, 5T5DC, 6W/RW3TN, A5100A, H44V, JW8DW, KH0PR, P29NI, SV0XBM/9, TC53A, TN6X, UK8AJ, V51AS, V60IL, V8FWU, VP8DLS, XV3M, Z29KM and ZL7/KH0PR

S7, SEYCHELLES. Mauro, HB9ENI, will be active as S79MI from Praslin Island (AF-024), October 21-26th. Activity will be on the HF bands and 6 meters using SSB and RTTY. He also plans to be on the CQWW DX SSB Contest (October 24-25th). QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW.

SPECIAL EVENT. Look for special event callsign GB50ATG to be active on the air until the end of June 2010. Activity is to celebrate the Golden Jubilee of the "British Amateur Radio Teledata Group (BARTG). Several BARTG members will be sharing the special callsign and will be operating from various locations. During the month of September, the callsign will be used by John, GW4SKA, from his usual address in Wales. This will include operations in the CQWW Contest. So, if you work GB50ATG in a contest "this month", it should count as a GW multiplier. Also, check the BARTG Web site for details on their "Golden Jubilee Award", special QSL cards and wall plaques at: http://www.bartg.org.uk

SPECIAL EVENT. Mark, KM6HB, will again (every year since 2005) operate special event station K6P in remembrance of "POW-MIA Recognition Day", September 18-20th (0000-2359z). Suggested operating frequencies are: SSB - 21350, 18150, 14253, 7250 kHz, and PSK-31 and RTTY on the appro-priated frequencies. Receive a folded pictured QSL card via KM6HB: Mark McMullen, P.O.Box 27271, Santa Ana, California 92799 (S.A.S.E please).

ST, SUDAN. Robert's, S53R, next work assignment (for UN WFP) has taken him here. He arrived in the Sudan early last week and expects to be on the air by the end of the month or early October. His possible callsign will be ST2X. He states, that his radio and amp are still in S5-land, but are expected to be shipped. More details are forthcoming.

SV5, DODECANESE. By the time you read this, Mort, G2JL, should be active as SV5/G2JL from Lipsi Island (IOTA EU-001, GIOTA DKS-056, MIA MGD-017, WLOTA L-0766) for the next three months. Activity will be on all bands and modes, propagation permitting. QSL via his home callsign, direct or by the Bureau.

TK, CORSICA (EU-014). Heinz, DF6ZY, will once again be active as TK/DF6ZY from the main island between September 16th and October 3rd. Activity will be on 80-10 meters, mostly on RTTY, but he will switch to SSB or SSTV on request. QSLs via home callsign, by the DARC Bureau or direct.

TK, CORSICA. Rene, DL2JRM, will be active as TK/DL2JRM/p from the Island of San Cipriano (IOTA EU-164, DIFM TK-037, MIA MCO-013), September 14-15th. Activity will be on 40-10 meters QRP CW, using solar power. QSL direct or by the Bureau to DL2JRM.

V2, ANTIGUA. Tom, K7ZZ, will be active as V25Z from Yepton Estate Cottages (IOTA NA-100, WLOTA L-1118, WW Loc. FK97CC), which is located on the north shore of the island, between October 19-28th. Activity will be on all bands and modes. QSL via K7ZZ, direct only.

VP8, FALKLAND ISLANDS. Members of the Uruguay DX Group's globetrotters are working on plans for this year's DXpedition. The group plans to activate the Falkland Islands for one week between November 14-21st. Their activity will focus on the lower bands, Digital modes and the 30/17/12 meter bands. Announced calls are: VP8BUH for SSB and VP8BUG for the Digitals modes. Operators mentioned include: Gus/CX2AM, Gus/CX3CE, Bert/CX3AN, Mario/CX4CR and Luis/CX4AAJ. Probably QSL Manager is EB7AEY. More details are forthcoming.

XR0, EASTER ISLAND (Update/Callsign Change). An international team of operators will be active as XR0Y (not XR0YA as first announced) from Rapa Nui between October 31st and November 15th. According to the newest licensing statement released by the Chilean Ministry of Telecommunication (aka Subtel), after arrangements by Radio Club de Chile, the group was delighted to announce that they received permission to use the new shorter, special callsign assigned to DXpeditions from Easter Island. Since this callsign has been in use 2 times in the past (1995, 2000), organizers of this expedition will pay much attention to inform numerous DX bulletins and QSL info databases about the new callsign and their QSL route for the upcoming activity in 2009. All details regarding their QSL Manager will be announced soon. For more details on this DXpedition, see OPDX.920 or visit their Web page at: http://rapanui2009.org

YJ, VANUATU. The Croatian team of Ante/9A4DU and Nikola/9A6DX are planning to be active as YJ0DU and YJ0DX, respectively, a little after the first of the New Year. The duo hopes to activate not one, but several of the islands

within Vanuatu. Their equipment will be a FT-857 with wire antennas.

YN, NICARAGUA (Update). Eric, K9GY, will be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW DX CW Contest (September 28-29th) as a Single-Op/All-Band/Low-Power entry. He will be there between November 25-30th. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

ZS10, SOUTH AFRICA (Special Event). Look for special event station ZS10WCS to be active between September 2009 and July 12th, 2010. Activity is to celebrate the hosting of the "2010 FIFA World Cup South Africa", world football event <http://www.fifa.com/worldcup/index.html>, where 200 teams will compete. Expect every day activity between June 1st and July 12th, but only weekend operations during the months leading up to the event. QSL via the SARL'S (South African Radio League) Bureau or direct to: SARL, P.O. Box 1721, Strubensvallei 1735, South Africa.

10722. Ohio/Penn DX Special Bulletin #924.1

Yahoo group: DX-IS (2009)
Date: 2009-09-07 14:08:36 UTC
From: Tedd Mirgliotta (KB8NW)
Topic: 10722 Message: 10722

SB DX @ WW < KB8NW $OPDX.924.1
Ohio/Penn DX Special Bulletin No. 924.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 924.1
BID: $OPDX.924.1
September 7, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network F5NQL & UFT and F5OGL following DX information.

FT/G, GLORIOSO ISLAND (Update). Didier, F5OGL, Glorioso 2009 team leader, sent out a press release (dated September 7th - edited by OPDX) stating that the FT5GA team (which includes Didier/F5OGL, Yves/F5PRU and Franco/F4EVR) picked up 291 kg of gear (transceivers, PAs, power supplies, antennas, masts and miscellaneous stuff). It was delivered to Mr. Alain Lefellec, the export freight manager of the "Logfret Inc." (international freight service), located at "Roissy Charles de Gaulle Airport". The team thanks him for his kind reception and his help to make this expedition a success. Two pallets of equipment will fly tomorrow to the Reunion Island, where they will be transported by the freight service to the Air Force Base 181. The team now has in their hands the authorization to transmit on the Radio Amateur Service bands, from Grande Glorieuse. The document of authorization can be viewed at the bottom of the "Glorieuses 2009" Web page at: http://glorieuses2008.free.fr/index-e.htm

CORRECTION DEPARTMENT. The were two small errors in OPDX.924 under "FT/G, GLORIOSO ISLAND (Update)". The original line states, "As the FR5GA team departs from Reunion Island on September 11th this week to head to Glorioso Island,", it should have stated "As the FT5GA team departs from Paris, France, on September 11th this week to head to Glorioso Island".

Paul, hoping you are following the sun more closely than I am.

Have the magnetic poles of the sun flipped yet? [An indicator of the solar sun spot cycle going to minimum]

Or, are we approaching a sun spot maximum in 2011-2012 where we will see 070/070/070 instead of 100+ numbers :-)

Hi Dave,

That message is auto-generated and sent to the list so I don't study it every day. It is always huge same anyhow! The key line is "Predicted 08 Sep-10 Sep 068/068/068", which has remained virtually unchanged for over a year. Signal noise and the distance between Earth and the sun have caused it to plunge to 66 or skyrocket to 70, but for the most part, the sun is dead.

As to your question, I don't really know if the pole reversal has occurred. Cycle 23 and cycle 24 sunspots are differentiated by their magnetic polarity (and their position on the sun, with those from a new cycle being higher in solar latitude than the declining cycle.) Most of the "spots" observed in the mast year or two are cycle 24, so I guess that indicates some sort of reversal is in progress or has occurred. By the way, the last I read, they moved the predicted cycle peak to 2013 or 2014.

There is a huge controversy as to whether or not many of these cycle 24 spots should even be counted. We have the technology today to see tiny specks that would never have been seen a century ago, and some of the scientists argue they wouldn't even have been detected 20 years ago. Most are short lived, as well. Everything points to a the sun entering a quiescent phase that we have not seen before. We are in uncharted waters and no one knows what is happening.

Most days I read the message boards on the following web site:

http://www.solarcycle24.com/

That is where the "experts" hash out all this stuff. It makes interesting reading, but is of little help in understanding what is going on, or when things might improve. I have a curious mind, having worked with research scientists all my life. However, I claim to be no expert in solar physics! As Hugh Cassidy put it many years

ago, "I just report'em as I get'em."

Oh, here's another "optimistic" article from NASA:

http://science.nasa.gov/headlines/y2009/03sep_sunspots.htm

Sigh . . . did you notice that with the exception of Midway in October few, if any, DXpeditions are being planned? It seems DXing and Ham radio in general may have been a hobby of the 20th century. I sure hope that is not the case. Let's hope things are rocking and rolling in a year . . . although I said the same thing last September.

73, Paul VE1DX

10726. Interesting observations, thoughts appreciate

From: Mark Lunday
Topic: 10726 Message: 10726

Just worked VK4DHF on 20 CW, 2132 UTC. He was 400 watts into a LPDA, I had 5 watts into an off-center-fed dipole at 32 feet. He was booming in at S8 into central North Carolina with his CQ, but nobody else called him and I got him on the first call.

OBSERVATIONS:

. Noone else called him after I was done with the QSO

. At the time of the QSO, he and I were perpendicular to our gray-line areas. We were both about 1500 miles from ours; me late in the day, him early

. The signal was fairly steady for the duration of the QSO

ASSUMPTIONS:

. Higher angle of arrival (above 15 degrees) for him to be that strong on this antenna

THEORIES:

. Noone else called him, so it was a point-to-point phenomenon unique to my QTH

. Skewed path along the gray line. I have not observed this phenomenon before for VK from this QTH, and certainly would not have expected it with the low dipole

Mark Lunday

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 251 Issued at 2200Z on 08 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 07/2100Z
to 08/2100Z: Solar activity was very low. A weak B-level event was
seen in GOES x-rays at approximately 1701Z, which was associated
with a brightening of plage region 1025(N17W73). The solar disk was
otherwise void of activity and continues to be spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low for the next three days (9-11 September).
IIA. Geophysical Activity Summary 07/2100Z to 08/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet to unsettled for day one (9 September), due to
a recurrent coronal high speed stream. On day two and day three
(10-11 September), the geomagnetic field is expected to return to
quiet levels.
III. Event Probabilities 09 Sep-11 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 08 Sep 069
Predicted 09 Sep-11 Sep 069/069/069
90 Day Mean 08 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 07 Sep 003/003
Estimated Afr/Ap 08 Sep 003/008
Predicted Afr/Ap 09 Sep-11 Sep 007/010-005/008-005/005
VI. Geomagnetic Activity Probabilities 09 Sep-11 Sep
A. Middle Latitudes
Active 10/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

Got a RTTY QSL card from SV2ASP/A today for a QSO on 6
August. Was suspicious that it might have been Slim, but it
apparently was Apollo himself. His call has been pirated a few times
on teletype, so nice to finally work that one.

Well, John, it was a long time coming. He isn't that
active. This only after ~25 years of chasing him and working a few
pirates. I manage to work the real Mount Athos about once every 5
years . . . not very easy, that's for sure.

The "easy" one was when DJ6SI went there in the early 1990s, but
I was on a ship at sea and missed it.

Topic: 10732 Message: 10732

Interesting! I received three QSLs on Monday in SASEs I had supplied to managers in the USA. The total of the stamps on each envelope:

Envelope 1 -- 75-cents + 1 H rate stamp (not for use outside the USA)
Envelope 2 -- 76-cents
Envelope 3 -- 39-cents (I thought the 4-cent stamp was 40-cents!!!)

No wonder the USPS is in trouble.

Anyway, needless to say, I'm glad they all made it through. Some new band/mode countries and one new IOTA.

73

I think the USPS automatic sorting machines are only capable of
scanning for the presence of postage, not the amount of it. Oversize
stuff or anything else that attracts a pair of eyes can get caught,
but stuff within spec pretty much gets a free pass. There is just
too much of it.

Dick

PS: As I'm sure you know, the current US-to-Canada rate is 79-cents.

Hi Paul,

Thanks for that. Well the numbers might be down but you were a very readable 579 this morning on 40 CW long path at around 2300z.

Don't know why you couldn't hear me, but I guess it was getting a bit late, 2230z would have been better.

Anyway, great to hear your sigs, I am guessing it would have been over the south pole, though at this time of year it may have been north.

Dick:

I once asked my local TX postmaster about "postage due" mail and he said the USPS "depends" mainly on its local carriers to be alert to this. So it appears if your local carrier doesn't notice that postage is due then it doesn't get collected. Only time I've ever gotten a letter back for postage due is when I forgot to put a stamp on the letter.

I often get ads, solicitation letters, etc. with several cents postage due stamped on them and the carrier just leaves an envelope for payment in the mailbox out front.

What was really irritating was once I went in to mail a letter 'cause I didn't have a stamp so I gave it to the clerk for a "metered" stamp. The clerk was so sure of himself that it was more than 1 ounce he took it to three USPS windows and weighed it. Two of the three, including the one at his window, said exactly one ounce, while the third said 1.1 ounces, so he charged me for two ounces. I almost told him where he could send the letter, but held my calm.

You want to send one for free, address it to yourself and put
the other guy's address in the upper left corner and it will get
"returned" to him as postage due! :-)

I have never tried this, but some guy with too much spare time
on his hands suggested it a couple of years ago. Wonder if it would
work . . .

Hello Jorma,

Just want you to know that the QSL for our 1995 QSO on 80M CW arrived today
- Sept. 9, 2009.

Thank you very, very much because I now have ZB2 confirmed on all 8 bands
from 10-80M.

73 and see you in CQWW.

SB DX ARL ARLD036
ARLD036 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Andy, LZ2HM is QRV as 5B/LZ2HM until September 15. Activity is on the HF bands, including 6 and 2 meters. He will be active as C4I in the Worked All Europe SSB contest. QSL to home call.

MADAGASCAR, 5R. Daniel, DF8UO will be QRV as 5R8UO from September 12 to 20. Activity is on 40 to 10 meters using mainly CW. QSL to home call.

MALAWI, 7Q. Harry, G0JMU is QRV as 7Q7HB for about three months. He is active mainly using CW and digital modes. QSL direct via G0IAS.

TONGA, A3. Effective immediately, 60 meters is allowed on a secondary restricted basis using the same band plan and power limitations as authorized by the Federal Communications Commission for the US.

MADEIRA ISLANDS, CT3. Matthias, DJ8OG is QRV as CT9/home call until September 15. Activity is on 80 to 10 meters. He will be active as CR3L in the Worked All Europe SSB contest. QSL CR3L via DJ6QT and all others to home call.

GLORIOSO ISLANDS, FR/G. A group of operators will soon be QRV as FT5GA until early October from Grand Glorieuse Island, IOTA AF-011. Activity will be on 160 to 10 meters using CW, SSB, RTTY and PSK31 with four stations active simultaneously. QSL via operators' instructions.

SCOTLAND, GM. Look for G3IZD, G7MRL and G0HIK to be QRV as GM3IZD, GM7MRL and GM0HIK, respectively, from the Isle of Islay, IOTA EU-008, from September 12 to 18. QSL to home calls.

REPUBLIC OF KOREA, HL. Mike, KE7WRJ is QRV as HL9QST for about two months. He is active on 40 to 10 meters using CW and SSB. QSL to home call.

MINAMI-TORISHIMA, JD1. Masa, JA6GXK is QRV as JD1BMM from Marcus Island, IOTA OC-073, until September 28. Activity is on all bands and modes. QSL to home call.

NETHERLANDS, PA. Special event station PA09MONUMENT will be QRV on September 12 during the Open Monumentendag, European Heritage Days from the Noordwijk Lighthouse, ARLHS NET-019. Activity will be on HF and 2 meters. QSL via bureau. In addition, special event station PA2009YSL will be QRV from the IJssellinie complex on September 12 and 13. QSL via PF1JM.

BONAIRE, CURACAO, PJ2. Operators PE2MC and PG4M are QRV as PJ4/home calls from Bonaire, IOTA SA-006, until September 16. This includes being active as PJ4NX in the Worked All Europe SSB DX contest. QSL PJ4NX via PA3CNX and all others via home calls.

DODECANESE, SV5. Mort, G2JL is QRV as SV5/home call from Lipsi Island, IOTA EU-001, for the next three months. Activity is on all bands and modes, propagation permitting. QSL to home call.

WEST KIRIBATI, T30. Gerben, PG5M is QRV as T30GM and has been active on 17 meters around 0200z. QSL to home call.

CENTRAL KIRIBATI, T31. Craig, N3BQR is QRV as T31AA from Phoenix Island, IOTA OC-043, until September 25 while on a scientific mission. He is active mostly on 20 meters using SSB. QSL via operator's instructions.

CORSICA, TK. Nicolas, F5TGR is QRV as TK/home call from Porto Vecchio, IOTA EU-014, until September 18. Activity is on 40 to 10 meters using CW and SSB. He may also try to be active from IOTA EU-100. QSL to home call.

CAMEROON, TJ. Lionel, F5PSA is QRV as TJ3SL. Activity is on 20 to 10 meters using SSB in his spare time. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL September VHF QSO Party, Worked All Europe SSB DX Contest, North American CW Sprint, FISTS Get Your Feet Wet CW Weekend, NCCC Sprint, PODXS 070 Club Jay Hudak Memorial 80-Meter Sprint, Swiss HTC QRP CW Sprint, Arkansas QSO Party, Ohio State Parks on the Air, SOC Marathon CW Sprint and the SKCC Weekend CW Sprint will certainly keep contesters busy this weekend. Please see September QST, page 78, and the ARRL and WA7BNM contest web sites for details.

:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 10 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 253 Issued at 2200Z on 10 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 09/2100Z
to 10/2100Z: Solar activity was very low.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 09/2100Z to 10/2100Z:
The geomagnetic filed was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet for the next three days (11-13 September).
III. Event Probabilities 11 Sep-13 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 10 Sep 069
Predicted 11 Sep-13 Sep 069/068/068
90 Day Mean 10 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 09 Sep 002/001
Estimated Afr/Ap 10 Sep 002/005
Predicted Afr/Ap 11 Sep-13 Sep 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 11 Sep-13 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

10743. Feedback loops

Yahoo group: DX-IS (2009)

Topic: 10743 Message: 10743

Feedback loops

One of the Local QRPers came around the bend and made his way up the hill. This one was in a lot better shape that the last time we had seen him, presumably because he had taken out a membership in the local gym. There was a lot less puffing and a lot less sweat when he made it to the verandah and sat down.

"Well", he said, "I've been thinking." This was cause for immediate interest because when a QRPer starts thinking, often the unexpected arises. "The solar cycle is stuck. The flux is 68, and has been for a long time. It won't be rising in the foreseeable future. Sunspot Louie hasn't seen a thing in almost two months. The Palos Verdes Sundancers have given up!" We rather doubted this pessimistic prognostication was correct, but we nodded for him to continue. "You know, I've been using my trapped triband beam for a long time," he began, "and I am going to replace it with a monobander. I found a 4-element beam on the swap shop. The fellow wanted a lot for it, but it only had been in the air for 2 years. So I drove over to his QTH and snapped it up this morning before anyone else had a chance. It's all ready to go on my tower next weekend. I already have my tribander for sale. Some sucker will buy it!"

We were about to ask for more details, but before we could he continued as soon as he'd caught a breath. "I was reading the Internet, and digging through some old magazines, and I saw my trapped beam only has 5 dB gain on 20 metres, and this monobander has 8.2 dB. That's a heck of a lot of difference! Over 3 dB. That would make my signal jump out in the pileups, and it makes sense to be king of 20. I bet I'll get a dozen new ones over the winter with it. Who cares about 15 and 10? They are never open anymore! I even asked Red Eyed Louie when he'd heard any DX on 28 MHz, and he says he can't remember."

We thought about this for a bit, for this was not the first time DXers have discussed antennas and gain. "Seems like a lot of difference", we said slowly, "3 dB is hard to get. Are you sure you are not comparing dBi and dBd?" The QRPer looked at us with a glare and snapped, "What's the difference? dBs are dBs. The fellow told me it was a killer beam. Why wouldn't a 4 element monobander on a 26 foot boom have 8.2 dB gain?"

We tried logic. "All dBs are not equal. dBb is the gain referenced to a dipole and dBi is the gain referenced to an isotropic radiator. There is a difference of about 2.14. You can bet the monobander specs are expressed in dBi and your tribander is dBd. If

you correct the monobander to use the same units, then the gain is 6.1. So you really are just getting about 1 dB. That's only a 6th of an S-unit. You'll never notice the difference. Your tribander might have traps, but it has 7 elements on a 24 foot boom. No doubt 4 of them are active on 20, and the only difference is about 1 dBb of trap loss."

The QRPer was looking confused, and then said with a defiant look, "Stop taking away gain from my new antenna before I even get it up! It has to be better than that. The fellow who sold it to me said he got DX with the first call every time. He said to ignore gain figures and all those comparison charts. He says the real proof is with the on-air performance. Says you know you are going to bust the pileup as soon as you hear it. Why would he say that if it wasn't true?" He pointed his finger at us to emphasize the point. "And I think he's on the DXCC Honor Roll, too!"

We looked at the QRPer for a moment, and decided not to tell him there is no Santa. "Well, if he told you it is a one-call antenna, then probably you made a good move. He wouldn't tell you that if it wasn't so. When you get it in the air, let us know how it works. Make sure you have it ready for the fall so you can get the fellows on Midway the first day. Just be a Believer and it will bring you more DX than you ever got with your old antenna! Just with one call, too. You will think the Great Days of DXing have returned!"

He smiled broadly and walked down the hill, satisfied that he had a solid edge over all of the locals. An hour or two later one of the older and more crafty QRPers came by. "I sold my 20 metre beam today. Got a good price for it too. The guy who bought it thought I worked Honor Roll with it. Most of my DXCC credits came on 15 and 10 with my vertical during the last two cycle peaks. I think I have 201 on 20. Now I can order the kit for that 4-square I've wanted for 80 so I can add to my DXCC Challenge totals. I think I have 20 worked dry. I saw a cheap tribander listed on the swap shop this afternoon. That will work just as well, and give me 15 and 10 as a bonus for when the sunspots return. I phoned the fellow. and he said he'd have it down by the weekend." He looked at us smugly, expecting a reply.

We simply nodded and looked out over the bay. Sometimes it is best to say nothing. Especially when the flux is stuck and circular deals are being made to ensure one's perch on the DXCC is maintained. More properly put, if it isn't broke, let them fix it anyhow! We recalled the advice of the Old Timer who told us years ago that it is best not to disturb a balanced feedback loop. DX IS!

10744. Who else uses IRCs?

Yahoo group: DX-IS (2009)
Date: 2009-09-11 13:21:44 UTC
From: Paul M Dunphy
Topic: 10744 Message: 10744

I realise there has to be someone who uses IRCs other than DXers looking for QSL cards, but I can't think of anyone. Is there another group who would regularly be sending return postage to distant lands? Parents of kids in university abroad?

While I cannot be specific with examples, Paul, I do recall people using them as "cash" of some sort, especially from African countries. If, however, IRCs are only supposed to be cashed only for stamps to the country from which the IRC was sent, I don't know how they can be converted in to cash. But I'm simply reporting what I remember being told.

I'll be interested in knowing what you find out from others.

BTW, still no joy with 4W6AL.

Usually when I go to the post office, half of the clerks there have no idea what an IRC is, how to stamp it correctly, etc. The last time I got some I overheard one of the clerks whom I know (it ended up we went to the same college 800 miles away but not at the same time) tell the one who waited on me "I have probably sold a half dozen on those in the past 5 years and mostly to him." I guess I am the only one in Lawton, OK who needs them.

Today I was on 20M looking for 4W6AL at 1200 -- when I would have conditions. There he was, on 17M. At 1500 he shows up on 20M and was being worked by Europeans and I saw one west coast spot from a K6. Not a peep. However, at 1530 I was able to hear 9V1YC. What gives :-) ?????

Maybe tomorrow???????????????

No 958
==========
*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3W - Sergey (RA3NAN), Oleg (RK3FA), Eugene (RZ3EC), Andy (RZ3EM) and Andrey/UA6BGB will be active from three Vietnamese IOTA groups between 24 September and 1 October as follows:
24-26 September XV6RRC Ngu Island AS-185
27-28 September XV7RRC Cham Island AS-162
29 September-1 October XV3RRC Tam Island AS-157
This is a tentative schedule, as actual dates will depend on local They plan to operate on 160-10 metres with two stations equipped with amplifiers and several antennas. QSL via RZ3EC, direct (Eugene Shelkanovtcev, P.O. Box 70, Orel, 302028, Russia) or bureau (bureau cards can be requested on-line). The logs will be uploaded to loTW. Bookmark http://xv6rrc.com for further information and updates. [TNX RZ3EM]
5R - Daniel, DF8UO will be active again 5R8UO from Madagascar (AF-013) on 12-20 September. He will operate mainly CW and digital modes on 40-10 metres. QSL via home call, direct or bureau. He will upload his log to LoTW. [TNX DXNL]
9A - Look for Oliver, 9A/DG7XO and Wolfgang, 9A/DL7CB to be active from Ugljan Island (EU-170) on 13-19 September. QSL via home calls (bureau preferred). [TNX DX Newsletter]
CT9 - Matthias, DJ8OG will be active as CT9/DJ8OG (QSL via home call) from Madeira (AF-014) until 15 September. He will operate on 80-10 metres and will participate in the WAE DX SSB Contest as CR3L (QSL via DJ6QT). [TNX DXNL]
F - F0FZK, F4AHE, F4ASQ, F4CRE, F4EOQ, F8CNX and possibily F4EQH will operate as TM85NI from Noirmoutier Island (EU-064) on 12-13 September. QSL via either F4ASQ or F8CNX. [TNX www.onlineradio.fr]
FT5G - The FT5GA team (F4EGS, F5IRO, F5LPY, F5PRU and F8CRS) is expected to depart Paris in the local early evening on 11 September, destination St. Denis, Reunion Island. The military flight to Glorioso (via Mayotte) is scheduled on 14 September. The team will remain on Grande Glorieuse for about three weeks. QSL via F5OGL, direct or bureau. Bookmark http://glorieuses2008.free.fr/ for

further information and updates. [TNX G7VJR]
JD1_og - Look for JD1BLP (QSL via JO2JDJ) and JD1BLY (QSL via JI5RPT) to be active from Chichijima (AS-031), Ogasawara on 19-22 September. They plan to operate on 40-6 metres CW, SSB and digital modes. [TNX NG3K]
OE - The Vienna International Centre Amateur Radio Club (4U1VIC) will participate in the WAE DX SSB Contest as 4U30VIC. Although it is Austria for DXCC, it counts as separate multiplier for WAEDC. QSL via 4U1VIC. [TNX NG3K]
OH0 - OH6EI will participate in both the Scandinavia Activity Contests (CW on 19-20 September and SSB on 26-27 September) as OH0Z from the Aland Islands (EU-002). QSL via W0MM. Detailed information on SAC can be found at http://qrq.se/sac/ [TNX NG3K]
OZ - Jakob, OZ7AEI will be active on 20 and 40 metres as OZ7AEI/p from the lighthouse of Roedvig E Mole on Sjaelland Island (EU-029) on 12 September. QSL via home call, direct or bureau. [TNX OZ7AEI]
OZ - Bernd, DL8AAV will be active as OZ/DL8AAV/p from Laeso Island (EU-088) on 14-26 September. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
OZ - Rene, DL2JRM will be active as OZ/DL2JRM/p from Romo Island (EU-125) on 18-20 September. He will operate mainly CW on 40-10 metres. QSL via home call, direct or bureau. [TNX www.rsgbiota.org]
PA - Special event station PA09MONUMENT will be active on the HF bands and 2 metres from Noordwijk Lighthouse on 12 September, for the Open Monumentendag (the European Heritage Days in the Netherlands). QSL via bureau to PA7DA. [TNX PA7DA]
SV - Fred, PA1FJ will be active as SV8/PA1FJ/p from Samos Island (EU-049) from 14 September to 2 October. He will operate SSB QRP on 40-6 metres. QSL via home call, bureau preferred. [TNX www.rsgbiota.org]
TA - The TC Special Wireless Activity Team (www.tcswat.org) will be active as TC3BLH from Balyos Lighthouse (Sea of Marmara) on 19-23 September. They plan to operate mainly on 20 and 40 metres SSB. QSL via operator's instructions. [TNX TA1HZ]
TK - Volta DX Team and Project DX Team members Ern/I2FUG, Oscar/IK2AQZ and John/IK2JYT will be active as TK/homecall from Corsica (EU-014) on 19-24 September. They will operate on all bands SSB, CW and digital modes, with two stations using small amplifiers, verticals and loop antennas. Side trips to the islands of San Cipriano (EU-164), Forana (EU-100) and Grande Sanguinaire (EU-104) are also being planned. QSL via home calls, direct or bureau. [TNX IK2JYT]
UA - Alex/RA1QY, Dmitry/RX1CQ and other operators will be active as UE1CDX/1 (QSL via via RN1CW, direct or bureau) and UE1RLH/1 (QSL via RA1QY, direct or bureau) from several lighthouses on Kotlin Island (EU-133) on 12-13 September. They will operate CW and SSB on 20, 30 and 40 metres. [TNX VA3RJ]
UR - UR5KHZ, UR5KO, US0KW and UX2KA will operate CW and SSB as US0KFF/p from the Rivnenskiy Nature Reserve until 16 September. QSL via US0KW. [TNX US0KW]

Z2 - Kazuo's, Z29KM next work assignment will be in Indonesia and he will be leaving Zimbabwe in mid October. He will remove his 5-band yagi in a couple of weeks, and although he will continue to be QRV as long as possible, his signals on the higher bands will be weaker. He reports having "too much QRN" on the low bands. Look for him on RTTY (18105 kHz) around 11 UTC, on SSTV (18130 and 14227 kHz) around 16 UTC and on CW (10120 kHz) after 18 UTC. QSL via EA7FTR. [TNX Z29KM]

PACIFIC TRIP ---> Bill, N7OU will be active as ZL7/N7OU from the Chatham Islands (OC-038) on 18-30 September, and as E51NOU from Rarotonga (OC-013, South Cooks) on 5-30 October. He will operate CW only on 80-10 metres, running 100 watts to a vertical, from both locations. QSLs via N7OU. [TNX NG3K]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The latest issue (Augsut 2009) is now available at http://www.425dxn.org/monthly/index.html. Articles and pictures should be sent to Nicola Baldresca, IZ3EBA.

CO8DM ---> Doug, CO8DM says he now has a LoTW account and is working on his old paper logs in order to upload all of his QSOs. Should you not being able to find a QSL record, please drop him a line (co8dmster@...) to fix the problem.

QSL EX8AB & EX9FF ---> Bek, EX8AB (EX9FF) says that RX3RC is no longer his QSL manager. Cards should be sent to Narynbek Djunushev, P.O.Box 1855, Bishkek, 720000, Kyrgyzstan. [TNX EX8AB]

QSL HK0MZ/0M ---> Jairo Vargas, HK5MQZ was active from Malpelo Island in June 2001. Those who still need a card can go direct to Jairo's daughter, Jenny (415 Kensington Lake Circle, Brandon, FL 33511, USA), who "is helping clean things up". [TNX The Daily DX]

QSL R1FJT ---> The Daily DX reports that, after the passing of QSL manager UA4RC [425DXN 947], QSL cards should be sent to: R1FJT, P.O. Box 252, Almetyevsk, Republic of Tatarstan, 432452 Russia ("this PO Box is still registered to UA4RC, even though he is a Silent Key", but "it is believed that the callsign should work as proper identification").

+ SILENT KEYS + Vernon R. Robinson (P29VR and W7GSP) passed away on 11 August. Vern was active from Papua New Guinea for 16 years, and his QSL manager (W7LFA) says he has all the logs for his entire operation. Other recently reported Silent Keys include Dennis T. Connors (KD2S), Robert D. Joy (W0EAN) and Sam Brown (WA4IUM).

10753. Re: [DX-IS] Who else uses IRCs?

Yahoo group: DX-IS (2009)
Date: 2009-09-11 17:53:31 UTC
From: Peg Haese KB9LIE
Topic: 10744 Message: 10753

Actually, my local IRC expert, Bob at our Platteville PO (state university town of about 11,000 total), says I'm the only one turning them in there. Mostly they sell new ones to foreign students who send them home for parents and friends to use.

When Bob isn't at the counter, I have the exchange steps written down for the other clerks (AKA retail associates) to use. I had a scare recently when someone said Bob had retired. The next time he told me that was another Bob and he'll be there for awhile.

73 de Peg KB9LIE in SW Wisconsin USA

ARLP037 Propagation de K7RA

ZCZC AP37
QST de W1AW
Propagation Forecast Bulletin 37 ARLP037
>From Tad Cook, K7RA
Seattle, WA September 11, 2009
To all radio amateurs

SB PROP ARL ARLP037
ARLP037 Propagation de K7RA

No new sunspot activity this week, and no emerging sunspots are visible on the far side of the Sun. Sunspot region 1025 (or 11025) which appeared over August 31 and September 1 faded over a week ago, and the area in which it appeared has just rotated over the Sun's western limb.

Average daily solar flux for this week was up slightly, just 0.7 points, to 68.8. Geomagnetic A indices were quieter, with last week's average daily planetary and mid-latitude A index at 5.7 and 4.1 respectively, while both numbers dropped to 2.9 for this week.

Very quiet and stable geomagnetic conditions were observed by the magnetometer used to generate the College A Index at Fairbanks, Alaska on September 9-10. From the last reading on September 8 through the end of the UTC day on September 10, the K index was zero at every 3-hour reading. It may have continued at that zero-level, but as of early Friday we have only the data for Thursday. You can see it at http://www.swpc.noaa.gov/ftpdir/indices/DGD.txt. For a longer range view, check http://www.swpc.noaa.gov/ftpdir/indices/quar_DGD.txt.

When the term "UTC day" is used in this bulletin, it refers to the date which ended after 2359z, or UTC. When it is 2359 UTC (the same as Greenwich Mean Time, or GMT), Alaska Daylight Savings Time is 1559. 1600 local Alaska time is in the following UTC day, because it is after midnight in Greenwich.

The planetary A index is projected to be 5 for today through September 14, then 8 for September 15-18. Solar flux is expected to be 69 for today and tomorrow, then 68 for September 13-19.

Geophysical Institute Prague predicts quiet conditions for September 11-12, quiet to unsettled on September 13, 15 and 17, and unsettled on September 14 and 16. But Petr Kolman, OK1MGW of the Czech

Propagation Interest Group thinks that September 14 will be quiet, but September 16 and 26 will be unsettled to active.

The Autumnal Equinox in the Northern Hemisphere is only 11 days away. This signals generally improved HF propagation, even with no solar activity.

As mentioned in past bulletins, even with the quiet Sun, worldwide propagation is still possible, but at lower frequencies. Fifteen and ten meter openings are rare, but 40, 30, 20 and even 17 meters have the better prospects.

John Parnell, K7HV of Seattle, Washington sent a link to a video he made while operating with just four watts on a Pacific Coast backpacking trip last week on Washington State's Olympic Peninsula. He used a simple radio he built from a kit, and a very basic wire antenna. John noted that HF conditions on a trip to the same place in 2007 were better. Checking the data in this bulletin from 2007, August 23-29 had an average daily sunspot number of 12.9, August 30 through September 5 was 16.1, and then for several weeks there were no sunspots.

Watch the video at http://tinyurl.com/lzz9f6 and see photos at http://tinyurl.com/l2onwh. Note that in the video you can hear a snippet of last week's ARRL DX Bulletin transmitted in CW from W1AW. How do we know this, with just a few seconds of copy? By comparing the few received characters to last week's bulletins on the ARRL web site.

Ronnie Borkgren, NN0L of Anamosa, Iowa writes to say he would like to see more detail in some of the reports of DX worked. He wants to know what power and antennas were used. We don't mention brand names very often, but will give details such as "3-element quad" or "popular 4 element tri-band beam," whether the antenna is homemade or commercially produced.

Mark Lunday, WD4ELG of Hillsborough, North Carolina gave us enough detail. He reported working VK4DHF long path on 20 meter CW on September 8 at 2130z. Mark was running just 5 watts and using a low-slung dipole.

Mark Bell, K3MSB of Airville, Pennsylvania reports he is seeing better propagation to Southeast Asia in the past week. He didn't give his power, antenna or mode, but says "After months upon months of really awful propagation on 20 meters into the southeast Asia region, things looked up during the past week."

"I worked 9V1YC (Singapore) on Sept 03 at 0012z, and heard stations from BY (China) and JT (Mongolia) on at the same time. Last night Sept 9, I again heard 9V1YC on around the same time, and also worked 9M2MRS (Malaysia) at 0023z. JT stations were also heard on the ninth."

"I heard Richard 9M2MRS another night around 0030z but he was too weak to work."

"Looking back, there seems to (finally) be some nice openings from the East Coast into the Southeast Asia region around 0030Z the past few days. Most of the time the signals were not strong, but the QRN was almost non-existent and they were "weak but workable" as the saying goes."

Frank Hertel, a consulting broadcast engineer sent an email with his observations of sporadic-e skip in the summer. For some reason he hasn't observed any this year, but of course he isn't trying to receive weak signals on VHF. His clients become concerned when a distant signal interferes with their local broadcast.

Frank wrote, "Since part of what I do is to operate a Frequency Measuring Service for broadcasters, I have a 100 foot tower with some pretty fair antennas. I also have antennas at about 20 feet which I use for phase canceling of unwanted signals when required. I have the assortment of horizontal, vertical and H+V when combined and phased and level balanced."

"When the interference does happen, the horizontal antennas are most affected. Often the 100 foot FM band antenna doesn't experience as much interference reception as my 20 foot high FM band antenna. The 100 foot antenna never delivers as much signal strength (being commercial broadband VHF, 40-300 MHz), as does my 20 foot 12 element FM band antenna, but when the interference does hit, the 100 foot antenna does a better job (receiving more of a direct signal path from local signals vs. the interfering signal from above). On non-interfering days, the 20 foot antenna actually out-performs the 100 foot FM antenna, since the 100 foot FM antenna, on a normal day, gets many unwanted signals (150 miles and beyond) that interfere with the signals I want to measure (100+ miles, and locals)."

"Once in the UHF TV band range, the problem doesn't often happen, but when it has happened it always seemed to be on very cold and dry winter nights, when the weather conditions are over a very wide spread area. As I can best recall, many years ago my home UHF TV antenna (15 feet) received Denver Colorado. I live in Evansville Indiana, about 1,000 miles from Denver."

"I remember in the 1970's that Havana Cuba had a TV Channel 2. Every August and September I would disconnect my outside VHF antenna (to keep from receiving Terre Haute, IN, CH 2) and hook up a pair of rabbit ears. Havana Cuba was quite watchable. I always knew when Havana was watchable because the reception of CH 2, in Terre Haute, IN would become quite scrambled. I would see 10 KHZ visual beat, due to the freq offset of the two carriers."

Very interesting info from a non-ham. We sent him a link to an APRS network (http://www.mountainlake.k12.mn.us/ham/aprs/) that automatically reports VHF propagation, and another

(http://www.dxinfocentre.com/tropo.html) that predicts propagation via the troposphere.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for September 3 through 9 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 68.6, 68.4, 68.5, 69.2, 68.8, 68.9, and 69.2 with a mean of 68.8. Estimated planetary A indices were 4, 5, 2, 3, 3, 2 and 1 with a mean of 2.9. Estimated mid-latitude A indices were 4, 4, 2, 2, 3, 2 and 3 with a mean of 2.9.

10756. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-11 22:11:01 UTC
From: Paul Dunphy
Topic: 9721 Message: 10756

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 11 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 254 Issued at 2200Z on 11 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 10/2100Z
to 11/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 10/2100Z to 11/2100Z:
The geomagnetic field was quiet.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet on day one (12 September). Quiet levels, with
unsettled periods possible at high latitudes, are expected on day
two (13 September). Quiet to unsettled levels, with a chance for
isolated active periods at high latitudes, are expected on day three
(14 September) as a coronal hole high-speed stream is expected to
become geoeffective.
III. Event Probabilities 12 Sep-14 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 11 Sep 069
Predicted 12 Sep-14 Sep 069/069/068
90 Day Mean 11 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 10 Sep 002/002
Estimated Afr/Ap 11 Sep 004/005
Predicted Afr/Ap 12 Sep-14 Sep 005/005-005/008-007/007
VI. Geomagnetic Activity Probabilities 12 Sep-14 Sep
A. Middle Latitudes
Active 05/05/10
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Hi friends

From Didier, F5OGL, FT5GA team leader :

FT5GA last news.
To Day sept 11th at 18h45 (Paris time ☐ 1645
uutc), the plane to La RÃ©union had took off from
Charles de Gaulle Paris7Roissy Airport.

The complete Gloriosos 2009 crew is onboard. ☐☐
F5IRO, F5PRU, F5LPY, F4EGS, F8CRS, and Lieutnant
Florence Gabulon ☐, they are on the way to FT/G.
They will land to morrow in the morning, at Saint Denis airport.
Some pics , usable free of charge, are available
at :
http://picasaweb.google.fr/MauriceF5NQL/DepartGlorieuses2009#
(If you use them you have only to say that they come from Serge, F6AML)
Some last details to check with the TAAF
authorities, and they will take off to Mayotte
then the Gloriosos on Monday 14th.
The TAAF Prefect, the higher authority for the
"Iles Eparses", on the zone, and the Prefect of
Mayotte, will go along the crew and the French
Foreign Legion detachment. They will spend some
time on the island, and especially observe the
ham station set up and first hours of traffic .
Now you can beam your antennas right to the
Indian Ocean. You have some four days to do and be ready.

The first signals are expected on next Tuesday/Wednesday.
Information will be sent one goes along on the
website -
http://glorieuses2008.free.fr/index-e.htm - and
through Maurice/F5NQL'smailing list (subscribe : f5nql@...)

bests 73's

□

Dale,

One possibility comes to mind, but many of these might have moved from writing letters to going via email. Guys looking for "mail order" brides. 10-20 yrs ago, I used to supply stamps to a few guys seeking a wife, mostly the request was for Philippine stamps! I'm sure others used IRCs as return postage! My last request for this was about 6 yrs ago. Guy was writing to Russia and Ukraine...

There used to be a dating/pen pal magazine called "Cherry Blossom". They used to run an ad for me! I knew I had a customer of theirs when the guy ordered 20 or 30 Philippine stamps! One guy wrote to me and said he wouldn't be buying any more stamps as he was getting married the next month!!

Another recent area using IRCs would be folks tracing their genealogy overseas, but I think the computer and emailing may have changed that too.

good luck,
bill

Subject: personal question

Bill;

This questioin came up on one of the yahoogroups boards that I subscribe to;

"I realise there has to be someone who uses IRCs other than DXers
looking for QSL cards, but I can't think of anyone. Is there another
group who would regularly be sending return postage to distant
lands? Parents of kids in university abroad?"

Any clues? Figure a man in your business might know.

The last few times I purchased some IRCs, I took a copy of the USPS bulletin from their web site. Only one guy in the post office had ever heard of them at all.

Since then, I've either purchased some from QSL managers or used the ones I receive from others. We receive a few requests a month for our trip to VP5 and I still receive and occasionaly request for C31JR more than three years ago. Many of those arrive with IRCs instead of cash.

I've seen perhaps half a dozen Japanese QSL requests with pre-franked envelopes. A very few QSL requests come with mint stamps for the SASE.

From: Paul M Dunphy
Topic: 10764 Message: 10764

Has anyone noticed that a lot of the "standard" contest stations are not as active anymore, and that generally activity is down? Why I am asking is that it was mentioned to me on 30M yesterday that it was "A SHAME THAT MNI HVE GIVEN UP HPE."

We were assaulted by the CW war, the takeover by the Internet and cell phones and other wireless gadgets in the past 10-15 years. We are now faced with a prolonged trough in the solar cycle. Perception is everything, but I *think* there is less activity in the WAE contest than I've heard in previous years.

Personally I am finding propagation great on 20 and lower, even better than when the flux was high in many cases. 17/15/12/10 are pretty much dead as one would expect, but there seem to be some great openings on the lower bands. One of the more knowledgeable DXers told me a week ago we are seeing great condx because the X-rays from the coronal holes are causing ionization without attenuation because the GMF remains unusually quiet. A silver lining we have never had the chance to see before, so to speak.

And we have Midway and Glorioso imminent. Bottom line, does anyone know if some of the old stalwarts are packing it in because the solar cycle seems stalled? That would be too bad, as there still is a lot of fun to be had. On the other hand, less calling means the pileups are easier to bust!

I am hoping that stations or managers receiving IRCs cash them in right away. Price of a US airmail stamp is $.98.

I am amused by the managers who are saying they wont take them cause it takes more than one to return the sase

Also if the managers are not going to get the cards out right-away I am hoping they will cash them in and annote the sase that the postage is on hand as a result of cashing IRC in..
I was not amused by one manager saying that it would take more than 2-3 dollars to get a card for a certain dx-pedition. Why not just ask me to chip in for the card and with his cost and I would be satisfiedl but telling a tall story about needing at least $3 bucks inlieu of an IRC is a bit overwhelming

Just my thoughts.

Paul,

The "Deserving DXers" never give up! Case in point, I worked 4U1ITU this morning (9/13/09 12:34) in the WAE. 4U1ITU was one of my last three on the current DXCC entity list and I saw him first spotted early 9/12/09 on 40M. I spent most of Saturday searching for 4U1ITU, working an occasional station calling CQ just to make sure I'd probably be heard if I found 4U1ITU.

"Never Give Up" , the good days are coming! < http://www.geocities.com/k2cddx/lead24.html >

Nope! Not here either! I haven't been on much this summer, and will admit to
being a 'cherry picker", that is I watch VE7CC, and if I need it for a
band-entity, AND it is on LOTW, I work it. Otherwise I just hide & watch.

This summer I have finished building a new receive array for 160 meters,
and built a deck for a place to put a Hot Tub, and my BBQ cookers. I'm
just quietly waiting & watching for the end of September, and for 160 to
spring to life. But give up, or quit: NEVER!

73,
Mike, W5UC

Paul,

The "Deserving DXers" never give up! Case in point, I worked 4U1ITU this morning (9/13/09 12:34) in the WAE. 4U1ITU was one of my last three on the current DXCC entity list and I saw him first spotted early 9/12/09 on 40M. I spent most of Saturday searching for 4U1ITU, working an occasional station calling CQ just to make sure I'd probably be heard if I found 4U1ITU.

"Never Give Up" , the good days are coming! < http://www.geocities.com/k2cddx/lead24.html >

73 ES DX,

Gary - AB9M

Subject: [DX-IS] Are Hams giving up hope?

Has anyone noticed that a lot of the "standard" contest stations
are not as active anymore, and that generally activity is down? Why
I am asking is that it was mentioned to me on 30M yesterday that it
was "A SHAME THAT MNI HVE GIVEN UP HPE."

We were assaulted by the CW war, the takeover by the Internet
and cell phones and other wireless gadgets in the past 10-15
years. We are now faced with a prolonged trough in the solar
cycle. Perception is everything, but I *think* there is less
activity in the WAE contest than I've heard in previous years.

Personally I am finding propagation great on 20 and lower, even
better than when the flux was high in many cases. 17/15/12/10 are
pretty much dead as one would expect, but there seem to be some great
openings on the lower bands. One of the more knowledgeable DXers
told me a week ago we are seeing great condx because the X-rays from
the coronal holes are causing ionization without attenuation because
the GMF remains unusually quiet. A silver lining we have never had
the chance to see before, so to speak.

And we have Midway and Glorioso imminent. Bottom line, does anyone know if some of the old stalwarts are packing it in because the solar cycle seems stalled? That would be too bad, as there still is a lot of fun to be had. On the other hand, less calling means the pileups are easier to bust!

73, Paul VE1DX

Nope! Not here. I haven't been on much this summer, and will admit to being a 'cherry picker", that is I watch VE7CC, and if I need it for a band-entity, AND it is on LOTW, I work it. Otherwise I just hide & watch.

This summer I have finished building a new receive array for 160 meters, and built a deck for a place to put a Hot Tub, and my BBQ cookers. I'm just quietly waiting & watching for the end of September, and for 160 to spring to life. But give up, or quit: NEVER!

73,
Mike, W5UC

Nope . . . don't get CQ magazine. W9RGB and I were discussing conditions on 30M and he mentioned it to me. Don't know where he saw it. Perhaps CQ??

Either way, it seems to be true.

They are "sticking" in Yahoo's queue waiting for
approval. Every now and then Yahoo flags innocent messages as SPAM
and Don, N1DG, or I have to approve them. I got 4 today, and all
were as clean as they come, in terms of the source, the title and
message content. I think Yahoo's band pass filters are a tad off!

While I may be somewhat discouraged, I certainly have not yet given up hope. Today, for instance, I was back looking for 4W6AL on 14027 without hearing a peep from him, despite several spots that he was there. And then, to add insult to injury, I saw him spotted on SSB in WAE and he wouldn't have worked me, even if I could have heard him.

Later today, as I tuned the bands listening to scant few CW signals drifting in and out of the QSB, I saw a spot congratulating VY2ZM on 2650 QSOs in WAE by mid-afternoon, and heard VE1OP trying to make a few QSOs.

Of course I know that Jeff has an incredible antenna system on PEI. But Scott lives less than a mile from me (as the crow flies) and has the same beam as me. I expect him to hear better but not that much better, because he has a clear shot to the horizon in all directions. A station in NH who worked a Russian just after I did (I could hear him faintly off the back of the beam) said he agreed with me that conditions were poor.

So what gives????????

But I'm still hunting for DX. I must be somewhat of a masochist.

73

Al, VE1AL

10774. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-13 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10774

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 13 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 256 Issued at 2200Z on 13 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 12/2100Z
to 13/2100Z: Solar activity was very low. No flares were observed.
The visible disk remained spotless.
IB. Solar Activity Forecast: Solar activity is expected to be very
low.
IIA. Geophysical Activity Summary 12/2100Z to 13/2100Z:
The geomagnetic field was predominantly quiet. A single unsettled
period was observed at high latitudes between 13/1500-1800Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet, with isolated unsettled periods on day one (14
September). Quiet to unsettled levels, with isolated active periods
at high latitudes, are expected on days two and three (15-16
September) due to a recurrent coronal hole high-speed stream.
III. Event Probabilities 14 Sep-16 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 13 Sep 069
Predicted 14 Sep-16 Sep 069/069/069
90 Day Mean 13 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 12 Sep 001/004
Estimated Afr/Ap 13 Sep 005/008
Predicted Afr/Ap 14 Sep-16 Sep 007/007-007/010-008/007
VI. Geomagnetic Activity Probabilities 14 Sep-16 Sep
A. Middle Latitudes
Active 10/10/15
Minor storm 01/01/01
Major-severe storm 01/01/01

Ohio/Penn DX Bulletin No. 925

The Ohio/Penn DX PacketCluster
DX Bulletin No. 925
BID: $OPDX.925
September 14, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, AA3B, NG3K, N4AA & QRZ DX, KH6BZF, W7LFA, K8YSE, KI8L, A35RK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IZ8CCW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) YT3W, and the Algarve STAR DX Team for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-September, through Sunday, 13th-September there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6Y, 7O, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP,, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T5, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Alex, GM0DHZ/AA8YH, informs OPDX that he is returning here November 16th for 5 weeks. He plans to be active on CW on the weekends from 3V8SS. He also adds that he is willing to accept skeds from "QRP" operators/stations, either CW or SSB. They can contact him via his E-mail address listed on QRZ.com. However, Alex has reminded us that it's a holiday trip by his XYL.

4W6AL UPDATE. The Algarve STAR DX Team reports that a new video of 4W6AL recorded on September 11th, in the south of Portugal, is available, as well as the 4W6AL log is updated online at: http://algarvedx.com
PLEASE NOTE: QSL Manager/Pilot Station Toze, CT1GFK, reports that some 100 stations worked a PIRATED 4W6AL station on September 12th! Only four stations worked the actual 4W6AL station. Check the log before QSLing.

5B, CYPRUS. Zoli, HA5PP, will once again be active as 5B/HA5PP during both the CQWW DX SSB Contest (October 24-25th) and CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (TBD) entry. QSL via HA5PP.

5R, MADAGASCAR (AF-013). Daniel, DF8UO, will once again be active as 5R8UO from here between now and September 20th. Activity will be mainly CW and the Digital modes on 40-10 meters. QSL via his home callsign, direct or by the Bureau. He is expected to upload his log to LoTW.

8Q, MALDIVES (Update). Andrew, G7COD, will once again be active as 8Q7AK from Embudu Village, Embudu Island (AS-013, WLOTA L-3911), between October 12-25th. Activity will be on 80-12 meters including 30/17/12m using CW and SSB. Operating schedule (everyday) is as follows: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14147, 18133, 21253 and 24953 kHz
Andrew's operating conditions will be very simple consisting of 100 watts PEP from an Icom IC 7000 transceiver, MFJ 929 Auto ATU, switch mode power supply and Vibroplex mini straight morse key. The antenna is a Radio Works CWS 160 Carolina Windom sloping from 20-12 meters suspended from the tops of the coconut palms approximately 10 meters from the sea. QSL via his home callsign, direct or by the bureau. Andrew now has a dedicated Web page at: http://8q7ak.freewebspace.com

8Y, GUYANA. Members of the "Amateur Brazilian Team" will be active as 8R1PY from Lethem, Guyana, between October 31st and November 4th. Activity will be on 160-6 meters, including 30/17/12 meters, using CW, SSB, RTTY and PSK31. Operators mentioned are Edi/PU8TEP, Abilio/PV8AZ, Paulo/PV8DX, Ivan/PV8IG, Ivan/PY1YB, Anderson/PY2TNT and Alex/PY2WAS. QSL via PY2WAS.

A3, TONGA (News). Paul Kidd, A35RK, provides the following special announcements by the Tonga Ministry of Communications and Information dated September 8th):

#1] "Today, the Radio Licensing Officer for the Kingdom of Tonga, Fe'ao Vakata, has authorized amateur radio operation on the 60 Meter Band (5.330 - 5.405 Mhz), on a secondary, restricted basis.

The 60M bandplan will be the same as is authorized by the FCC, i.e. 'channelized' on the following frequencies only, USB only, 2.8 kHz maximum bandwidth, with a 50 watt pep ERP limit:

Channel Center Amateur Tuning Frequency
-------------- ------------------------
5332 kHz 5330.5 kHz

5348 kHz 5346.5 kHz
5368 kHz 5366.5 kHz
5373 kHz 5371.5 kHz
5405 kHz (common US/UK) 5403.5 kHz
This 60M authorization is effective immediately."

#2] "Effective immediately, the 40 meter band allocation has been expanded. A3 licensees are now permitted to operate from 7.0 to 7.2 MHz."

Paul states, "The previous upper band edge was 7.1 MHz, so our 40M band just doubled in size! This additional allocation will allow us to work U.S. stations without having to work 'split'.

The 7.2 -7.3 MHz segment may be opened later, on a secondary use basis. The IARU Region 3 Bandplan permits this, but for the time-being, we will gladly content ourselves with the additional 100 kHz.

Many thanks to Fe'ao Vakata, the Radio Licensing Officer, for his efforts in revising and updating the amateur radio regulations here in Tonga."

ACTIVATING A RARE IOTA (Interesting Story). Cezar, VE3LYC, last week(end) activated the Ottawa Islands (NA-230) as VY0O which turned out to be a big adventure for him (bad weather, polar bear, boat problems (engine, back engine and sinking). However, he made a total of 3000 QSOs with stations on all continents. About 53% of the contacts were on CW, 47% on SSB. Read his interesting story at: http://www.qrz.com/db/vy0o

AFRICAN TOUR (6W, J5 and IOTAs). Laci, HA0NAR, will be heading to western Africa in early 2010, and plans to be there at the end of January through the end of February. He plans to visit and activate Senegal (6W) and Guinea-Bissau (J5). Tentative dates and callsigns are as follows:
Senegal (6W) - Callsign 6W/HA0NAR; January 27th through February 10th
Guinea-Bissau (J5) - Callsign J5NAR; February 11-21st
Laci is also planning to activate the following IOTA groups:
AF-078 - Senegal South Group
AF-093 - Guinea-Bissau Coastal Region Group
Look for more details to be forthcoming.

ANTARCTICA (IOTA) ACTIVITY. Mehdi, F5PFP, who did an Antarctica cruise/ expedition in the beginning of the year, reported that his good friend Pupi, LU8XP, advised him that a group of hams with Pedro, HK3JJH, are preparing an expedition to the Chilean sub-antarctic territories of the Wollaston Islands (SA-031) and Diego Ramirez Islands (SA-094) in 2010 or perhaps 2011. Pupi might be in charge of the logistic support at Ushuaia like he already made for several other expeditions. Stay tuned for updates.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the CQ World Wide DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry.

Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

FT/G, GLORIOSO ISLAND (Update). By the time you read this, the FR5GA team is expected to depart from Reunion Island on September 14th, and after some final checks with the TAAF authorities, the team will head to Glorioso Island via Mayotte Island. First signals from FR5GA are expected to be Tuesday or Wednesday (September 14th or 15th). Pictures of the teams departure are available already on the Web at: http://picasaweb.google.fr/MauriceF5NQL/DepartGlorieuses2009#
The team is expected to be there for about three weeks. QSL via F5OGL, direct or by the Bureau. For more information, updates and suggested frequencies, visit their Web page at: http://glorieuses2008.free.fr
ADDED NOTE: In a press release, it was reported (edited): "Someone said that there is no pilot station for the west coast of Americas; that's not completely true. In fact some hams offerred to help us, but they cannot be QRV for the entire length of the DXpedition, so we have only one pilot for the Americas which is Floyd, N5FG."

IOTA NEWS.....
EU-049. Fred, PA1FJ, will be active as SV8/PA1FJ/p from Samos Island (GIOTA SAS-006, MIA MG-099, WLOTA L4163) between September 14th and October 2nd. Activity will be on 40-6 meters using SSB and running QRP (5 watts - Yaesu FT817 and Buddistick antenna). QSL via his home callsign, direct or by the Bureau.

EU-164. Before going to Romo Island (See OPDX.924), Rene, DL2JRM, will activate the Island of San Cipriano (DIFM TK-037, MIA MCO-013) as TK/DL2JRM/p between September 14-15th. Activity will be on 40-10 meters QRP CW, using solar power. QSL via DL2JRM, direct or by the Bureau.

NA-110. Operators Jeep/KA1DF, Dave/KI4ROL, Paul/K3LLH, David/N2EIO, Gary/AI4JA and Bill/W3HEA will be activating the special event callsign K4L from a lighthouse (ARLHS USA-392, TWLHD WLH K-082, WLOTA L 2265, WW Loc. EM92SJ) on Hunting Island (USI SC003S, Beaufort County, South Carolina) between October 17-18th.
The activity is to commemorate the 150th anniversary of the lighthouse. The light was the first light on Hunting Island, built in 1859 but destroyed during the Civil War. It was rebuilt in 1875 of curved iron panels (each weighing 1200 pounds) with an interior brick wall. In 1889 it was dis-assembled and moved 1/4 mile inland due to rapid erosion of the northern end of the island. It served as a navigation light until decommissioned in 1933. The park itself was created just prior to WWII; during the war, the Air Force had a trans-mitter site there. QSL via K3LLH. An online log will be available after the event. Further information can be found at: http://pws.prserv.net/K4L

KH6BZF PROPAGATION FORECAST/REPORT (For September 14-20th)....
Sep 14 AN SOLAR REFERENCE
Sep 15 AN ---------------
Sep 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 18 AN LN - Low Normal
Sep 19 AN
Sep 20 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NEW D.L.I. AWARDS. Please check out the new "Italian Lakes Award" at:
http://www.dlit.info
---or--
http://www.forum.dli.altervista.org/viewforum.php?f=3D4

OH0, ALAND ISLAND. Tomi, OH6EI, will be active as OH0Z during two different weekends this month for the SAC Contests. Look for him during the Scandinavian Activity CW Contest (September 19-20th) as a Single-Op/All-Band/High-Power entry, and the Scandinavian Activity SSB Contest (September 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

PACIFIC TOUR. Once again, Hrane/YT1AD and Miki/YU1DW will travel to the Pacific, and will be active from the following locations per this timetable:
KH8 - American Samoa; September 30th-October 1st; callsign KH8/N9YU
5W - Samoa; October 2-3rd; callsigns 5W7A (YT1AD) and 5W0DW (YU1DW)
3D2 - Fiji; October 4-6th; callsigns 3D2AD (YT1AD) and 3D2DW (YU1DW)
T30 - Western Kiribati; October 6-8th; callsigns T30M (YT1AD) and T30W (YU1DW)
The main purpose of this trip is to prepare all necessary documents for their next DXpeditions to Central Kiribati (T31), Tokelau Island (ZK3) and Wallis Island (FW8) in September and October of 2010. More details will be forthcoming at: http://www.yt1ad.info/t31

QSL INFO AND NEWS.....
9M2MRS QSL ROUTE CHANGE. Rich, 9M2MRS, reports that envelopes are being opened from his Penang Island, Malaysia address, and green stamps are being taken. He advises to send QSL requests to his PA0RRS address in the Netherlands. He said he would like this info passed around to the U.S hams.

SWAZILAND DXPEDITION QSL STATUS. QSL Manager for Swaziland DXpedition in August 2009, David, GI4FUM/3DA0DJ, reports that 5,000 QSL cards have arrived from the printer (in the Ukraine), September 11th, so the cards are on their way back to anyone who QSLed direct. Cards from the UK and Ireland have been dealt with first. Unfortunately, the present postal strikes will not help, but the cards are on their way. There are two designs, so anyone who worked more than one member

of the team should get cards in both designs.

PIRATE ALERT. Phil, G3SWH, reports that the activity on 20 meters CW earlier this month by a station signing ZF2NT was a pirate operation. Bruce is still in California.

QSLS VIA LOTW: T6AD

QSLS RECEIVED VIA MAIL: 5H3VMB, 5K0T, 9J2VB, BD1HFP/2, CO8LY, FR7ZL/g, FW5ZL, GM01VI/p, J39BS, JT1CO, OH/JA5AQC, OH0E, OJ0J, R1ANR, SV2ASP/A, TK/I4GAD, TM5EL, V51AS, VK9GMW, VR10XMT, VR2XMT, VR2008O, VR2009EAG, XE2PEA, ZS1REC and ZX8A

QSLS RECEIVED VIA THE BUREAU: 4A3IH, DX1J, KH0N, T32XG and V63MP

SILENT KEY. QSL Manager Norman, W7LFA, informs OPDX that Vern Robinson, P29VR/W7GSP, became a "Silent Key" on August 17th. He returned to his home in Renton, Washington, a couple of month prior for treatment. He was active on all bands for over 16 years from PNG along with his surviving wife P29RI/K7IAF. Norman states that he has all the logs for his entire operation. OPDX and its readers would like to give our deepest sympathy to the family and friends of P29VR/W7GSP.

T4, CUBA. Operators Luis/CO6LP, Orelvis/CO6LC, Yordany/CM6YAC, Jose/CO6EC and possibly one or two other operators will be active as T46A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via CO6LC. The plans to use a FT-747, FT-80 and 2-SEG 15D, with 2 or 3 amplifiers 400w; antennas include: 2 - 2 element yagis (20/15/10), a vertical for 40m, and verticals and dipoles for 160/80m. Receiving antennas: 2 Beverages 580 feet long to EU and USA-JA.

TC2, TURKEY. If you missed Tevfik, TA1HZ, during the WAE SSB Contest this past weekend using the special callsign TC2X, you will have a second chance to work him during the 51st Scandanavian Activity Contest on September 26-27th. Tevfik's QTH is Bayramoglu, Kocaeli, and he uses a Diamond BB7V vertical antenna and a long wire. He states, "Main purpose of activity is to give out multipliers to runners and have the flag up!!"

TC3, TURKEY (Lighthouse Activity). After the successful ILOTA Istanbul Lighthouses On The Air activity, the members of the Turkish group called TCSWAT (Special Wireless Activity Team) will now activated for the first time Balyos Lighthouse on the south coast of the Marmara Sea between September 19-23rd. The callsign will be TC3BLH. Activity will be as usual on the HF bands, mainly on 20 and 40m SSB. SSTV activity is planned, but not guaranteed. There will be other new lighthouse activations from the Marmara Sea coastline with a special award available after the operations. If you are interested in lighthouse activities, please check the following Web site for further announcements at: http://www.tcswat.org

TJ, CAMEROON. Reports indicate that Lionel, F5PSA, is active as TJ3SL. His length of stay is unknown at this time. Activity has been on 20-10 meters using SSB, but only during his spare time. QSL via his home

callsign.

TK, CORSICA. Members of the Volta DX Team and Project DX Team will be active as TK/homecall from Corsica (EU-014) between September 19-24th. Operators mentioned are: Ern/I2FUG, Oscar/IK2AQZ and John/IK2JYT. This is their annual holiday/DXpedition. Activity will be on all bands (160-2 meters) using CW, SSB and the Digital modes. They plan to have two stations using small amplifiers, verticals and loop antennas. They will also try to go and operate from a more islands, such as Ile St.Cipriano (EU-164), Ile Cerbicales (EU-100) and Ile Sanguinaire (EU-104). QSL via their home callsigns, direct or by the Bureau.

V2, ANTIGUA. Bud, AA3B, will once again be active as V26K between November 26th and December 1st. His activity includes the CQWW CW Contest (November 29-30th) as a Single-Op/All-Band/Low-Power entry. This will be an all CW operation on the contest HF bands only. Please QSL via AA3B.

VP5, TURKS AND CAICOS ISLANDS. Jack, N2VW, will be active from the VP5JM Hamlet on Providenciales Island (NA-002, FL31) between October 21-28th. His activity will include an entry in the CQWW DX SSB Contest (October 25-26th) possibly using a special callsign. Outside of the contest Jack will be signing VP5/N2VW on all bands (160-6 meters) and modes. QSL via his home callsign.

VP5, TURKS AND CAICOS ISLANDS. Operators Rodger/W7VV, Ralph/VE7XF and possibly some other operators will be active from Jodi's, VP5JM, "Hamlet" QTH (http://www.vp5jm.com/) on Providenciales, Caicos Islands (NA-002), between November 15th and December 3rd. Activity will include the CQWW DX CW Contest (November 28-29th) as a Multi-? entry and possibly a special callsign (TBA). QSL route TBA. Operators will be active before and after the contest on all bands (160-6 meters) and modes signing VP5/homecall. QSL via their home callsigns.

XV, VIETNAM (Rare IOTAs). Members of the Russian Robinson Club and R-Quad Antenna Company have put together a DXpedition project to activate the rarest IOTA references in Vietnam during the last part of September and early October. They will be in Vietnam between September 24th and October 2nd. Operators mentioned are: Sergey/RA3NAN, Oleg/RK3FA, Andy/RZ3EM and Andrey/UA6BGB. The tentative schedule is as follows:
AS-185. Activity from Hon Ngu Island as XV6RRC; September 24-26th.
AS-162. Activity from Cu Lao Cham Island as XV7RRC; September 27-28th.
AS-157. Activity from Hon Tam Island as XV3RRC; Sept. 29th-October 1st
The team plans to run 2 stations with the following setup:
TXs: Elecraft K3 ☐ 2 pcs
Amplifiers: Acom 1000, Ameritron ALS600
Antennas: 160/80/40m Vertical on 18m mast, 20m VDA on 12m mast, VDAs on 15-17m on 12m mast, BiggIR Vertical (40-10m), LowBands RX antennas (if the conditions permit)
Software: WinTest, AATest
The team will try to do their best to log as many IOTA enthusiasts all over the world as the propagation and other local conditions permit. If

they can manage to arrange an Internet connection, they will try to update
their log daily. For more details and updates, please visit their Web
page at: http://xv6rrc.com/

YJ0, VANUATU. Tomas, VK2CCC (LY1F), will be active from here between
October 30th and November 5th. Callsign is to be announced later. Activity
will be "part time", but mainly on 160 and 80 meters CW. QSL via VK2CC,
by the Bureau or direct. View some photos from his past operations at:
http://www.qrz.lt/foto/main.php?g2_view=core:ShowItem&g2_itemId=3793

ZS, SOUTH AFRICA. Bernie, ZS4TX, from Danhof, will be active during the
CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL
via LoTW.

I mentioned CQ magizine because every April they publish some plausible story, so deep that you kinda wonder if it is true. Usually am able to catch on by about the 5th-6th paragraph. Supposed to be an April Fool. They did get me the first time around. hi hi

BTW: as an Extra, I did the memorize on the written (I'm just no teckie) BUT I did pass the 20 wpm test. phase angle??

Nope . . . don't get CQ magazine. W9RGB and I were discussing conditions on 30M and he mentioned it to me. Don't know where he saw it. Perhaps CQ??

Either way, it seems to be true.

look at ve7cc or other dx clusters and you can see the indication a station is lotw

other than that how can one really tell

Well, I wouldn't make that my criteria as to whether or not I would work a station, but there are those who do. There is no absolute guarantee that I know of to be certain the station you are interested in is a LoTW user. The ARRL does not make public such a list. Even if they did, there is no way to be sure the station identified has done any more than sign up for LoTW . . . they may have tried it and for some reason decided they didn't like it. So they got "on the list", but are no longer active with LoTW.

An unofficial list is available at:

http://www.hb9bza.net/lotw/

As the web site says, "This is a compilation of information from many sources, including the DX-Cluster, DX bulletins, WEB sites and files received from other LoTW users." It's a good reference but for a number of reasons, it isn't 100%. It is probably the best there is.

Many logging and telnet programs use that list to flag known users. Two are AA6YQ's DX Labs Suite and VE7CC's AR User program. Both of these are free and make a good attempt at flagging LoTW (and eQSL) users.

They are available at:

(AA6YQ's DX Labs Suite): http://www.dxlabsuite.com/

(VE7CC's AR User): http://www.ve7cc.net/

Alternatively you can work the guy, ask and not log him if he says no. HI

BTW the list of LOTW users most likely contains many who started using LOTW and quit. I've come across quite a number who last updated their logs 3 or 4 years ago-- according to the "find call" option LOTW has.

Paul,

The "Deserving DXers" never give up! Case in point, I worked 4U1ITU this morning (9/13/09 12:34) in the WAE. 4U1ITU was one of my last three on the current DXCC entity list and I saw him first spotted early 9/12/09 on 40M. I spent most of Saturday searching for 4U1ITU, working an occasional station calling CQ just to make sure I'd probably be heard if I found 4U1ITU.

"Never Give Up" , the good days are coming! < http://www.geocities.com/k2cddx/lead24.html >

Subject: [DX-IS] Are Hams giving up hope?

Has anyone noticed that a lot of the "standard" contest stations
are not as active anymore, and that generally activity is down? Why
I am asking is that it was mentioned to me on 30M yesterday that it
was "A SHAME THAT MNI HVE GIVEN UP HPE."

We were assaulted by the CW war, the takeover by the Internet
and cell phones and other wireless gadgets in the past 10-15
years. We are now faced with a prolonged trough in the solar
cycle. Perception is everything, but I *think* there is less
activity in the WAE contest than I've heard in previous years.

Personally I am finding propagation great on 20 and lower, even
better than when the flux was high in many cases. 17/15/12/10 are

pretty much dead as one would expect, but there seem to be some great openings on the lower bands. One of the more knowledgeable DXers told me a week ago we are seeing great condx because the X-rays from the coronal holes are causing ionization without attenuation because the GMF remains unusually quiet. A silver lining we have never had the chance to see before, so to speak.

And we have Midway and Glorioso imminent. Bottom line, does anyone know if some of the old stalwarts are packing it in because the solar cycle seems stalled? That would be too bad, as there still is a lot of fun to be had. On the other hand, less calling means the pileups are easier to bust!

So here I am, in a thick pile-up of Europeans calling JA7CDK. Aside from the fact he can't hear me through the much stronger European hoard, when I listen for him there are not one but two Europeans calling ME.

Reference yesterday's thread about losing faith, this bothers me more than poor conditions.

And, oh yes, 4W6AL didn't bother with 20M today (at least so far) and I sure as hell don't have conditions on 17M at 1100Z. My birdie was S-9 on 14027 so I wouldn't have heard him anyway. Life goes on.

Today we have conditions and he's not available for the northeast coast. If it weren't for bad luck, I'd have no luck at all.

Unless all of those calls are pre-programmed, you just about have to do it yourself. One prefix, in the case of TO5, isn't specifically for one country as far as I can tell.
:-(

I hope I can work the FR/G operation. It would be an all-time new one.

As far as I'm concerned, Zack, they're a real PITA. It isn't as if the French are short on prefixes. I would have thought the amateurs in France would have howled loud enough that I could have heard them in Cape Breton without a receiver!!!

From here on, I will make sure I have the proper prefix logged at the time of the QSO so I don't have to worry about doing this again if I'm around in another 15 years.

Hi Alan
TO5MM was Doug Priest W3CF, V26DX, and TO5MM and is Martinique in 1993

For those of you that use DX4Win, an easy way of identifying a new entity call like FT5GA in your log is to enter a QSO using that call, change to the correct entity with F1 and then delete it. The next time you enter that call it will identify it correctly. I can't comment on other logging programs.

Good luck with working the team on Glorioso

Thanks, Lee, for that info. Now that you've reminded me, I think I knew that it was Doug's operation.

Your suggestion also works with DXbase when an unknown call is entered. With DXbase, the first time FT5GA is entered it will come up as France. In this case, simply scroll through the F calls until you come to FR/G and enter the call as a QSO. You'll be prompted to accept all future entries for that call as FR/G (the proper designation for Glorioso as far as I'm concerned).

I'm hoping to work them on several new bands and modes.

Subject: [DX-IS] Re: TO5MM in 1993

Hi Alan
TO5MM was Doug Priest W3CF, V26DX, and TO5MM and is Martinique in 1993

For those of you that use DX4Win, an easy way of identifying a new entity call like FT5GA in your log is to enter a QSO using that call, change to the correct entity with F1 and then delete it. The next time you enter that call it will identify it correctly. I can't comment on other logging programs.

Good luck with working the team on Glorioso

Hi Michael,

for german Hams, you can go to

http://ans.bundesnetzagentur.de/Amateurfunk/Rufzeichen.aspx

and type in the call.

This is the website from the german authority "Bundesnetzagentur"

for DL3OI you will find:

Ulrich Bettin; Lehrer-Wirth-Str. 42; 81829 München

You may also try DL3OI@... for email. All german hams have the possibility

to get a free "call @ darc.de" email from the german DARC. But this is not a must,

but worth a try, asking for the direct address

Good luck!

10797. RE: [DX-IS] Are Hams giving up hope?

Yahoo group: DX-IS (2009)
Date: 2009-09-15 07:29:33 UTC
From: Lance Martin
Topic: 10764 Message: 10797

Well I think I worked 3 stations in the WAE and they were local DX, well relatively local to us.

It took me ages to get T30GM, especially on 40m, but I guess I was a bit impatient, sometimes one never knows if one is going to miss out...

Have not heard FO/G3BJ at all. He seems to be on at the wrong times for us on every band. I am glad there is another team going to the Australs soon.

On a brighter note, (according to the cluster) I see FT5GA has fired up!! On 20m SSB, I am really looking forward to working those guys,

73, Lance - VK6DU

Paul,

The "Deserving DXers" never give up! Case in point, I worked 4U1ITU this morning (9/13/09 12:34) in the WAE. 4U1ITU was one of my last three on the current DXCC entity list and I saw him first spotted early 9/12/09 on 40M. I spent most of Saturday searching for 4U1ITU,

working an occasional station calling CQ just to make sure I'd probably
be heard if I found 4U1ITU.

"Never Give Up" , the good days are coming! <

73 ES DX,

Gary - AB9M

From: Paul M Dunphy <mailto:list_dx@ve1dx.net>

Sent: Sunday, September 13, 2009 7:29 AM

To: DX IS! <mailto:DX-IS@yahoogroups.com>

Subject: [DX-IS] Are Hams giving up hope?

Has anyone noticed that a lot of the "standard" contest stations

are not as active anymore, and that generally activity is down?
Why
I am asking is that it was mentioned to me on 30M yesterday that
it
was "A SHAME THAT MNI HVE GIVEN UP HPE."

We were assaulted by the CW war, the takeover by the Internet
and cell phones and other wireless gadgets in the past 10-15
years. We are now faced with a prolonged trough in the solar
cycle. Perception is everything, but I *think* there is less
activity in the WAE contest than I've heard in previous years.

Personally I am finding propagation great on 20 and lower, even
better than when the flux was high in many cases. 17/15/12/10
are
pretty much dead as one would expect, but there seem to be some
great
openings on the lower bands. One of the more knowledgeable DXers

told me a week ago we are seeing great condx because the X-rays
from
the coronal holes are causing ionization without attenuation
because
the GMF remains unusually quiet. A silver lining we have never
had
the chance to see before, so to speak.

And we have Midway and Glorioso imminent. Bottom line, does
anyone know if some of the old stalwarts are packing it in
because
the solar cycle seems stalled? That would be too bad, as there
still
is a lot of fun to be had. On the other hand, less calling means

the
pileups are easier to bust!

Yes, I saw the e-mail and tuned in to 14190. Nothing there at the moment, but the only signals on the band right now are a K7 and P41USA I think both said they could not hear FT5GA.
We have two or three weeks - I'll only get concerned if there are a couple days left and I haven't worked them yet.

I think it just sounds like gloom and doom because there's nothing else to talk about!

While the coming cycle will most likely not be as strong as in the past, the propagation experts do seem to agree that next year will see lots more 15M (consistent) openings and by 2011 we'll probably see many regular openings on 10M.

The guy who does the ARRL prop bulletins also does a column in the National Contest Journal. His comments there seem more positive than I've seen in quite some time. He also stated that for those who still promulgate a Maunder Minimum that experts have conclusive proof that the next cycle has already begun.

A couple of years from now we'll be laughing about how we thought the world was coming to an end!

I agree Gary. I also meant to state in my response to Paul that perhaps the WAE is only an anomaly - after all, there are many who despise the QTC portion of that contest.

If the number of logs are truly indicative of the overall activity, many of the major contests are exhibiting record entries and record scores (notwithstanding the DQs!).

A number of logging programs as well as some of the cluster software display users either known or suspected to be LotW participants.

I use DXLabs (DXKeeper is the logbook and SpotCollector color codes users who participate in LotW and eQSL.

I also use CC User (from VE7CC) and the LotW users are marked (at least I think they used to be - I don't bother too much to look).

There are also databases available on the internet whether you have software that can use them or not.

Dont dispair boys and girls. According to Spaceweather.com, there is a very large sunspot (cycle 24) making its way around the backside of the disc right now and should be earth facing by friday or saturday.

I think it just sounds like gloom and doom because there's nothing else to talk about!

While the coming cycle will most likely not be as strong as in the past, the propagation experts do seem to agree that next year will see lots more 15M (consistent) openings and by 2011 we'll probably see many regular openings on 10M.

The guy who does the ARRL prop bulletins also does a column in the National Contest Journal. His comments there seem more positive than I've seen in quite some time. He also stated that for those who still promulgate a Maunder Minimum that experts have conclusive proof that the next cycle has already begun.

A couple of years from now we'll be laughing about how we thought the world was coming to an end!

10805. FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-16 19:40:28 UTC
From: Alan Leith
Topic: 10757 Message: 10805

I guess I shouldn't have thought it would be any different. FT5GA finally shows up on 20M CW and the lids come crawling out of the woodwork. I'd seen spots for them earlier on 14200 but that was just an HB9 with a special suffix, who didn't even have a prefix to offer. Lots of statesiders and Europeans decided he was the FT5 and spotted him as thus that caused some pandemonium.

But the guys on 14014 sending profanities made me wish for better things. Europeans saying on the cluster that US hams were awful, US hams saying Europeans were awful, South Americans (a PY) calling CQ, general anarchy that I could hear.

And just how do you identify the LIDS? You can't. They don't have the guts to use their own calls. The whole thing is unbelievable and my faith in hams is quickly fading.

But how many of them know code vs just looking at the cluster frequency and sending gibberish or having the computer send swear words for them? After all, was it this bad when you had to pass a CW test to get on any HF?

And people wonder why I took an interest in
VHF/UHF/microwave weak-signal work. It's a different world up there. I have
yet to encounter a lid above 144 MHz on CW/SSB.
Anyway, we supposedly have a few weeks to try to work this one. KA9FOX
evidently got lucky and worked them on the first call on 20 CW. I will
listen tonight on the low bands and see what kind of signals they are
getting into the Black Hole.

I supposably heard FT5GA this morning on 7002 around 2230 – 2300z they were not strong here.

Didn't hear them sign once, though there was quite a bit of QRM happening. Though their signals were down here (not sure if they have a directional antenna on 40m) there were some tremendously good sigs coming in LP from the states! Also heard LP USA on 20m around the same time...

That's right Lance. For them being just 7000km
away, they were extremely weak. I would have
expected S9+ signals but mother nature decided otherwise.

Likewise, I did not hear them identify at all.
The spots on the cluster said it was FT5GA but it
could have been anyone. I thought it was a rule
that a station should identify periodically.
Obviously not in that part of the world.

Cheers, Alek

PS:Don't need 'em but would like just one cw contact.

They were surprisingly weak on 40m here around 0000z. I think the MUF may have been too low for the path. When they went to 80m around 0040z, they were noticeably stronger. The operator was an excellent low band op and seemed to be hearing quite well. I first heard them in the noise calling a PY2 and then I called, not expecting him to reply but he answered immediately.

For those with a decent RX antenna and TX signal, they were very workable into the Midwest. For some reason they went QRT around 0215z which was 30 minutes before sunrise. They gradually built in strength from 0040z and I would have expected a good sunrise peak if they had stayed.

73 & GL!

Bill W4ZV (now 7O, BS7H and P5 to finish 80m)

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 259 Issued at 2200Z on 16 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 15/2100Z
to 16/2100Z: Solar activity was very low. No flares were observed.
The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low.
IIA. Geophysical Activity Summary 15/2100Z to 16/2100Z:
The geomagnetic field was predominantly quiet with an isolated
unsettled period at mid latitudes from 0300Z-0600Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain quiet with isolated unsettled levels for day one
and day two (17-18 September). This activity is due to a recurrent
coronal hole high speed stream. On day three (19 September), the
geomagnetic field is expected to return to quiet levels.
III. Event Probabilities 17 Sep-19 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 16 Sep 069
Predicted 17 Sep-19 Sep 069/069/070
90 Day Mean 16 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 15 Sep 004/005
Estimated Afr/Ap 16 Sep 007/007
Predicted Afr/Ap 17 Sep-19 Sep 007/010-005/008-005/005
VI. Geomagnetic Activity Probabilities 17 Sep-19 Sep
A. Middle Latitudes

Active 15/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

I was away from home till about 0230Z and couldn't find them (or any pileup) on any band then. However, I did barely hear 3B8CF on 40m. I heard someone else work him who could evidently hear him better than I could. I did not take that as a good sign. Jacky is usually copyable by me on 40m.

Anyone have a clue why someone holds the dit paddle down incessantly on the FT5GA guys? I can't fathom a reason. Maybe it is the "I got them so I want to ensure as few as possible others get through" thought process.

With no serious DXpeditions recently, one would think Hams would welcome the chance to work a pileup. Guess it only takes one disgruntled operator.

There are some insane people out there. Some of them apparently get ham licenses.

Someone last night was sending "OBAMA" over and over on 7002. I don't believe the FT5 was active at the time. But that's totally nuts. Absolutely non-sequitur and pointless.

I hope the DXpedition ops get going and really crank out the QSO's. I hope the lids give up. I hope those of us who actually want to work them and then get on with the rest of our lives without being evil or malicious get the chance.

The amount of intentional QRM and disgusting notes in cluster spots associated with the FT/G dxpedition seems like an all-time low.

Perhaps the DXCluster network should be configured to not report spots for major DXPeditions.

I was a proponent of this 10 years ago, Dave. In fact, the first DX Cluster software I used was written by KH2D and it would not pass spots on to the users of any stations within 15 minutes of the previous spot (on the same frequency, +- 2 or 3 KHz.)

However, there are now several major players in the DX Cluster software writing game. They all pass spots between each other, Getting agreement between all the authors and all the SYSOPs on such a drastic move would be virtually impossible, I believe. I could stop all references to the current DXpedition on my VE1DXI node, but that would only mean most of my users would telnet to another cluster. It is impossible to co-ordinate such a policy unless you are the sole author of the package.

The other phenomena at work here is the underlying belief that more is always better. If one spot of FT5GA is good, then 1000 spots must be better. Every second person who works them has to re-spot them and tell us where they worked them. This brag spotting serves no purpose as the QSX frequency has always changed by the time it propagates to the users, and they don't care if you or I worked the DX.

This was prevented in KH2D's software (no longer available.) It seemed to be an unpopular feature. Users said they wanted to re-spot the DX to put the QSL manager in the comment field, etc. The abuse of the DX Cluster system by turning it into a global chat line to anonymously insult other Hams in real time is an unfortunate and unexpected consequence of technology. I fear the barn door is open for good.

That is a good approach, Joey. The hurdle I see, as I explained to Dave, AA6YQ, is that it would take agreement between a number of DX Cluster authors and SYSYPs (and their power users) who support this huge network with untold time and a lot of $$. There would also be pressure not to do it from users who like comments.

I'd like to see it happen, but the logistics of implementing such a change are formidable, to say the least.

I have never completely understood the resentment that some people hold towards DXers or contesters, and the resulting interference that occurs because of it. There are a couple of facets in ham radio that I think are just plain stupid, but I ignore them as best I can, instead of interfering with them or trying to ruin it for those who do engage in them.

Its not the "brag spotting" I'm out to eliminate. In the case of FT5GA, there would be no spots of FT5GA.. Jammers and policeman would actually have to find the DX, which would likely reduce the problem by a factor of 10. The DX could QSY, and the remaining jammers would have to find them again; no fun.

It would be best if the cluster network agreed to implement this.

Sometimes it helps if someone posts a QSX for the DX. I have heard DXpeditions, particularly on 20 and 30 meters near the band closing time, where the DXpedition was the only signal I heard on the whole band. I could hear them working a pileup but couldn't hear the pileup. Sometimes they would say "UP 3" etc. and I'd call there. But otherwise, unless someone spotted "wrkd 7 up" or whatever, I'd just be guessing. Sometimes that worked and sometimes not.

We have a couple weeks to work these guys (hopefully). I don't know why so many people think they HAVE to work them on the first day. If I get one QSO with them by the time they go QRT, I'll be happy.

SB DX ARL ARLD037
ARLD037 DX news

This week's bulletin was made possible with information provided by DL1FX, NC1L, QRZ DX, the OPDX Bulletin, DXNL, 425 DX News, The Daily DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

VIET NAM, 3W. A group of operators will be QRV from three island groups as XV6RRC from Ngu Island, IOTA AS-185, XV7RRC from Cham Island, IOTA AS-162, and XV3RRC from Tam Island, IOTA AS-157, on various days from September 24 to October 1. Activity will be 160 to 10 meters with two stations active simultaneously. QSL all calls direct via RZ3EC.

MADAGASCAR, 5R. Daniel, DF8UO is QRV as 5R8UO until September 20. Activity is on 40 to 10 meters using mainly CW and various digital modes. QSL to home call.

OMAN, A4. San, VU2CEO and Manoj, VU2MCJ along with two SWL operators will be QRV as A45WH/p from Masirah Island, IOTA AS-014, from September 22 to 24. Activity will be on 160, 80, 40, 30 and 20 meters using CW, SSB and digital modes. QSL direct to A45WH.

CANARY ISLANDS, EA8. Heinze, DL7HKL is QRV as EA8/home call from La Gomera Island. IOTA AF-004, until September 28. Activity is holiday style on 20, 15 and 10 meters using SSB and especially during his evening hours. QSL to home call.

ETHIOPIA, ET. Jim, WU0I is staying in Addis Ababa momentarily and should soon be QRV as ET3JD in October. Activity will be on 40 to 15 meters using CW, SSB and PSK31. QSL direct to ET3JD.

TAJIKISTAN, EY. Ken, K4ZW has been QRV as EY8/home call on 20 meters around 1200z and 15 meters around 0900z. QSL to home call.

MAYOTTE, FH. Willi, DJ7RJ will be QRV as TO7RJ from September 22 to October 25. The last three days of his activity he will be QRV as FH/DJ7RJ. Activity will be on 160 to 10 meters, and possibly 6 meters, using CW and SSB. QSL to home call.

GLORIOSO ISLANDS, FR/G. A group of operators are QRV as FT5GA until October 10 from Grand Glorieuse Island, IOTA AF-011. Activity will be on 160 to 10 meters using CW, SSB, RTTY and PSK31 with four stations active simultaneously. QSL via F5OGL.

OGASAWARA, JD1. Operators JO2JDJ and JI5RPT will be QRV as JD1BLP and JD1BLY, respectively, from Chichijima, IOTA AS-031, from September 19 to 22. Activity will be on 40 to 6 meters using CW, SSB, digital modes and satellites. QSL to home calls.

ALAND ISLAND, OH0. Tomi, OH6EI will be QRV as OH0Z a Single-Op/All-Band/High-Power entry in the Scandinavian Activity CW Contest. QSL via W0MM.

GREECE, SV. Fred, PA1FJ is QRV as SV8/PA1FJ/p from Samos Island, IOTA EU-049, until October 2. Activity is on 40 to 6 meters using QRP power and SSB. QSL to home call.

TUVALU, T2. Gerben, PG5M is QRV as T2G until September 23. Activity is on the HF bands at various times using CW. QSL to home call.

SAN MARINO, T7. Operators DL1ZBO, DK9FEC, DJ5TT and DL1FX will be QRV as T70A from September 24 to 27. Activity will be on 80 to 10 meters using CW, SSB and various digital modes. This includes an entry in the upcoming CQ WW RTTY contest. QSL via operators' instructions.

TURKEY, TA. Members of the ''TC Special Wireless Activity Team'' will be QRV as TC3BLH from September 19 to 24 from Balyos Lighthouse in the Marmara Sea. Activity will be mainly on 40 and 20 meters using SSB. QSL via operators' instructions.

NIUE, ZK2. Koji, JM1CAX will be QRV as ZK2NX from September 19 to 25. He will be active on all HF bands, with a preference to the newer bands, using mainly CW with some SSB. QSL to home call.

CHATHAM ISLAND, ZL7. Bill, N7OU is QRV as ZL7/home call until September 30. Activity is on 80 to 10 meters using CW. QSL to home call.

THIS WEEKEND ON THE RADIO. The ARRL 10 GHz and Up Contest, North American SSB Sprint, Scandinavian Activity CW Contest, NCCC Sprint, AGB NEMIGA CW Contest, SARL VHF/UHF Contest, CIS DX QPSK63 Contest, South Carolina QSO Party, QRP Afield, Washington State Salmon Run, Feld Hell Sprint and QCWA Fall QSO Party will certainly keep contesters busy this weekend. The Run for the Bacon QRP CW Contest and 144 MHz Fall Sprint are scheduled for September 21. The SKCC CW Sprint and RSGB 80-Meter Club CW Sprint are scheduled for September

23. Please see September QST, page 78, and the ARRL and WA7BNM
contest web sites for details.

I was actually of the opinion that the "dit maker" was someone who couldn't work them, so intended that none of the rest of us could do so either!

Did manage to get through on 20 CW (and it turned out NOT to be a pirate!). Struggled this afternoon on 20 SSB (through the zoo!) for a couple of hours and never could get through. For the last hour or so they were working a decent number of NA ops, but I couldn't find the right spot!

I agree with the first part, but disagree with the second part - sort of!

In the case of FT5GA this afternoon, with or without posts, it was difficult to discern any recognizeable pattern by the operator. However, in many operations, the more astute observer (listener!) might garnish some kind of pattern from those posting where they worked the DXpedition.

Posts I have made showing where I worked the station is *never* done as a brag post, but as a post that might help others identify how high (or how low) he was listening at the time; does he tend to stay near a given frequency; does he appear to be moving up/down, etc.

I *am* willing to admit you might be right, but my posts were never intended to be bragging posts. Now that my wife is a DXer, I only have bragging rights in her direction! hi hi ("Honey, if you learned the code, you'd have more chances to work 'em!")

I found the operator on 20 SSB was painstakingly slow, likely due to the intense QRM from those calling from both Europe and North America. While I could hear him, he never got stronger than S-8 and by late afternoon he was down to S-4/5 and working NA much farther south of me. I'm still waiting for the on-line logs to come up to see if I'm there for a very sketchy contact made last evening on 20 CW, where I don't need FT5GA.

The biggest problem everyone faced this afternoon on 20 SSB was the extremely wide split and the jammers and guys who either deliberately or accidentally called on the transmit frequency. Of course, the out-of-turn callers didn't help and the FT5 operator's lack of rhythm made it difficult to snag a QSO.

I heard some European this afternoon using the "F" word repeatedly and last night on 20 and 40 CW I heard the "A*hole" word spelled out along with many "f-you" epithets. I could not hear them last night on 40, although I could hear the pile-up. I knew that 3B8CF was there but he wasn't strong enough for me to call.

Good luck to all who need it for a new one. I'm just looking for some band and mode QSOs.

Strange, isn't it? It seems that those who can, do and those who can't just cause QRM!

It always seems to be the same weird group - they raise caine when the DXpedition first comes on the air. Then, after a few days, when the DXpeditioners seems persistent, they fold their tents and (usually!) sort of disappear.

Listen for me in Mississippi this coming week. Marsha and I are trying to put out all 82 counties starting Monday morning. We need to be back home by mid Saturday afternoon, so if I can't finish, I'll have a small cluster (hopefully all together) to finish up later. It will be all CW on 20, 30 and 40.

Fortunately, it doesn't happen very often, but, once in a great while, a planned 10-day or two week dxpedition gets drastically shortened. This has happened only two or three times that I was aware of. Just two or three years ago, a group from Venezuela went to Aves Island for a planned 10 to 14-day trip. They were on for two or three days and then the Venezuelan navy evacuated them because of a threatening storm (Aves Island being about 1 foot above sea level!)

In situations like that, the guy who waited got left holding the bag! Again, those are truly rare. Sometimes it's amazing how easy they get in the latter stages of their trip.

Sometimes, like Spratly back in the 70s, the dxpeditioners got shot at (a couple DXers died - I think at least one of them died of exposure after being adrift at sea for several days). Several of the planned ops opted out of the trip - one guy I knew stayed in Brunei rather than make another attempt to land and operate.

It happened back in 2003 or so with the 3C0 DXpedition when the Spanish navy ran them off the island. Too bad 3C0 wasn't a French possession-the French navy would have surrendered to the DXpedition team.

According to cluster reports, one of the ops yesterday appears to be a pirate. There are a number of ops who reported working FT5GA only to NOT be in the log today. I had the same fear and the URL I was using showed the log to still be empty. Then someone steered me to another link with the logs and my call is there.

I agree with your assessment of the 20 SSB op this afternoon. He sounded very workable in mid-afternoon but bounced around like crazy. There didn't seem to be much in the way of "quiet spots" to hunker down and call - everyone was calling from everywhere!

This evening they are being reported on 40 CW, but all I can hear from here are the jerks. I can hear the pile (lots of US calls) but have yet to hear the FT5 - such is life. Same on 80. The EU stns are bitchin' cuz FT5GA sent "NA only" but I can't hear 'em!

Art,

Good luck on the trip. Will be looking for you. I am not a hard core county hunter, but with the sunspots the way they are you have to find something to keep oneself interested until the next sunspot appears.

Strange, isn't it? It seems that those who can, do and those who can't just cause QRM!

It always seems to be the same weird group - they raise caine when the DXpedition first comes on the air. Then, after a few days, when the DXpeditioners seems persistent, they fold their tents and (usually!) sort of disappear.

Listen for me in Mississippi this coming week. Marsha and I are trying to put out all 82 counties starting Monday morning. We need to be back home by mid Saturday afternoon, so if I can't finish, I'll have a small cluster (hopefully all together) to finish up later. It will be all CW on 20, 30 and 40.

Subject: Re: [DX-IS] Re: Glorioso QRM

It happened back in 2003 or so with the 3C0 DXpedition when the Spanish navy ran them off the island. Too bad 3C0 wasn't a French possession-the French navy would have surrendered to the DXpedition team.

Fortunately, it doesn't happen very often, but, once in a great while, a planned 10-day or two week dxpedition gets drastically shortened. This has happened only two or three times that I was aware of. Just two or three years ago, a group from Venezuela went to Aves Island for a planned 10 to 14-day trip. They were on for two or three days and then the Venezuelan navy evacuated them because of a threatening storm (Aves Island being about 1 foot above sea level!)

In situations like that, the guy who waited got left holding the bag! Again, those are truly rare. Sometimes it's amazing how easy they get in the latter stages of their trip.

Sometimes, like Spratly back in the 70s, the dxpeditioners got shot at (a couple DXers died - I think at least one of them died of exposure after being adrift at sea for several days). Several of the planned ops opted out of the trip - one guy I knew stayed in Brunei rather than make another attempt to land and operate.

Al,

Why were you in the 20 meter CW pileup if you didn't need them on 20 meters? I was in that pileup, I need it on 20 meters, and I didn't work them. If all the DX'ers that had them on 20 meters would QRX, maybe some of us who need them on 20 meters could work them.

Nelson, KU0A

Subject: RE: [DX-IS] Re: Glorioso QRM

I found the operator on 20 SSB was painstakingly slow, likely due to the intense QRM from those calling from both Europe and North America. While I could hear him, he never got stronger than S-8 and by late afternoon he was down to S-4/5 and working NA much farther south of me. I'm still waiting for the on-line logs to come up to see if I'm there for a very sketchy contact made last evening on 20 CW, where I don't need FT5GA.

The biggest problem everyone faced this afternoon on 20 SSB was the extremely wide split and the jammers and guys who either deliberately or accidentally called on the transmit frequency. Of course, the out-of-turn callers didn't help and the FT5 operator's lack of rhythm made it difficult to snag a QSO.

I heard some European this afternoon using the "F" word repeatedly and last night on 20 and 40 CW I heard the "A*hole" word spelled out along with many "f-you" epithets. I could not hear them last night on 40, although I could hear the pile-up. I knew that 3B8CF was there but he wasn't strong enough for me to call.

Good luck to all who need it for a new one. I'm just looking for some band and mode QSOs.

I was actually of the opinion that the "dit maker" was someone who couldn't work them, so intended that none of the rest of us could do so either!

Did manage to get through on 20 CW (and it turned out NOT to be a pirate!). Struggled this afternoon on 20 SSB (through the zoo!) for a couple of hours and never could get through. For the last hour or so they were working a decent number of NA ops, but I couldn't find the right spot!

Hey Nelson,

Yes, I heard you in that pile-up!!! I just checked the on-line log and I'm not there and neither is VO1SA whom I heard being "worked." Apparently this is the pirate who was reported so you just go ahead and work 'em and I'll stay out of your way at least until Sunday :-).

From: Alan Leith
Topic: 10820 Message: 10852

Well, it appears that nobody is in the log. Does anyone have an address where the FT5GA logs are located? Maybe I am there, after all.

And, BTW, not a hint of them on 40 or 80M CW at the moment.

Subject: [DX-IS] Re: Glorioso QRM

According to cluster reports, one of the ops yesterday appears to be a pirate. There are a number of ops who reported working FT5GA only to NOT be in the log today. I had the same fear and the URL I was using showed the log to still be empty. Then someone steered me to another link with the logs and my call is there.

I agree with your assessment of the 20 SSB op this afternoon. He sounded very workable in mid-afternoon but bounced around like crazy. There didn't seem to be much in the way of "quiet spots" to hunker down and call - everyone was calling from everywhere!

This evening they are being reported on 40 CW, but all I can hear from here are the jerks. I can hear the pile (lots of US calls) but have yet to hear the FT5 - such is life. Same on 80. The EU stns are bitchin' cuz FT5GA sent "NA only" but I can't hear 'em!

Thanks for that URL, Paul. Nope, I'm not there and neither is Rick. So I guess he worked the pirate and I might have worked the pirate.

Back to the drawing board.

Subject: RE: [DX-IS] Re: Glorioso QRM

I found the operator on 20 SSB was painstakingly slow, likely due to the intense QRM from those calling from both Europe and North America. While I could hear him, he never got stronger than S-8 and by late afternoon he was down to S-4/5 and working NA much farther south of me. I'm still waiting for the on-line logs to come up to see if I'm there for a very sketchy contact made last evening on 20 CW, where I don't need FT5GA.

The biggest problem everyone faced this afternoon on 20 SSB was the extremely wide split and the jammers and guys who either deliberately or accidentally called on the transmit frequency. Of course, the out-of-turn callers didn't help and the FT5 operator's lack of rhythm made it difficult to snag a QSO.

I heard some European this afternoon using the "F" word repeatedly and last night on 20 and 40 CW I heard the "A*hole" word spelled out along with many "f-you" epithets. I could not hear them last night on 40, although I could hear the pile-up. I knew that 3B8CF was there but he wasn't strong enough for me to call.

Good luck to all who need it for a new one. I'm just looking for some band and mode QSOs.

I was actually of the opinion that the "dit maker" was someone who couldn't work them, so intended that none of the rest of us could do so either!

Did manage to get through on 20 CW (and it turned out NOT to be a pirate!). Struggled this afternoon on 20 SSB (through the zoo!) for a couple of hours and never could get through. For the last hour or so they were working a decent number of NA ops, but I couldn't find the right spot!

10856. Re: Glorioso QRM

Yahoo group: DX-IS (2009)
Date: 2009-09-18 02:27:03 UTC
From: n3oxdan
Topic: 10820 Message: 10856

"Why were you in the 20 meter CW pileup if you didn't need them on 20 meters? I was in that pileup, I need it on 20 meters, and I didn't work them. If all the DX'ers that had them on 20 meters would QRX, maybe some of us who need them on 20 meters could work them."

He's allowed to bust the pileup and work a rare one just because he wants to.

Besides, one person doesn't make or break your chances. That's not how pileups work. Your job usually is to get through a mass of callers that will be rather large no matter who in particular is in it. Trust me, most of the people in the pileup need FR/G on 20m, because most of the people in the pileup need FR/G, period. Don't blame DXers who just like to work DX when it comes up for the fact that you haven't worked that particular DX.

It's bad form to work the *same expedition* over and over and over again on the same band, but none of us have to consult our tally every time we feel like calling a rare one. If FT5GA comes in here on 15m I'll work 'em even though I've worked FR/G on 15m. Why the heck not? I don't even really care about the awards. I don't even have a card for my FR/G contact (time will tell if I regret this, but I should have plenty of time when I get back from the shore here to work FT5GA)

But I worked Glorioso years ago and didn't bother with the card because I liked DXing, I liked DXCC counters as a way to track my own progress, and didn't so much care about confirmations. There's this island, see, and very rarely is anyone there with a radio. I want to contact such places, and the mere fact that I'm in a pileup proves I don't entirely care whether I'm "stealing someone else's chance." Plus, I want to contact the rarest places even if it's a repeat.

There have been times when I'd wished I'd reached the DX before the hordes set in, where I cursed the pileup, but I can't imagine very many where I *probably* could have got through if only the pileup was 10% to 20% smaller, and certainly very few cases where I would have got through if not for one single ham.

Honestly, most of the pileups I've failed to get through were one of a few things:

First possibility: I was too weak, period. Had I been the only one, the DX would have CQed in my face. BS7H was *probably* one of these, with my 100W and Moxon and 30 minutes of hearing them clearly one day. TX5C on 160m was a CONFIRMED one of these. I *almost* made it, they stuck with me very tenaciously but in the end I could not get across that I was N3OX not N3MX.

Second possibility: I was insufficiently motivated. Even if you're on a roll, in a rhythm, and understand the pileup, it can take a long time to get through. It's even worse if you're NOT on a roll and in a rhythm. I walked away from a couple of pileups on the first Swains Island expedition because they were so diffuse across 50kHz of band that I was hopeless and just not having any fun. I almost wore my dial out trying to find the correct frequency where they were listening. This was an all time new one and I just gave up. Wasn't worth it, I'd get 'em later. I did, on 17m instead of 20m.

Third possibility: The DX wasn't on long enough, and/or I screwed up. There's a probability per unit time that N3OX is going to get through a massive pile. I'm not the strongest in the bunch for sure, but I feel like I do pretty well overall (I usually have fun doing it and don't give up so I can't be too frustrated on average). But as a smaller station, I'm not going to dominate the pileup in a way that I can just tune in, key up, and be done. I missed JD1BMM for an all time new the other night because of this... well, that and the fact that I forgot JD1BMM was on Minami-Toroshima at first, so Possibility #2 made me lackluster for a while.

But once I started calling in earnest, it was about 15 minutes before JD1BMM went QRT. Another half hour and I bet I would have been in the log, but I just didn't have enough chances and a simplex SSB pileup doesn't allow much trickery.

Now, in this third situation, it is possible that ONE ham could have "taken my slot," but that's it. However, I wasted a bunch of opportunities beforehand. I was ill prepared. Had I been thinking clearly about JD1BMM and the fact that I still need M-T for a new one, I would have had a DXLab SpotCollector alert set and I would have been scouring the AA contest from the first time I realized he was in the contest. I wouldn't have waited, not only until the spot went out, but long after while I looked for "other things I needed" down on much easier to work 20m CW thinking that JD1BMM was on Ogasawara. It wasn't really my slot to have, now was it?

The way I see it, from the perspective of a smaller station who rarely misses a band slot I try for out of a big DXPedition, getting through the pileup has very little to do with going head-to-head with *anyone*. If you do that in many cases, you're doing it wrong :-) Unless you're MASSIVELY louder than everyone, you need your call to ring out relatively in the clear to get through the pileup. Most of the big ones I bust, at least on CW, I do by putting myself on a frequency where I know the DX listens but currently doesn't have any other callers that I can hear. If I have to call on the same frequency as others, I work on my timing. Ideally, I don't compete with anyone... I go around or through, not over the top How can someone steal my slot then?

From: Alan Leith
Topic: 10820 Message: 10857

I find myself calling blindly from time to time and I have to stop myself and re-evaluate the situation. Once I do that, I usually make a QSO. In the case of FT5GA on 20M CW, there was such pandemonium that I would have gone away about the time I made the "contact." But since it was so tenuous and seems to have been with a pirate, I went away shaking my head and did not return.

My usual way of doing this DX thing is to spend 15 minutes max in the pile-up. If the operation is half-decent (and so far, this one isn't), I'll come back later. Sometimes I never come back, most times I do.

When there's nothing new to work, filling in band and mode totals is all there is to keep me happy. FT5 is a challenge because it is there. If it is there and it interests me, I'm there for one QSO per band and mode, whether I have it or not. Usually, I'm in and out in a flash and haven't bothered anyone. Apparently, this time I did.

But, I agree with you 100%. Thanks for a wonderful "tirade," Dan.

The DX Cluster is just a tool which can be used by anyone with a computer and I don't believe it's the problem....

As far as the "kids, LIDs, and space cadets" that seem to come out of their holes to QRM DXpeditions;
I recall the same stuff happening to FO0XC back in 1978. There were other DXpeditions before and since the
advent of the personal computer, internet, and DXcluster / DXSpider networks which have had problems similar
to those happening to FT5GA.

As in Military Communications, the best thing to do is "do not acknowledge intentional interference". Doing so only
reveals the effectiveness of the intentional interference, thereby providing encouragement to the interfering station's operator.
When the stress caused by the interfering station becomes too great; use the OFF button, QSY, or find something else to do...
take a walk, read a book.

There will be better days and more DX for the Deserving.... you are a Deserving DXer, aren't you?

Subject: Re: [DX-IS] Glorioso QRM

Sometimes it helps if someone posts a QSX for the DX. I have heard DXpeditions, particularly on 20 and 30 meters near the band closing time, where the DXpedition was the only signal I heard on the whole band. I could hear them working a pileup but couldn't hear the pileup. Sometimes they would say "UP 3" etc. and I'd call there. But otherwise, unless someone spotted "wrkd 7 up" or whatever, I'd just be guessing. Sometimes that worked and sometimes not.

We have a couple weeks to work these guys (hopefully). I don't know why so many people think they HAVE to work them on the first day. If I get one QSO with them by the time they go QRT, I'll be happy.

> 73,
>
> Dave, AA6YQ

I was a proponent of this 10 years ago, Dave. In fact, the
first DX Cluster software I used was written by KH2D and it would not
pass spots on to the users of any stations within 15 minutes of the
previous spot (on the same frequency, +- 2 or 3 KHz.)

However, there are now several major players in the DX Cluster
software writing game. They all pass spots between each
other, Getting agreement between all the authors and all the SYSOPs
on such a drastic move would be virtually impossible, I believe. I
could stop all references to the current DXpedition on my VE1DXI
node, but that would only mean most of my users would telnet to
another cluster. It is impossible to co-ordinate such a policy
unless you are the sole author of the package.

The other phenomena at work here is the underlying belief that
more is always better. If one spot of FT5GA is good, then 1000 spots
must be better. Every second person who works them has to re-spot
them and tell us where they worked them. This brag spotting serves
no purpose as the QSX frequency has always changed by the time it
propagates to the users, and they don't care if you or I worked the DX.

This was prevented in KH2D's software (no longer
available.) It seemed to be an unpopular feature. Users said they
wanted to re-spot the DX to put the QSL manager in the comment field,
etc. The abuse of the DX Cluster system by turning it into a global
chat line to anonymously insult other Hams in real time is an
unfortunate and unexpected consequence of technology. I fear the
barn door is open for good.

From: Alan Leith
Topic: 10820 Message: 10859

Before I head off to bed, I have to comment that the cluster is becoming less and less reliable for the casual DXer. That's because of the errors that appear on it -- wrong callsigns, typos, stupid and hurtful comments -- and the constant repeats of spots. As well, there are the brag spots.

There are spots for everyday Europeans posted by east coast Europeans, spots by Europeans for backyard stuff, etc. Unless the bands are in terrible shape, I hate seeing my call come up on the cluster from a DL, F, G or other western European. I KNOW I get into Europe very well. After all, there's absolutely nothing but water between me and them.

As for deliberate QRM, in its many forms, I agree with Gary. Ignore the jerks. Don't respond to their childishness by acknowledging their presence. It may take a few minutes, but they'll disappear out of frustration that no one recognizes their maliciousness. As for the guys who call on the wrong VFO (I've done it myself), I don't know how to handle them. However, someone always does.

And as for the FT5GA operators, judging from the numbers showing on their website, I'd say they're absolutely overwhelmed by what they're hearing. Also, we don't know what QRN they're experiencing, or what weather conditions they're working under.

Subject: Re: [DX-IS] Glorioso QRM

The DX Cluster is just a tool which can be used by anyone with a computer and I don't believe it's the problem....

As far as the "kids, LIDs, and space cadets" that seem to come out of their holes to QRM DXpeditions;
I recall the same stuff happening to FO0XC back in 1978. There were other DXpeditions before and since the
advent of the personal computer, internet, and DXcluster / DXSpider networks which have had problems similar
to those happening to FT5GA.

As in Military Communications, the best thing to do is "do not acknowledge intentional interference". Doing so only
reveals the effectiveness of the intentional interference, thereby
providing encouragement to the interfering station's operator.
When the stress caused by the interfering station becomes too great; use the OFF button, QSY, or find something else to do...
take a walk, read a book.

There will be better days and more DX for the Deserving.... you are a Deserving DXer, aren't you?

Subject: Re: [DX-IS] Glorioso QRM

Sometimes it helps if someone posts a QSX for the DX. I have heard DXpeditions, particularly on 20 and 30 meters near the band closing time, where the DXpedition was the only signal I heard on the whole band. I could hear them working a pileup but couldn't hear the pileup. Sometimes they would say "UP 3" etc. and I'd call there. But otherwise, unless someone spotted "wrkd 7 up" or whatever, I'd just be guessing. Sometimes that worked and sometimes not.

We have a couple weeks to work these guys (hopefully). I don't know why so many people think they HAVE to work them on the first day. If I get one QSO with them by the time they go QRT, I'll be happy.

> Dave, AA6YQ

I was a proponent of this 10 years ago, Dave. In fact, the first DX Cluster software I used was written by KH2D and it would not pass spots on to the users of any stations within 15 minutes of the previous spot (on the same frequency, +- 2 or 3 KHz.)

However, there are now several major players in the DX Cluster software writing game. They all pass spots between each other, Getting agreement between all the authors and all the SYSOPs on such a drastic move would be virtually impossible, I believe. I could stop all references to the current DXpedition on my VE1DXI node, but that would only mean most of my users would telnet to another cluster. It is impossible to co-ordinate such a policy unless you are the sole author of the package.

The other phenomena at work here is the underlying belief that more is always better. If one spot of FT5GA is good, then 1000 spots must be better. Every second person who works them has to re-spot them and tell us where they worked them. This brag spotting serves no purpose as the QSX frequency has always changed by the time it propagates to the users, and they don't care if you or I worked the DX.

This was prevented in KH2D's software (no longer available.) It seemed to be an unpopular feature. Users said they wanted to re-spot the DX to put the QSL manager in the comment field, etc. The abuse of the DX Cluster system by turning it into a global chat line to anonymously insult other Hams in real time is an unfortunate and unexpected consequence of technology. I fear the barn door is open for good.

I've yet to hear anything that I'd try calling FT5GA on phone or CW.
Mostly its due to lack of decent signals AND a good friend nearby
who does NOT have a Glorioso QSO/QSL while I have one from
FR5ZQ in 2000.

I'll continue to wait for a good opportunity.... probably after my friend has
a "new one" in his log.

Subject: RE: [DX-IS] Re: Glorioso QRM

I found the operator on 20 SSB was painstakingly slow, likely due to the
intense QRM from those calling from both Europe and North America. While I
could hear him, he never got stronger than S-8 and by late afternoon he was
down to S-4/5 and working NA much farther south of me. I'm still waiting
for the on-line logs to come up to see if I'm there for a very sketchy
contact made last evening on 20 CW, where I don't need FT5GA.

The biggest problem everyone faced this afternoon on 20 SSB was the
extremely wide split and the jammers and guys who either deliberately or
accidentally called on the transmit frequency. Of course, the out-of-turn
callers didn't help and the FT5 operator's lack of rhythm made it difficult
to snag a QSO.

I heard some European this afternoon using the "F" word repeatedly and last
night on 20 and 40 CW I heard the "A*hole" word spelled out along with many
"f-you" epithets. I could not hear them last night on 40, although I could
hear the pile-up. I knew that 3B8CF was there but he wasn't strong enough
for me to call.

Good luck to all who need it for a new one. I'm just looking for some band
and mode QSOs.

Dan,

What are you smoking? I'm #1 Honor Roll and I don't need your tirade. I need Glorioso on RTTY and a few band countries including 20 meters. I don't jump into rare pileups unless I really need a new mode or band country, so as not to deny others the opportunity to work the DX. I kind of expect other DX'ers to reciprocate. Unless you're also #1 Honor Roll, crawl back under your rock.

Subject: [DX-IS] Re: Glorioso QRM

"Why were you in the 20 meter CW pileup if you didn't need them on 20 meters? I was in that pileup, I need it on 20 meters, and I didn't work them. If all the DX'ers that had them on 20 meters would QRX, maybe some of us who need them on 20 meters could work them."

He's allowed to bust the pileup and work a rare one just because he wants to.

Besides, one person doesn't make or break your chances. That's not how pileups work. Your job usually is to get through a mass of callers that will be rather large no matter who in particular is in it. Trust me, most of the people in the pileup need FR/G on 20m, because most of the people in the pileup need FR/G, period. Don't blame DXers who just like to work DX when it comes up for the fact that you haven't worked that particular DX.

It's bad form to work the *same expedition* over and over and over again on the same band, but none of us have to consult our tally every time we feel like calling a rare one. If FT5GA comes in here on 15m I'll work 'em even though I've worked FR/G on 15m. Why the heck not? I don't even really care about the awards. I don't even have a card for my FR/G contact (time will tell if I regret this, but I should have plenty of time when I get back from the shore here to work FT5GA)

But I worked Glorioso years ago and didn't bother with the card because I liked DXing, I liked DXCC counters as a way to track my own progress, and didn't so much care about confirmations. There's this island, see, and very rarely is anyone there with a radio. I want to contact such places, and the mere fact that I'm in a pileup proves I don't entirely care whether I'm "stealing someone else's chance." Plus, I want to contact the rarest places

even if it's a repeat.

There have been times when I'd wished I'd reached the DX before the hordes set in, where I cursed the pileup, but I can't imagine very many where I *probably* could have got through if only the pileup was 10% to 20% smaller, and certainly very few cases where I would have got through if not for one single ham.

Honestly, most of the pileups I've failed to get through were one of a few things:

First possibility: I was too weak, period. Had I been the only one, the DX would have CQed in my face. BS7H was *probably* one of these, with my 100W and Moxon and 30 minutes of hearing them clearly one day. TX5C on 160m was a CONFIRMED one of these. I *almost* made it, they stuck with me very tenaciously but in the end I could not get across that I was N3OX not N3MX.

Second possibility: I was insufficiently motivated. Even if you're on a roll, in a rhythm, and understand the pileup, it can take a long time to get through. It's even worse if you're NOT on a roll and in a rhythm. I walked away from a couple of pileups on the first Swains Island expedition because they were so diffuse across 50kHz of band that I was hopeless and just not having any fun. I almost wore my dial out trying to find the correct frequency where they were listening. This was an all time new one and I just gave up. Wasn't worth it, I'd get 'em later. I did, on 17m instead of 20m.

Third possibility: The DX wasn't on long enough, and/or I screwed up. There's a probability per unit time that N3OX is going to get through a massive pile. I'm not the strongest in the bunch for sure, but I feel like I do pretty well overall (I usually have fun doing it and don't give up so I can't be too frustrated on average). But as a smaller station, I'm not going to dominate the pileup in a way that I can just tune in, key up, and be done. I missed JD1BMM for an all time new the other night because of this... well, that and the fact that I forgot JD1BMM was on Minami-Toroshima at first, so Possibility #2 made me lackluster for a while.

But once I started calling in earnest, it was about 15 minutes before JD1BMM went QRT. Another half hour and I bet I would have been in the log, but I just didn't have enough chances and a simplex SSB pileup doesn't allow much trickery.

Now, in this third situation, it is possible that ONE ham could have "taken my slot," but that's it. However, I wasted a bunch of opportunities beforehand. I was ill prepared. Had I been thinking clearly about JD1BMM and the fact that I still need M-T for a new one, I would have had a DXLab SpotCollector alert set and I would have been scouring the AA contest from the first time I realized he was in the contest. I wouldn't have waited, not only until the spot went out, but long after while I looked for "other things I needed" down on much easier to work 20m CW thinking that JD1BMM was on Ogasawara. It wasn't really my slot to have, now was it?

The way I see it, from the perspective of a smaller station who rarely misses a band slot I try for out of a big DXPedition, getting through the pileup has very little to do with going head-to-head with *anyone*. If you do that in many cases, you're doing it wrong :-) Unless you're MASSIVELY louder than everyone, you need your call to ring out relatively in the clear to get through the pileup. Most of the big ones I bust, at least on CW, I do by putting myself on a frequency where I know the DX listens but currently doesn't have any other callers that I can hear. If I have to call on the same frequency as others, I work on my timing. Ideally, I don't compete with anyone... I go around or through, not over the top How can someone steal my slot then?

I don't know what their schedule is. This is the second night I've gotten home at about 0230Z expecting to hear them on at least one band (or maybe hear a pileup on them) and inttead they just haven't been around at all.

Hopefully they get on during their grayline some time soon.

Marsha struggled for an hour or so on 20SSB. She was constantly complaining about the QRM, verbal abuse, ignorant operators, incessant callers, blah, blah, blah. I grinned at her and told her she was having fun. "If you could get through immediately every time, everyone would want to do it!"

DX is! (sometimes frustrating!)

I just genuinely don't understand. The pileup was spread out maybe 30 kHz wide. The operator would say something like "Delta Lima 2 Papa Whiskey, is that correct?" When you swap VFOs and listen, there are still literally hundreds of people calling. If you call sounds nothing remotely like what the operator asked, what is to be gained by continuing to call?

As ridiculous as it seems, it DOES sometimes make sense that so many are calling when the op does not specify anything, even a partial call. If there are three guys trying to work the station, they each may want to be the one "in the clear" or the "last one heard." But when hundreds are calling, the odds of being in the clear are certainly more remote. But when the op specifically asks for "DL2PW" and tons of OK1, W4, AA4, W3, etc., keep calling, what's the logic?

My first reaction was "Geez! That's certainly a long answer!"

My second reaction was that this should be one of the short chapters in your book! I think your response provides an excellent view into the mindset of the reasonably well-prepared DXer (at a minimum!).

I also remember a year or two back, Paul, VE1DX, made a comment about jumping in to work something he didn't need - "I just couldn't help myself!" There's something about the thrill of jumping in when there's a pileup.

I need FT5GA for an all-time new one so I'll be in there whether Al is in there or not!

> The way I see it, from the perspective of a smaller station who rarely misses a band slot I try for out of a big DXPedition, getting through the pileup has very little to do with going head-to-head with *anyone*. If you do that in many cases, you're doing it wrong :-) Unless you're MASSIVELY louder than everyone, you need your call to ring out relatively in the clear to get through the pileup. Most of the big ones I bust, at least on CW, I do by putting myself on a frequency where I know the DX listens but currently doesn't have any other callers that I can hear. If I have to call on the same frequency as others, I work on my timing. Ideally, I don't compete with anyone... I go around or through, not over the top How can someone steal my slot then?

From: aburkefl
Topic: 10820 Message: 10865

In reading your post, I was reminded of the very first pileup I ever heard. I was a newly licensed General, living in an apartment complex and TVI from my transmitter was rampant. To battle the TVI (I lived on the second floor and a good ground was difficult), I operated in the wee small hours of the morning when most sane people were still in bed.

Some apparently rare or semi-rare station was on 20 CW. I heard the pileup but never actually heard the station they were trying to work. It was so rhythmic it was almost scary. It was so "angry" (it sounded like a swarm of 40 different kinds of bugs!) but it was so "regular." It would start and stop as if everyone was "cued" by their own invisible director. I honestly didn't realize what it was until a few weeks later.

A couple of years down the road (very early 1980s), after having been mentored somewhat by members of the Central Florida DX Association (W4VQ, N4WW, K4XI, AA4MM et al), I had the pleasure of hearing those same sounds again. But this time, from both my lessons and experience, that rhythmic spasm of cacophony known as a CW pileup was like true music. My first vividly remembered CW symphony was orchestrated by DJ6SI. There are many others I can also remember, but one of Baldur's trips through Africa was a memorable exercise in learning the rhythm of a good DX pileup and the skill of the op on the other end. Armed with experience and knowledge (also from things like The Complete DXer - thanks Bob, W9KNI), there were times when I felt like we were shooting fish in a barrel. While other DXers were in there blindly calling and calling and calling and hoping to be one of the deserving, I was listening to his patterns, identifying where he was working - was he moving up, moving down, was he working them on the exact kHz or was he working virtually *any* "in-between" freq? Once the pattern emerged, it was essentially a question of being where he was going and let him "fall into your trap."

Now I must honestly admit I don't remember when was the last time I heard a pileup like that. Despite the same type of pandemonium we're hearing now, both Ducie and Desecheo were memorable for the skills of the ops on the other end.

Maybe once things settle down after a few days, we'll think the FT5GA ops are better too. After all, a cluster post of "BAD OP BAD OP POOR OPERATION" typically translates to "BOO HOO I CAN'T GET THROUGH!"

Additionally:

On their web site there is a note that they must shut down several times daily for current/voltage inspections - the island is run by the French army and they apparently have tight security and strict rules. Tons of these clods on the cluster have access to the internet for the cluster but don't bother to read any info on the web site and when FT5GA suddenly goes QRT, the puzzlement on the cluster just multiplies unnecessarily.

I think they also have a maximum of four stations at FT5GA. To read some of what's on the cluster, one would think the "deserving" expect them to have eight bands going at a time!

Maybe Ducie and Desecheo spoiled us. At one point I almost felt like I could have worked those two on 2 meters! They appeared to be virtually everywhere! In the case of FR/G, after reading all the problems, hoops and hurdles these guys had to go through, those of us who need it for a new one are probably very lucky there's someone there at all!

I know where those jerks on 40M last night came from. Their frequency
was relatively clear. As soon as they said NA, their frequency filled
up with these jerks. Beam direction indicated EU.

These twisted mind guys must figure if they don't work a decent rate of
NA stations, then they will go back to working EU's.

The jerks will get tired....

Zack,

Their webpage indicates they have been working USA from 18 to 23z.
Higher freq bands earlier and lower freq bands later.

10869. Pirates

Yahoo group: DX-IS (2009)
Date: 2009-09-18 13:22:43 UTC
From: tm303
Topic: 10869 Message: 10869

I'd sure like to know the thrill of using a DX call to work several stations on CW. I would think that would be a lot of work for the pirate. Of course, they don't stay on the freq for hours like the real DX ops. I need FT5GA for #330. Any band/mode will do. When I worked "him" on 20 CW at 2240 UTC, I had a bad feeling that this was Slim at the key. The signal was weak and the pileup wasn't bad at all. Should have known that, when a thousand guys leave the freq, that something';s up. But, work them and check the log later. Then, work them again until you get it right. Hopefully, they will be there for the announced time period.

Our window here in the U.P. is quite narrow. It was the same with BS7 but I got them in the 18 minute window on next to the last day.

I won't even try on SSB until the end of the operation. I don't like to listen to the freq cops voices; it's bad enough on CW!

I'd have 333 countries, if I hadn't worked three Slims over the past 50 years. Unfortunately, when the three countries needed were on for an extended period, I was off the air from 1992 until P5/4L4FN came on in 2002. What a surprise to get him on 15 SSB, using my 40 meter 2 element beam on 15. Anything can happen with a little luck and sun spots!!!

Hope that all of us who worked that pathetic pirate can work the "real" FT5GA for a new one.

73,

Tom W8JWN

10870. On DXing FT5GA and others

Yahoo group: DX-IS (2009)

From: CSM(r) Gary Huber - AB9M
Topic: 10870 Message: 10870

The current state of affairs with QRM and poor conditions are just part of the game of DXing if one considers the past and the future. "All things are relevant, some more so than others" according to the Old Timers.

I've made my share of honest mistakes with wrong VFO, calling out of turn, etc. There have been times of great disappointment and those of with a great sense of accomplishment.

Dr. DX, W9KNI, G3SXW, and others have provided great insights on how to play the game and have some success. Experience, some luck and good DXpedition Operators (and DX station design) also have put many (342/336) in my log.

In the past ten years or so I've noticed there are several excellent DX CW operators (including G3SXW and K9ZO) who I can seemingly work in less time than it takes to write this email if we have signals at least 2 S-units above the noise. I don't know if its mental telepathy or some unconscious understanding of how they work through their pile-up but whatever the case it works.

As you obviously know by now, I erroneously told you that no logs had been posted. The link I had was *not* the correct link. W2YJ and someone else provided me with the correct link. I didn't think to check your call - I confess I was too excited about seeing my own! It's #329 for me.

Like you, I not only have worked some Slims over the years, but have also worked some who really were there but, for numerous/various reasons, were not "sanctioned" by the DXCC desk. My most notable is XZ9A back in the 80s.

To all radio amateurs

SB PROP ARL ARLP038
ARLP038 Propagation de K7RA

The STEREO mission (Solar TErrestrial RElations Observatory) web site shows a new display, in which the Sun is visible via an animated image that rotates to show the whole Sun. The small portion on the Sun's far side--which is not yet visible to the spacecraft--is shown as a dark area.

Currently (early Friday, September 18) the animation shows an emerging bright spot, just beyond the direct view from Earth.

Check the animation at http://stereo.gsfc.nasa.gov/.

The zero degree meridian represents the area closest to Earth, appearing in the center of the solar disk as viewed from Earth. The two 90-degree meridians represent the eastern and western horizon, and of course the 180 degree meridian is directly opposite Earth's view.

A full rotation of the Sun relative to Earth takes slightly less than four weeks. The bright spot appears around 120 degrees, or 30 degrees short of the eastern limb, and may represent a new sunspot group. This would be a wonderful event coinciding with the Autumnal Equinox, the first day of Fall, which starts next Tuesday afternoon (September 22) in North America.

Helioseismic readings also show an active region in that area, at 30 degrees south latitude.

Go to http://stereo-ssc.nascom.nasa.gov/where.shtml to see the current position of the two craft relative to Earth. Eventually they will be 180 degrees relative to each other and 90 degrees relative to Earth.

Thursday's prediction shows solar flux values at 70 beginning tomorrow, September 19, and continuing through September 24, then

rising to 72 September 25-28. We haven't reported a weekly solar flux average above 70 in this bulletin since Propagation Forecast Bulletin ARLP020 on May 19, and prior to that there were only four more weeks above 70 in 2009.

These predictions are from NOAA and the US Air Force, which also predicts a planetary A index of 8 for September 18, and only 5 from September 19 to more than a month after.

Geophysical Institute Prague also predicts nothing but quiet geomagnetic conditions for September 18-24.

Steve Jones, N6SJ of Woodside, California hopes to work FT5GA, the Glorioso DXpedition. Glorioso is northwest of Madagascar in the Indian Ocean at approximately 11.5 degrees south latitude, and 47.33 degrees east longitude.

The expedition is expected to be on the air until October 5, and you can look at http://www.dxwatch.com/dxped/ft5ga/# to see who is currently working them.

>From California, this weekend Steve's best bet may be 20 meters from 2100-2330z, and possibly 1600-1700z with lower signals. If we get some sunspot activity next week, for the following weekend 20 meters looks good 1430-1930z, and then 2100-0000z. 15 meters with no sunspots looks bad for this weekend, but on the following weekend if there is more solar activity 1900-2130z looks possible. 17 meters looks very good that following weekend, (September 26) 1630-2300z.

For September 19, 40 meters is possible 0130-0300z, and the following weekend 2330-0330z, again assuming some solar activity in the days prior.

If you live in the Southeast United States, based on projections from Atlanta, your chances look much better than from the West Coast.

On both weekends from Atlanta, 40 meters looks good 2230-0230z, and 20 meters on this weekend 1930-2300z, and lasting an hour later on the next weekend. 15 meters looks promising, assuming some sunspots, 1530-1900z on the next weekend.

>From Ohio, 20 meters looks good both weekends 1900-2300z, and 40 meters 2200-0330z.

Bobby Raymer, N2BR of Cookeville, Tennessee says he enjoys working distant stations despite lack of solar activity. Running 100 watts into a vertical dipole, he usually has better luck with CW than phone. On 17 meters on September 9 he worked OJ0B on CW on Market Reef, and on September 11 using SSB he worked St. Helena Island. He said he works more stations outside the USA than stateside.

Dennis Reagin, W7KB of Vail, Arizona was running 10 watts SSB into a portable vertical antenna on September 6 and enjoyed JA0JHA, getting an S8 report, XE1REM who said he was 10 dB over S9, DL8OBQ/PJ2 in Netherlands Antilles, who gave him an S6 report. He notes he is having fun and working distant stations with no sunspots, low power, patience and persistence.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://www.arrl.org/tis/info/propagation.html. For a detailed explanation of the numbers used in this bulletin, see http://www.arrl.org/tis/info/k9la-prop.html. An archive of past propagation bulletins is at http://www.arrl.org/w1aw/prop/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://www.arrl.org/qst/propcharts/.

Instructions for starting or ending email distribution of this bulletin are at http://www.arrl.org/w1aw.html#email.

Sunspot numbers for September 10 through 16 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. 10.7 cm flux was 69.3, 69.3, 69, 69.1, 69, 69.2, and 68.8 with a mean of 69.1. Estimated planetary A indices were 2, 4, 4, 6, 5, 5 and 6 with a mean of 4.6. Estimated mid-latitude A indices were 2, 2, 1, 4, 4, 4 and 5 with a mean of 3.1.

Practice, practice, practice!

A friend of mine here in Florida is very well known in contesting circles (Dan, K1TO - he was on the WRTC winning team three times in a row!) and is an incredibly proficient operator. Another of my friends rode with him in the Florida QSO Party last year. Naturally, each time they came into a new county, there would be a moderately large pileup of stations outside of Florida who were following a number of us mobiles. Dan and his "partner" (they operated multi-single-mobile), the "partner" was Kevin, N4KM, made over 2,000 QSOs during the FQP. I was astounded. First place single op with driver made around 1200 Qs. I asked Kevin about it and he said "Dan is an animal! He would pick up four and five calls at the same time and work them all right in a row before calling QRZ again!"

A few days later, at a dinner gathering, I asked Dan if there was something I could do to practice picking up more than a call or two at a time. He said "I have no idea. I've been doing this since I was 12."

I agree with you. Roger - G3SXW (and his buddy Nigel (G3TXF?), Baldur - DJ6SI, Vince - K5VT, Ron - ZL1AMO - there must be at least 10 more we could list - they've been doing this long enough that I think it has become second nature to them. Between Visalia and Dayton, I've met some of these guys. Amazingly, virtually every one of them whom I've met personally seem to be very modest people. They can all be quite different, however. Vince - K5VT, is very quiet, rather soft-spoken. By contrast, Dave Collingham - K3LP is quite gregarious, talkative and hysterically funny - in my opinion.

On my own two modest dxpeditions, my attempt was to avoid embarassment while trying to emulate some of these guys!

There is also the CQ magazine DX marathon where your score is based on the number of entities and zones worked each calandar year. I am pretty sure that no one had worked FR/g this year before this past week.

My first reaction was "Geez! That's certainly a long answer!"

My second reaction was that this should be one of the short chapters in your book! I think your response provides an excellent view into the mindset of the reasonably well-prepared DXer (at a minimum!).

I also remember a year or two back, Paul, VE1DX, made a comment about jumping in to work something he didn't need - "I just couldn't help myself!" There's something about the thrill of jumping in when there's a pileup.

I need FT5GA for an all-time new one so I'll be in there whether Al is in there or not!

>
> He's allowed to bust the pileup and work a rare one just because he wants to.
>
> Besides, one person doesn't make or break your chances. That's not how pileups work. Your job usually is to get through a mass of callers that will be rather large no matter who in particular is in it. Trust me, most of the people in the pileup need FR/G on 20m, because most of the people in the pileup need FR/G, period. Don't blame DXers who just like to work DX when it comes up for the fact that you haven't worked that particular DX.
>
> It's bad form to work the *same expedition* over and over and over again on the same band, but none of us have to consult our tally every time we feel like calling a rare one. If FT5GA comes in here on 15m I'll work 'em even though I've worked FR/G on 15m. Why the heck not? I don't even really care about the awards. I don't even have a card for my FR/G contact (time will tell if I regret this, but I should have plenty of time when I get back from the shore here to work FT5GA)

>
> But I worked Glorioso years ago and didn't bother with the card because I liked DXing, I liked DXCC counters as a way to track my own progress, and didn't so much care about confirmations. There's this island, see, and very rarely is anyone there with a radio. I want to contact such places, and the mere fact that I'm in a pileup proves I don't entirely care whether I'm "stealing someone else's chance." Plus, I want to contact the rarest places even if it's a repeat.
>
> There have been times when I'd wished I'd reached the DX before the hordes set in, where I cursed the pileup, but I can't imagine very many where I *probably* could have got through if only the pileup was 10% to 20% smaller, and certainly very few cases where I would have got through if not for one single ham.
>
> Honestly, most of the pileups I've failed to get through were one of a few things:
>
> First possibility: I was too weak, period. Had I been the only one, the DX would have CQed in my face. BS7H was *probably* one of these, with my 100W and Moxon and 30 minutes of hearing them clearly one day. TX5C on 160m was a CONFIRMED one of these. I *almost* made it, they stuck with me very tenaciously but in the end I could not get across that I was N3OX not N3MX.
>
> Second possibility: I was insufficiently motivated. Even if you're on a roll, in a rhythm, and understand the pileup, it can take a long time to get through. It's even worse if you're NOT on a roll and in a rhythm. I walked away from a couple of pileups on the first Swains Island expedition because they were so diffuse across 50kHz of band that I was hopeless and just not having any fun. I almost wore my dial out trying to find the correct frequency where they were listening. This was an all time new one and I just gave up. Wasn't worth it, I'd get 'em later. I did, on 17m instead of 20m.
>
> Third possibility: The DX wasn't on long enough, and/or I screwed up. There's a probability per unit time that N3OX is going to get through a massive pile. I'm not the strongest in the bunch for sure, but I feel like I do pretty well overall (I usually have fun doing it and don't give up so I can't be too frustrated on average). But as a smaller station, I'm not going to dominate the pileup in a way that I can just tune in, key up, and be done. I missed JD1BMM for an all time new the other night because of this... well, that and the fact that I forgot JD1BMM was on Minami-Toroshima at first, so Possibility #2 made me lackluster for a while.
>
> But once I started calling in earnest, it was about 15 minutes before JD1BMM went QRT. Another half hour and I bet I would have been in the log, but I just didn't have enough chances and a simplex SSB pileup doesn't allow much trickery.
>
> Now, in this third situation, it is possible that ONE ham could have "taken my slot," but that's it. However, I wasted a bunch of opportunities beforehand. I was ill prepared. Had I been thinking clearly about JD1BMM and the fact that I still need M-T for a new one, I would have had a DXLab SpotCollector alert set and I would have been scouring the AA contest from the first time I realized he was in the contest. I wouldn't have waited, not only until the spot went out, but long after while I looked for "other things I needed" down on much easier to work 20m CW thinking that JD1BMM was on Ogasawara. It wasn't really my slot to have, now was it?

>
> The way I see it, from the perspective of a smaller station who rarely misses a band slot I try for out of a big DXPedition, getting through the pileup has very little to do with going head-to-head with *anyone*. If you do that in many cases, you're doing it wrong :-) Unless you're MASSIVELY louder than everyone, you need your call to ring out relatively in the clear to get through the pileup. Most of the big ones I bust, at least on CW, I do by putting myself on a frequency where I know the DX listens but currently doesn't have any other callers that I can hear. If I have to call on the same frequency as others, I work on my timing. Ideally, I don't compete with anyone... I go around or through, not over the top How can someone steal my slot then?

Interesting comments, Art. I'm responding to all the posts overnight in this one.

I had the great pleasure of spending quite some time with Roger, G3SXW, at this year's Maritime DX Forum in Halifax, NS. Not only is he a fine person, droll, quick to respond (like his operating) and an all round nice guy, but I earned more respect for his operating abilities which I have encountered countless times. Although I'm sure he'll deny it, we had a bit of fun together back in August.

Ron, ZL1AMO, stayed with me when I lived in St. Catharines, ON and was operating as VE3FRA back in the late 70s or early 80s, and he was similarly a fine gentleman. San, K5YY, I have met on a few occasions at Dayton and concur with you about his personality. I've not had any personal contact with the others you mentioned but have encountered them on the air. Among the people for whom I had a great deal of respect was Jim, VK9NS. We'd met on the air, at Dayton, and while I published DX Report back in the 80s, he called me in the middle of the night every week, prior to my publishing date and gave me scads of current and useful DX information for the bulletin. While my then-wife wasn't particularly pleased with the middle-of-the-night calls, I judiciously took notes and deciphered them the next morning before heading off to work.

On the conditions you mentioned on Glorioso, I did know about the French bureaucracy and its connection with the operation. However, in the lateness of the evening and my desire to get to bed, I had overlooked that encumbrance. And I certainly hope that you are right in your prediction that the operation will improve as the days go on.

My nemesis these days seems to be 4W6AL. I have been looking for him and have only "heard" him once in over two weeks. I check the spots daily and see none from the northeast of NA, and scant few from farther south. Lots of spots from EU indicating an excellent signal there but nada from here.

Finally, on my two DXpeditions -- to CY9DXX and to CY0DXX -- in the late 80s, I did the bulk of the CW operating and was knocking 'em off at 3/minute on average and 5/minute at peak. Sadly, I can't do that any more. Age and my health have slowed me down and I find that I no longer have the stamina to sit in the chair for more than a few hours and often considerably less. Propagation plays a role, obviously, but I seem to have lost my edge and my general interest in operating. I like to think that all the meds I'm on have caused late-stage ADD :-).

KU0A says:

>Unless you're also #1 Honor Roll, crawl back under your rock.

Wait, wait. If I'm #1 Honor Roll (which I most certainly am not ;-)) I get to say everything I said and you'll accept it, and if not
I should be silenced?

The guy who needs 24 more DXCC counters WORKED to just get on the Honor Roll, and who needs to track down a VAST number of confirmations to officially catch up, is *less* qualified to have an opinion that it's OK for guys who've "worked 'em all" to call rare ones?

Interesting.

"I don't jump into rare pileups unless I really need a new mode or band country, so as not to deny others the opportunity to work the DX. I kind of expect other DX'ers to reciprocate."

Yeah, well I don't believe that any individual ham is much of a threat to my working a rare one. "Selflessly" standing aside just doesn't matter. Either they're a super big gun one caller and they're in and out before I can blink, or I have a chance at beating them and they're just another call in the pileup.

I'm not worried that a more seasoned DXer out having fun is going to steal my opportunity for ANYTHING. The pileups are awfully egalitarian regarding your official DXCC status in the database in Newington. The pileups don't know and don't care if you've got 343 confirmed or are some lazy good-for-nothing like me who likes DXing a lot more than he likes sending off for picture postcards in the mail.

Hey Dan,

By this reasoning, I SHOULD BE CALLED FIRST by the next P5 operation because of the unfortunate (and ironically, somewhat funny) circumstances in my missing my only opportunity to work P5/4L4FN when I could hear him S-9 on 15M. I like your idea. It will be a cinch to get the last one I need to in my climb back to the top of the HR (where I was perched for many years). I'm currently at 337 confirmed with 353 overall.

Of course I'll be in the pile-up for the FT5 on every band I can hear him, both modes (CW & SSB). And I'm hoping to get one opening to 4W6 to make a single CW QSO. And I'll be in every other pile-up that interests me. If I step on your toes....ahhhh, sorrrrrrrrrry!

From: tm303
Topic: 10869 Message: 10879

I'd sure like to know the thrill of using a DX call to work several stations on CW. I would think that would be a lot of work for the pirate. Of course, they don't stay on the freq for hours like the real DX ops. I need FT5GA for #330. Any band/mode will do. When I worked "him" on 20 CW at 2240 UTC, I had a bad feeling that this was Slim at the key. The signal was weak and the pileup wasn't bad at all. Should have known that, when a thousand guys leave the freq, that something';s up. But, work them and check the log later. Then, work them again until you get it right. Hopefully, they will be there for the announced time period.

Our window here in the U.P. is quite narrow. It was the same with BS7 but I got them in the 18 minute window on next to the last day.

I won't even try on SSB until the end of the operation. I don't like to listen to the freq cops voices; it's bad enough on CW!

I'd have 333 countries, if I hadn't worked three Slims over the past 50 years. Unfortunately, when the three countries needed were on for an extended period, I was off the air from 1992 until P5/4L4FN came on in 2002. What a surprise to get him on 15 SSB, using my 40 meter 2 element beam on 15. Anything can happen with a little luck and sun spots!!!

Hope that all of us who worked that pathetic pirate can work the "real" FT5GA for a new one.

73,

Tom W8JWN

>. But when the op specifically asks for "DL2PW" and tons of OK1, W4, >AA4, W3, etc., keep calling, what's the logic?

In my opinion, this kind of behavior is a much more serious issue than the occasional bored, skillful, and courteous DXer sniping at stuff he or she doesn't need. The logic is pretty simple. Sometimes this works. "DL2PW? 5NN DL2PW?" shuts up a large swath (the truly deserving part) of the pileup, and people have found that soft ops on the other end will sometimes switch from the partial they know they heard to a new, totally distinct one.

I guess my tirade should have included a point on this... you CAN also steal someone's QSO when there's a less hard-nosed DXPedition op by just ignoring the partial and calling in regardless. But the bored Honor Roller would never submit to such an ethical lapse.

And man, is it music to my ears when the DX op just sits there and asks over and over and over again, "DL2PW PSE AGN ONLY DL2PW BK" Gives me a warm fuzzy feeling to participate in a pileup where cheaters just can't win... and when I know that somewhere out there in pileup land, there are at least a few light bulbs going on... "ohhhh... man... when the DX says DL2P?, he REALLY means DL2P?"

I had the luck to tune into a real on air tirade from the VP6DX 160m SSB op on this point... went on for a minute on how yes, he can hear, and yes, he knows what he heard, and no a K0 is not a W7, etc. I thought it was hilarious. A little sad that he had to waste time scolding the pileup as if they were snotty children, but it was kind of worth it.

Sure, there will be true "partial confusion" on the bands. Those 160m pileups where I'm up against N4OX and K3OX at the same time are interesting (and invariably disappointing for me ;-)). And it has turned out once or twice that when the DX says "N4OX?" they actually mean me (when Jay isn't there). But it's ridiculous in a big pileup how many calls with *zero* characters in common will call for an almost-complete partial. An almost complete partial signifies that a QSO has begun, and at that point, anyone else who calls in is deliberately QRMing.

Just to be sure, petition for the DX to go in order by number and suffix starting with 1AA.

>And I'll be in every other pile-up that interests me. If I
>step on your toes....ahhhh, sorrrrrrrrrry!

And if *I* beat *you*, don't be too upset that this puny little non Honor Roller snuck past your Ivory Antenna Tower ;-)

You don't have to worry for a few more days... at the beach, no radio :-)

One day, Dan, I'll tell you the story of the P5.

Enjoy the beach. Too chilly today for that up this way -- right now it is just 52F and perhaps will go up to 66.

*** 4 2 5 D X N E W S ***
**** DX INFORMATION ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

3W - The 3W6C team members are starting to make the extensive preparations necessary for the 10-18 April 2010 DXpedition [425DXN 948] to Con Co (AS-185), Vietnam. A large group of operators will be running four stations 24 hours a day, with a target of 60,000 QSOs on as many different bands as possible, including 160 and 80 metres. Such an extensive operation requires considerable financial resources, and fund raising has just started. Detailed information on how contribute to the expedition can be found at www.3w6c.qrv.ch [TNX HB9DST]
7Q - Barrie, G4AHK will operate holiday style as 7Q7BJ while travelling around Malawi, from 23 September through 12 October. He plans to focus on 160, 80 and 40 metres. QSL via G4AHK. [TNX The Daily DX]
9M6 - Steve, 9M6DXX, will operate (SSB only) as 9M8Z from Sarawak, East Malaysia (OC-088) on 22-26 October, including a SOAB HP unassisted entry in the CQWW DX SSB Contest. QSL via M0URX direct, bureau or LoTW (see www.m0urx.com for details on e-mailing requests for bureau cards). [TNX 9M6DXX]
9M6 - Steve, 9M6DXX, and John, 9M6XRO will be active from Pulau Labuan (OC-133) on 6-8 November (and possibly for one or two hours from 00.00 UTC on 9 November). Look for 9M6DXX/p on 10-80 metres SSB, and for 9M6XRO/p on 10-160 metres CW and RTTY. They will be using linearamplifiers to a multi-band vertical and a 160m inverted-L, both mounted very close to the ocean. They hope it will be possible to operate on 160m CW at the same time as SSB on the other bands. QSL both 9M6DXX/p and 9M6XRO/p via M0URX, direct or bureau or LoTW. [TNX 9M6DXX]
A4 - San/A45WH (VU2CEO) and Manoj/VU2MCJ, along with a couple of SWLs, will be active as A45WH/p from Masirah Island (AS-014) on 22-24 September. Expect activity on 160, 80, 40, 30 and 20 metres CW, SSB and didgital modes. QSL direct to A45WH. [TNX The Daily DX]
C3 - A large group of operators from Spain will participate in the CQ WW DX RTTY Contest as C37URE from Andorra. This operation is a joint effort between the two IARU societies of Andorra (URA) and

Spain (URE) in celebration of URE's 60th anniversary. QSL via EA4URE, direct or bureau. Further information at http://c37ure.ure.es/
C9 - Marco, IK1RAE says he will be active as C91VM from Mozambique on 5-23 October. He will operate SSB on 40-10 metres running 100 watts into a vertical antenna. Side trips to one or more IOTA groups (AF-061, AF-066, AF-072, AF-088) are also being planned. QSL direct only, as proceeds will be donated to charity project in the village of Malangute (QSLling policy details to be announced on qrz.com under C91VM).
ET - Jim, WU0I is a US Foreign Service Officer presently stationed in Addis Ababa, Ethiopia. He expects to be QRV as ET3JD by about October, and to operate PSK31 and possibly RTTY (for contests mostly), SSB and CW ("my CW is pretty rusty", he says, "so please be patient with me!"). He will try to get on 40, 20 and 15 metres, plus 30 and 17 metres, using home-made wire antennas. QSL direct to Jim DeLoach, 2030 Addis Ababa Place, Dulles VA 20189-2030, USA (please indicate if you would like his card to come via U.S. mail or Ethiopian mail; no preference stated means he will use whichever is cheapest for your QTH). Bookmark http://www.deloach.net/ET3JD.html for updates. [TNX OPDX Bulletin]
G - The Bittern DX Group will operate special event station GB2TX on 19-20 September as part of "Transmission 2009" to raise money for the British Wireless for the Blind Fund (http://www.blind.org.uk/). QSL via M0CNP. [TNX VA3RJ]
G - Kevan, 2E0WMG will be active from St. Agnes, Scilly Isles (EU-011) on 22-23 September. He will operate SSB only on 80, 40 and 20 metres. QSL via home call, direct or bureau. [TNX K1XN]
KL - Hugh, K6HFA says he will try to be active as K7A from a few islands in Alaska between 21 September and 5 October. IOTA groups mentioned include NA-236 (new one), NA-222, NA-216 and NA-087. He plans to operate CW and SSB on 20, 30 and 40 metres. QSL via K6HFA, direct or bureau (direct QSLling policy at qrz.com). [TNX www.islandchaser.com]
OD - The Radio Amateurs of Lebanon (RAL) will be operating special event station OD5F for the duration of the 6th Francophone Games, which will be held in Beirut from 27 September to 6 October. QSLs will be handled by the RAL QSL bureau. [TNX IARU]
PA - Special callsign PA08DWN will be aired on CW on 2-3 October during the annual Furieade maritime event at Maassluis, near Rotterdam. Operations will take place from the radio shack of the "Elbe", a tugboat that is being restorated to serve as a museumship. QSL via PA3ALM. [TNX PA9HR]
PJ5 - Dave, AH6HY will be active as PJ5/AH6HY from St Eustatius (NA-145) from 26 September to 1 October. He will operate holiday style on 10-40 metres, mainly SSB with some CW. QSL via home call, direct or bureau. [TNX NG3K]
SP - Kris, SP6DVP (SO6V) has been grated permission to operate as SN40DVP until 30 November to celebrate his 40th anniversary in amateur radio. QSL via SP6DVP, direct or bureau. [TNX SP6DVP]

SP - Special event stations SN2009B, SN2009EM, SN2009K, SN2009L and SN2009W will be active from Poland from 25 September to 4 October for the Women's Volleyball European Championship. On-line logs and details on the relevant award can be found at http://www.sq7mzh.pl/
SV - A group of 8 operators will be active on the HF bands SSB, CW and RTTY as SY2G from Mount Paiko on 19-21 September for the International Day of Peace. QSL via SV2JAO (direct only). [TNX SV2LZX]
T7 - Gerd/DJ5TT, Thomas/DK9FEC, Peter/DL1FX and Rainer/DL1ZBO will be active as T70A from from the radio club of San Marino's IARU Society (http://www.arrsm.org/) on 24-27 September. They will operate CW, SSB and various digital modes on 80-10 metres, anche will participate in the CQ WW DX RTTY Contest. [TNX ARRL DX Bulletin]
V2 - Bud, AA3B will be active as V26K from Antigua (NA-100) between 26 November and 1 December, including an entry in the CQ WW DX CW Contest. This will be an all CW operation on the contest HF bands only. QSL via AA3B. [TNX AA3B]
VP8_sg - Lars, MM0DWF (www.lars-boehme.de/vp8dif/index.html) will be working again at Husvik, South Georgia (AN-007) between early October and mid November. He expects to operate again as VP8DIF during his limited spare time, running 100 watts to a G5RV on RTTY, CW and SSB (in that order). QSL via DJ9ZB, direct or bureau. [TNX G4DYO]

PACIFIC TOUR ---> Hrane, YT1AD and Miki, YU1DW will be travelling to a few Pacific islands between 30 September and 8 October as follows:
30 September-1 October KH8/N9YU (QSL via YT1AD) American Samoa
2-3 October 5W8A (YT1AD) and 5W0DW (YU1DW) Samoa
4-6 October 3D2AD (YT1AD) and 3D2DW (YU1DW) Fiji
6-8 October T30M (YT1AD) and T30W (YU1DW) Western Kiribati
The main reason for this trip is to prepare all necessary documents for the expedition to T31,ZK3 and FW8 in September-October 2010 (www.yt1ad.info/t31) [TNX YT3W]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

FT5GA ---> The first batch of QSOs (1049 contacts made between 06.04.23 UTC on 15 September and 02.04.40 UTC on the 17th) has been uploaded to http://www.clublog.org/charts/?c=FT5GA

KP2 QSL BUREAU ---> The ARRL US Virgin Islands Incoming QSL Bureau's new address is: Virgin Islands QSL Bureau, P.O. Box 25782, Christiansted, St. Croix, U.S. Virgin Islands 00824. Comments or questions on this bureau's operation may be directed to Ann Keegan, KP2YL (kp2yl@...). [TNX NC1L]

PIRATE ---> Toze, CT1GFK reports that a large number of stations (many of them from France and Italy) worked a pirated 4W6AL on 20 metres SSB on 12 September, while the genuine 4W6AL only made 4 QSOs. Check the log (http://algarvedx.com) before sending your QSL.

PIRATE ---> "I'm sorry to have to inform you that the activity on 20 metres CW earlier this month by a station signing ZF2NT was a pirate operation", Phil/G3SWH says. "Bruce is still in California".

QSL 9M2MRS ---> Rich, 9M2MRS (PA0RRS) reports that his incoming mail is being tampered with and green stamps are being stolen. Direct QSL requests should be sent to his address in the Netherlands (R.W.L. Smeets, Schoorveken 100, 5121 NM Rijen, The Netherlands). [TNX OPDX Bulletin]

SURINAME ---> Ramon, PZ5RA is sorry to be no longer able to help visiting amateurs to get a licence, which he has done for ten years. He will try to have a licence permanently issued for guests to use (http://dxholiday.com/sa/pz.htm), but those who want an individual licence will have to apply direct to TAS (Telecommunications Authority Suriname). [TNX PZ5RA]

+ SILENT KEYS + Recently reported Silent Keys include Gianfranco Chiodi (I0CHF), Valerij P. Radashkevich (RU9WM), F. Martin Hankins (W5HTY) and Vincent Mattera (WB2AAP).

QSLs received direct or through managers: 3D2AG/p, 3DA0EL, 3V9A, 4T6I, 5B4/AJ2O, 5B4/R3CC, 5B4AII, 5H3VMB, 5J0BV, 5K0T, 5K5T (SA-017), 6H1IM, 6W6JX, 7O1YGF, 7P8CF, 7P8R, 7Q7CE, 7Q7SI, 7Z1SJ, 9J2VB, 9V1YC, A35XR, A35ZS, A45XR, A61Q, BD1HFP/2, C6AGU, CE2/K0MD, CO8LY, D4C, E73M, EA8CQS, EA9/KH0AM, ER4DX, ES1WW, ET3JA, FT5YI, FW5ZL, H44MY, HC7AE, HU1M, HZ1FS/p, J39BS, JD1BLY, JD1BMH, JT1CO, JY4NE, JY8YV, K5D, KG6DX, KP4MS, LY0HQ, N3DXX/6Y5, OH0E, OJ0B, OJ0J, PV8ADI, PX6B (SA-080), PX6T (SA-080), PX8M (SA-041), PZ5RA, R1ANR, R7HQ, RW2F, S79NS, SV2ASP/A, T30XX, T31DX, T77NM, TC4X, TG9NX, TK/I4GAD, TL0A, TM5EL (EU-094), TN5SN, TO3R, UA0IDZ/p (AS-059), UA9ZZ, V51AS, V63TO, V85SS, VC8B, VI2BV90, VK9GMW, VK9WWI, VP8YLG, VP9/VE3DZ, VQ9JC, VR10XMT, VR2008O, VR2009EAG, VR2XMT, VU7RG, XE2PEA, YJ0AWG, YL2BJ, Z21SI, Z29KM, ZS1REC, ZX8A (SA-016), ZY0F.

< could list - they've been doing this long enough that I think it has
< become second nature to them.

If Baldur, Roger, or Nigel are on a DXPedition I usually feel confident I would work them using a HW7 and a mobile whip. I also find it interesting how they identify after each QSO and still run up rates comparable or better to the ones that identify every 15 minutes.

Perhaps, but I wouldn't want to be the one to piss off the wrong one
at the wrong time. The entire operation could be shut down in a
heartbeat as we have witnessed with a handful of others over the years.

Everyone play nice...at least until I get them confirmed on SOMETHING! :)

10888. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-18 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10888

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 18 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 261 Issued at 2200Z on 18 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 17/2100Z
to 18/2100Z: Solar activity was very low. No flares were observed.
The visible disk remains spotless.
IB. Solar Activity Forecast: Solar activity is expected to remain
very low.
IIA. Geophysical Activity Summary 17/2100Z to 18/2100Z:
The geomagnetic field was predominantly quiet with an isolated period
of unsettled conditions from 0000Z-03000Z.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to remain at quiet levels for the next three days (19-21
September).
III. Event Probabilities 19 Sep-21 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 18 Sep 069
Predicted 19 Sep-21 Sep 070/070/070
90 Day Mean 18 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 17 Sep 006/008
Estimated Afr/Ap 18 Sep 005/005
Predicted Afr/Ap 19 Sep-21 Sep 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 19 Sep-21 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01

10891. DX as it relates to the Dr. Phil Show

Yahoo group: DX-IS (2009)
Date: 2009-09-19 17:42:39 UTC
From: WB6PSY/N6AXK
Topic: 10891 Message: 10891

Bob: I know it's early in the expedition, but I want to remind you that 'NA' is not a single place. Zone 3--the West Coast--has entirely different propagation than Zones 4 and 5. To work you at most times requires taking a polar path, where signals from m Zone 3 have a difficult time competing with EU or Japan or the US/Canada East Coast.

Please try to work the West Coast at our sunrise (1300-1500 UTC) and sunset (0200-0400 UTC). Signals from Reunion Island can be quite loud at our sunrise. The TO4E Europa expedition was also very loud during our mornings on 30 and 40 meters.

It will be a real shame if--with all the enthusiasm and with NCDXF support--we West Coast operators can't work you.

Dr Phil: First of all Bob, for the life of me, I can't understand why ham radio operators are so obsessed with working some island in the middle of the ocean that most people have never heard of. Just last week, we had Danny in here with the same obsession. OK, when did this "expedition" start, and when does it end?

Bob: Well, Dr. Phil, it started on Sep 15 and ends on Oct 8.

Dr Phil: OK, this is Sep 19, so your "expedition" has been underway four days, and it will continue until Oct 8, which is nineteen days away. You said it all when the first words out of your mouth were, "I know it's early in the expedition." Before the show, I consulted with some experts on radio propagation. They advised me that the earth is divided into hundreds of areas where propagation differs at any given time. So since it is so early on in this "expedition," what makes you think your area of California is more special than other areas of the world?

Bob: Like I said, the Northern California DX Foundation (NCDXF) helped fund this expedition. So that should be taken into consideration when these guys call CQ.

Dr. Phil: Oh, I get it. It's all about money. That means if I get a ham license, get on the air, and send the next expedition $100,000, then I should get first crack at working them.

Bob: I didn't say that Dr. Phil.

Dr. Phil: Well, that's what it sounded like to me. Now tell me this. Why did you fly in here today to be on my show, when this expedition is on the air. Aren't you missing a chance of working them if they are calling your area as we speak?

Bob: Yeah, I know Dr. Phil. I do lots of other things when expeditions are on the air. It's just I think they should be there for me when I sit down at the radio.

Dr. Phil: Yeah, I know. Me, Me, Me. This is the ME generation. Get out of here. Here's your plane ticket for the next flight to California. We'll break for a commercial and hear from another obsessed ham, Robert from Ontario, when we return.

19/09/2009 12:47 - Jasper Ontario Canada
354

ve3uuh Robert J Calver (74.198.12.---) http://www.myspace.com/robcalver
This operation needs some sort of control.A set frequency plus or minus qrm,a daily schedule for operating times.The amount of bandwidth for spread is totally ridiculous.There could be times set aside for zones for NA/SA propagation appears to be best around 18:00 UTC to 23:00 UTC plus.EU, Asia, Middle East can make almost all of the time.I see stations getting frustrated at the pace thus qrming on the operators frequency.It is up to both the dxepedition operator and those trying to work it to show some self control.Stupid, ignorant comments, deliberate jamming, swearing, not listening are ruining what very slim chance many us have to work FT5GA.Even if you make contact there's no guarantee after hours of work you'll get in the log.WE all have to work harder to make FT5GA a success.Step one sensible listening spread!!

Dr. Phil: Robert, I have read the note you sent to the "DXpedition," as you call it. I also read the note you sent earlier, complaining about not appearing in their radio log.

Robert: That's right Dr. Phil, I called for four hours and three minutes, they acknowledged my call sign, and I still didn't appear in the log.

Dr. Phil: Robert, I also spoke to the Chief of Police for the Cluster and Amateur Radio bands. He advised me that you were constantly calling on the wrong frequency when the "DXpedition" was working split, or listening on a different frequency. And here you are giving the guys on the "DXpedition" advise on how to operate?

Robert: That's right Dr. Phil. He got on my case about that and I got my act together. I'm just glad I got off with a warning. But someone needs to tell those guys how to operate. I figured since I just got a tongue wagging from the Chief of Police, I had fresh knowledge of how things are suppose to be done.

Dr. Phil: I'll remember that if I get a speeding ticket. I'll stand on the side of road with a sign telling everyone to slow down. Besides, I'm the one who knows better. [Laughter from the audience] OK, now you say you worked them on Sep 17, at 2303 GMT? (For those of you who don't know, hams log their contacts in Greenwich Mean Time)

Robert: That's correct Dr. Phil.

Dr. Phil: OK, I went on the internet and looked at their logs this morning. It very plainly states that their last log entry was on Sep 17, at 0204 GMT. So If you worked them twenty one hours after they updated their logs, so how in the world do you expect your contact to show in their logs?

Robert: Duh... I didn't think about that Dr. Phil.

Dr. Phil: Here's your plane ticket. Get out of here and go back to Canada. I've had it with all you hams who have nothing better to do than whine when you don't get your way anytime you want it. We'll break for another commercial and come back with something more sensible than ham radio operators. We have a guy on who sleeps with his pig. And I'm talking about the barnyard type.

Forwarded from Dr. Phil by WB6PSY

10892. 1936 QST

Yahoo group: DX-IS (2009)
Date: 2009-09-19 18:42:13 UTC
From: RICHARD SOLOMON
Topic: 10892 Message: 10892

At the weekly breakfast today, one of the locals gifted me with a Bound Volume of the 1936 QST issues. What a hoot reading some of these issues:

January: New Cosmic Phenomenon
A paper on linking of Sunspot Activity and DX

February: A Noise-Silencing I.F. Circuit by James J. Lamb

And there was a Radio Shack store in Boston in 1936, on 46 Brattle Street.

Now, if I can get him to bring in the two volumes from the 1920's.

73, Dick, W1KSZ

Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 262 Issued at 2200Z on 19 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 18/2100Z
to 19/2100Z: Solar activity was very low. No flares occurred and the
solar disk continues to be void of sunspots. There are indications,
however, of a possible new active region behind the east limb based
on Stereo-B EUVI and GOES-14 SXI imagery.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. A gradual increase in background levels is expected and a
slight chance for an isolated B-class flare is anticipated as the
new region rotates onto the disk.
IIA. Geophysical Activity Summary 18/2100Z to 19/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (20-22 September).

Hi Dale

What does a DXpedition "Pilot" do?

I have been asked about being a pilot on a few occasions and recently on the Kiwi DX List. Basically a DXpedition pilot is a "screen door" between the DXpedition team and the 50,000 ham DXers out there that want to work the DXpedition. The pilot becomes the regional collection point for complaints and accolades for the DXpedition. If the pilot didn't exist then DXers can and sometimes turn ugly. That's a fact.

DXpeditions teams try to do their best, often under the most trying circumstances and like other forms of human endeavor can sometimes fail miserably at doing their job. The worldwide DX community is often be unforgiving and that leads to some rather bizarre and appalling on air behavior to disrupt the DXpedition they have lost respect for. Believe me. It happens. The job of the pilot is to be a "sounding board" and a channel for information to and from the DXpedition team.

A typical scenario is a team working short path direct with signals 20 over nine into a region hour after hour frustrating DXers in smaller countries two or three skips away that could easily work them. In other words the DXpedition team band plan will sometimes preclude working rarer areas that really need them. Strangely, South Africa, South America and often ZL/VK suffer. If that info can get to a pilot network, the pilots can usually make the team aware that they are not taking advantage of conditions to work rarer countries. It is real time information such as that which will really help the team to do their job better.

One of the problems of DXpedition team members is that they become zombies after a few days of thousands of QSOs, screaming hams, rude behavior, outrageous pileups, poor food, crap living conditions and weather that is usually 10 degrees too hot or too cold. As a DXpeditioner it's sometimes difficult not to get depressed and lose enthusiasm and indeed get really snarky with your customers... the DX community. In fact, a week of high pressure shoveling out pileups makes you lose touch with reality. Pilots love to relay messages of congratulations and accolades to the team from the ham community as it gives them encouragement to carry on and do their job.

One of the more pleasant duties of a pilot is to pass messages to and from the team to their families and to the ham community in the form of bulletins or newsletters. It's a great job and it also means you get to know a bit of what the guys are up to and with a little luck the pilot's call may sound a bit familiar to the team in a pileup. As a pilot, I

make it my business to put ZLs in a prominent place on the table so the DXpedition team will be aware of us. It has worked very well before.

Some things pilots do NOT do.

We don't make individual skeds. We don't have access to the logs. We don't pass individual messages to individual team embers unless specifically asked to do so. We do not lose our temper when outrageous requests are emailed to us. We don't relay individual emails to the team. We try to treat all inquiries and requests equally and fairly. We try to help the DXpedition team and the hams that seek that elusive contact. It is an impossible task but rewarding when you get it right!

73, Lee ZL2AL - Pilot FT5GA and many others

That is where I took the classes and test for my Novice License.
It was on Washington Street, and next door was a War Surplus store
that would be Boatanchor Heaven today !!

I know you are young enough to remember 'The Olden Days'.

I remember the RS near the Boston Marketplace, do you?

Subject: [DX-IS] 1936 QST

At the weekly breakfast today, one of the locals gifted me with a
Bound
Volume of the 1936 QST issues. What a hoot reading some of
these
issues:

January: New Cosmic Phenomenon
A paper on linking
of Sunspot Activity and DX

February: A Noise-Silencing I.F. Circuit by
James J. Lamb

And there was a Radio Shack store in Boston in 1936,
on
46 Brattle Street.

Now, if I can get him to bring in the two
volumes from the 1920's.

One of the toughest DX QSOs ever for me but as predicted he was in at my QTH at 1847, barely readable, and peaked, as predicted started to peak by 1900. I'm in the log for 1857.

Now, with the numbers getting better, maybe there's a chance for 4W6AL.

Congratulations Al,
I also got lucky on 30M around 1600z on the 18th.
Have you heard anything about how to read their online log?
It shows 20M "ph" and 20M through 80M "cw" regardless of what call you
search for.

Also, the bar graph you get when clicking on best propagation for your
location.doesn't make sense (to me).

Also, their log update schedule?
The last update is the 17th at 0200.

Yeah, I know it's confusing.
I clicked the most wanted tab and entered my call sign in a box on the page.
Up came the qso as a green ck mark in their band plan.
Also, the 1st page has an older update date, where the most wanted page
shows an update today.

OK, figured it out. My 20M "QSO" was nada, not there, NIL, didn't happen, pirate!!!!!

Today's SSB contact was good and I needed it on 20M SSB. Couldn't hear a peep on 40M and didn't try 30 this afternoon. Perhaps I can get them but I'm not going to lose sleep over it.

4W6AL is one I need on CW anywhere so I'll be looking for him.

Take care, Frank.

10911. Report of Solar-Geophysical Activity

Yahoo group: DX-IS (2009)
Date: 2009-09-20 22:11:00 UTC
From: Paul Dunphy
Topic: 9721 Message: 10911

```
:Product: Report of Solar-Geophysical Activity
:Issued: 2009 Sep 20 2200 UTC
# Prepared jointly by the U.S. Dept. of Commerce, NOAA,
# Space Weather Prediction Center and the U.S. Air Force.
#
Joint USAF/NOAA Report of Solar and Geophysical Activity
SDF Number 263 Issued at 2200Z on 20 Sep 2009
IA. Analysis of Solar Active Regions and Activity from 19/2100Z
to 20/2100Z: Solar activity was very low. No flares were observed
and the solar disk continues to be void of sunspots. Solar x-ray
images and Stereo B EUVI continue to indicate an active region just
on or behind the east limb although so far there have not been any
reports of the group in ground-based H-alpha imagery.
IB. Solar Activity Forecast: Solar activity is expected to be very
low. Background levels are expected to increase gradually as the new
region rotates onto the solar disk. There is a slight chance for
isolated B-class events during the next three days (21-23
September).
IIA. Geophysical Activity Summary 19/2100Z to 20/2100Z:
The geomagnetic field was quiet during the past 24 hours.
IIB. Geophysical Activity Forecast: The geomagnetic field is
expected to be quiet for the next three days (21-23 September).
III. Event Probabilities 21 Sep-23 Sep
Class M 01/01/01
Class X 01/01/01
Proton 01/01/01
PCAF Green
IV. Penticton 10.7 cm Flux
Observed 20 Sep 071
Predicted 21 Sep-23 Sep 073/075/077
90 Day Mean 20 Sep 068
V. Geomagnetic A Indices
Observed Afr/Ap 19 Sep 001/002
Estimated Afr/Ap 20 Sep 003/005
Predicted Afr/Ap 21 Sep-23 Sep 005/005-005/005-005/005
VI. Geomagnetic Activity Probabilities 21 Sep-23 Sep
A. Middle Latitudes
Active 05/05/05
Minor storm 01/01/01
Major-severe storm 01/01/01
```

Yeah, I know it's confusing.
I clicked the most wanted tab and entered my call sign in a box on the page.
Up came the qso as a green ck mark in their band plan.
Also, the 1st page has an older update date, where the most wanted page shows an update today.
Try again

10914. RE: [DX-IS] FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-20 22:48:25 UTC
From: Alan Leith
Topic: 10757 Message: 10914

They peaked here on 40M around 2125 at S-3 for about 8-10 minutes. Mind you, I only have an inverted vee on 40. BUT I COULD HEAR THEM and at 2245 they're still there but not workable.

I suspect there will be loads of NILs but all being well, there's enough time and predicted improving flux numbers to make it possible for all of the deserving.

Good luck to all.

10915. RE: [DX-IS] FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-20 23:12:18 UTC
From: Alek Petkovic
Topic: 10757 Message: 10915

The other morning here, they were on 40m ssb and not moving the s
meter. For a 1/4 wave vertical and amplifier and a path of just
7300km over water, they are not putting out a big signal. Anyway, it
was right on sunrise here and VE3EJ called (by mistake) on their
frequency and he nearly blew the cans off my head. He was 20 over 9.

Conclusion: Their antennas are not working very well.

Even this morning, they were very light on 40CW.

As a matter of interest, their statistics show just 81 CW qsos on 40m
so far. I'm pretty sure they have missed some uploads.

Guess it will all work out in the end and regardless of anything
else, they are giving a lot of people a brand new one and that's what matters.

73, Alek

The Ohio/Penn DX PacketCluster
DX Bulletin No. 926
BID: $OPDX.926
September 21, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1MI/HB9DST, K1XN & GoList, NC1L, NJ1Q, W2CG, W2VU, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, 9M6XRO, AT International, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IN3VZE, M0URX, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and YO3HJV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-September, through Sunday, 20th-September there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FR/g, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T31, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week "all is prepared for our DXpedition to Conway Reef (3D20CR), the rigs, antennas and gear are all packed and a pre-shipment by air will leave Hamburg tomorrow (September 15th). The crew will fly out on September 24th, and we plan to start operation on October 1st." The DXpedition is still looking for sponsors. The total amount of the operation is

estimated at 64,000 USDs. For details/updates and how to donate funds
for this operation, please visit their Web page at:
http://www.conwayreef2009.de

3W, VIETNAM (Update [VERY RARE IOTA - #2]). An international group of
operators will be active as 3W6C from Con Co Island (AS-185), Vietnam,
in April 10-18th, 2010. This multi-national project, being coordinated
by Swiss ham-radio operators, consists of roughly 20 individuals including
one woman with members not only from Switzerland but also from Vietnam,
Germany, USA and Japan. Operators mentioned as of today: Team Leader
Hans-Peter/HB9BXE, Jan/DJ8NK, Hans/HB9BHW, Rene/HB9BQI, Christine/HB9BQW,
Markus/HB9DIZ, Hans-Jurg/HB9DKZ, Paul/HB9DST/AA1MI, Leo/HB9DWL, Hans-
Peter/HB9EHP, Matthias/HB9JCI, Peter/HB9PJT, Eddy/XV1X and Michal/XV9DX.
During their stay, they plan to have 4 stations on the air. Their goal
is to make contacts on as many different frequencies as possible, even on
the 80 meter and 160 meter bands, which makes this DXpedition very special.
But this goal also means that the group must transfer considerable amounts
of equipment ☐ including radios, antennas, power generators, computers,
and various ancillary supplies ☐ with them to the island. The team is
looking for sponsors (whether individuals, ham-radio clubs or commercial)
to help offset the costs. Complete details are available at:
http://www.3w6c.qrv.ch
ADDED NOTES: Con Co Island, with a land surface of just 2 square kilo-
meters, is 32 km off the central coast of Vietnam in the Gulf of Tonkin.
The island has a population of approximately 400 people. For many years
it was a restricted military zone, but today the Vietnamese government
is working to turn this idyllic location into a tourist and vacation
destination.

7Q, MALAWI. Barrie, G4AHK, will once again be active as 7Q7BJ between
September 23rd and October 12th. Activity will be on all HF bands, mainly
CW and SSB. QSL via his home callsign, direct or by the Bureau.

7Q, MALAWI. Ely, IN3VZE, informs OPDX that he will be active once again
as 7Q7CE from the southwest shore of Lake Malawi from the shack of his
good friend Harry, 7Q7HB, between October 2-20th. Activity will be holiday
style with planned operations on all bands using SSB and RTTY. QSL via
his home callsign, direct or by the Bureau.

9M6, EAST MALAYSIA. Tony, KM0O, will be active as 9M6/KM0O during the
CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL route
TBA.

9M8, EAST MALAYSIA (IOTA Op). Steve, 9M6DXX, from the Island of Borneo
(OC-088) plans to busy from East Malaysia over next two months. Look for
Steve to be active as 9M8Z from Sarawak, East Malaysia (OC-088), between
October 22-26th. Activity will be SSB only but will also include oper-
ations in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-
Band/High-Power/Unassisted entry. QSL via LoTW, or QSL direct or by
the Bureau to M0URX (or request direct or bureau cards on-line [see
info at: http://www.m0urx.com/direct-a-bureau-instructions.html]).

In early November, Steve/9M6DXX will be joined by John/9M6XRO and the operators will activate Pulau Labuan Island (OC-133) between November 6-8th (and possibly for one or two hours on November 9th after 0000z). The callsigns and operations will be as follows:
9M6DXX/P - On 80-10 meters; SSB only.
9M6XRO/P - On 160-10 meters; CW and RTTY.
Each stations will be using amplifiers to a multi-band vertical and a 160m inverted-L, both mounted very close to the ocean. Operators hope it will be possible to operate on 160m CW at the same time as SSB on the other bands. QSL both 9M6DXX/P and 9M6XRO/P via M0URX, either direct, by the bureau or LoTW.

A5, BHUTAN. Yasuo, JA1FJJ, will be active as A52FJJ between October 8-20th. Activity will be on 80-10 meters using SSB, RTTY and PSK31. He plans to use 500 watts into a G5RV antenna. QSL via his home callsign, direct or by the Bureau.

ALASKA IOTA OP. Hugh, K6HFA, announced that he hopes to activate the following IOTA groups:
NA-236 - (New) Sanak Islands
NA-222 - South Alaska Peninsula West Group
NA-216 - North Alaska Peninsula West Group
NA-087 - Shumagin Islands
He plans to be in the area between September 21st and October 5th. Callsign will be K7A. Activity will be on 40/30/20 meters using CW and SSB. QSL via K6HFA. PLEASE NOTE (per Hugh): He states, "Due to the very high cost of transportation in this area, I will reluctantly require 3 Green Stamps, Three Dollars, for each direct QSL request for each IOTA group. This applies to all direct requests - USA and NON-USA, EXCEPT members of IREF. All others will be sent via the Bureau."

C9, MOZAMBIQUE. Marco, IK1RAE, will be active as C91VM between October 5-23rd. Activity will be on 40-10 meters using SSB and running 100 watts into a vertical. Marco plans (if possible) to activate IOTA groups AF-061, AF-066, AF-072 and AF-088. QSL only direct. PLEASE NOTE: All proceeds will be donated to a charity project in the village of Malangute - check QRZ.com for the official QSL info.

CQ NEWS (CQ Announces 75th Anniversary Worked All Zones Award). The following is a news release from Richard Moseson/W2VU, Editor CQ Amateur Radio, dated September 18th: "The November, 1934, issue of [R/9] magazine announced a new operating award for radio amateurs, designed to encourage the growing popularity of contacting stations across the globe, what we know today as DXing. The award was called Worked All Zones and was to be granted for making confirmed contacts with hams in each of the 40 zones into which the world had been divided by [R/9's] editors. Today, 75 years later, [R/9] has been succeeded by [CQ] magazine and WAZ - Worked All Zones - sponsored by [CQ] since 1945, continues to be one of amateur radio's most prestigious operating awards.
In celebration of the WAZ's 75th anniversary, [CQ] magazine is announcing a limited-term 'Diamond Jubilee WAZ' award. A special certificate will

be issued to amateurs who make contacts in all 40 CQ Zones of the World between November 1, 2009 and December 31, 2010. Certificates will be numbered but there will be no endorsements. Confirmations will not be required. However, it is expected that applicants will continue to uphold amateur radio's long-standing tradition of honesty and self-regulation. Standard WAZ application fees will apply.
Complete details on the Diamond Jubilee WAZ Award will be in the October 2009 issue of [CQ] and are posted on the CQ website, <http://www.cq-amateur-radio.com/>, with a link from the October issue highlights page.
WAZ is the second-oldest amateur radio operating award still offered today. The only current award that is older is the International Amateur Radio Union's Worked All Continents award. The ARRL's DX Century Club (DXCC) award was introduced in 1936. To date, more than 8,600 basic WAZ awards have been issued. More information on the WAZ award program is available on the CQ website at <http://www.cq-amateur-radio.com/awards.html>"

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TX3A - Chesterfield Island; 2009 Operation
T6AB - Afghanistan; 2008 and 2009 Operation
T6AF - Afghanistan; Current Operation

* Awards Branch E-mail Change. "There has been a change in one of the awards branch E-mail addresses. This address is no longer accepting E-mail: awards@...
The address has been changed to: award@...
Anyone sending an E-mail to awards@... will get a return message noting this and advising you of the new address. This address mostly affects the Worked All States awards program.
E-mail to dxcc@... and any of the other e-mail addresses that come to me are not affected by this.", 73 es DX! Bill Moore, NC1L, ARRL Awards Branch Manager

EA8, CANARY ISLANDS. Heinz, DL7HKL, is expected to be active as EA8/DL7HKL from La Gomera Island (AF-004) until September 28th. This will be a holiday style operation on SSB with activity on 20/15/10 meters during his evening hours. QSL via his home callsign, by the Bureau or direct.

EA8, CANARY ISLANDS. Jyrki, OH6CS, will be active as EA8/OH6CS during the CQWW DX SSB Contest (October 24-25th) as a Single-OP/Single-Band (TBA) entry. He will be in the Canary Islands (AF-004) between October 21-27th. QSL via LoTW or to his home callsign direct. Visit his Web site at: http://personal.inet.fi/cool/sierra/

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969) during the CQWW RTTY DX Contest (September 26-27th). QSL via UA3DX.

FO8, FRENCH POLYNESIA (Update). Phil, F5PHW, who will be in Tahiti for the next two years (see OPDX.920 and OPDX.921) and active as FO8RZ, has

reported that he has installed the 160 meter kit on his HF6V antenna. It is suggested to start looking for him on 160m. Over the past week Phil has been on 40/30/20 meters CW, with some RTTY. QSL via LoTW. QSL is also 'OK' via F8BPN, either direct or via the French Ref-Union Bureau.

FT/G, GLORIOSO ISLAND (Update). The FT5GA team is now active. The team had some antenna problems at first due to windy weather conditions and a faulty contact on a WARC Spiderbeam (which was fixed). Indications seem that all three stations are now on the air. Most stateside stations report that the FT5GA signals are very weak and propagation is not helping. Activity has been on all bands and the CW/SSB modes with some RTTY. Operations will last until October 5th, per the Web page at: http://glorieuses2008.free.fr
Bob, N6TV, has reportedly put on his Web site some propagation tables (by bands and area) calculated by Dean, N6BV, and they are available at: http://www.kkn.net/~n6tv/ft5ga_prop.pdf
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

IOTA NEWS.....
AS-014. Operators San/VU2CEO (A45WH) and Manoj/VU2MCJ, along with two SWLs, will be active as A45WH/p from Masirah Island, Sultanate of Oman, between September 22-24th. Activity will be on the top bands, 40/30/20 meters. QSL via A45WH, direct or by the Bureau.

EU-050. Operators Gerry/IZ1DSH and Pasquale/IZ1MLQ will be active as IL7T from San Domino Island (IIA FG-001, MIA MI-085, WLOTA L-1284) between September 24-27th. Using two stations, they will be active on 40-10 meters CW, SSB and the Digital modes. QSL via IZ1DSH, direct or by the Bureau. More information is available at: http://www.aritorino.it/IL7T.htm

EU-123. Ken, G0ORH, will be active as GM0ORH from Aran Island in the Scottish Coastal Islands until September 27th. QSL via his home callsign, direct or by the Bureau.

JW, SVALBARD. Operators Arne/LA7WCA, Maurits/LA3XIA and John/G4ATA will be active as JW7WCA, JW3ZIA and JW/G4ATA, respectively, between October 8-13th. Activity will be on most bands using SSB and RTTY. QSL via the operator's home callsign.

K5D DVD ALMOST READY! The Desecheo video is almost ready according to the K5D Web page. The Web page reports: "Bob/K4UEE and Ed/W4ZSB will produce yet another exciting DXpedition video. In the tradition of previous video productions, the K5D Dxpedition video, entitled, 'Desecheo---so near, yet so far' will be full of exciting footage of the helicopter trips, the island from the air, camp set up and takedown, pileups you won't believe and of course an inside look into the logistics of a big DXpedition, interviews with key team members and of course, humor. The video should be ready by October 2009 and will sell for 25.00 USDs. But by ordering now you reserve an early copy of this

collectors' item at a discounted price of 22.00 USDs. As always, this includes shipping and handling." For complete details on how to order, go to: http://www.k4uee.com/dvd

KH6BZF PROPAGATION FORECAST/REPORT (For September 21-27th)....
Sep 21 AN SOLAR REFERENCE
Sep 22 AN ---------------
Sep 23 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 24 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 25 AN LN - Low Normal
Sep 26 AN-HN
Sep 27 AN-LN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I during the CQWW DX RTTY Contest (September 26-27th) as a Multi-2 entry. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

P4, ARUBA. Marty, W2CG, will once again vacation and operate in Aruba between January 5-26th, 2010. Look for him to use a special callsign, either P40C or P40CG (awaiting approval). Activity will be primarily CW/RTTY on 80-6 meters, usually between 1200-1400z and 2000-2400z, other times as schedule permits. QSL is via the LoTW (prefers), or via his home callsign, by the Bureau or direct (U.S. stations, if not LoTW then SASE via CBA).

QSL INFO AND NEWS.....
PIRATE ALERT. The infamous "YL 40m CW Pirate", ZK3T, was active again. Operator was Tanya, on 7007 kHz at 1626z. Save your green stamps.

VC1W QSL STATUS. Nenad, VE3EXY, reports, "QSL cards received from UX5UO. Processing in progress. Check your mail boxes in the next week or two. Requests received with insufficient funds will be responded via the bureau."

VK9NI QSL STATUS. It was announced this past week that the VK9NI Norfolk Island DXpedition (July 2009) QSL cards have finally arrived. Expect to receive your cards in your mailbox soon.

QSLS VIA LOTW: 5N0OCH, 5W0VK and ZK3DX

QSLS RECEIVED VIA MAIL: 5K0T, A45XR, C6AGU, CG200I, D44AC, D44TXS, DY1C, EA9/KH0AM, EX2T, FT5YI, GB5HOD, OH/JA4JBZ, PR5D, TL0A, TM5EL, V63MY, VK0BP, VK9GMW, VP2ETN and ZC4LI

QSLS RECEIVED VIA THE BUREAU: None reported this week!

USVI QSL BUREAU CHANGE. Bill Moore, NC1L, ARRL Awards Branch Manager, advises: "Please note the following update regarding the ARRL U.S. Virgin

Islands Incoming QSL Bureau:
For all USVI callsigns:
V.I. QSL Bureau

Virgin Islands QSL Bureau
P.O. Box 25782
Christiansted, St. Croix
U.S. Virgin Islands 00824

Comments or questions on this bureau's operation may be directed to:
Ann Keegan, KP2YL at: kp2yl@...

VC, CANADA (Special Event). Look for OPP officer Bob Cooke/VE3BDB and other current or retired uniform or civilian members of the OPP, to activate the special callsign VC3COPP between October 2-31st. Activity is to celebrate the 100th anniversary of the Ontario Provincial Police Force (OPP). Since its formation on October 13, 1909, the OPP has grown to become one of the largest deployed police forces in North America. Activity will be on the HF bands, possibly 6 meters, and using CW and SSB. QSL via VE3BDB only direct. Visit the special VC3COPP Web site at: http://www.qsl.net/ve3bdb/vc3copp.htm

VP2M, MONTSERRAT. Operators Tom/DL2RUM (as VP2MUM), Rudi/DM2XO (as VP2MXO) and 3D20CR op Jan/DJ8NK (as VP2MNK) will operate from Montserrat between November 3-15th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns per the QRZ.com address or by the Bureau.

YM, TURKEY. Nick, LZ1NK, will be active from Asian Turkey (Zone 20) as YM3A during both the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (40 or 20m) entry and the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m) entry. QSL via LZ1NK. ADDED NOTE: Look for Nick as TA3/LZ1NK before each contest.

YR550, ROMANIA (Special Event). Members of the Romanian Society of Radio Amateurs will activate the special callsign YR550BU between September 18th and October 5th. According to the "Societatii Romane a Radioamatorilor" (SRR - Romanian Society of Radio Amateurs) Web page, activity is to celebrate the 550th anniversary of the first written mention of "Bucharest", the capital city of Romania. SRR states, "Bucharest was mentioned by Vlad Tepes (a.k.a "Vlad - Dracul") in a donation receipe issued at 20th of September, 1459. Vlad Tepes is the character that inspired Bram Stoker's 'Dracula'." The Romanian Society of Radio Amateurs will issue a special QSL card for this occasion. Look for activity on the HF bands, 80-10m. For more information, visit the SRR Web page at: http://www.asrr.org

YS4, EL SALVADOR. Operators Gregor/DF7OGO, Tom/K3WT, Ron/N0AT, Vlad/N0STL and Bill/W0OR will be active as YS4U during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via N0AT. Look for activity outside of the contest. Operators will be in YS-land between November 20th and December 1st.

ZF, CAYMAN ISLANDS. Joe, W6VNR, will once again be active as ZF2AH from Grand Cayman Island. Activity will include the CQWW DX SSB Contest (October 24-25th). QSL via his home callsign.

ZM2, NEW ZEALAND. Operators Lee/ZL2AL, Stan/ZL2ST, Peter/ZL2LF, John/ZL2QM, Mike/ZL2CC, Gary/ZL2IFB and Wayne/ZL2WG will be active as ZM2M from Napier, New Zealand (OC-036, also counts for WLOTA LH-0069) for the CQWW DX SSB Contest (October 24-25th), as a Multi-2R entry. QSL via ZL2AL, direct or by the bureau.

10917. FT5GA Missing logs

Yahoo group: DX-IS (2009)
Date: 2009-09-21 00:35:32 UTC
From: Richard Williams
Topic: 10917 Message: 10917

Alek,

How do you know there are missing logs for 40CW and we (me included because I was not in the log for a 40 mtr contact on 18 Sept at 00:31Z) just "added a new one" to our "Worked 100 Slims Award"?

If you have good solid information that the logs are incomplete, that would be great news to a large number of Homo Sapiens Sapiens that might have worked them!

I wonder if Al VE1AL worked them around the same time?

In any case, I just re-worked them (and I bet a bunch of others might be doing the same thing) this evening because I was not in the log according to the log that was just updated today. I guess that is the "down side" of uploading logs that are incomplete!!!

Hope you are right and the logs are incomplete; that will be good news to a number of guys, gals, lids, kids, and space cadets that worked him on 40 CW!!

Dick K8ZTT

From: aburkefl
Topic: 10757 Message: 10918

Someone provided a URL that didn't work - that supposed log never gets updated.

Ultimately, I googled FT5GA and took the first result. There's a choice of language, then following that, an aerial photo of the island. On the left hand side of the frame there's a list of items, including "online logs." Click on that, then your call. The red squares show where they've been active (band and mode) and, if you were lucky, there will be a check mark (or two or....) identifying band and mode you worked them.

I checked this evening and the logs had been updated through sometime on the 20th.

I haven't heard a peep out of the 4W either. Also, there was someone on a week or two back from the Austral Islands. I saw in the Daily DX where his operation was completed. Completed? I never heard/saw any evidence he was ever on the air - at least not from an east coast U.S. perspective!

10920. RE: [DX-IS] Re: FT5GA

Yahoo group: DX-IS (2009)
Date: 2009-09-21 00:48:46 UTC
From: Dave AA6YQ
Topic: 10757 Message: 10920

I worked FO/G3BJ in the Australs on 10104 around 0700Z on 2009-09-06. He was 559 here near Boston, and CQing away. I spotted him after our QSO, which drummed up a little business for him, but not much.

Did you set up an entity override for FO/G3BJ, Art?

73,

Dave, AA6YQ

Yes, Austral Is was on. The call was FO/G3BJ and was spotted a good bit.
They were pretty active on cw. Art, I even worked them ! HI !

FO/G3BJ - Austral Is, was quite active. Even managed a contact on 12M phone, although he was extremely weak on that band. The pacific is not a problem usually from NM. He was primarily operating CW.

Now FT5GA is another matter, usually in the noise or just not there. Did mange to hear them on 17 phone today, but just as the path was opening, they disappeared which seems to be the operating mode...

The Indian Ocean is tough from here all the time, although with TO3R late last year II had contacts from 80 though 17.

FT5GA is CQing on 1823.47 right now, listening up 4. Peaking 559 here on my RX 4-square.

73,

Dave, AA6YQ (near Boston)

Hi Dick,

I only heard one other east coast Canadian call being "worked" at the time when I made my "QSO" and when I looked at the on-line logs, neither of us was there. That's why I assume the reports of a pirate are valid.

I was able to make a solid QSO on 20 SSB on my first call this afternoon and heard, but didn't work, FT5GA on 40 CW tonight, right at my grey line.

Don't give up hope.

Alek,

How do you know there are missing logs for 40CW and we (me included because I was not in the log for a 40 mtr contact on 18 Sept at 00:31Z) just "added a new one" to our "Worked 100 Slims Award"?

If you have good solid information that the logs are incomplete, that would be great news to a large number of Homo Sapiens Sapiens that might have worked them!

I wonder if Al VE1AL worked them around the same time?

In any case, I just re-worked them (and I bet a bunch of others might be doing the same thing) this evening because I was not in the log according to the log that was just updated today. I guess that is the "down side" of uploading logs that are incomplete!!!

Hope you are right and the logs are incomplete; that will be good news to a number of guys, gals, lids, kids, and space cadets that worked him on 40 CW!!

Dick K8ZTT
